Race and Racism syllabus

This syllabus is a compilation of readings that focus on the ways race and racism are socially constructed phenomena with very real implications on people’s lives. This 10-week syllabus addresses the history of race and racism, problems of the idea that we live in a post-racial society, race and its intersections, race in education, how it is presented in the media, and the theorization of resistance to racism.

READINGS

Schedule and Topics

Week 1

Course Introduction and Syllabus Overview
