Academic Catalog

Overview

College Mission

The mission of Kalamazoo College is to prepare its graduates to better understand, live successfully within and provide enlightened leadership to a richly diverse and increasingly complex world.

Directions for Correspondence

Requests for specific information on the following topics should be directed to the individuals named below at the following address: 1200 Academy Street, Kalamazoo, Michigan 49006. The general information telephone number for the College is (269) 337-7000. For admission information, call (800) 253-3602 or (269) 337-7166.

President	Jorge Gonzalez
Academic Affairs	Michael A. McDonald, <i>Provost</i>
Admission of Students	Eric Staab, <i>Dean of Admission and Financial Aid</i>
Advancement	Albert J. DeSimone, <i>Vice President for Advancement</i>
Alumni Relations	Kim Aldrich, <i>Director of Alumni Relations</i>
Business Matters	James Prince, <i>Vice President for Business and Finance</i>
Career and Professional Development	Joan Hawxhurst, <i>Director, Center for Career and Professional Development</i>
Financial Aid	Becca Murphy, <i>Director of Financial Aid</i>
Registration, Records, and Transcripts	Nicole Kragt, <i>Registrar</i>
Student Affairs	Sarah Westfall, <i>Vice President for Student Development and Dean of Students</i>
Study Abroad	Margaret Wiedenhoeft, <i>Director of the Center for International Programs</i>

General Information

Kalamazoo College is fully accredited by the Higher Learning Commission. It is an institutional member of the American Council on Education, the College Entrance Examination Board and the Association of American Colleges.

The College is a member of the Great Lakes Colleges Association (GLCA), the Michigan Intercollegiate Athletic Association (MIAA), and the National Collegiate Athletic Association (NCAA) Division III.

An equal opportunity employer, Kalamazoo College is committed to equal rights, equal opportunities, and equal protection under the law. The College administers its programs, activities, and services without regard to race, color, religion, age, sex, national origin, height, weight, marital status, disability as protected by law, or sexual orientation. The College's definition of sexual orientation proscribes discrimination based on a person's heterosexuality, homosexuality, bisexuality or gender identity, actual or presumed. Inquiries should be addressed to the Director of Human Resources, Renee Boelcke.

The Academic Catalog (<http://www.kzoo.edu/catalog/>) contains the most accurate information available at the time of publication. Statements contained herein are not contractual obligations, and verbal or other representations that are inconsistent with or not contained within the catalog's offerings or policies are not binding. Kalamazoo College reserves the right to change, without specific notice, offerings, policies, procedures, qualifications, fees and other conditions.

Policies

Honor System

The mission of Kalamazoo College is to prepare its graduates to better understand, live successfully within, and provide enlightened leadership to a richly diverse and increasingly complex world.

Members of the Kalamazoo College community come to teach, study, and work here because the College's mission and community statements correspond to their values. This community of individuals holds these values in common, despite our diversity. However, we recognize that this community is a fragile balance of cooperation, goodwill, and dependence, ever in need of renewal as new members enter it.

The Honor System is a set of mutually held principles freeing us to create an environment of living and learning that will foster understanding, mutual respect, intellectual curiosity, and social commitment. We ask the members of the Kalamazoo College community to pledge themselves to creating and protecting a sense of honor in their lives, and we call upon them to act when they observe actions that are in conflict with these principles.

Taking Responsibility for Personal Behavior

To develop academic and social growth, we commit ourselves to free inquiry, openness to different points of view, and honesty in speech and conduct. In our attitudes and actions, we aim beyond selfishness and parochialism.

Respecting Others

To enhance our community, we accept responsibility for its social well-being. We commit ourselves to treat with respect those with whom we differ, to recognize the rights held by others, and to resolve conflicts. Expressions of prejudgment and prejudice are contrary to this mutual respect and prevent the fostering of community.

Nurturing Independent Thought

To safeguard the integrity of academic work and research, we accept responsibility for our own scholarly performance. We regard false representation of our scholarly work as unacceptable because it undermines our integrity and that of the community. We commit ourselves to knowing under what conditions scholarly research is to be conducted, the degree of collaboration allowed, and the resources to be consulted.

Accepting Environmental Responsibility

To maintain and improve the condition of our physical environment, we commit ourselves to the respectful and prudent stewardship of our community's material and natural resources.

Academic Freedom

For its highest effectiveness, liberal learning requires an environment of free inquiry in which the whole range of human aspiration and achievement, knowledge, and culture can be subjected to searching scrutiny. Liberal learning believes that people should be free to construct and criticize without restraint of official dogmatism. Liberal learning specifically denies that if an idea is unpopular it is therefore suspect, or that if an idea is popular it is therefore true, and trusts instead in those canons of discrimination that are given in the Western tradition of historical scholarship and ethics.

Standing self-consciously within this tradition of liberal learning, Kalamazoo College claims for its teachers and students the freedom to engage in the careful and critical examination of the history of ideas; the freedom to create, to hold, to advocate, and to act on behalf of ideas that express their own convictions and integrity; the freedom to engage in the controversy that an unfettered examination and expression of ideas generates; and the freedom to invite to campus representatives of points of view that are important to an informed understanding of the conflict of ideas in our own time.

Since freedom of any kind always exists within certain clearly understood boundaries, these freedoms are subject to the following limitations:

1. The freedom of individual members of the College to hold, advocate, and act on behalf of ideas does not entail the right to receive endorsement or support of those ideas from the College as a corporate body. It is understood that no one may act as a spokesman for the corporate institution who has not been expressly authorized to do so.
2. Ideas held, whether by members of the College or by its guests, may be advocated openly in order that the processes of learning and of advocacy may be served by open criticism and by counter-advocacy.
3. It is understood that both advocacy and action will avoid destruction of property and injury to the personal or intellectual rights of others.
4. It is understood that the commonly accepted prohibitions against plagiarism, slander, libel, and incitement to force or violence are in effect in the exercise of these freedoms.
5. It is understood that freedom of advocacy and action does not entail the right to violate the regulations of the College with impunity.

The Board of Trustees affirms its belief in upholding academic freedom on the campus. It is convinced that the maximum educational opportunity occurs when the College preserves for all its members the right to question, to debate, to criticize, and to dissent. On the other hand, it is equally convinced that freedom is only possible in an environment predicated on peace and orderliness. Therefore, the Board of Trustees wishes it clearly understood that lawlessness, either on campus or off campus, and interference with the College's educational process cannot be condoned.

Student Records

Student Records: Notification of Student Rights under FERPA

The College subscribes fully to the guidelines set forth in the Family Educational Rights and Privacy Act (FERPA) of 1974, Section 438 of the General Education Provision Act. It provides students access to education records directly related to them and protects the private information contained within those files from unauthorized persons.

The Family Educational Rights and Privacy Act (FERPA) is a federal law that applies to educational agencies and institutions that receive funding under a program administered by the U.S. Department of Education. It affords students certain rights with respect to access to, amendment, and disclosure of their education records. Specifically, these rights include:

1. **The right to inspect and review the student's education records within 45 days of the day the College receives a request for access.**

A student should submit to the Registrar or Vice President for Student Development and Dean of Students, or other appropriate official, a written request that identifies the record(s) the student wishes to inspect. The College official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the College official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. **The right to request the amendment of the student's education records that the student believes are inaccurate, misleading, or otherwise in violation of the student's privacy rights under FERPA.**

A student who wishes to ask the College to amend a record should write the College official responsible for the record, clearly identify the part of the record the student wants changed, and specify why it should be changed. If the College decides not to amend the record as requested, the College will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to provide written consent before the College discloses personally identifiable information from the student's education records, except to the extent that FERPA authorizes disclosure without consent.

The College discloses education records without a student's prior written consent under the FERPA exception for disclosure to school officials with legitimate educational interests. A school official is a person employed by the College in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the College has contracted as its agent to provide a service instead of using College employees or officials (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibilities for the College.

Upon request, the College may also disclose education records without consent to officials of another school in which a student seeks or intends to enroll. In such cases, the College will make reasonable efforts to notify students of this action.

Exceptions

Exceptions to the rights outlined above relate, primarily, to student and/or campus safety issues. The limited occasions when a student's consent is not required to disclose personally identifiable information include:

- 1. To protect the health or safety of students or other individuals. Such a release of information could include medical or law enforcement personnel, public health officials, and parents. This information may include medical or health treatment records.*
- 2. The final results of an institutional disciplinary proceeding to an alleged victim of any crime of violence or non-forcible sex offense.*
- 3. To provide timely warning and information of crimes that represent a threat to the safety of students or employees.*
- 4. To provide information from campus law enforcement units to others.*
- 5. To comply with the Student and Exchange Visitor Information System requirements.*
- 6. To another institution at which the student seeks or intends to enroll.*
- 7. To parents if a student is a dependent for income tax purposes, if a health or safety emergency involves their child, or if a student under the age of 21 has violated any law or policy concerning the use or possession of alcohol or other controlled substance. Please note that disclosure of information to parents in these circumstances is permitted, not required. The policy of Kalamazoo College is to notify parents only in the case of a health or safety emergency or other set of extraordinary circumstances that affect a student's status at the college.*

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA.

The name and address of the Office that administers FERPA is:

**Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 202-5901**

Maintaining Accurate Academic Records

The official academic record of a student is the file maintained in the Registrar's Office. This file contains all official enrollment and academic information. It is the responsibility of students to have all pertinent information regarding declarations, changes, waivers, exemptions, substitutions, scores, and transcripts on file in the Registrar's Office.

Any appeal for a change to the official Kalamazoo transcript record must be made within one year of the original recording. After one year, the transcript record is considered the permanent record.

Requests for Release of Educational Records

Students may request that educational records (including units attempted, units earned, grades, GPA, address, phone number, class schedule, and student conduct/disciplinary records) be shared with other entities by submitting a written request to the appropriate office. For example, many graduate schools and employers seek grade transcripts and disciplinary information. Students may contact the Office of the Registrar (transcripts) and the Office of the Vice President for Student Development and Dean of Students (disciplinary records) to request the release of these records.

Transcript request requests can be made in person, through ground mail, via fax, through the Hornet Hive, or through the Student Clearinghouse. Requests for official transcripts must include the appropriate fee.

The College reserves the right to withhold a request if there is an outstanding financial obligation to the College or an unresolved disciplinary action.

The following notations regarding separation status will appear on a student's transcript if applicable: suspension, dismissal, expulsion.

Definition of Suspension, Dismissal, Expulsion

Suspension - A compulsory separation from the college for a specific amount of time. Student must apply for reinstatement to return.

Dismissal - A compulsory separation from the college. Student must petition Academic Standards Committee in order to be reinstated.

Expulsion - A compulsory separation from the college with no possibility of returning.

Directory Information

“Directory information” is defined by FERPA as information contained in the education records of a student that would not generally be considered harmful or an invasion of privacy if disclosed. This information does not require student consent for release. Kalamazoo College defines directory information as:

- Name
- Dates of attendance
- Classification (first year, second year, etc.)
- Enrollment status (full- or part-time)
- Campus box number from the directory
- Campus telephone listing from the directory
- Campus e-mail address
- Photograph/image
- Most recent educational agency or institution attended
- Major field of study (including minors and concentrations)
- Degree conferred (including date)
- Honors and awards
- Participation in officially recognized activities and sports
- Height and weight of members of athletic teams
- Leadership positions at Kalamazoo College

Defining directory information does not obligate the institution to release information, but means that the College may release the information without the consent of the student. Careful consideration is given to all requests to ensure that information is not released indiscriminately.

Students may file a written request that their directory information be withheld by submitting it to the Vice President for Student Development and Dean of Students. This request will then be shared with the appropriate parties at the College.

Admissions Policies

Kalamazoo College seeks talented students from diverse backgrounds who are looking for the academic and personal challenges that are offered in a Kalamazoo College education. In determining admission, consideration is given to many different expressions of a student's qualities and abilities: scholastic achievements, extracurricular activities, and other experiences. Standardized test scores (SAT and/or ACT scores) are not required. Admission is very selective and is offered to those applicants whose academic and personal qualities promise success.

First Year Students

Kalamazoo College operates under a traditional admission calendar and offers four different admission programs for First-Year Students. For deadline and notification dates, please contact the Office of Admission. Admission is to the fall term only.

Early Decision

This program is designed only for those whose clear first-choice college is Kalamazoo. The College offers Early Decision I and Early Decision II. Students who are admitted under Early Decision will either be offered an estimate of financial assistance at the same time they learn of admission or a full financial aid package depending on which Early Decision round is chosen. This is a binding admission program. If admitted, the applicant must withdraw applications to any other colleges or universities and submit an enrollment deposit to Kalamazoo College by the appropriate date.

Early Action

This program offers the opportunity to learn of one's admission status early, but enables students to pay commitment deposits at any time up to May 1. Offers of financial aid will be mailed to these applicants starting in January.

Regular Decision

This program is designed for students who do not wish to be part of the early programs. Notification of admission decisions will be mailed at least 4 weeks in advance of the May 1 deadline for commitment deposits.

Application Components

Applicants should note that all components of the application packet must be postmarked by the application deadlines in order to be considered on time. Only those files that are completed will be reviewed for decisions.

1. **Application Form.** Students must use the online Common Application. Kalamazoo College requires a supplement to the Common Application that may be obtained from the College website or the Common Application website.
2. **High School Transcript.** An official high school transcript should be furnished by the secondary school at the time the student applies for admission. A final transcript will be required at the end of the senior year.
3. **Secondary School Report.** The secondary school report form must be submitted by the applicant to the secondary school counselor, who should send the completed form and a letter of recommendation to Kalamazoo College. In addition, a midyear report is required.
4. **Essay.** The essay helps us to become acquainted with a student in ways different from courses, grades, test scores, and other objective data. It enables students to demonstrate their ability to organize thoughts and express themselves.
5. **Teacher Evaluation.** The teacher evaluation form should be given to a teacher who has taught the applicant in an academic subject within the last two years. The completed form and a letter of recommendation should be returned by the teacher to Kalamazoo College.
6. **Financial Aid.** Candidates applying for financial aid should note this in the appropriate space on the admission application form. Applicants for financial aid based on need must submit the Free Application for Federal Student Aid (FAFSA).

Campus Tour and Visit

Prospective students and their families are invited to visit the campus. Appointments may be made through the Office of Admission during regular business hours (8 a.m. to 5 p.m. Eastern Time) Monday through Friday. From October to May, the office is open Saturday mornings by appointment. To arrange a visit, call the Office of Admission toll-free at (800) 253-3602 or locally at (269) 337-7166; visit our website at www.kzoo.edu/admissions; or send an e-mail, including your full name, address, and telephone number, to admission@kzoo.edu.

Transfer Students

Kalamazoo College welcomes transfer students each fall. A limited number of transfer applicants are also considered for mid-year admission. Kalamazoo College subscribes, in general, to the Michigan Association of Collegiate Registrars and Admission Officers (MACRAO) agreement concerning general education requirements at participating colleges. Some restrictions, however, do apply. Please see the section below on Transfer Credit. Because of the varied cocurricular opportunities at Kalamazoo, it is essential that students interested in transferring do so as early as possible to take advantage of the many options available. Transfer student applications must be completed by no later than May 1.

International Students

International students should contact the Office of Admission via email or visit www.kzoo.edu/admission/international/ regarding admission. To be eligible for admission, international students must be competent in the use of the English language. The Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) may be used to prove English proficiency. Online application is required. International students may choose to apply as Early Decision, Early Action, or Regular Decision candidates.

Dual Enrollment for High School Students

Kalamazoo College has a dual enrollment program for those high school students who, with the approval of their principal, wish to enroll for college credit while still in high school. Students are asked to call the Office of Admission for a dual enrollment application, course information, and information about costs. Enrollment in courses is predicated on availability and prerequisites. High school students may not enroll in first-year seminars.

Transfer Credit

New Transfer Students

Determination of transfer credit will be made at the time of enrollment. All credit is awarded by the Registrar in consultation with departmental faculty. Transfer students must meet all Kalamazoo College degree requirements, including the Residency Requirement.

Transfer Credit Policies

All transfer credits must be earned from a regionally accredited institution with a grade of C or above (C- is not acceptable). Credit transferred in from other institutions is not used in the calculation of the Kalamazoo College cumulative grade point average (GPA).

Transfer units may be used to satisfy the language and physical education requirements. Transfer students who have, prior to admission, already taken a first-year seminar or English composition course similar in content to the first-year seminar at Kalamazoo College may apply that course toward the first-year seminar requirement. Transfer units may not be used to satisfy the sophomore or senior Shared Passage Seminar or cultures requirements. Transfer units may be used toward majors, minors, and concentrations at the discretion of the faculty in the associated department or program.

All work to be considered for transfer credit must be submitted on an official transcript sent directly from the transfer institution to Kalamazoo College or in a sealed envelope with the registrar's signature across the seal. The College reserves the right to deny transfer, Advanced Placement, or International Baccalaureate credit not reported within the first year of enrollment.

Advanced Placement (AP)/International Baccalaureate (IB)/A-Level Credit

Upon enrollment at Kalamazoo College, students will be granted one unit of credit toward graduation for each subject area in which they earn a score of 4 or 5 on the College Board Advancement Placement Examination or a score of 5 or higher on the Higher Level examinations of the International Baccalaureate. Credit may also be granted by the Registrar at the time of enrollment for General Certification of Education, Advanced Level (A-Level) examinations with grades of C or better. Placement or credit toward a major, minor, or concentration may also be granted at the discretion of the department or program; a table of examples for various subject areas may be found online under Academics and Admission. No placement or transfer credits may be used to satisfy sophomore or senior Shared Passage Seminar or cultures requirements.

Dual Enrollment Credit

Dual enrollment credit is credit taken at a regionally accredited institution of higher education while a student is still in high school. While this credit may have been used to satisfy high school diploma requirements, it must have been taken at an accredited institution of higher education. All general transfer credit policies apply to dual enrollment credit.

Credits earned prior to your first-year enrollment with Kalamazoo College will not count towards your accumulated credits until after your first term. Students interested in using dual enrollment credit to graduate early should contact the Registrar's Office.

Expenses, Refund Policy, Fees

The tuition and fees listed represent the charges for the 2018-2019 academic year. In planning for the following year, students should expect an increase in line with rises in institutional costs.

Charges Per Quarter

NOTE: The Board of Trustees reserves the right to change fees prior to the opening of any quarter.

	Resident Student	Commuter Student
Tuition	\$16,054	\$16,054
Student Activity Fee*	118	118
Room	1,582	0
Full Board Plan	1,670	0
Total	19,424	16,172

The college offers the seven board plans listed below:

Meal Plans	Description*	Quarter
20 Meal Premium	20 meals/week + \$115 K Cash/term*	\$1,770
20 Meal + \$15	20 meals/week + \$15 K Cash/term*	1,670
15 meals Premium	15 meals/week + \$125 K Cash/term*	1,673
15 meals+ \$25	15 meals/week + \$25 K Cash/term*	1,573
10 meals Premium	10 meals/week + \$135 K Cash/term*	1,418
10 meals+ \$35	10 meals/week + \$35 K Cash/term*	1,318
50 meals+ \$100	50 meals/term + \$100 K Cash/term* (available only to students residing in Living Learning Houses)	479

*K Cash for all meal plans will carry over from term to term. However, any unused K Cash at the end of the spring term will be forfeited.

Students can change their board plans up through the Thursday of the 1st week each quarter.

All students are required to have health insurance. All international students are required to purchase the Kalamazoo College health insurance plan.

A normal course load at Kalamazoo College is three units. If a student takes two or four courses, the tuition cost remains the same.

Of particular significance to those students participating in the study abroad program is the subsidy repayment that is required should they withdraw from the College. The Board of Trustees has designated \$1,300 as the amount that must be repaid to the College before a transcript may be released for those who consider transferring from the College after having participated in study abroad. This fee is payable at the time a transcript is requested and is refundable upon completion of the degree if the student remains at or returns to the college. (Further information regarding penalties for withdrawal from the study abroad program may be found in the "Center for International Programs" section of this catalog.)

Entering students will pay a fee deposit of \$350 to reserve a place in the class; this also reserves space in a residence hall. It is credited against the bill for tuition and fees. New students will be notified of the due date for the fee when they are admitted to the College. All drafts and checks should be made payable to Kalamazoo College.

Quarterly payments are due on or prior to the opening of each quarter. Bills not paid by the due date will be considered past due; students will be assessed a late charge of 1.5 percent per month on any past due balance. In addition, a registration hold will be placed on the student's account Monday of 6th week preventing registration for the following quarter. Lastly, the registration hold will become an administrative withdrawal from the college as of 5pm on the 1st day of the following quarter. The hold will be removed once the balance is paid or the student has made acceptable payments arrangements with the Student Accounts office.

Transcripts cannot be released until all financial obligations are met.

The College offers a tuition payment plan through the Student Accounts Office. For information please visit: www.kzoo.edu/billing

Kalamazoo College Withdrawal and Refund Policy

When a student chooses to withdraw from the College, we recommend the student start the withdrawal process with the Office of the Dean of Students. The student will receive useful information about separating from the College and in some cases will be advised to meet with a staff person from the Office of Financial Aid.

Financial Aid/Return of Federal (Title IV) Aid:

Federal, Title IV financial aid will be returned to the U.S. Department of Education according to a federal mandated formula for calculating the amount of financial aid a student and school may retain when a student withdraws from all classes. This regulation uses a daily pro-ration of financial aid earned based on the number of days enrolled to the number of days in the term, including weekends and holidays. The school must calculate the portion of the total financial assistance that the student has earned and is entitled to retain. At the point where the number of days enrolled is at or greater than 60 percent of the term, there will be no return of federal funds. Mandatory fees, such as the Matriculation Fee and Student Activity Fee will not be prorated or removed. If a student receives more assistance than the student earns, the unearned funds must be returned to the applicable aid programs. An example of the calculation is if a student attended 50% of the term, 50% of the aid disbursed will be earned. The remainder or unearned amount must be returned.

If a student unofficially withdraws, the last date of attendance determined by the Office of Financial Aid will be used to calculate the portion of the total financial assistance that the student has earned and is entitled to retain. At the point where the number of days enrolled is at or greater than 60 percent of the term, there will be no return of federal funds.

Institutionally-funded scholarships and grants will use this same pro-ration method.

A student's withdrawal date is the last date of documented academic activity as determined by the Dean of Students (official withdrawal) or as determined by the Office of Financial Aid (unofficial withdrawal). Further information regarding penalties for withdrawal from a study abroad program may be found in the "Center for International Programs" section of this catalog.

If a student is receiving Title IV funds and chooses to withdraw, funds will be returned in this order:

1. Federal Direct Unsubsidized Loans
2. Federal Direct Subsidized Loans
3. Federal Perkins Loans
4. Federal Parent PLUS Loan
5. Federal Pell Grant
6. Federal Supplemental Educational Opportunity Grant (SEOG)
7. Other Grants

A student who receives a refund of federal financial aid after the posting of institutional charges and subsequently withdraws from the College before 60 percent of the term is over will be subject to the federal return of funds policy on a portion of the funds they received back as a credit on their account. Such an outcome may occur when a student has no charges on their account for room and board as a result of living off campus. **Financial aid from the State of Michigan** will be returned to the Michigan Department of Treasury according to guidelines specified by the state. The state's refund is based on percentage of tuition paid by the program to the percentage of tuition refunded back to the student. **Timeframe for Return of Title IV Funds:** As per federal regulations associated to the Higher Education Act, Kalamazoo College must return the amount of Title IV funds for which it is responsible as soon as possible, but no later than 45 days after the date of the institution's determination that the student withdrew. An institution must determine the withdrawal date for a student who unofficially withdraws no later than 30 days after the end of the earlier of the:

1. Payment period or period of enrollment as appropriate
2. Academic year in which the student withdrew; or
3. Educational program from which the student withdrew.

Post-Withdrawal Disbursements: If the amount disbursed to the student is less than the amount the student earned, the student is eligible to receive a post-withdrawal disbursement of the earned aid that was not received. Kalamazoo College will disburse any Pell funds within 45 days of the determination that the student withdrew and disburse any loan funds within 180 days. Whenever possible, a student who receives any financial aid should attempt to consult with staff in the Office of Financial Aid before withdrawing. A student who successfully gains re-admittance to the College will be considered for need-based aid or merit scholarships under certain conditions. Reinstatement of need-based institutional, federal, and state aid is subject to application requirements and availability of funds. Students seeking reinstatement of institutional scholarships will automatically be considered for reinstatement upon official notice of re-admittance from the Registrar. If the student left in good academic standing and campus citizenship and still has remaining terms of eligibility, they will have their scholarship(s) reinstated.

Special Fees

> .80 to 1.4 Registered Units	\$5351
> .40 to .80 Registered Units	3,056
> .20 to .40 Registered Units	1,529
Up to .20 Registered Units	764
LandSea Program	2,295
Special Secondary School Fee (per course)	1,449
Matriculation Fee	150
Advanced Deposit (Nonrefundable)	
First-Time Students	350
LandSea Program	100
Applied Music Fee	
Half-hour private lesson per week for 10 weeks	300
One-hour private lesson per week for 10 weeks	600
One-hour group lesson per week for 10 weeks	200
Official Transcript Fee	6
Tuition Payment Plan Enrollment (per quarter)	25

Financial Aid Programs

In a sense, every Kalamazoo College student receives a scholarship. Tuition and fees at the College cover only about two-thirds of the cost of an education. The remainder is made up from funds from endowments, gifts to the College, the Annual Fund, and other sources.

Additionally, through the generosity of alumni and friends, many named scholarships have been endowed to support students at Kalamazoo College. The Office of Financial Aid awards these funds, matching students with the criteria established by each donor.

Kalamazoo College believes in both financial aid based on promise and ability and financial aid based on need. For information about merit scholarships, contact the Office of Admission located in The Admission Center. For information about need-based awards, contact the Office of Financial Aid located on the first floor of Mandelle Hall.

Merit-Based Aid Programs

The College offers scholarships based on merit criteria: Lux Esto and Passages. These merit scholarships are awarded by the Office of Admission. These scholarships range from \$20,000 to \$32,000 per year (renewable for up to four years and are awarded to students who demonstrate strong academic achievement. First-year students and transfer students admitted to the College will be considered for these merit scholarships as their admission application is evaluated. No additional application is required.

Renewal terms are stated in the original award letter from the Office of Admission. A cumulative GPA of 2.5 is required at the end of the sophomore and junior years. First-year students are held only to the overall standard required by federal programs, that is a cumulative GPA of at least 1.67. This allows first-year students opportunity to experiment with course selection and recover from any initial adjustments to college requirements.

The College sponsors National Merit Scholars who are selected as finalists by the National Merit Scholarship Corporation. Finalist must be admitted to the College by March 1 and must have Kalamazoo listed as their first college choice. The same renewal terms as for general merit scholarships apply to National Merit Scholarships.

For the latest scholarship information, go to www.kzoo.edu/admission.

Heyl Scholarship Program

Kalamazoo College has long been respected for the strength of its science program, and this is reflected in the Heyl Scholarship Program. A science scholarship fund established by Dr. Frederick W. Heyl and Elsie L. Heyl provides scholarship support for students graduating from the Kalamazoo Public Schools or earning a certificate of completion from the Kalamazoo Area Math and Science Center to attend Kalamazoo College and major in one of the departments in the Division of Natural Sciences and Mathematics.

The scholarships are highly competitive and are renewed annually, provided the recipient maintains a grade point average of 3.0 or better while making normal progress toward a major in one of the above departments. A Heyl Scholarship covers full tuition and fees plus room charges and a book allowance. A student cannot simultaneously hold another scholarship awarded by the College and a Heyl Scholarship. However, scholarships offered by agencies outside of the College may be held concurrently, unless the combined scholarships exceed the "total cost of attendance," as defined by the Office of Financial Aid. Heyl Scholarships are not based on financial need, and some students may qualify for additional need-based financial aid from the College. Heyl Scholarships also cover tuition and fees for study abroad programs. Any situations that require a student to spend extra quarters on campus require a request for additional financial support. Students should direct this request to the Executive Director of the Heyl Scholarship Fund.

The Heyl Scholarship Fund also provides fellowships to any student graduating from Kalamazoo College with a major in the Division of Natural Sciences and who wishes to pursue graduate study in selected science fields at Yale University. Students who are interested in this program are encouraged to contact the Executive Director of the Heyl Scholarship Fund early in their senior year. Students should provide notice of their intent to apply and verify that their field of interest qualifies for Heyl support.

Kalamazoo Promise

Kalamazoo College may enroll and support Kalamazoo Promise eligible students according to the terms of the program established by The Kalamazoo Promise Foundation. Promise eligible students can expect to receive college supported tuition scholarships concurrently with the Promise award. The level of tuition support is dependent on the qualifying years of eligibility earned under the terms of the Promise. For program details, please review the Kalamazoo Promise website or contact the Kalamazoo College Office of Financial Aid directly.

Posse Scholarship

The Posse Foundation identifies, recruits and trains student leaders from high schools in cities around the U.S. to form multicultural teams called "Posses." These teams are then prepared, through an eight-month pre-collegiate training program, for enrollment at top-tier colleges and universities nationwide to pursue their academic interests and help promote cross-cultural communication. Kalamazoo College has partnered with the Posse Foundation to enroll students from Los Angeles. Scholarship renewal terms are stated in the original award letter from the Office of Admission and are dependent on meeting Satisfactory Academic Progress standards.

Postgraduate Fellowships

Many Kalamazoo College students compete for assistance in financing postgraduate education. The College specifically administers the Herbert Lee Stetson Fellowship, which was established by President Stetson's will to assist with graduate work at Harvard, Yale, or Johns Hopkins Universities, the University of Chicago, or at a European university. The Graduate Fellowships Committee oversees the application process for a number of other scholarship and fellowship programs including, but not limited to, the following: Fulbright, Goldwater, James Madison, Rhodes, Marshall, Truman. Language faculty members coordinate applications for teaching assistantships in France, and the German University fellowships. Interested students should contact the Director of Grants, Fellowship & Research. As noted above, the Heyl Scholarship Fund provides fellowships for graduate study in selected science fields at Yale University.

Need-Based Aid Programs

Kalamazoo College participates in the following federal and state aid programs: Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Work/Study Program, Federal Direct Loan, Michigan Competitive Scholarship/Michigan Tuition Grant, and the Federal Direct PLUS (Parent) Loan.

In addition, the College is committed to the provision of Kalamazoo College Grants and the many endowed and annually funded scholarships that are based on financial need.

Within its resources, the College strives to meet the financial needs of its students. These are the steps that a student must follow to apply for need-based financial aid at Kalamazoo College:

- Apply and be accepted for admission to the College.
- Submit a completed Free Application for Federal Student Aid (FAFSA) via the web at FAFSA.gov. Be sure to list Kalamazoo College (code 002275) as one of the schools to receive your data. This form is used to determine eligibility for federal and state awards. Priority filing date is Nov. 15 in the year preceding enrollment.
- If you are a Michigan resident, take the SAT test before December of your senior year in high school and arrange to send scores to the State of Michigan for Michigan Competitive Scholarship consideration. High school counselors have information about test dates.

Financial Aid Policies

The following policies affect the amount of, and eligibility for, financial aid at Kalamazoo College:

- Federal Title IV funding (Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Work/Study Program, Federal Perkins Loan, Federal Direct Loan) will only be awarded to eligible students who have successfully earned a high school diploma (or its equivalent) or a GED.
- College financial aid is awarded to those students participating as regular students in the normal academic program for the purposes of obtaining a first bachelor's degree.
- *College funded aid* is awarded on an academic-year basis for those quarters in which the student is enrolled as at least a three-quarter time student. **Enrollment in a course as a repeat of a first attempt cannot be counted toward enrollment for financial aid eligibility unless the original grade was a D, F, NC, or NG.**
- The type, amount, and composition of the financial aid package will vary from year to year according to family circumstances and funds available to the College for distribution. If the family encounters a change in its financial situation after the application materials have been filed, they should contact the Office of Financial Aid.
- Students can apply as early as Oct 1 in the year preceding enrollment, but no later than March 1. If selected for U.S. Department of Education verification, we request copies of IRS tax transcripts and the completion of a verification worksheet. Continuing students who are residents of the state of Michigan risk reduced funding from state need-based program if they file later than March 1st. Otherwise, the College considers students who file by **April 1st** to be on time for financial aid consideration.
- Financial aid will be credited to each student's account by the first day of classes each quarter. Aid items that arrive from external sources in the form of a check will be deposited to the student's account for the student's use and will not be available until the first day of classes.
- All aid awarded by sources other than Kalamazoo College must be reported to the Office of Financial Aid. The financial aid package will then be re-evaluated to incorporate these resources.
- Priority for campus jobs is given to financial aid recipients who have been designated as eligible to earn funds under the Federal Work/Study program. An equal opportunity employer, Kalamazoo College is committed to equal rights, equal opportunities, and equal protection under the law. The College administers its programs without regard to race, creed, religion, age, sex, national origin, height, weight, marital status, disability as protected by law, sexual orientation or gender identity.
- A student retains eligibility to continue to receive financial aid support from the institution, as well as federal and state programs, by maintaining an acceptable standard of academic performance. Therefore, financial aid is provided and administered under the terms of the College's Financial Aid Satisfactory Academic Progress policy.

NCAA (National Collegiate Athletic Association) Financial Aid Regulations

Kalamazoo College is an NCAA Division III school with strict financial aid award policies and regulations. Questions about eligibility and NCAA rules should be directed to the Office of Admission. Our Athletics Department cannot discuss specific financial aid issues with any prospective student.

Special Financial Circumstances

Prospective families may experience extraordinary financial setbacks different from what is reported on the current-year FAFSA. Families who experience persistent job loss, unplanned retirement, one-time significant income, etc... are encouraged to complete a **Special Circumstances Form**. Contact the Office of Financial Aid for more information.

Financial Aid Satisfactory Academic Progress (SAP) Policies

Kalamazoo College wants to assure that students progress toward graduation in a successful and timely manner. Furthermore, federal regulations require institutions that award federal student aid to implement policies and practices that monitor student progress toward achievement of a degree. This involves monitoring both a reasonable quality of academic achievement as measured by **Grade Point Average** and a reasonable **"length of time"** to earn an academic degree.

The following section explains how Satisfactory Academic Progress is measured at Kalamazoo College. The College will administer this policy to **all students**, whether their financial aid is funded from federal, state, and/or institutional sources.

Who determines if a student is making Financial Aid Satisfactory Academic Progress?

The Committee on Financial Aid Satisfactory Academic Progress (CFASAP) shall include the Director of Financial Aid (chair), the Registrar, the Dean of Students, and the Dean of First-Year and Advising.

How often is Financial Aid Satisfactory Academic Progress evaluated?

CFASAP will meet at the end of the academic year following the Academic Standards Committee's review of student grades. Because summer classes are not offered at Kalamazoo College, this review occurs after Spring Term.

What are the criteria and standards used to measure progress?

There are two forms of measurement; qualitative and quantitative:

Qualitative measure: Grade Point Average (GPA): A student who has been enrolled for three terms of study (first-year) must have achieved a minimum cumulative GPA of 1.67 by the end of the first academic year. At the end of the second year, and each year thereafter, the cumulative GPA must be 2.0* ("C" average) or above. Remedial coursework is not offered at Kalamazoo College and therefore will not be included in this assessment.

Failure to meet these standards will result in the student being denied financial aid for the next term of enrollment. A student whose financial aid eligibility is cancelled because of a deficient cumulative GPA may file an appeal and be granted an additional term under the status of "probation" at which time the student must meet the standards established for success. Refer to the section "**Appealing Cancellation of Financial Aid**" for information about how to appeal.

Note: the standard for renewal of college-funded merit scholarships, **Lux Esto, Trustee, Presidential, Founders, J.T. Williamson, and Enlightened Leadership scholarships has been established as a cumulative 2.5 GPA at the end of the sophomore and junior years.*

Quantitative measure: Students are considered eligible for financial aid only for those terms which constitute a part of their program leading to graduation. A "term" at Kalamazoo is also referred to as a "quarter". The expected duration (number of terms/quarters) for which a student may enroll to achieve a first bachelor's degree is twelve. These twelve terms may include a maximum of 3 terms of study abroad/study away. Understandably, there are reasons that may require a student to need to enroll beyond this standard. Therefore, the College extends eligibility for some types of financial aid to allow a maximum of 150% of the published program length (18 terms) to achieve graduation requirements. **Not all forms of financial aid will be available for this extended length of time.** Financial aid awards from the College (both merit scholarships and need-based grants) will not normally extend beyond 13 terms. The chart below explains the funding options available based on the length of time.

Number of Enrolled Terms:	Eligible for Federal/State Aid	Eligible for College-Funded Aid
Up to 12	YES	YES
13	YES	Must Petition Director of Financial Aid
14	YES	Must Petition Committee (CFASAP)
15-18	Federal Only	NO

Transfer Students: As transfer students are admitted to the College, the Registrar reviews the applicant's academic transcripts. This official review establishes the number of units needed to meet our degree requirements and includes enrollment at prior institutions. The number of terms of funding available at Kalamazoo will be based on the remaining credits required to complete the degree, using a standard of 3-class course load per term. The number of transfer credits accepted upon admission will be included in the quantitative calculation which includes number of credits attempted and completed.

Change of Major/Double Major: If a student elects to double major or change majors, then all classes previously taken will count towards Satisfactory Academic Progress.

Pursuit of a Second Degree: Students who have already earned a bachelor's degree cannot be admitted to the College for the pursuit of a second degree.

Tracking Academic Progress-Probation and Cancellation of Financial Aid: In order to successfully complete graduation requirements within a reasonably established length of time, the student must be making reasonable progress toward the degree. A calculated ratio of units attempted to units completed illustrates a student's progress towards achieving a degree within the College's acceptable standard. In the chart below, a comparison is made to the cumulative number of units attempted to cumulative number successfully completed.

Successful completion requires that a passing grade is received for a course. First-year students are expected to successfully complete 67% of the courses attempted. After the first 9 units have been attempted, students are expected to successfully complete 75% of the courses attempted. Students who fail to meet this standard will no longer be eligible to receive any forms of financial aid and will have a financial aid eligibility status of "Cancelled". Please read the section labeled "Appealing Cancellation of Financial Aid" to determine what is required to regain financial aid eligibility.

The following table illustrates a sample of the percentage of successful course completions to attempted. Please contact the Financial Aid Office if you have any concerns about your ratio.

Units Attempted	Units Completed	Ratio: at least
9	6	67%
12	9	75%
20	15	75%
27	20.4	75%
36	27	75%

Note: Since Kalamazoo College students primarily attend at full-time status, the standards within this policy are established for full-time enrollment. All standards, however, function properly in the occasional term in which a student is not enrolled for three courses.

Clarifications/explanations:

- Grades of F, NC, and W are not considered passing grades. Grades of I (Incomplete) must be successfully replaced with a passing grade within the timeline established by the Registrar. See section on "Grading Practices" in the Academic Policies section of the catalog for rules on incomplete grades.
- When you repeat a course, removal of the first grade earned will count as an *unsuccessful* attempted unit.

If the required ratios are not met, financial aid and scholarships for the next term will be **cancelled**. If your financial aid eligibility is cancelled you may follow instructions below to appeal.

If you need more than 36 attempts to complete your degree, you may petition CFASAP for permission to have an additional quarter of funding. Refer to length of time above.

Appealing Cancellation of Financial Aid

What is the process to appeal a cancellation?

Appeals will only be heard by the Committee on Financial Aid Satisfactory Progress (CFASAP), and its decision will be final. Appeals must be in writing using the **2018-19 Satisfactory Academic Progress Appeal Form** and sent to the Office of Financial Aid by the appropriate deadline. Completing this form allows the student:

- to explain the circumstance why the student believes they deserve another chance to meet the standard,
- to identify the reason for the academic difficulty, and
- to outline what has changed or been accomplished to lead to a better performance.

It must be feasible for the student to return to a state of meeting Satisfactory Academic Progress in the next period of enrollment carrying a normal course load.

What are the outcomes of a successful appeal?

- **Probation:** A successful appeal will permit the student to receive financial aid in the next period of enrollment under the status of "Financial Aid Probation".
- **Conditions of Probation:** While on probation, the student is expected to carry a full-time course load. The specific conditions and levels of achievement that are required to be met during the probation period will be conveyed in a letter from the CFASAP when the appeal is granted.
- In very rare cases, CFASAP may "mitigate" withdrawn courses from counting in the student's ratio and extend the student's eligibility. Grades of "F" cannot be mitigated.

Responsibility of Notifying Students: Financial Aid shall notify the student of all Committee decisions in writing. Letters will be sent to the student's campus mailbox or to the student's home address of record if a notification takes place during the summer period between academic years. As a courtesy, an email will alert the student that a letter has been sent. All communication with the CFASAP should be sent to the Director of Financial Aid.

What happens after a term on probation?

Reinstatement/Cancellation: If the student successfully meets the academic requirements set forth by the Committee while on probation, they will be removed from probation and return to regular financial aid eligibility. If the academic results required while on probation *are not* achieved, all forms of financial aid and scholarships (institutional, federal, and state) will be cancelled for future terms.

Regaining eligibility after Cancellation: A student who has been cancelled for financial aid eligibility, but not academically dismissed, will have to pay for the next term without any financial aid or scholarship assistance. Such a student may petition the CFASAP committee on their own. A meeting with the Director of Financial Aid and the Registrar is advised before such an appeal is submitted.

Subsequent Cancellation: It may be possible for a student who was once cancelled to regain eligibility and subsequently return to a condition of cancellation again. Only in unusual cases will a student be reinstated following a second cancellation. Third cancellations are always final.

Appeal process for additional terms of financial aid funding

Students who have not been cancelled or been placed on probation may still find the need to enroll beyond 12 terms in order to achieve their degree. Consider the following when asking for additional terms of financial aid support.

For all students, circumstances that typically lead to approval for additional funding of institutional aid beyond the 13th term are course withdrawals necessitated by illness or injury of the student or a death in the family. Furthermore, any additional terms must be necessary for graduation and may not solely be the result of failures, under-enrollment, or poor planning.

Students who require financial aid and scholarships beyond the basic standard of twelve terms must make a written request to the Director of Financial Aid or to the Committee on Financial Aid Satisfactory Academic Progress (CFASAP). Students who need one additional term must send a letter of appeal and include the specific reason why the additional term is needed to graduate. Students who wish to request financial aid and scholarships beyond 13 terms must petition the Committee on Financial Aid Satisfactory Academic Progress. The written appeal must be a formal and include the specific reason why the additional terms are needed to graduate. The petition letter may be delivered to the Director of Financial Aid who will bring the petition to the Committee on Financial Aid Satisfactory Progress.

All students requiring an additional term(s) must remember to file a FAFSA for the year in which the aid is being requested in order to be considered for all forms of need-based aid in addition to College-provided scholarships.

If you find you still have questions or concerns about Financial Aid Satisfactory Academic Progress after reviewing this policy, ***we encourage you*** to contact the Office of Financial Aid for assistance.

Academic Policies

It is the student's responsibility to be familiar with all policies and procedures of the College. It is ultimately the student's responsibility to meet all graduation requirements.

Academic policies and procedures are established by the faculty to ensure the integrity of the academic program at Kalamazoo College. The Academic Standards Committee is charged by the faculty to take action on petitions made by students for adjustments to academic rules and policies. A petition must be made in writing and submitted electronically to the Academic Standards Committee. Petitions are available on the Registrar's Website.

Placement and Transfer Information

Placement of first-year students and transfer students into Kalamazoo College courses may depend on previous coursework, College Board Advanced Placement (AP) Examinations, the International Baccalaureate (IB), or departmental placement exams. The College does not place students, nor grant credit toward graduation, based on the College Level Examination Program (CLEP).

Chemistry and Mathematics Placement

Placement in chemistry and mathematics courses depends on scores earned on Kalamazoo College placement tests (offered online during the summer before the first year) or the appropriate College Board Advanced Placement Examination. See the Chemistry and Mathematics pages under the Courses of Instruction section for more information on placement in those departments. Placement does not imply academic credit toward graduation; see the Admissions Policies section of this catalog.

Foreign Language Placement

Students who have previously studied a foreign language must take a Kalamazoo College foreign language placement test. Placement in foreign language courses depends on the score earned on the Kalamazoo College placement test, a College Board Advanced Placement Examination, or an International Baccalaureate Higher Level examination. Students who have completed three or more years of foreign language in high school will not be placed in a 101 class. Placement does not imply academic credit toward graduation; see the Admissions Policies section of this catalog.

Transfer Credit

Advanced Placement (AP) Credit

Please refer to the Admissions Policies section of this catalog.

International Baccalaureate (IB) Credit

Please refer to the Admissions Policies section of this catalog.

Dual Enrollment Credit

Please refer to the Admissions Policies section of this catalog.

New Transfer Students

Please refer to the Admissions Policies section of this catalog.

Continuing Students

Summer Transfer Credit: Students who wish to receive credit for academic work completed over the summer must have the program and course(s) approved prior to their enrollment. Students may receive credit (with a grade of C or better) for courses taken at a regionally accredited U.S. college or university, on a program offered in the U.S. through a regionally accredited U.S. college or university, or from an appropriately accredited institution outside of the U.S. For U.S. institutions, the Registrar will determine whether the college or university is accredited and appropriate; for institutions and programs outside the U.S., the CIP will make that determination, along with checking into risk management issues. The Registrar's Office will work with appropriate departments to determine the appropriateness of the courses.

Transfer students may not transfer more than 18 total units toward graduation. Credit transferred from other institutions is not used in the calculation of the Kalamazoo College cumulative grade point average (GPA). A student may not transfer credit for a repeated course if the student earned credit (D- or better) for the original course.

Transfer units may be used to satisfy language and physical education requirements and, at the discretion of the departmental faculty, may be used toward majors, minors, and concentrations. All work to be considered for transfer credit must be submitted on an official transcript mailed directly from the transfer institution to the registrar. The College reserves the right to deny transfer credit not reported within the first year of enrollment.

Kalamazoo College does not allow concurrent enrollment. Credits taken at another college or university while enrolled during a standard session at Kalamazoo College will not be considered transferrable. This does not apply to Interinstitutional coursework as discussed below.

Michigan Guest Student Enrollment

The Registrar's Office has forms for students wishing to take courses at another Michigan college or university. Applications must be submitted at least thirty days prior to the start of the term. All transfer policies for continuing students apply to students participating in this program.

Study Abroad Course Credit

Students must obtain prior approval for participation in any study abroad program by applying to the Center for International Programs. See the section on Study Abroad Grades for information on how credit from approved courses is transferred. Study abroad courses do not apply toward the maximum allowable transfer units, and study abroad grades are not used to calculate the grade point average (GPA).

Interinstitutional Enrollment

Students may take advantage of opportunities offered by the Kalamazoo Consortium for Higher Education by enrolling in courses at Western Michigan University or Kalamazoo Valley Community College. This program is intended to provide students in good academic standing the opportunity to take courses that are not available at Kalamazoo College but will add a meaningful dimension to their educational program. First Year students must obtain approval from the Dean of the First Year in order to participate in the program. Juniors and seniors at Kalamazoo College may not take lower level credit at one of the other institutions without receiving special permission from the Registrar's Office prior to registration. Enrollment is considered on a "space available" basis. The College reserves the right to refuse students the ability to participate in the program. Final approval must be received by the Registrar's Office. Students must adhere to the policies of both the home and host institutions during the time of interinstitutional enrollment.

Credit will be awarded to students based on the number of credits the interinstitutional course is worth at the school offering it. Courses worth 3 semester credits will be awarded .9 units, and courses worth 4 semester credits will be awarded 1.2 units. Questions regarding how this affects degree completion should be directed to the Registrar's Office.

Kalamazoo College students must be registered for a minimum of two Kalamazoo College units for the quarter in which they enroll in an interinstitutional course and must include the course as part of a normal full-time registration. Interinstitutional courses do not count as part of the residency requirement. The overload policy does, however, apply to the registration of interinstitutional courses; interinstitutional courses worth 3 or 4 semester credits will count as a full academic course regardless of course credit conversion. Students may also not register for more than two courses at the host institution. Students are encouraged not to enroll in interinstitutional courses during the Spring quarter due to academic calendar dates, housing issues, and the fulfillment of requirements for graduating seniors.

Courses taken under the interinstitutional program are included in Kalamazoo College tuition charges and will appear on the Kalamazoo College transcript; the grade(s) received will be calculated in the Kalamazoo College GPA.

Students from WMU and KVCC wishing to take classes at Kalamazoo College under this program should submit an approved Michigan Guest Student Application to the Registrar's Office. Applications must be submitted a minimum of 30 days prior to the start of the term.

Enrollment at Kalamazoo College

Credit

Credit is measured in terms of "units." In most cases, a course is equivalent to a single unit. Exceptions include some laboratory courses and a limited number of partial credit courses.

Each Kalamazoo College unit is equivalent to 5 quarter hours or 3.33 semester hours.

Course Load

Kalamazoo College is on the quarter system. Each quarter is composed of ten weeks of class plus an examination period for a total of eleven weeks. Students normally carry a course load of three academic units per quarter. (Academic units do not include physical education units.) This course load enables a student to complete all graduation requirements (36 academic units and 1 physical education unit) within 12 quarters.

Students may also, in certain circumstances, underload or overload.

Underload

Students may choose to underload (take less than three units) in a given quarter in consultation with their advisor, the Office of Financial Aid, and the Registrar. Students who are registered for fewer than 2.4 units are not considered fulltime, are ineligible for participation in intercollegiate athletics, and may be ineligible for certain forms of financial aid and insurance coverage. Students who have brought in credits/units from AP, IB, dual enrollment, or transfer may not apply these units toward a specific quarter to offset an underload. Students may carry fewer than two units only under exceptional circumstances, as judged appropriate by the Dean of Students.

Overload

Students may be allowed to overload (register for four or more units in a single quarter) after completion of their first quarter of enrollment on a space available basis (as determined by the Registrar) and on the condition that the following requirements are met:

- First year students: A minimum cumulative GPA of 4.00 and advisor approval are required. First-year students may not overload in their first quarter of enrollment.
- Second year students: A minimum cumulative GPA of 3.50 and advisor approval are required.
- Third year students and seniors: No minimum GPA is required; however, students on academic probation may not overload, and seniors may not overload in their SIP quarter. Advisor approval is required.

Residency Requirement

A minimum of 18 full-unit courses must be completed at Kalamazoo College, including 6 of the last 12 courses*. These minimum units exclude units earned on Study Abroad, study away (including GLCA programs), and interinstitutional registration.

**Students on approved programs for 3/2 engineering are not subject to the requirement that 6 of the last 12 course must be at Kalamazoo College.*

Withdrawal, Leaves of Absence, and Dismissal from the College

Withdrawal

A student who wishes to withdraw from the College must contact the Associate Dean of Students in the Office of Student Development to complete an exit interview and the proper paperwork. During the exit interview, the student will receive information about separating from the College and about options for reinstatement, if appropriate. Students receiving financial aid are encouraged to meet with the Office of Financial Aid (please see the College's refund policy in the Expenses section of this catalog for complete details about refunds and financial aid). Students withdrawing during a quarter on campus will receive a grade of W for all courses in progress at the time of withdrawal.

Leave of Absence

In rare instances, a Leave of Absence may be granted to students experiencing significant hardship (including, but not limited to, medical, mental health, or family-related issues). This is a status conferred by the Associate Dean of Students and may require documentation. Any student granted a Leave of Absence during a quarter on campus will receive a grade of W for all courses in progress at the time of withdrawal. Although the College considers a student on a "Leave of Absence", for purposes of enrollment reporting to state and federal agencies, such a student is reported as withdrawn/no longer enrolled. This is a requirement of student financial aid programs. Such agencies will be advised when the student is reinstated for continued coursework.

A Leave of Absence may be granted for up to one quarter, but a student may request an extension of one additional quarter. If a student is unable to return after the extension, the student will be withdrawn from the institution. Reinstatement following a Leave of Absence is subject to review by the Office of Student Development in consultation with the Health and/or Counseling staff.

Academic Dismissal

The Academic Standards Committee meets at the end of each quarter to review student grades. Students experiencing academic difficulties may be placed on academic probation or, in certain cases, dismissed from the College. (See the section on Academic Progress for more information about types of probation and academic dismissal.) Actions taken by the Academic Standards Committee may be appealed by submitting a petition for reconsideration. Appeals will be heard by the Academic Standards Committee, and its decision will be final.

Administrative Withdrawal

The College reserves the right to administratively withdraw a student who does not return to campus for a planned on-campus quarter, whose enrollment falls below two units, or who fails to satisfy or make arrangements to satisfy any financial obligations.

Kalamazoo College is committed to the well-being and safety of its community members and to the integrity of its learning environment. The College may require a student to take an administrative withdrawal or leave of absence if the Vice President for Student Development and Dean of Students or designee deems a withdrawal necessary to protect the health and safety of the student or others or the integrity of the learning environment and campus community. Examples of such extraordinary circumstances include, but are not limited to: suicidal threats, self-starvation or purging behavior, ongoing substance abuse or addiction, serious threats of harm to others, or disruptive or destructive behavior. Similarly, a student who is not functioning as a student (attending classes and completing academic work) may be administratively withdrawn by the College. Before a required administrative withdrawal is considered, the Vice President for Student Development and Dean of Students or designee will encourage the student to take a voluntary withdrawal.

This policy and associated procedures do not take the place of disciplinary action associated with a student's behavior that is in violation of College policies, standards, or regulations. This policy is to be invoked in extraordinary circumstances in which, at the discretion of the Vice President for Student Development and Dean of Students or designee, the regular disciplinary system cannot be applied or is not appropriate. The procedures related to this policy appear in the Student Handbook.

Reinstatement

A student who withdraws, is withdrawn, or is dismissed from the College may apply for reinstatement. In order to return to the College from a withdrawn or leave status, a student must make a request in writing to the Office of Student Development. The College reserves the right to require, review, and approve documentation that the student is qualified and ready to return to academic work. Students applying for reinstatement must do so no later than thirty days prior to the start of their anticipated quarter of return.

If a student withdrew from the College while on academic probation or was dismissed for academic reasons, the application will be forwarded to the Academic Standards Committee for review. Students must indicate in writing how the problem that led to probation or dismissal has been resolved or addressed.

In the case of a voluntary withdrawal for medical/psychological reasons, or any administrative withdrawal under this policy related to a physical or mental health condition, the student must submit a Health Care Provider Report from a treating health professional as part of their request for reinstatement. Kalamazoo College Student Health Center and/or Counseling Center may require a release from the student to discuss current treatment and follow-up needs with the treating health professional, in order to assess whether the student is qualified and ready to return to the College and whether the College can provide the follow-up care needed to maintain the student's enrollment. Kalamazoo Health and Counseling professionals will review this information and recommend to the Dean of Students or designee approval (with or without conditions of treatment, education, counseling, or other) or denial of the reinstatement.

After consulting with College health professionals and/or other appropriate College officials as necessary to facilitate an informed decision, the Dean of Students or designee will make the final decision about reinstatement. In all cases, in order to return to Kalamazoo College, a student's financial account must be in good standing and any enrollment fees paid.

Students who interrupt their course of study for more than one academic year must, upon reinstatement, consult with the Office of the Registrar. The Office of the Registrar will make a determination about whether the student will follow the degree requirements of the Academic Catalog under which they were first enrolled or the catalog in effect when they are reinstated.

Registration and Student Schedule Changes

Registration

Students are expected to register during the designated registration periods for their next quarter on campus. Prior to registration, students are required to acquaint themselves with the class schedule, academic policies, procedures, and regulations in this catalog and the policies located on the Registrar's website. The student's advisor must clear the student to register before the student is allowed to register for classes. The Registrar's Office reserves the right to move students from one section of a course to another to balance the sections (if requested by the department) or to accommodate the schedules of all students registered for a particular course.

A student's registration is not finalized until the student's fees are paid or arrangements for payment have been made with the business office. The College reserves the right to withdraw a student for failure to meet the designated deadlines of registration. Registration may be denied a student for failure to adhere to health center regulations (such as failure to provide proof of vaccinations or other health information as required), lack of tuition payment, failure to declare a major by the end of the sophomore winter quarter, or as a result of disciplinary action.

Registering for the Senior Individualized Project (SIP)

SIP registration, including its impact on course load, is described in detail under Senior Individualized Project in the Kalamazoo Curriculum section of the catalog. The SIP counts as one or two course unit(s) for the term(s) during which it is counted, but the SIP is registered via a separate process from class registration. The SIP registration process involves a paper form (no online registration) that must be submitted to the Registrar's office by the student. This paper form has its own set of deadlines:

<u>SIP Quarter</u>	<u>Registration Form Due</u>
All SIPs involving work over the summer (as part of an extended fall term)	Friday of 10th Week, Junior Spring Quarter
Fall and Fall/Winter SIPs	Friday of 1st Week, Senior Fall Quarter
Winter SIPs	Friday of 1st Week, Senior Winter Quarter

Any changes to SIP registrations must be made in the Registrar's Office by the end of the drop/add period of the quarter of registration (end of the first week of Fall quarter for Summer and Fall units; end of the first week of Winter quarter for Winter units). These changes include dropping a SIP, changing the department or SIP supervisor, changing the number of units, etc.

Independent Study

A student may register for an independent study course (198/298/398/498) in an area of interest that is not available as a regularly offered course or, under special circumstances (such as the unavailability of a required course), a student may take a regular course as an independent study. All independent study applications require the approval of the instructor, department chair, advisor, and Registrar. Independent Study is a full-unit course, and students may not receive credit for more than one independent study course per quarter nor for more than two independent studies during degree completion. Independent Study applications are due in the Registrar's Office by 5 p.m. Friday of the first week of the quarter.

Credit/No Credit Option Policy

Students in good academic standing may elect to take at most one letter-graded course on campus as CR/NC (Credit/No Credit) in any given quarter, for a total of up to four courses over their college career.

- Students may elect this option for at most one course in any one department. The CR/NC grade option is not available for Shared Passage Seminars or for the final course taken to satisfy the language requirement (i.e. 103 or 201).
- Letter-graded courses taken as CR/NC may not count towards any major, minor, or concentration (including required cognates), nor may they satisfy prerequisites for those course sequences that require a "C- or better," without special permission from the department.
- Students who take a course for a CR/NC grade may retake the course for a letter grade.
- Students may choose to apply the CR/NC option at any time during the course up to the end of the withdrawal period (the end of Week 8). The professor will assign a letter grade as per normal procedure, but the Registrar's Office will convert passing grades to CR and will convert an F to NC. (Professors will not be formally notified if students have taken this option.)

Registering to Repeat a Course

A course in which a student earned a grade of C-, D, F, W, or NC may be repeated. If the repeated enrollment is at Kalamazoo College, both attempts will appear on the student's transcripts, but only the most recent attempt will be used to calculate the Kalamazoo College cumulative GPA, and only one total unit of credit will be earned. Any course repeated at another institution will not affect the original course grade on the Kalamazoo College transcript and is not used in the calculation of the Kalamazoo College cumulative GPA. A student may not transfer in credit for a repeated course if the student earned credit (D- or higher) for the original course. Students may not repeat a course, either at Kalamazoo College or at another institution, to replace a D or F once they have taken a higher level course.

Repeating Partial-Credit Courses

Partial-credit courses, such as ARTX 200, BIOL 200, and PE activity courses, may be repeated to earn a full unit of credit. Students may earn up to two units for Theatre Production (THEA 200), and up to five units for partial-credit courses within the Music department (music ensembles and applied music courses). Students may audit partial-credit courses in PE and the arts after reaching the maximum number of units, but will not earn additional units of credit toward graduation.

Drop/Add

The period during which students may drop and add courses begins shortly after priority registration is complete and continues through the first week of the quarter. A student who wishes to add a course during first week should consult with the course instructor to determine how the student will make up any missed assignments or activities. After the third day of the term, students must have the instructor's signature to add a course. Certain courses, such as music ensembles, applied music courses, physical education activities, and theatre production courses, have an extended drop/add deadline of the end of the second week of the quarter to provide students and instructors time to make arrangements for the quarter.

All class and lab fees that are in addition to the tuition charge are nonrefundable after the end of the Drop/Add period.

The day after the drop/add deadline for a term is the official "census date" for the quarter, when a student's status as a full-time or part-time student is determined based on the number of units for which the student is enrolled. All changes to a student's class schedule must be on file in the Registrar's office by this time. Students will receive grades for all classes that appear on the final class schedule and only for those classes.

Course Withdrawal

From the second week through the eighth week of a quarter, students may exercise their option to withdraw from a course. After eighth week students may not withdraw from a course, although they may withdraw from the College. When a student withdraws from a course the course remains on the student's transcript with a grade of a W. Because the course remains on the transcript, the financial aid full-time enrollment requirement is still met for almost all programs. Note that Financial Aid Satisfactory Academic Progress standards must also be met (see the Financial Aid Policies section in this catalog). In addition to the implications for financial aid, students should be aware that course withdrawal may affect a student's medical insurance coverage, athletic eligibility, study abroad eligibility, sequencing of classes, and timely completion of degree requirements.

Students may not withdraw below two units in any given quarter. Students experiencing serious health difficulties, a family emergency, or some other extraordinary circumstance outside the students' control should meet with the Dean of Students to discuss possibly withdrawing from the College, Underloading, or other options. (See the sections on Underloading, Withdrawals, and Leaves of Absence for more information.)

Registering to Audit a Course

Students may audit a course with permission of the instructor. There is no official registration or notation on the transcript. There is no audit fee for registered Kalamazoo College students.

Registration and Study Abroad

See the section on Study Abroad for information on choosing courses while on study abroad and for information on how credit from those courses is applied to a student's transcript. Students register for their first quarter on campus after study abroad in the usual way. They should contact their advisor for course selection approval and then register online during the registration period in the prior quarter.

Grading Practices

Grades

The grade point system at Kalamazoo College is:

<i>Final Grade</i>	<i>Quality Points</i>
A	4.00 (excellent)
A-	3.67
B+	3.33
B	3.00 (above average)
B-	2.67
C+	2.33
C	2.00 (average)
C-	1.67
D+	1.33
D	1.00 (below average)
F	0.00 (failure)

CR (credit), NC (no credit), H (honors), IP (in progress), W (withdraw), and I (incomplete) do not affect the grade point average (GPA).

Grade Reports

Grade reports are made available online to students at the end of each quarter. Printed copies are available upon request. Copies of grade reports will be sent to parents only if students present a signed statement of request to the Registrar.

Course Attendance

Attendance is the responsibility of the student and is regulated within each course. Faculty members may report to the Early Alert Committee those students whose absences may be impairing their performances.

Final Examinations

Examinations are held at the end of each quarter for most courses. Students and faculty are required to follow the exam schedule as set by the Registrar. However, if a student has three final exams scheduled for the same date, one of these exams may be changed by making appropriate arrangements with one of the instructors.

Incomplete Grades

An I (incomplete) is recorded when work is of acceptable quality but has not been finished because of illness or other extraordinary circumstance outside the student's control. If the work has not been completed by the end of the sixth week of the next quarter, the instructor should submit the grade the student had earned by the end of the quarter. This deadline applies whether the student is on or off campus or has left the College.

If a student has been granted a Leave of Absence after the end of a quarter in which he/she has received an incomplete, the incomplete deadline will be extended for one quarter. In this circumstance, the incomplete grade will be due by Friday at 5:00pm week six of the quarter following the first quarter in which the student is on a Leave of Absence. There are no exceptions to this extension unless the student petitions and receives approval from the Academic Standards Committee.

Change of Grade

Students seeking a grade change should contact the course instructor responsible for the grade issued. Both students and faculty should understand that *a change in an assigned grade should reflect only identifiable and distinct errors in the evaluation process*. Students should initiate this process as soon as possible and no later than the end of the sixth week of the following quarter or within six weeks after graduation or withdrawal from the College. Faculty who identify an error in grading should submit a change of grade form to the Registrar within one year of the original recording. After one year, the transcript record is considered the permanent record.

Cumulative GPA

All courses taken at Kalamazoo College are included in the calculation of the cumulative Kalamazoo College grade point average (GPA), except the SIP, PE activities, other credit/no credit (CR/NC) courses, and repeated courses. When a student repeats a course (for which they received a C-, D, F, W, or NC), both attempts will appear on the student's transcript but only the second attempt will be used to calculate the Kalamazoo College cumulative GPA, and only one course unit will be earned. (See the section on Registering to Repeat a Course for more information). Transfer courses and courses taken on study abroad/study away do not affect the cumulative GPA.

Academic Progress

Classification

Students may be classified by unit status, by entering cohort, or by expected graduation year, depending on the context. For enrollment verification purposes, unit completion is the sole determinant of class status. Students must receive 36 academic units to graduate, or 9 units per year, plus one physical education unit. The unit status classification used for enrollment verification is as follows:

- **First-Year:** 0–7 academic units*
- **Sophomore:** 8–16 academic units
- **Junior:** 17–25 academic units
- **Senior:** 26 academic units and above

** First-year students who bring in AP, IB, dual enrollment, or transfer credits are reclassified, as appropriate, at the end of the first year. After the first year, a student's unit status is adjusted each quarter; the expected graduation year is adjusted as necessary, usually at the completion of the spring quarter.*

Good Standing

Students who are not on academic probation are considered to be in good standing at Kalamazoo College. Students should be aware that maintaining good academic standing does not ensure continued financial aid eligibility. Grades of NC or W may also affect an award. Please refer to the Financial Assistance section of this catalog for more information.

Dean's List

Students who earn a term GPA of 3.5 or better for a full-time course load of at least 3 units, without failing or withdrawing from any course, will be placed on the Dean's List. Students who elect to take a letter-graded course as credit/no credit (CR/NC) or receive an F, NC, or W grade are not eligible for Dean's List consideration during that quarter. Students with I or IP grades will be considered for Dean's List upon receipt of the final grades. Dean's List recognition is posted on students' transcripts.

Honor Societies

The College invites qualified first-year students to join the Alpha Lambda Delta national scholastic freshman honorary society.

Phi Beta Kappa, the oldest honorary scholarship society in the United States, has a chapter at Kalamazoo College, Delta of Michigan. Students who wish to be considered for election to Phi Beta Kappa must demonstrate a knowledge of mathematics and take a wide variety of courses outside the major, and must include courses in the natural sciences, social sciences, and humanities. Students must also demonstrate good character in order to be considered for election.

Monitoring Academic Progress

The Academic Standards Committee meets at the end of each quarter to review the grades of all students. If a student appears to be having academic difficulties, as indicated by withdrawn courses, poor grades as compared to previous work, or failing grades, the committee may issue a warning letter through the Registrar or may place the student on academic probation. The Academic Standards Committee may place students on academic probation whenever their cumulative GPA falls below 2.00. Placing a student on academic probation is notification that the student is no longer in Good Academic Standing and needs to take immediate action to improve academic performance.

First-Year Academic Warning

Students placed on "First-Year Academic Warning" must be First Year Students at the end of their first quarter. Students may be given this status instead of probation if their cumulative GPA falls between a 1.67 and 1.99 GPA after the first quarter. Students must improve their cumulative GPA to a 2.0 or better in the subsequent quarter to demonstrate academic progress. Students on First-Year Academic Warning should meet with their academic advisor within the first two weeks of the subsequent quarter and as needed thereafter in order to develop strategies for success. It is the student's responsibility to seek this assistance and ensure progress toward degree completion. Students are encouraged to seek assistance through various support services, including the learning centers, subject tutoring through supplemental instruction and individual departments, career counseling and testing through the Career and Professional Development Center, and personal counseling through the Office of Student Development. Failure to meet this requirement will result in academic probation (see probation levels below). "First-Year Academic Warning" status does not apply to transfer students.

Academic Probation Level I

Students on academic probation should meet with their academic advisor within the first two weeks of the subsequent quarter and as needed thereafter in order to develop strategies for success. It is the student's responsibility to seek this assistance and ensure progress toward degree completion. Students are encouraged to seek assistance through various support services, including the learning centers, subject tutoring through supplemental instruction and individual departments, career counseling and testing through the Career and Professional Development Center, and personal counseling through the Office of Student Development. Failure to meet these responsibilities may result in continued or final probation or dismissal from the College. Student athletes placed on academic probation will be ineligible to participate in MIAA/NCAA sports.

Academic Probation Level II

In addition to the conditions from "Academic Probation Level I" students placed on "Academic Probation Level II" must be enrolled in and complete three letter-graded courses in the next quarter of residence and earn a minimum GPA of 2.0 for the quarter. Failure to meet this requirement may result in dismissal from the College.

Final Academic Probation

In addition to the conditions from "Academic Probation Level I" students placed on "Final Academic probation" must be enrolled in and complete three letter-graded courses in the next quarter of residence and earn a minimum grade of C- in each of the three courses for the quarter. Failure to meet this requirement may result in dismissal from Kalamazoo College.

Veteran's Administration

The Veteran's Administration (VA) requires that all recipients of veteran educational benefits maintain a cumulative grade point average of 2.0 to remain eligible. A recipient who allows the cumulative GPA to fall below 2.0 will be placed on probation with regard to veteran benefits. A recipient will be allowed two quarters to bring the cumulative GPA to the level of 2.0. If the recipient fails to do so, the VA will be notified of unsatisfactory progress and enrollment will not be certified to the VA. Certification may resume once the cumulative GPA has reached 2.0. The Veteran's Administration may rescind benefits if a recipient does not present a GPA of 2.0 at the time of graduation.

Academic Progress & Financial Aid Policies

For information on how academic progress influences eligibility for student financial aid, refer to Financial Aid Satisfactory Academic Progress Policies found under Financial Aid Programs.

Graduation

Graduation Standard

All students must have a cumulative GPA of 2.00 to be eligible to receive a Kalamazoo College degree.

Diploma Granting Dates

Kalamazoo College grants degrees in March, June, September, and December of each year.

Commencement

Commencement ceremonies are held each year in June. Members of the graduating class are expected to attend Commencement. Students who have earned 27 units (exclusive of PE) upon completion of work for the winter quarter, or 30 units (exclusive of PE) by the time of Commencement, are eligible to march in the commencement ceremony, even though a diploma will not be granted until the required 36 units (exclusive of PE) are completed. An actual diploma, reflecting the appropriate degree date, will be released once all graduation requirements and financial obligations have been met.

Graduation Honors (Latin Honors)

The Bachelor of Arts degree is awarded cum laude if a student graduates with a cumulative grade point average of 3.50 to 3.699; magna cum laude with an average of 3.7 to 3.899; and summa cum laude with an average of 3.9-4.0. This honor is announced at Commencement and recorded on the academic transcript.

Honors in the Major

Honors in the major may be awarded at the discretion of departmental faculty at the time of graduation. Usually, departments consider the grade point average in the major, the results of the comprehensive examination (if required), and the Senior Individualized Project in awarding students for honors. Departments may set additional requirements. This honor is announced at Commencement and recorded on the academic transcript.

Study Abroad/Study Away Policies

Study Abroad/Study Away Academic Policies

Through its Center for International Programs (CIP), Kalamazoo College sponsors study abroad programs in the following countries: Ecuador, France, Germany, Kenya, Mexico, Sénégal, Spain, Thailand, and Trinidad. In addition, Kalamazoo College students are able to participate in programs organized by foreign or U.S. institutions in a number of other countries including Australia, Botswana, Chile, China, Costa Rica, England, Greece, Hungary, India, Israel, Italy, Japan, Jordan, and Scotland. For specific information about the study abroad or study away programs available to Kalamazoo students and their requirements for participation, please contact the Center for International Programs. A list of study abroad and study away programs pre-approved for transfer of academic credit is updated and published by the Center yearly. It is available on the CIP website. Some study abroad/study away programs offered through the Center are subject to annual enrollment limits. In the case where a program does not have sufficient minimum enrollment to meet academic and/or financial requirements, the College reserves the right to cancel the program for that particular year and advise students to consider other programs. The complete policies and regulations that govern Study Abroad and Study Away Programs at Kalamazoo College are found in the *Study Abroad and Study Away Handbooks*, which are published by the Center for International Programs (CIP). The *Handbooks* are available online. Programs may be changed, suspended, or withdrawn at any time due to political, economic, or other conditions.

The Center determines which study abroad and study away programs qualify for transfer of academic credit and Kalamazoo College financial assistance/scholarships. Students should consult the Hornet Passport database regularly to determine if a program qualifies for the transfer of academic credit and Kalamazoo College financial assistance/scholarships. Programs may be changed, suspended, or withdrawn at any time due to political, economic, or other conditions. No credit will be awarded for any academic work done outside the United States without prior endorsement by the Center. Requests for endorsements after the fact will not be considered. Students interested in enrolling in a program not in the Hornet Passport database of Study Abroad Programs Approved for Transfer of Academic Credit (a copy of which can be found in the CIP office and on the CIP website) can petition the Center to have the program endorsed on a one-time basis. Such petitions must be filed by November 1 of the calendar year prior to the year in which students wish to participate. A description of the petition process is available in the Center for International Programs and on the CIP website.

As a general policy, participation in Kalamazoo College study abroad programs will be limited to a maximum of 18 students per program, although some programs have different limits. Long-term and extended-term programs are open to juniors only (students with a minimum of 17 academic K-units). First-year students are not eligible to participate in study abroad during the academic year. A description of the policies and processes for summer off-campus study can be found in this catalog under the heading "Transfer Credit". Transfer students to the College should consult with the CIP about their eligibility to study abroad/away.

Kalamazoo students are eligible to participate in only one extended-term, long-term, or short-term study abroad experience and only one domestic study away program for credit during their time at the College. Students may participate in both one domestic study away and one short- or long-term study abroad program during their time at the College. No more than ten units of credit from off-campus programs (including study abroad and domestic off-campus programs such as New York Arts, Philadelphia Urban Studies, or Border Studies Program) can be used to meet a student's graduation requirements. Students may apply their Kalamazoo College financial assistance/scholarships to only one extended-, long-, or short-term study abroad program approved for such transfers. (For more details, see the *Study Abroad and Study Away Handbooks*.)

On most Kalamazoo College programs, a College representative meets each group as it arrives abroad. College personnel visit study abroad programs as needed. All Kalamazoo sponsored study abroad programs have a Resident Director appointed by the College to mentor students and represent the College. At many programs, students live in homestays; in other instances, housing is arranged by the program, typically in university dormitories.

Study Abroad Program Length

The study abroad programs available to Kalamazoo College students include long-term, extended-term, and short-term programs. In a long-term program, the academic experience typically lasts 15 to 20 weeks (requiring students to enroll in 6 units of credit), beginning in the fall. Extended-term programs are only available to language and/or International and Areas Studies majors and typically begin in the fall and end the following June or July (requiring students to enroll in 9 units of credit). Students who intend to participate in extended-term programs must pass all classes taken during the long-term portion with a C or better. If a student has not met this requirement, they are not eligible to participate in the extended-term program and will need to make arrangements to return to campus for the spring quarter. Fall, Winter or Spring short-term programs typically last ten weeks (requiring students to enroll in 3 units of credit). For information regarding specific program dates, please contact the Center for International Programs. Students need to meet with their academic advisers and consult the CIP well in advance of participation in order to determine the programs that will best fit their academic program at the College. Summer study abroad for credit is available to Kalamazoo College students through CIP-sponsored International Study Seminars or the summer off-campus study programs approval process.

Study Abroad/Study Away Eligibility

Students are required to obtain approval in advance for participation in study abroad/study away programs through application to the Center for International Programs. Students wishing to participate in study abroad/study away must have a minimum 2.5 GPA at the time of application; some programs have higher minimum GPA requirements. Students whose GPA does not meet the College's 2.5 minimum or the program's minimum and who still wish to study abroad must meet with CIP staff prior to submitting an application for study abroad. *NOTE: Kalamazoo College cannot waive GPA or other eligibility requirements established by other programs. Therefore, only certain Kalamazoo-sponsored study abroad programs may be available to these students.* The final decision regarding admission to and participation in specific programs rests with the Executive Director of the Center for International Programs and host institutions abroad. The Executive Director reserves the right to deny participation in study abroad/study away when students' actions either on or off campus raise doubt that they are ready for an international study experience or prepared to represent Kalamazoo College appropriately.

Students on academic probation, or who have a history of significant disciplinary problems, are not eligible to participate in the study abroad/study away program. All incomplete grades must be resolved prior to departure for study abroad/study away. All students participating in long-term or extended-term study abroad programs must have junior standing (a minimum of 17 Kalamazoo College academic course credits; note, this excludes PE or applied music credit). Students who are not able to complete the program's 17 academic-unit requirement prior to the conclusion of the last quarter on campus before study abroad may be placed on a conditional admission status until proof of completion has been received and approved by the registrar. Students who transfer to Kalamazoo College should talk with a CIP staff member during their first term on campus about their study abroad/study away options.

Students whose physical, mental, or emotional condition may require accommodations to participate in study abroad/study away must contact the Center staff well before the deadlines for applications. The Center staff will assist by providing the student a clear description of the physical and emotional requirements of the program as well as the accommodations that could be available. The student will be asked to provide the Center staff with a clear description of the accommodations which the student believes will be necessary for the student to meet the requirements of the program as well as a list of the accommodations provided the student by Kalamazoo College. The Center staff will determine the availability of those or other reasonable accommodations at the program location. The student's acceptance into a specific study abroad/study away program is contingent upon the determination to the Executive Director's satisfaction that reasonable accommodations are available at that program location.

Study Abroad/Study Away Application, Selection, and Placement

Students must meet specific requirements and deadlines in order to be eligible to participate in any study abroad/study away program. These requirements differ from program to program, but for all of them prospective participants must fill out and submit required application materials, which are available on the CIP website and in the CIP. Students must complete a Kalamazoo College study abroad/study away application and, in most cases, will also need to complete additional materials for the host institution or university. Incomplete applications will be considered late and will not be processed until completed. Application materials will be forwarded by the CIP office to the appropriate study abroad/study away programs.

Information on specific program requirements and applications is available online. With the exception of a single required foreign language course, students must meet all study abroad requirements at the time they apply and continue to meet the set requirements prior to departure. Academic performance and probationary status for violations of the student code of conduct will be evaluated by CIP staff following each quarter prior to departure for study abroad/study away.

Students may only apply for one study abroad/study away program at a time, regardless of the application deadline of that program. If a student is not admitted into his or her first choice study abroad program, the CIP will assist the student in applying for another study abroad program for which he or she is eligible and in which there is space available.

Participants are admitted to specific study abroad/study away programs based upon student qualifications, program capacities, and other conditions deemed relevant by the Executive Director of the Center for International Programs. Students meeting the College's and any program-specific eligibility requirements are selected for participation in the study abroad/study away program on the basis of such items as their cumulative grade point average, their grades in the appropriate foreign language (where applicable), the strength of the required essay(s), faculty letters of recommendation, an evaluation of the transcript, and other information provided in their application and their College records. The Center for International Programs may also require applicants to be interviewed.

Transfer students should expect that their previous academic work will be reviewed as part of the selection process and must supply the Center with an official transcript from their previous institution(s) at the time of application. The Office of the Registrar cannot release copies of non-Kalamazoo College transcripts. A combined transfer and Kalamazoo GPA will be used to determine eligibility.

Applications for participation in the winter quarter short-term study abroad programs are due on Thursday of the third week of fall quarter. Applications for participation in Spring short-term study abroad programs are due eighth week of fall quarter; applications for participation in long-or extended-term study abroad programs are due in the Center third week of winter quarter. Failure to turn in the completed application materials by the due dates will jeopardize a student's participation in study abroad. Study Away application deadlines can be found in the CIP office and on the CIP website.

Study Abroad Foreign Language Prerequisites

Students who desire a university-integrated experience, in which they take classes with host country students in French-, German-, or Spanish-speaking programs, must have advanced proficiency in the appropriate foreign language equivalent to at least level 202 or 203. Students who have proficiency in a foreign language through level 201 will most typically take courses in the target language but offered through a language and culture institute for foreign students attached to or otherwise affiliated with a university.

Students who have already taken the required minimum level of foreign language for their study abroad program are encouraged to maintain their level of proficiency during the time before departure. Students will not receive credit for a language course abroad equivalent to one already taken at Kalamazoo College.

Students choosing the spring short-term study abroad option may not have proficiency in the language of the Study Abroad program greater than four units (level 202) of that language and must have a minimum proficiency equivalent to 2 units (102). Most short-term programs can only offer courses at the 201-203 level and are thus not appropriate academically for students with higher levels of foreign language proficiency.

Students who are not able to complete the program's language requirement prior to the conclusion of the last quarter on campus before study abroad may be placed on conditional admission status until proof of completion has been received and approved by the language department and the Registrar.

Study Abroad/Study Away Fees

For Kalamazoo College students participating in a long-term Kalamazoo College study abroad program, the comprehensive fee for 2018-2019 is \$38,612; for an extended-term Kalamazoo College program, the 2018-2019 fee is \$57,918. The fee for students participating in Kalamazoo College 2018-19 fall, spring and winter short-term programs is \$19,306. Fees for CIP-sponsored International Study Seminars will be noted on the program description and may vary according to the program's itinerary. Fees for study away vary by program and can be found on the CIP website.

The comprehensive fee includes room and board while classes are in session, all academic tuition and fees, and excursions included as part of the academic program.

Note: The US Internal Revenue Service requires that Kalamazoo College report tuition separate from other fees on the form 1098-T. Study Abroad students at Kalamazoo College are charged a comprehensive fee for participation in the program. For the purposes of the 1098-T form, tuition will be listed in the same amount charged for the on-campus program. The remaining portion of the study abroad comprehensive fee will be noted as "study abroad program fee."

Study abroad fees do not include items such as the following:

- round-trip transportation between the student's home and the program's location (note: transportation subsidies are available for qualified students)
- books and other required educational materials (including photocopies and personal printing—approximately \$75 per quarter) or additional lab or music fees
- room and board during academic breaks, Christmas, Holy Week, and other extended vacation periods, particularly in Spain and France (note: funds are available to support travel during this time for qualified students)
- data/mobile phones or Internet fees/usage (note: funds are available for qualified students)
- passports
- required passport photographs
- required physical exams, x-rays, and other medical tests
- required and recommended immunizations (average cost for immunizations at the College Health Center is \$200 to \$300)
- required health and accident insurance
- required antimalarial prophylactic pills (where recommended by the CDC) that the student takes abroad (average cost \$10 per pill, taken on a weekly basis; total cost varies from \$300 to \$400, depending on the length of the program)
- independent travel while abroad
- incidental expenses en route and abroad
- cost of local transportation at the program site, including field trips for a course as well as daily commuting
- Visa fees (for certain programs)
- personal property insurance; personal liability insurance; program cancellation insurance

Note: The CIP tries to estimate these additional miscellaneous expenses on the individual budget program sheet found on the Hornet Passport Website.

Kalamazoo College reserves the right to change or modify what is included in the comprehensive study abroad/study away fee without prior notice. For details on what the comprehensive fee includes, please consult the the CIP website and Hornet Passport budget information.

The amount students spend above and beyond the comprehensive fee paid to the College will vary: Returning students suggest that an average of \$2,000 extra for short-term; \$2,500 to \$3,500 for long-term programs; and \$3,000 to \$4,000 for extended-term programs is realistic. Students may be able to manage on less than these amounts if they budget carefully and restrict independent travel. Many study abroad/study away programs require participants to accept financial obligations that are not covered by the Kalamazoo College comprehensive fee. Students should consult specific program information for details.

Study Abroad/Study Away Billing and Payment

Payments for study abroad/study away programs are made according to the regular college tuition payment schedule. For specific billing dates, contact the Kalamazoo College Student Accounts Office.

All student accounts, including fees, must be cleared before students can leave for study abroad/study away. Final departure packets will not be released unless student accounts are paid in full or appropriate arrangements have been made through the Kalamazoo College Student Accounts Office. Non-payment of the comprehensive fee installments will jeopardize a student's continuing participation in the program and may result in withdrawal or dismissal from the program.

Study Abroad Financial Assistance/Scholarships

International education is supported at Kalamazoo College by a number of generous gifts, including the S. Rudolph Light Endowment and the Arcus Gay and Lesbian Fund Study Abroad Endowment. For Kalamazoo College students receiving Kalamazoo College financial assistance/scholarships, this aid is available for those programs that appear in the "approved for transfer of academic credit and Kalamazoo financial assistance/scholarships" category of the List of Study Abroad Programs. The term "limited financial aid" indicates that state and federal funds are fully available, but institutional funding (including GLCA tuition remission) will not be credited.

For a list of outside scholarships and/or fellowships available to college students, please see the "Scholarships" page on the CIP website. Kalamazoo College students with demonstrated financial need as determined by the Kalamazoo College Office of Financial Aid may be eligible to receive a travel subsidy for their study abroad program. More information on travel subsidies is available in the Travel Subsidy FAQs on the CIP website.

Work/Study: No employment is available to students while on study abroad. Students travel overseas on a student visa that specifically prevents them from seeking employment or earning money while they are in that country: If work/study is part of their financial aid package, students should consult the Office of Financial Aid and should find an alternative source for those funds for the quarters spent abroad.

Study Abroad Pre-Departure Orientation

CIP staff members recognize that an important first step in preparing for the study abroad experience is for participants to have an opportunity to learn more information about their study abroad program. During the quarter preceding study abroad participation, CIP and other College staff members offer question-answer sessions as well as formal meetings providing information about the academic structure of the programs abroad, health and safety information, and details about logistical components of the program. Where feasible, study abroad returnees as well as visiting international students will contribute to sessions to help students prepare to make the most of their time abroad. Kalamazoo students must attend all mandatory study abroad orientation workshops and sessions, sign up for/complete and submit all signature or material submission documents, and read all learning content material in the Hornet Passport, the College online study abroad/away application and information system. Students are also encouraged to participate in optional workshops, which provide additional information and preparation. Failure to attend these mandatory sessions or complete required orientation assignments may result in the student's withdrawal from study abroad.

Academic Credit from Study Abroad/Study Away

All academic work completed in the study abroad/study away program is certified by the Executive Director of the Center for International Programs and the Registrar and is recorded on the Kalamazoo College academic transcript on the basis of examinations and reports supplied by supervisors and teachers abroad. Study abroad/study away credits may be used to satisfy graduation requirements. Major, minor, or concentration requirements are at the discretion of departmental faculty. Credit distribution for other College graduation requirements is determined by the Registrar. When registering for courses abroad, students should direct inquiries regarding such credits accordingly. Students are encouraged to obtain approval from the department in advance if a student wishes to use a course from study abroad/study away to satisfy requirements for a major, minor, or concentration. Kalamazoo College students are eligible to earn three Kalamazoo College units of credit for a short-term program, six units for a long-term program, and nine units for an extended-term program. Once students have completed the study abroad/study away program and (where necessary) consulted with the Registrar, the appropriate grades and credits will be recorded on the transcript. Only those courses from study abroad/study away which are within the "Liberal Arts Tradition" of the College will be accepted for credit.

Independent Study on Study Abroad/Study Away

No independent study for credit, including "distance education" courses, may be pursued in any study abroad/study away program without advance approval from the Executive Director of the Center for International Programs.

Grades from Study Abroad/Study Away

All grades earned on study abroad/study away fall within the College's general policies on transfer credit. Study abroad/study away grades will be reviewed, translated, and certified by the Center for International Programs and will be recorded by the Registrar on the official Kalamazoo College transcript according to the Kalamazoo A, B, C grading system. Grades from study abroad/study away courses will not be counted in the student's Kalamazoo grade point average. To receive credit for a study abroad/study away course, students must earn a C or better according to the local grading scale. (Note: Courses taken as "pass/fail" on study abroad will not be transferred.) Credits will normally be listed on the Kalamazoo College transcript with the same academic rubric used at the foreign institution; for example, a class listed as a "History" course will be listed as a "History" course on the Kalamazoo transcript. A student who believes that, for instance, a course listed as "Art History" at a foreign institution should be listed as "History" on the Kalamazoo transcript should appeal to the Executive Director of the Center for International Programs and the Kalamazoo College Registrar. In consultation with the department affected and after examining a syllabus of the course completed abroad, the Executive Director and Registrar will determine how the course should be described on the transcript.

Students seeking a grade change for a course taken on study abroad/study away must petition the Center for International Programs no later than six weeks following notification of their grades. Requests for a grade review must be accompanied by complete documentation from the course in question including syllabi, assignment sheets, reading lists, homework and other assignments, essays, examinations, etc. Grade appeals must follow the College's standard change of grade procedure as outlined in the catalog.

Incomplete Grades on Study Abroad/Study Away

Students must complete all course work while they are enrolled in the study abroad/study away academic program; no Incomplete (I) grades will be given for course work taken in a program off-campus. All course work must be completed by the deadlines set by the staff and/or instructors at the program. Courses that are not completed abroad will be recorded with a grade of F on the Kalamazoo College transcript.

Attendance Policy on Study Abroad/Study Away

Attendance is required at all classes while on study abroad/study away except in the case of illness and/or emergencies beyond the student's control. Students are expected to attend classes Monday through Friday and to participate in scheduled group activities and excursions. Visits by family or friends are not reasons for an excused absence from class. Unexcused absences often result in a lowered grade and may be deemed a sufficient reason for withdrawal from the program, which could also result in withdrawal from the College.

Withdrawal from Courses on Study Abroad/Study Away

Students are not permitted to arbitrarily underload, drop, or add courses while on study abroad/study away. Students must enroll in the required number of courses as specified by Kalamazoo College and cannot exceed or reduce the required number of courses in the program without the written permission of the Executive Director of the Center for International Programs. Approved course withdrawals will be noted on the transcript with a "W". If a petition for a course withdrawal is made on the basis of medical reasons, appropriate documentation and the signature of a health care provider is required. The availability of "extra credits" in the form of AP and/or dual-enrollment credits will not be accepted as a sufficient reason for course withdrawal.

Students wishing to withdraw from a course must first submit the "Course Withdrawal Form" to the CIP. Approved withdrawal petitions will be sent by the CIP to the study abroad/study away partner institution.

Change of Student Status: Study Abroad/Study Away

Students who decide not to participate in the program after being admitted will be required to pay any costs incurred on their behalf (including, but not limited to, moneys advanced on their behalf for nonrefundable deposits at other institutions, airfare, legal documents, visa and application fees, housing deposits, host university tuition, etc.). Students who leave the program with the permission of the Executive Director of the Center for International Programs after the program abroad has begun may be entitled to a partial refund as specified in the College's policies. Students will still be responsible for covering any non-recoverable costs paid on their behalf. Eligibility for possible refunds will be computed according to the on-campus calendar. These students may be eligible to receive grades of W (withdrawal) on the Kalamazoo College academic transcript or depending on the date of departure, be eligible for a change of status from study abroad/study away to on-campus student. Students who leave the program without earning any academic credit will be withdrawn from the College. Students will be charged for any non-recoverable costs paid on their behalf and they will be subject to the withdrawal policies of the College.

Students who wish to travel home for a personal or family emergency must notify the Executive Director of the Center for International Programs, or designee, and complete a "temporary leave of absence" form.

Dismissal from Study Abroad/Study Away

Application to and acceptance into the study abroad/study away program is separate from admission to the College. Participation in study abroad at Kalamazoo College requires that students meet eligibility criteria as well as exercise responsible judgment and behavior. The Executive Director of the Center for International Programs or designee may dismiss students from the study abroad/study away program for violations of College policy and/or regulations, disruptive behavior or conduct which could bring the program into disrepute, misuse and/or abuse of alcohol or drugs, medical or academic grounds, or behavior that poses a danger to the student or others.

When students accept their admission to the study abroad/study away program, they agree to abide by the policies and regulations set forth in the Study Abroad Handbook, the Academic Catalog, and other relevant Kalamazoo College publications. Of particular importance for students participating in study abroad is the "Statement of Social Behavior" from the Study Abroad Handbook that states, in part, that acceptable behavior includes compliance with local laws and regulations, host university policies and regulations (including local housing regulations and policies), and adherence to the social patterns of the homestay family (or local housing placement) and the local community. Any behavior that, in the judgment of the Executive Director of the Center for International Programs, causes pain or discomfort to others, reflects discredit on the individual or upon the College, or poses a danger to the individual student or to others is considered unacceptable and may subject the offender to immediate administrative action by the Executive Director of the Center for International Programs including, but not limited to, immediate dismissal from the study abroad/study away program. Immediate administrative action may also be required for behavior or medical conditions which affect a participant's ability to perform the essential functions of a student.

Students who are dismissed from the study abroad/study away program will be withdrawn from their courses overseas and receive a grade of W for each course. They will also be removed from their program-provided housing and will be expected to return to the home country. Examples of student behavior while on study abroad/study away that may lead to immediate administrative action by the Executive Director of the Center for International Programs or designee include, but are not limited to, illegal drug use, abuse of alcohol, failure to attend class and/or other required academic activities, hitchhiking, unauthorized absence from the study abroad/study away program, unauthorized changes in housing, arrest for infractions of local laws, and violations of Kalamazoo College policies. Furthermore, the Center for International Programs reserves the right to notify the parents of any student whose behavior abroad, which in the judgment of the Executive Director, is unacceptable or in violation of study abroad/study away and/or College policy. (See the Study Abroad and Study Away Handbooks for copies of the Student Agreement).

Student Life Policies

Housing and Board Policy

Kalamazoo College affirms the educational benefits inherent in the residential undergraduate experience. Residential living is supportive of one's academic preparation and plays an integral role in one's experiential education, providing rich opportunities for involvement and development. Therefore, Kalamazoo College requires all students to reside within the College's residential system and board at the College's dining center through the Winter Quarter of their Junior year.

To be eligible for campus housing students must be enrolled full-time (at least two units) for the term of residence, and be at least 16 years of age at the time campus residency begins. Students under the age of 16 are not eligible to live in on-campus housing.

All first-year students and visiting international students must live in the College's residential system and board at the College's dining center for their first three quarters.

Exceptions for first-year students are made for:

- married students
- students with children
- students who are at least 23 years old
- students who are under the age of 16

Transfers: All transfer students shall be treated per their student classification (see below)

All sophomores and juniors must live in the College's residential system and board at the College's dining center.

Exceptions are made for:

- married students
- students with children
- students who are at least 23 years old
- students who are under the age of 16
- students commuting from the primary residence of parents or guardians within 30 minutes or 30 miles of the College
- students released by the College's Petition Committee

Exceptions to the board plan only are made for:

- residents of campus apartments and the Living/Learning Housing Units (who may carry a board plan if they wish)
- those released by the College's Petition Committee

Seniors are not required to live on campus. Juniors and seniors will be housed on campus on a space available basis only. Juniors and seniors who choose to live on campus must carry a board plan unless they are:

- residents of the Living/Learning Housing Units and campus apartments (who may carry a board plan if they wish)

Several campus housing options are available. Residence halls are coed by area or floor, with single, double, or triple rooms as well as suites. Ten Living/Learning Housing Units allow groups of seven to nine students to arrange their housing around a particular educational focus and initiate programming to enrich their own experience and that of the wider campus.

The primary purpose of our residential campus is to develop and maintain an atmosphere that promotes academic, personal, and social growth. Working with students, the College assumes the responsibility for standards of occupancy and the proper care of the residence halls. All on-campus housing is supervised by professional staff members and student resident assistants under the supervision of the Director of Residential Life.

Students with Disabilities

In compliance with section 504 of the Rehabilitation Act of 1973, as Amended, and with the Americans with Disabilities Act of 1990 (ADA), Kalamazoo College recognizes that qualified students who have diagnosed or identified learning, physical, and emotional disabilities are entitled to the same benefits from the educational programs of the College. Kalamazoo College is committed to making every effort to providing reasonable accommodations, unless that imposes an undue hardship or burden. The Associate Dean of Students and the student will work together to negotiate and ensure appropriate accommodations that will work for the student. Cost associated with diagnosis, evaluation, and testing is the responsibility of the student, except in cases of severe financial need demonstrated to, and upon recommendation of, the Associate Dean of Students.

The office also makes assistance available to students experiencing short-term illness or physical injury.

Kalamazoo College has the right to: Deny a request for accommodations, academic adjustments, and/or auxiliary aids and services if the documentation demonstrates that the request is not warranted or if the individual fails to provide appropriate documentation.

Please direct questions to the Associate Dean of Students Office.

Procedure

1. Upon enrollment or upon receiving an assessment that verifies a disability, a student must make an appointment with the Associate Dean of Students/Disability Services Coordinator to discuss the disability and the process for receiving accommodations. It will be imperative to bring or send ahead the medical verification of the disability.
2. You must provide a copy of the medical documentation and any recommendations about necessary accommodations that are included. If the assessment does not provide the necessary information with which to determine accommodations or if the assessment is more than three years old, the Associate Dean of Students may ask for additional assessment.

3. The Associate Dean of Students/Disability Services Coordinator will review the assessment. The student and Associate Dean of Students will then enter into negotiations to determine appropriate accommodations. One should not assume that specific accommodations offered in high school would necessarily be offered by the College.
4. The Associate Dean of Students/Disability Services Coordinator will communicate in writing to the student the approved accommodations.
5. Each quarter, the Associate Dean of Students/Disability Services Coordinator will send a letter requesting specific accommodations to the faculty of courses in which the student is registered unless the student requests that this step not be taken.
6. If the accommodations do not seem to be working, the student shall contact the Associate Dean of Students/Disability Services Coordinator, and they will work together to discover why the accommodations are not working and to develop additional or different accommodations if that becomes necessary.

Student Responsibilities:

Be sure to read and understand your responsibilities in the partnership to provide you full access to Kalamazoo College's educational opportunities. You may also benefit from general suggestions for being a successful student.

Student Registration:

For registration assistance, please read registration information for students with disabilities.

Will Graduation Requirements Change Because of Disabilities? No.

We believe that teaching within a course can be modified to address particular disabilities by providing reasonable accommodations. Students, regardless of their disability, in most cases can successfully master the material of courses and meet graduation requirements. Should a student have questions about the process of seeking accommodations, please contact the Associate Dean of Students and Disability Services Coordinator at (269) 337-7209. Kalamazoo College uses several assistive technologies to assist students with disabilities access resources in classrooms and in the library.

Resources Available

Library

- There is barrier-free access.
- All floors are accessible by elevator. Visually impaired students would need staff assistance.
- Staff assistance may be required for retrieving materials from upper shelves.
- Several internet workstations are available for seated users.

Media Center

- Audiotapes, tape recorders, and an audio lab are available to visually impaired students.
- A text and image enlarger is available to visually impaired students.
- The video collection includes some tapes with subtitles.
- Sound amplification equipment is available.
- A transmitter and six assistive listening devices to help overcome background noise can be used in Dalton, Stetson, and the Recital Hall.
- The Media Center is accessible by elevator.

Computer Center/Computer Labs

- Computer labs in Dewing, Olds/Upton, Hicks Center and Dow are accessible by elevator.
- Tables in the computer labs will accommodate wheelchairs.
- Specialized equipment is not available in the computer labs.
- Media Center staff can help determine appropriate equipment for the College to purchase.

Social Policies and Regulations

When a student accepts admission to Kalamazoo College, the student agrees to live by a set of mutually held principles defined as the Honor System. The faculty and staff of the College, in return, agree to treat the students by the same principles. Policies and regulations, including the Student Code of Conduct, interpret the broad principles of the Honor System. Students are expected to acquaint themselves with these regulations and to abide by them both in spirit and in practice, whether enrolled in on-campus or off-campus programs. Failure to live within the College's policies and regulations, thus within the spirit of the Honor System, will result in administrative action or action through the Student Conduct Process.

Enforcement Authority and Responsibility

The Board of Trustees gives authority for administering the College to the President. The President delegates to the Provost and the faculty the authority to determine the curriculum of the College and the academic processes, policies, and regulations that define the academic structure. The President delegates administrative responsibility for particular programs, activities, and processes to the administrative officers of those programs.

- Social policies and regulations and the Student Conduct Process are under the jurisdiction of the Vice President of Student Development and Dean of Students. Violations of social policies and regulations are addressed by the VP/Dean of Students, deans or directors of programs, or through the Student Conduct Process.
- Academic policies and regulations are under the jurisdiction of the Provost and the faculty. Violations are addressed by individual faculty, by committees of the faculty, by directors of programs, by the Registrar, by the Provost or his/her representatives, or through the Student Conduct Process.
- Administrative procedures, policies, and regulations are under the jurisdiction of specific program directors and administrative officers. Those directors and administrative officers address violations.

Students will be treated with procedural fairness within each of these respective systems in accordance with procedures communicated through the Student Code of Conduct, College policies and regulations, the *Academic Catalog*, or specific documents from the offices or programs.

Relationship to Governmental Law Enforcement Units

The College reserves the right to determine whether violations of municipal, state, or federal laws are also actionable under the College's Honor Statement, Student Code of Conduct, standards, policies, or regulations. Therefore, students who are cited or arrested and/or charged by law enforcement authorities may be notified that College action is also pending. College policies and regulations are not designed to replicate state or federal laws, but rather to address student conduct under the Honor System, the Student Code of Conduct, and the College's policies and regulations, and to ensure an appropriate educational environment for all community members. Thus, College proceedings need not await the outcome of civil or criminal proceedings. Since the Fourteenth Amendment does not refer to or place restrictions upon private action, private institutions of higher education like Kalamazoo College are not bound by the prohibitions in the Fourteenth Amendment. Such private institutions are not in a constitutional relationship with their students unless they are in some way acting on behalf of the state.

In cases where students have allegedly violated both campus regulations and statutory laws, the College may be faced with a situation where it must take action on its Student Code of Conduct prior to action by the courts. This does not constitute double jeopardy for the student, since the campus and the community are two separate jurisdictions and the College is not making either legal or criminal determinations, but determinations about the appropriateness of student conduct within its community. Therefore, the proceedings are independent of one another and one need not await the outcome of the other. The College is maintaining its integrity by lawfully determining whether sanctions may be appropriate and/or whether the student is fit to continue in the academic community. Kalamazoo College reserves the right to take such action in cases where the College determines that the student's presence on campus may endanger or disrupt others or the College community.

Jurisdiction. In the course of their education, students are members of multiple communities and hold multiple citizenships, including on study abroad, at internships, student teaching, on SIPs, etc. The College reserves the right to determine whether violations of municipal, state, or federal laws, or violations of the standards or policies of universities or countries abroad also constitute a violation of College standards and regulations. Therefore, students who are cited or arrested and charged by law enforcement authorities or are charged or disciplined by institutions, municipalities, or countries abroad may be notified that College disciplinary action is also pending. Further, the College reserves the right to take action on behavior off campus that violates College standards and regulations, adversely affects the lawful educational mission of the institution, or has endangered or disrupted others.

Consequences of Violations

Administrative or faculty action, or action through the Student Conduct Process will result from violations of the Honor System, the Student Code of Conduct, or the policies and regulations of the College. Responsive action can include suspension or expulsion from the College; limitation of access to programs, activities, or housing; restriction of privileges; imposition of new requirements; required community service; or community restitution hours, to name a few. Actions are designed to educate a student about the responsibilities of membership within an educational community. However, when those efforts fail, the recourse is to rescind the privilege to attend this College.

Acting under the authority of the Board of Trustees, the President of Kalamazoo College (or designate) may, on an interim basis, suspend or expel any student whose conduct is detrimental to the well-being of the College or members of the College community. In such circumstances, the procedures employed in responding to violations of College policy may be suspended in the event of a crisis or a threat to the safety, health, or well-being of members of the College community.

Title IX

Kalamazoo College is committed to creating and maintaining a community in which students, faculty, and staff can work together in an atmosphere free from all forms of discrimination. Kalamazoo College is strongly opposed to discrimination, including sexual harassment, and such behavior is prohibited by College policy.

Title IX of the Education Amendments of 1972 provides that:

"No person in the United States shall, on basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance . . ." 20 U.S.C. § 1681 and 34 C.F.R. Part 106 (1972).

What does this mean?

Title IX prohibits discrimination based on sex or gender identity of students and employees of educational institutions that receive federal financial assistance. Each college or university receiving federal financial assistance must designate at least one professional employee as its Title IX Coordinator. The Title IX Coordinator is responsible for monitoring the overall implementation of Title IX.

What does Title IX apply to?

Title IX applies to every aspect of education *from a student's application until their graduation*, including course offerings, counseling, financial assistance, student health, student housing, marital and parental status of students, physical education and athletics, student conduct involving sexual harassment, educational programs and activities, and student employment.

What does sex/gender discrimination mean?

Title IX prohibits sexual misconduct, gender discrimination, sexual harassment, retaliation, and other behaviors when gender- or sex-based. All students and employees are covered under Title IX, including people who are female, male, heterosexual, homosexual, bisexual, transgender, and of any gender identity or gender expression.

What if I have questions?

If you have further questions about Title IX, please contact Ellen Lassiter Collier, Director of Gender Equity, via email at ellen.lassitercollier@kzoo.edu or by phone 269.337.7480.

Additional information about the College's policies and procedures for addressing sex and gender discrimination can be found in the Policy Against Harassment: <https://reason.kzoo.edu/hr/policies/genemploy/harassment/>

Kalamazoo Curriculum

The Kalamazoo Curriculum

For fifty years, Kalamazoo College's distinctive K-Plan has served as the foundation and focal point of the College's curriculum. The original four components -- on-campus instruction, career service internships, foreign study, and the senior individualized project -- have remained at the heart of the K-Plan experience, augmented and enhanced by new opportunities such as service learning, externships, social justice leadership, and intercultural research projects. Throughout a half century, however, the underlying principles of the K-Plan have remained unchanged:

- * Depth and breadth in the liberal arts;
- * Learning through experience;
- * International and intercultural engagement, especially through study abroad; and
- * Independent scholarship, culminating in the Senior Individualized Project (SIP).

Following these principles, students construct individualized K-Plans combining activities that reflect and expand their own interests. Some activities will integrate multiple K-Plan components, since the principles suffice and reinforce one another. For example, students may experience depth and breadth in the liberal arts while on study abroad, intercultural engagement through service learning, independent scholarship while participating in a summer internship, or experiential learning while conducting their SIP. Thus, rather than narrowly prescribing a single path for students to follow from matriculation to graduation, the guiding principles in the K-Plan encourage students to navigate their own path to an individualized, integrated liberal arts education, and provides a structure to support them while doing so.

Exploration Across the Liberal Arts

The K-Plan and its general education curriculum encourage student exploration within the liberal arts through a variety of unique opportunities, both on campus and off. Students engage with new ideas, new experiences, new perspectives, and new places as they explore diverse disciplines, a variety of cultures, and possible careers. This exploration enables them to expand their intellectual horizons and to broaden their perspective on their particular field of interest. Before each registration period, students meet with their academic advisors to discuss their plans for pursuing an education that balances pursuing new interests, further developing and integrating existing interests, and studying at least one discipline in depth through a major. Students may also broaden their learning experience by studying a second discipline or an interdisciplinary field in depth through a major or minor.

Students who wish to be considered for election to Phi Beta Kappa must demonstrate a knowledge of mathematics, take a wide variety of courses outside the major, and must include courses in the natural sciences, social sciences, and humanities.

Shared Passages

All students take three Shared Passage courses.

First-year Seminars constitute the gateway to the K-Plan and to college life for entering students, while also serving as the foundation of the Shared Passages Program. Offered in Fall quarter, First-Year Seminars are designed to orient students to college-level learning, with particular emphasis on critical thinking, writing, and speaking. In keeping with Kalamazoo College's emphasis on intercultural education, they aim to engage students in the study of significant social and historical differences. They integrate collaborative and group work, effective research strategies and discussions, all promoting active, engaged learning. They work to accustom students to modes of academic behavior likely to promote success in college, including class participation, productive approaches to assignments, visits to faculty members' offices, and awareness of support structures for K students.

First-Year Seminars are linked to academic advising, the First-Year Experience program, Upjohn Library, and the Writing Center. They create connections with the components of the K-Plan; depth and breadth in the liberal arts, learning through experience, international and intercultural engagement, and independent scholarship.

Transfer students and students who do not pass the First-Year Seminar must work with the Registrar's Office who will, in consultation with the Associate Provost and Dean of the First Year Class, determine how the First-Year Seminar requirement will be met.

Sophomore seminars build upon the learning goals of the First-Year Seminars, focusing on a particular topic or question viewed from multiple perspectives. Learning goals include intercultural proficiency and the ability to differentiate between observation and interpretation (both critical skills for study abroad and experiential education in general), as well as enhanced writing and oral presentation abilities. As in the First-Year Seminars, information literacy and enhanced research skills remain a key component of Shared Passages.

Students who transfer to the College after the sophomore year and students who do not pass the sophomore seminar must work with the Registrar's Office who will, in consultation with the Associate Provost and Dean of the Sophomore Class, identify an appropriate substitution.

Senior-level courses in the Shared Passages Program focus on integrating students' Kalamazoo College experiences and preparing them for lives beyond 'K.' Disciplinary senior seminars integrate students' experiences inside and outside a particular major, while interdisciplinary senior seminars provide a liberal arts capstone experience, allowing students from a variety of majors to apply diverse aspects of their Kalamazoo College education to a specific topic or problem.

Students who do not pass their senior seminar may find that completion of their degree is delayed. They must work with the Registrar's Office, in consultation with the Associate Provost and Dean of the Senior Class, to identify an appropriate substitution. If the senior seminar was also a requirement for the major, the student must work with the department chair to determine what is required to complete the major.

Students on approved 3/2 engineering or health professions early entry programs are required to meet the senior capstone requirement by working with the director of their program at Kalamazoo College to identify a single capstone course at the approved school that reasonably fits the published senior capstone guidelines. Upon transfer of the credit for this course back to Kalamazoo College, the student will have completed the senior capstone requirement.

Foreign Language Learning and Proficiency

Kalamazoo College is dedicated not only to international education and study abroad but also to proficiency in a second language. All students consequently are required to demonstrate at least an intermediate-level proficiency in a language other than English.

Proficiency in any language offered by the College can be demonstrated by completing the third language course (numbered 103 or 201, depending on the language) in any sequence or by scoring at a proficiency level determined by the department on an examination developed or approved by the College. Kalamazoo College regularly offers Chinese, French, German, Greek, Hebrew, Japanese, Latin and Spanish. Please see individual department policy regarding whether/how credit earned from the College Board Advanced Placement examinations and International Baccalaureate examinations applies to the language requirement in that particular language.

Students wishing to satisfy the College language requirement by taking a language not taught on campus are responsible for 1). Finding another University or College that offers the language and 2) successfully completing a course (or courses) in that language at the intermediate level. Before registering, the student must have the course (or courses) approved by the Registrar's Office.

Students who are at least partially bilingual in a language taught on campus should take the College's placement test and score at a proficiency level determined by that language department. Students who are at least partially bilingual in a language not taught on campus and whose formal secondary education was exclusively in English may fulfill the language requirement by demonstrating intermediate-level literacy skills in that language. A written essay test will be administered on campus and rated by a person fluent in that language. A reasonable effort will be made to provide this option to students requesting it.

Students whose formal secondary education was not exclusively in English may request to certify that they had at least two years of secondary education in a school which teaches at least 50% of its content in a language other than English. Students should contact the Registrar's Office to request such certification.

Senior Individualized Project

The Senior Individualized Project (SIP)

The Senior Individualized Project is the capstone of Kalamazoo College's program of liberal arts education, offering students the opportunity to make use of all of their experiences at the College. The SIP is an occasion for independent scholarship, often in conjunction with an internship or other creative activity that results in a written report, performance, or exhibit. A number of departments host symposia, recitals, exhibitions, or theatrical productions in which results of research or creative work are featured. Rather than selecting only a subset of students to work on an honors project or thesis, the College considers such independent work a significant part of the education of all Kalamazoo College students and requires it of all seniors. The requirement is waived for students participating in approved 3/2 engineering or health professions early entry programs, as they are not at the College for their senior year.

Every student must complete a Senior Individualized Project of at least one unit. The SIP requirement is usually completed in the major department, although students may complete a SIP in any department or program of the College with the approval of the department chair or program director and a faculty SIP supervisor from that area. Each department sets its own requirements for senior projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. The amount of SIP credit (one or two units) is determined by the student and the SIP department at the beginning of the project. In consultation with the faculty SIP supervisor, and within the constraints set by the relevant department, students determine their project's form and the environment in which it is to be pursued.

The College reserves the right to archive student SIPs within academic departments, the Upjohn Library and/or an online digital archive, and to publish SIP titles and the titles of SIP presentations.

General Information about SIPs

- Every senior must complete a SIP in a department, program, or Independent Interdisciplinary Major. Every SIP must have a faculty advisor (also known as the SIP supervisor) within that department, program, or IIM committee.
- Each student must complete at least a 1-unit SIP. Departments and programs have the option of allowing or requiring a 2-unit SIP.
- A student may split a SIP between two departments, be it 1 or 2 units. In this case, the student may have more than one faculty SIP supervisor.
- The SIP does not necessarily have to be done in the major department, although most SIPs are done in the major or in one or both departments of a double major. Some majors strongly encourage their students to do their SIP in the major. Many departments have certain prerequisites that must be met before doing a SIP within that department.
- All departments and programs provide written guidelines or requirements for SIPs done within their disciplines. Ask your department or faculty advisor for guidelines early in the process. In general, SIPs take the following forms:
 - Research thesis or reading project culminating in review paper
 - Internship with a paper relating theory to practice
 - Laboratory or field research with a paper
 - Translation with appropriate explanation
 - Creative work culminating in an exhibition, performance, and/or written work
 - Under extenuating circumstances, with approval of the Department or Program Chair or IIM committee, advanced coursework at Kalamazoo College or another institution may be substituted for the SIP
- Departments and potential SIP supervisors are not obliged to approve every SIP proposal that is presented to them. You may have to meet certain prerequisites, or you may have to adjust your ideas or modify your proposal, before it gains the approval of a SIP supervisor. Enlist a SIP supervisor early in the process and then work with that person to develop a project that will be interesting, significant, and meaningful to you.

The SIP Quarter

- Each student must complete at least a 1-unit SIP. Departments and programs have the option of allowing or requiring a 2-unit SIP.
- A student may split a SIP between two departments, be it 1 or 2 units. In this case, the student may have more than one faculty SIP advisor.
- Students may conduct SIP work over the summer (as part of an extended fall term), during the fall quarter, or during the winter quarter.
- The SIP quarter will be included in any financial aid package you already receive. A SIP is charged as part of a regular quarter load (2 to 4 units of course work carries the same tuition fee). A summer SIP will be registered in the Extended Fall term and included in the Fall tuition billing.
- Students may not overload while working on their SIP. With the exception of performance-based SIPs in specific departments, which may have partial units spread over multiple quarters, students will have at least one "SIP quarter" in which at least one unit is devoted to the SIP. During this term students may take no more than 2 non-SIP courses (not counting partial credit courses)

Sip Units

Maximum Additional Coursework Allowed

1 Unit Summer SIP	3 courses (up to 3.9 units) in Fall
2 Unit Summer/Fall SIP	2 courses (up to 2.9 units) in Fall
2 Unit Summer/Winter SIP	3 courses (up to 3.9 units) in Fall; 2 courses (up to 2.9 units) in Winter; Summer component must be finished before Fall term
1 Unit Fall SIP	2 courses (up to 2.9 units) in Fall
2 Unit Fall SIP	1 course (up to 1.9 units) in Fall
2 Unit Fall/Winter SIP	2 courses (up to 2.9 units) each in Fall and Winter
1 Unit Winter SIP	2 courses (up to 2.9 units) in Winter
2 Unit Winter SIP	1 course (up to 1.9 units) in Winter
Multi-term Performance SIP in Art or Music	Depends on portion of SIP unit registered each term

SIP Registration Policies

The SIP counts as one or two course unit(s) for the term(s) during which it is counted, but the SIP is registered via a separate process from class registration. The SIP registration process involves a paper form (no online registration) which must be submitted to the Registrar's office by the student herself/himself. This paper form has its own set of deadlines:

SIP Quarter

Registration Form Due

All SIPs involving work over the summer (as part of an extended fall term)	Friday of 10th Week, Junior Spring Quarter
Fall and Fall/Winter SIPs	Friday of 1st Week, Senior Fall Quarter
Winter SIPs	Friday of 1st Week, Senior Winter Quarter

- Some departments may also require a *SIP proposal* or *contract*, which should be submitted to your SIP department. Your department's SIP contract deadline may be earlier than the normal SIP registration deadline, in which case it is recommended that you turn your SIP registration form in to the Registrar's Office at the same time that you submit the contract to your department. Some departments require all SIP proposals to be submitted in the spring. **Submitting a SIP proposal to your department does not constitute registration for your SIP; you must officially register by submitting a registration form to the Registrar's Office in order to receive a grade or earn credit for a SIP.**
- The SIP registration form requires your signature and the signature of your faculty SIP supervisor (the person who will evaluate and grade your work). Many departments also designate a SIP coordinator. Find out from your department who your coordinator will be.
- Any changes to SIP registrations must be made in the Registrar's Office by the end of the drop/add period of the quarter of registration (end of the first week of Fall quarter for Summer and Fall units; end of the first week of Winter quarter for Winter units). This includes dropping a SIP, changing your department or SIP advisor, changing the number of units, etc.
- After the end of the drop/add period, you may withdraw from a SIP as you would from any other class, and the SIP will appear on your transcript with a grade of W. The withdrawal period for SIPs ends on Friday of the first week of the term following the SIP quarter (the end of the drop/add period for the following term).
- Overloading is not permitted during a SIP quarter. Work completed over the summer as part of an extended fall SIP is the exception; students with a summer SIP unit may either take up to 3 full-unit courses or 2 full-unit courses and a fall SIP unit during the regular fall term. (Registration above 3.9 units is considered an overload.)
- A student may not take 1 unit of SIP as their only course during a quarter unless that is the only unit they need to graduate.
- If a student drops, withdraws from, or fails a SIP, the original SIP advisor is not obligated to supervise a second SIP with that student.

SIP Deadlines for Students and Faculty

- Each Department, Program, or IIM Committee is responsible for establishing and implementing specific SIP deadlines within the SIP quarter (the term in which the bulk of the work on the SIP is to take place). This may include deadlines for drafts, interim feedback, revisions, presentations, etc.
- For all SIPs, the final copy (i.e., no more revisions) is due to the SIP supervisor no later than Friday of second week of the term following the SIP quarter. For Summer SIPs, this means second week of the Fall quarter, even though Summer SIPs appear with the Fall registration. Students are expected to be completely finished with all work associated with the SIP by that time, with the possible exception of departmental or program symposia in later terms.
- Faculty shall submit Credit/No Credit grades by Friday of 6th week of the quarter following a registered SIP unit. For departments with partial SIP units extending into Spring, that partial unit grade is due by 6th week of the Spring quarter. A grade of Credit may be upgraded to Honors (e.g., after a Spring departmental symposium) until the end of Spring quarter.
- The time lag between students turning in completed SIPs and faculty deadlines for turning in grades should not be interpreted as extra time for students to make revisions to the SIP. Work on the SIP in a quarter in which the student is not registered for SIP credit is consider an "invisible overload" for the students and is against College policy.

SIP Grades

- The SIP will receive a grade of Honors (H), Credit (CR), or No Credit (NC). If you complete a SIP in two departments, you may be graded separately by each department. The SIP grade is not included in the cumulative GPA calculation, though it is recorded on the academic transcript along with the title of the project. There are no college-wide rules regarding length or breadth of paper that determine the difference between a CR and an H; the grade is determined solely by evaluators within the academic department or program, with the input of any outside mentors the student may have consulted.
- Students who register for a 2-unit SIP but only complete enough work to earn 1 unit will receive a grade of CR for one unit and a grade of NC for the other unit. Faculty may also award a CR for one unit and an H grade for a second unit of a 2-unit SIP.
- An "In-Progress" notation (IP) indicates that a SIP is continuing beyond the end of the quarter.
- Incompletes will only be issued in consultation with the faculty SIP supervisor, and only in the event of a verified serious illness or family emergency. An incomplete will not be granted for poor or neglected work.

PE/Wellness Unit

The College requires all students to successfully complete one unit of physical education or wellness activity classes (typically five classes). PED 101 (Mind/Body) counts as two activities and may not be repeated. PE/Wellness activities are graded CR/NC. Only one unit of PE/Wellness activities may be counted toward graduation; students may participate in additional activities but will not earn additional units towards graduation.

Full-unit, credit-bearing courses, PED 205, 210 and 598, are separate from the PE/Wellness activities; they apply as separate units toward graduation rather than toward the five activities requirement.

Transfer credit may be applied toward the PE/Wellness unit requirement.

Majors, Minors, and Concentrations

Completion of a Major

Each student is expected to pursue a passion and develop expertise in at least one academic discipline or interdisciplinary area. A major is required for graduation; students may supplement this by completing a second disciplinary major or minor or by integrating courses from several disciplines.

Majors programs are designed to move from the broad to the specific through a sequence of core and elective courses. Upper-level majors courses usually delve deeply into a specific topic, and students can shape a particular emphasis within a major through their choice of upper-level courses. No matter what the discipline, all majors programs build skills in written and oral expression, information literacy, critical thinking and analysis, creative problem-solving, and independent scholarship.

Each major consists of a minimum of eight units plus cognates. The specific requirements for all major programs are documented in the Academic Programs section of this catalog. Students are required to declare a major during the winter of their sophomore year. The major program of study may be changed thereafter by filing a Change of Major form in the Registrar's office. If a double major is chosen, students must meet the requirements of both programs, including comprehensive examinations (if required). The number of units from study abroad that may count toward the major is determined by the department or program. See the Requirements for the Major for the specific departmental requirements.

- Students may not double count a single course to meet multiple major or minor requirements (two different requirements for a single major or minor, requirements for two different majors or minors, or requirements for a major and a minor) except that requirements for the IAS major may be used to satisfy another major or minor. A single course may meet the requirements for a major and be a cognate course for another major or a minor.
- All courses taken in the major field of study and that major's associated cognates must be at C- or better.

Transfer units may be used toward majors, minors, and concentrations at the discretion of the faculty in the associated department or program. Many departments have limits on the number of credits from outside Kalamazoo College that may count toward the program.

Minors

A minor consists of a minimum of six units within one department, all of which must be earned at a grade of C- or better. A minor is not required for graduation, but may be used by the student to strengthen a knowledge base different from or complementary to the required major program. Courses taken in a minor program may not also count toward a major or another minor.

Concentrations

A concentration consists of a minimum of six interdisciplinary units, all of which must be earned at a grade of C- or better. A concentration is not required for graduation, but may be used by the student to strengthen a knowledge base different from or complementary to the required major program. A course used for a concentration may also count for a major or a minor.

Outcomes of a Kalamazoo College Education

To understand our richly diverse and increasingly complex world, to be successful within that world, and to provide enlightened leadership to that world, a Kalamazoo College graduate will:

- know at least one field of inquiry in depth
- have studied a variety of fields of inquiry
- be able to engage in various cultural contexts in informed, meaningful, responsible, and respectful ways
- be able to learn effectively in a variety of settings
- be able to integrate theory and experiences through reflection

- be able to communicate effectively in both written and oral forms
- be proficient in at least one second language
- be able to think critically, reason analytically, and solve problems skillfully

Degree Requirements

#Units	Requirements
3 Units	Shared Passages Seminars
1 Unit	First-Year Seminar First-Year Seminars do not satisfy major, minor, or concentration requirements.
1 Unit	Sophomore Seminar (SEMN 200-299) May be used to satisfy major, minor, or concentration requirements at the discretion of departments and programs.
1 Unit	Disciplinary or Interdisciplinary Senior Capstone ((SEMN400-499 or a course from any program with 490, 491, or 492 designation) May be used to satisfy major, minor, or concentration requirements at the discretion of departments and programs.
Up to 3 Units	Second Language Demonstrated proficiency through the Intermediate Level (103 or 201, depending on the language).
1 or 2 Units	Senior Individualized Project 1 unit minimum *
1 Unit	Physical Education May be satisfied by completing activities, selected from physical education activity classes taken on campus or while on study abroad, intercollegiate sports, and Land/Sea.
8-12 Units	Major Every student must complete a major. Some students also choose to declare a minor, concentration, or second major, although those are optional. Some departments may require majors to pass a comprehensive exam to complete the major or graduate with honors. Majors, minors, and concentrations are described in the Academic Programs section of the catalog. Please consult those descriptions for requirements in those programs. A Minimum 2.0 cumulative GPA in major coursework is required for graduation.

Residency, Unit, and GPA Requirements

36 Units	Minimum Required for Graduation , not including PE activities A minimum of 18 full-unit courses must be completed at Kalamazoo College, including 6 of the last 12 courses*. These minimum units exclude units earned on Study Abroad, study away (including GLCA programs), and inter-institutional registration.
1 Unit	PE/Wellness activities
2.00	Cumulative GPA

**Students on approved 3/2 engineering or health professions early entry programs are not subject to the SIP requirement or the requirement that 6 of the last 12 courses must be at Kalamazoo College.*

Additional Key Curricular Components

Students should choose a wide-ranging set of courses, in consultation with their advisors, to expand their horizons and complement their major. Students are also encouraged to integrate the following key elements of the K Plan into their own learning experience:

- Study abroad
- Service-learning
- Disciplinary and integrated, interdisciplinary minors
- Student research
- Career and Professional Development internships and externships
- Guild participation
- Land/Sea
- Involvement in student activities and athletics

Note about Skills:

Development of skills such as writing, oral communication, cultural understanding, critical thinking, creative expression, reflection, quantitative reasoning, information literacy, and research skills will take place across the curriculum: in seminars, in many general education courses, and in the major. Majors may require liberal arts cognates to supplement or complement the learning that happens within the major, whether that be skill development, concept understanding, or related content.

List of Programs

Majors

Anthropology and Sociology
Art History
Art – Studio Art
Biology
Business
Chemistry
Classical Civilization
Classics
Computer Science
Critical Ethnic Studies
East Asian Studies
Economics
English
French
German

Environmental Studies
Jewish Studies
Independent Interdisciplinary Concentration
Film and Media Studies
Neuroscience
Public Policy and Urban Affairs
Women, Gender, & Sexuality

Special Programs

3/2 Engineering
Complex Systems Studies
Shared Passage Seminars
Interdisciplinary Courses
Physical Education

Experiential Programs

Experiential education is an important element of the K-Plan, with on-campus and off-campus opportunities in both domestic and international settings. Study abroad, study away through domestic programs, civic engagement, student research, internships and externships, career treks, and student activities and athletics are key curricular components of the K-Plan, and are supported by a variety of administrative departments on campus.

First-Year Experience

The intentional weaving together of hands-on involvement, experiential learning, and mentorship within the context of a rigorous academic life is the hallmark of our First-Year Experience (FYE). Kalamazoo College was named one of thirteen "Institutions of Excellence in the First College Year" by the National Policy Center on the First Year of College and is featured in *Achieving and Sustaining Institutional Excellence for the First Year of College* (Jossey-Bass, 2005). *US News & World Report* has recognized Kalamazoo's First-Year Experience as a "program that really works." FYE at Kalamazoo College helps students:

- achieve academic success,
- identify and pursue passions,
- connect with Kalamazoo College and the greater Kalamazoo communities,
- construct complex intercultural understandings, and
- develop a purpose-filled and balanced life.

First-Year Seminars are the foundation of the FYE program, which includes participation in orientation and the Summer Common Reading, connections with Peer Leaders and academic advisors, residing on campus in a first-year residence hall, and attendance at First-Year Forums. Peer Leaders, carefully selected student-mentors, share their knowledge and experiences to help first-year students achieve greater academic and personal success. Each First-Year Seminar is assigned a Peer Leader.

Center for Career and Professional Development

The Center for Career and Professional Development (CCPD) empowers students to clarify their career aspirations, broaden their networks, hone their professional skills, and articulate the integrated outcomes of their K-Plan, so that they are well prepared to step confidently into life after Kalamazoo College.

To support students in their career development, the CCPD offers the support for externships and internships in the summer months, and recruiting events, networking opportunities, and a variety of workshops and on- and off-campus events during the academic year. The CCPD's staff also offers services including individual coaching appointments, peer advising, career assessment tools, résumé and cover letter critiques, and practice interviews.

Managed by the CCPD, Wisr, the Kalamazoo College Career Mentoring Network is an exclusive professional network that brings together students and alumni around common career interests. For students, the Wisr offers networks and mentoring relationships useful after graduation.

Center for International Programs

Every study abroad program at Kalamazoo College is unique, but each offers challenging course work in an education system whose values and methods reflect those of the local culture, opportunities for integrative cultural experiences, and structured opportunities for using the local language(s) both in and out of the classroom. As the academic, language, and other specific qualifications differ from program to program, it is imperative that students carefully read the program descriptions and Study Abroad Handbook, available from the Center for International Programs (CIP).

Civic Engagement and Service-Learning

During their careers at K, about two thirds of all Kalamazoo College students are actively engaged in the greater Kalamazoo area through community-based courses, student-led co-curricular initiatives, and summer Community Based Internships. Through the nationally recognized **Mary Jane Underwood Stryker Center for Civic Engagement (CCE)**, established in 2001, and working in long-term, reciprocal partnerships, students are involved in public problem-solving and collaborative efforts to build a more equitable community. This takes place in over 20 different courses each year, and in ongoing programs that paid student Civic Engagement Scholars (CESs) lead and coordinate. Each week, about 200 K students work at community sites, through courses, volunteer activities, and through community federal work study –in fact, because of the many opportunities to work with public schools, the CCE is the largest student employer on campus! In the summer, the CCE offers six-week, fully-funded Community Based Internships in Kalamazoo with many of our partner organizations.

Our programs address issues such as health and educational equity, immigrant rights, prison reform, arts for social change, food justice, sustainability, and neighborhood and City of Kalamazoo development. With over 40 community organizations and grass-roots groups, students serve as scholar activists who conduct research and outreach; develop community gardens; make films; register voters; advocate for policy change; work with Kalamazoo Public School students; create health education materials; create stories, ceramics, visual arts, and poetry with community members; influence environmental practices; and more. We emphasize building long-term relationships that are transformational for individuals and communities; we respect and promote both student agency and community voice. All students involved with CCE programs, within courses or in student-led programs, engage in structured reflection in order to make critical connections between service and learning, theory and practice, the global and the local, and to integrate these experiences into their individualized "K Plans." All of our programs foster civic, academic, and personal growth within a social justice framework, and offer plentiful opportunities for student leadership and collaboration with communities.

Domestic Study Away Programs

Kalamazoo College students who meet appropriate qualifications are eligible to apply for participation in a fine arts program in New York City, a fall quarter seminar at the Newberry Library in Chicago, a fall program based in Philadelphia, an arts, social justice and entrepreneurship program in Chicago, a semester program on the U.S.-Mexico border through the Border Studies Program, or be part of a research project at the Oak Ridge National Laboratory in Tennessee. Students interested in study away programs should consult with the Center for International Programs.

Student Support and Services

Academic Advising

Advisors are academic mentors who notice what is happening to their advisees, pay attention to their academic progress, and help them work towards completing their degrees while identifying and fulfilling their goals. Academic advising at Kalamazoo College helps students to develop plans compatible with their interests, abilities, and goals; design a course of on- and off-campus study; meet degree requirements; grow intellectually and personally; and make the most of their undergraduate education. All students must meet with their advisors before they are allowed to register for classes for the upcoming quarter. New students are assigned to an advisor linked to First-Year Seminars. Students typically stay with their first advisor until they declare a major sophomore year, when they may opt to change to an advisor in their major department. Departmental Student Advisors (DSAs) provide a student perspective on majors, minors, and concentrations.

Early Alert

Kalamazoo College has had an Early Alert system in place since 1996. If faculty or advisors have concerns about a student's academic progress or engagement, they are asked to use the Early Alert system. Academic advisors are notified immediately of any reports regarding their advisees. The Early Alert Committee, a group of academic and student development administrators, meets regularly each quarter to review the reports and make plans for follow-up.

Student Health Center

The Kalamazoo College Student Health Center is staffed by physician assistants, registered nurses, and an office coordinator. Services include acute medical care, diagnosis and treatment of illness and injury, travel consultation and immunizations, gynecological care, and limited diagnostic testing. If necessary, referrals are provided to outside medical care centers and specialist physicians. Medical supervision and after hours on call advice is offered by Western Michigan University Homer Stryker M.D. School of Medicine Family Practice Residency program, located at the Family Health Center. There is no fee for most services at the Student Health Center. Students are charged for in-house diagnostic tests, physical exams, some individual pre-travel consultations, immunizations, annual gynecology exams, some medications, supplies, nutritional counseling, and some treatments. The Student Health Center only bills the College Insurance Plan directly. For all other insurances, we offer an insurance ready receipt at the time of service. **Student Health Services does not provide medical excuses** for missed classes, exams, or assignments since medical conditions are confidential.

Counseling Center

The Counseling Center provides a confidential setting where mental health professionals and interns help students understand and work through personal concerns. Our services include individual counseling, therapy and support groups, educational workshops, and referral to off-campus mental health professionals.

Students with Disabilities

In compliance with section 504 of the Rehabilitation Act of 1973, as Amended, and with the Americans with Disabilities Act of 1990 (ADA), Kalamazoo College recognizes that qualified students who have diagnosed or identified learning, physical, and emotional disabilities are entitled to the same benefits from the educational programs of the College. Kalamazoo College is committed to making every effort to providing reasonable accommodations, unless it that imposes an undue hardship or burden on the College. The Associate Dean of Students and the student will work together to negotiate and ensure appropriate accommodations that will work for the student. Cost associated with diagnosis, evaluation, and testing is the responsibility of the student, except in cases of severe financial need demonstrated to, and upon recommendation of, the Associate Dean of Students. The office also makes assistance available to students experiencing short-term illness or physical injury.

Academic Programs

African Studies

Professor: Bangura (Director)

The concentration in African Studies offers students the opportunity to study Africa, its people, and its societies from a perspective that provides a holistic understanding of the continent. In order to provide concentrators with an in-depth understanding of African peoples and cultures, histories, and the political, economic, and ecological environments, the program draws upon the social sciences, natural sciences, and humanities.

In addition, students will develop a heightened awareness of the long-term and complex relationship between Africa and the West. A core curriculum of courses, coupled with study abroad opportunities and an ongoing series of campus events including speakers, special programs, and visiting scholars, will provide students with a foundation for future work and/or study in African studies and related fields.

Requirements for the Concentration in African Studies

Number of Units

Six units are required.

Required Courses

AFST/HIST 104 Introduction to African Studies

AFST/HIST 276 Civilizations of Africa

AFST/HIST 277 Contemporary Africa

Three additional courses chosen from the following list. Courses should include Africa specific study abroad subject to approval by the Director of African Studies.

AFST/ANSO 290 Africa in Global Context

AFST/HIST 273 Atlantic Slave Trade

AFST/POLS 248 Politics of Sub-Saharan Africa

ENGL 221 African Literature

AFST/SEMN/HIST 271 Nelson Mandela and the Anti-Apartheid Movement

HIST/AFST 272 Gender Relations in Africa

HIST/RELG/AFST 274 Islam in Africa

HIST/RELG/AFST 275 African Christianity

Concentrators are encouraged to take as many core and elective courses as possible.

Courses taken abroad and at other U.S. colleges and universities, or with guest scholars on campus, may meet a concentration requirement. Students are encouraged to speak with the Director of African Studies as they develop their program.

Kalamazoo College also operates study abroad programs in Africa: Kenya, Senegal, Egypt, and Botswana. These give students an intensive academic and intercultural experience in an African region. The specific African countries in which the College operates are listed in the "Center for International Programs" section of this catalog.

African Studies courses

AFST 101 Elementary Kiswahili I This course introduces students to the basic structures of Kiswahili with an emphasis on achieving elementary communication skills in reading, writing and grammatical skills. Student will become familiar with aspects of the language they would need in Kiswahili-speaking communities in Eastern Africa. This course also introduces students to the appropriate contexts of language usage by providing them with insights into the culture, traditions and history of Kiswahili-speaking peoples.

AFST 102 Elementary Kiswahili II This course continues to introduce students to the basic structures of Kiswahili with an emphasis on achieving elementary communication skills in reading, writing and grammatical skills. Student will become familiar with aspects of the language they would need in Kiswahili-speaking communities in Eastern Africa. This course also continues the introduction of appropriate contexts of language usage, providing students with insights into the culture, traditions and history of Kiswahili-speaking peoples.

AFST/HIST 104 Introduction to African Studies This course introduces students to selected themes, paradigms, and concepts in African Studies. It is divided into four sections: section one deals with "Pre-colonial African societies;" section two examines "The Idea of Africa;" section three focuses on "African Studies as an academic discipline;" section four addresses "Colonialism and its impact on Africa." It is strongly recommended that students take the Introduction to African Studies course before taking any of the upper level African Studies classes.

AFST 201 Intermediate Kiswahili Kiswahili 201 is a continuation of Elementary Kiswahili I & II that students have taken at K or while on study abroad in Kenya. The course emphasizes skills of listening, speaking, reading and writing with intermediate level grammatical structures. Half of the class time will be devoted to conversation and oral practice, reinforcing and going beyond the skills the students have mastered while on study abroad. The rest of the time will be devoted to reading and learning some intermediate-level grammar. Students are required to review all the readings prior to each class meeting. Attendance is required.

AFST/POLS 248 Politics of Sub-Saharan Africa This course offers an in-depth perspective on the study of Sub-Saharan African politics. It examines Africa's post-independence democratic strides, security issues, and the failure and successes of statism. It specifically exposes students to the challenges and the conundrum of the postcolonial state and the efforts in dealing with such challenges in Africa. The end of the Cold War as well as the demise of apartheid affected the political landscape in Africa, thus strengthening the role of grassroots organizations and of other external forces to engage in the process of state reconstruction.

AFST/HIST/SEMN 271 Nelson Mandela and the Anti-Apartheid Movement There are times when specific people, places and moments in history capture the imagination of the world. This occurs when that specificity speaks volumes to the human condition and offers lessons that we all sense are important. Such has been the case with Nelson Mandela and anti-apartheid movement. This course will use Mandela and the evolution of, and struggle against, apartheid as a window into some of the 20th century's most complex issues. Prerequisite: Sophomores Only

AFST/HIST/WGS 272 Gender Relations in Africa This course explores categories of masculinity and femininity that relate to and inform one another. It analyzes how these identity categories interact with other axes of social and political power, such as ethnic affiliation, economic status, and age in various places and times in Africa.

AFST 273 Atlantic Slave Trade This course examines the complex web of connections that linked together the various lives and fates of Africans, Europeans, and Americans via the Atlantic slave trade. It analyzes the mode of enslavement of Africans by slavers in Africa, the experiences of slaves in the Middle Passage, and the impact of the trade on continental and Diasporan Africans. It also explores the role played by Africa-based abolitionist movements in ending the trade in Atlantic Africa.

AFST/HIST/RELG 274 Islam in Africa This course explores the spread of Islam from the Arab peninsula to the African continent in the seventh century through the nineteenth century and limns the factors which facilitated this advance. It examines the methods and principles of Islam and how the religion affected the life styles of its African neophytes and adherents. As a result of the interaction between Muslim and African civilizations, the advance of Islam has profoundly influenced religious beliefs and practices of African societies, while local traditions have also influenced Islamic practices. Muslims were important in the process of state-building and in the creation of commercial networks that brought together large parts of the continent. Muslim clerics served as registrars of state records and played a role in developing inner-state diplomacy inside Africa and beyond.

AFST/HIST 275/SEMN 274 African Christianity This course explores the complex and disparate trends of Christianity in Africa since the first century C. E. It highlights Africa's role in the development and growth of Christianity as a global religion. Prerequisite: Sophomores Only

AFST/HIST 276 Civilizations of Africa Study of Africa south of the Sahara including the origins of man and the emergence of food producing communities; Ancient Egypt and pre-colonial African kingdoms and federations; medieval empires of western Sudan, Ethiopia, and Bantu-speaking Africa; and the Atlantic slave trade. Emphasis on socio-political and economic history.

AFST/HIST 277 Contemporary Africa Study of Africa south of the Sahara including colonialism and the anti-colonial struggles of the post-WWII period.

AFST/HIST 279 Special Topics in African History This course will focus upon a topic in African history that is not addressed in the department's regular offerings. The course can be repeated with different topics.

AFST/ANSO 290 Africa in Global Context An examination of contemporary African societies. Particular emphasis is given to the ways that people and places on the African continent have been and continue to be connected to global dynamics and the implications of these past and present connections for people's lives as they are lived today.

AFST 498 Independent Study

AFST 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that program, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

American Studies

Professor: Mills (Director)

The concentration in American studies offers an interdisciplinary approach to the study of American culture. The concentration provides an excellent background for a wide variety of pursuits. Students will take six courses focusing on American institutions in fine arts, history, literature, political science, psychology, sociology, and religion. The concentration also offers a focus on Native American and African American Studies.

Requirements for the Concentration in American Studies

Number of Units

Six units are required.

Required Courses

One American History course: AMST/HIST 110 or 111

One American Literature course: AMST/ENGL 269, 270, 275, or 276

Core Courses

Four additional courses from at least two of the following different categories:

History

AMST/HIST 110 History of the US I

AMST/HIST 111 History of the US II

HIST 200 Colonial America

HIST 203 Revolutionary America

HIST 206 Culture and Society in Victorian America

HIST 209 Post World War II America

HIST 211 Native American History

HIST 212 American Environmental History

HIST 213 The Slave South

HIST 214 African American History: Slavery and Resistance

HIST 215 Civil War to Civil Rights

HIST 217 History of Leisure and Recreation in America

HIST 218 The American Jewish Experience

HIST 220 American Women's History to 1870

HIST 221 American Women's History since 1870

HIST 223 American Diplomacy since 1898

Literature and Fine Arts

AMST/ENGL 269 New World Narratives: American Literature 1500-1790
AMST/ENGL 270 Reform and Renaissance: U.S. Literature 1790-1865

POLS 380 Drugs, Democracy, and Human Rights

Society

ANSO 103 Introduction to Society and Culture
ANSO 120 The Family
ANSO 205 Urban Sociology
ANSO 215 Crime and Society
ANSO 230 Sociology of Religion
ANSO 236 Race and Racism
ANSO 255 The Media and Popular Culture
ANSO 322 Prisoners and Detainees
PSYC 230 Psychology of Prejudice
RELG 218 American Jewish Experience
RELG 120 Religion in the Early U.S.
RELG 121 Religion in the Modern U.S.
RELG 220 Catholicism in the Americas
RELG 221 Black Religious Experience in the Americas

Students interested in Native American Studies should take: ENGL 222, HIST 211, and RELG 120. Students interested in African American Studies should take: ANSO 236, ENGL 220 and 310, HIST 213 and 215, POLS 229, RELG 221, and THEA 155, among other offerings.

Other courses may be accepted at the discretion of the director. Concentrators should consult with the Director of American Studies as early as possible to develop their program. Concentrators are encouraged to take as many courses as possible.

Senior Individualized Project (SIP)

The SIP in American Studies is encouraged but not required. Any faculty member regularly teaching in the American Studies program may direct a SIP in American Studies. Concentrators should consult with the Director of American Studies.

American Studies courses

AMST/HIST 110 History of the United States I America from contact times to 1865, with emphasis on economic, social, intellectual, and political developments.

AMST/HIST 111 History of the United States II America from 1865 to the present, with emphasis on economic, social, intellectual, and political developments.

AMST/ENGL 269 New World Narratives: American Literature 1500-1790 A study of the divergent and complementary tales emerging from those settled in or settling "America." Texts include American Indian and European creation myths, exploration narratives, Puritan poetry, captivity narratives, and late 18th-century fiction and non-fiction. Prerequisite: A Reading the World course or instructor permission

AMST/ENGL 270 Reform and Renaissance: U.S. Literature 1790-1865 "American" identity, the unsettling of indigenous populations, the movement of European populations westward, and the Slavery and Woman questions. Through an exploration of diverse texts, students will examine a literature shaped by an impulse to transform or reform pre-existing perspectives and genres. Prerequisite: A Reading the Worlds course or instructor permission

AMST/ENGL 275 American Realisms: U.S. Literature 1865-1914 This course examines a variety of approaches to knowing a literary period. We will explore theoretical, socio-historical, formal, and thematic paradigms that can organize our understanding of the wide variety of written and cinematic texts produced in the period between the end of the Civil War and the beginning of World War I. Through a study of the frequently conflicting stories about gender, race, sexuality, art, and Americanness that come to voice during this period, students will challenge and complicate their definitions of literary realism. Prerequisite: A Reading the World course or instructor permission

AMST/ENGL 276 Modernism and Postmodernism: U.S. Literature 1914-Present A study of the rise of a modern aesthetic in the wake of World War I and the postmodern response in the second half of the 20th century with an eye toward the diversity of voices and formal choices that mark this period. Prerequisite: A Reading the World course or instructor permission

AMST 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that program, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Anthropology and Sociology

Professors: Garriga-López (Chair), Baptiste, Cunningham, Luthra, Thomann, Villegas

The related disciplines of anthropology and sociology seek to understand the nature of communities, organizations, institutions, the systems of cultural meanings that form and inform them, and the interplay between individuals' lives and the societies in which they live. Such understanding requires critical analysis of the interactions among societies and the political, economic, and cultural dimensions of power embodied in structures of class, gender, ethnicity, and race operating on both a local and global level.

Our goal is to provide courses that integrate the two disciplines into a common curriculum from which students derive the multiple perspectives, patterns of evidence, and methodological skills that will engender a broad yet nuanced understanding of the local and global dimensions of contemporary issues. This awareness, gained through reading, discussion, and active engagement both in the local and national community, as well as through participation in international programs and projects—is consistent with and thus directly serves the overall mission of the college: "to better understand, live successfully within, and provided enlightened leadership to a richly diverse and increasingly complex world."

Students graduating with a major in Anthropology and Sociology will find this major relevant for careers not only in anthropology and sociology, but also for such related fields as human services, journalism, law, medicine, public health, urban affairs, international development, government, business, and education.

Requirements for the Major in Anthropology and Sociology

Requirements for the Major in Anthropology and Sociology

A minimum of ten courses, comprised of three core courses and seven other ANSO courses of the student's choosing, of which at least two must be at the 200-level, two at the 300-level and two at the 400-level. One of the seven elective courses may be taken off-campus.

The Core (required)

ANSO 103 Introduction to Society and Culture
ANSO 212 Quantitative Research Methods
ANSO 245 Qualitative Research Methods

Requirements for the Minor in Anthropology and Sociology

Number of Units

A minimum of six courses.

Required Courses

ANSO 103 Introduction to Society and Culture

Select the remaining five from all other courses, *of which at least two must be 300- or 400-level courses.*

Anthropology and Sociology courses

ANSO 103 Introduction to Society and Culture This course is an introduction to the academic study of culture and social structure, as developed through the fields of cultural anthropology and sociology. Students will develop a vocabulary of core concepts and analytical skills for the study of cultures and societies both local and global. Through readings, films, lectures, class discussions, and experiential projects, students will explore the nature of communities, organizations, and institutions; the system of meanings that form and inform them; and the interplay between individuals' lives and the societies in which they live. Along the way, students will be asked to apply course concepts to their own lives in a critical way, and to reflect upon how such issues as belief systems, social stratification, culture change, gender roles, etc play out in an increasingly interconnected and globalized world.

ANSO 120 The Family This course examines the institution of The Family, primarily from a critical perspective. After situating The Family in cultural and historical structures of race/ethnicity, class, and gender, we explore the institution as a site for the production and reproduction of femininity, masculinity, and (hetero)sexuality. We also examine the implications of the institution and the dynamics of power embedded in it for individuals and groups working against the dominant script.

ANSO 140 Language, Culture and Society This course examines the relationship among language, culture and society with a special emphasis on the social and cultural factors that affect our use of and attitudes towards language. By examining how language is used in different socio-cultural contexts from an anthropological perspective, we will explore not only how language use varies according to social contexts and social groups, but also the roles that different varieties of language play in the expression of social identity and the production and reproduction of stereotypes and power relationships. Prerequisite: ANSO-103

ANSO 210 Medicine and Society Cross-cultural analysis of the relationship of society to health and the disease process through the examination of the evolution of knowledge about disease; views of disease by different societies, ethnic groups, and social classes; and alternative national health care systems. Prerequisite: ANSO-103 or CGHL-120

ANSO 212 Quantitative Research Methods An introduction to the use of quantitative analysis and statistical reasoning in the fields of sociology, anthropology, and human development and social relations. The course will emphasize understanding and critiquing data and conclusions, and students will produce data sets as well. Students will develop skill in using SPSS. Prerequisite: ANSO-103

ANSO 220 Special Topics: Anthropology & Sociology This course will focus upon a topic in Anthropology and Sociology that is not addressed in the department's regular offerings. The course can be repeated with a different topic. Prerequisite: Take ANSO-103

ANSO 225 Sex and Sexualities This course provides students with an overview of influential theories about the social aspects of sex and sexuality, as well as some direct engagement with ethnographic representations of sexual worlds and their politics. It examines the diversity of human sexual identities and activities in their historical, philosophical, legal, and social contexts. This course will consider sex and sexualities in an intersectional way, that is, in and through their intersections with issues of race, class, gender, nationality, and globality. Prerequisite: ANSO-103 or CGHL-120

ANSO 232/SEMN 231 Nature & Society: Intro Pol. Ecology This course will introduce students to the sub-discipline of political ecology, a field broadly concerned with the relationships between nature and social power. In other words, this course will focus on developing an understanding of how social relations and politico-economic systems produce environmental problems, structure access to natural resources, the resulting struggles over 'nature' and how and in whose interests these may or may not be resolved. Because the field is broad, the course has been structured into themes that we will explore each week. Prerequisite: Take ANSO-103

ANSO 234 Latin America in Global Context This course will primarily examine contemporary Latin American history from an anthropological perspective. The first part of the course will explore the role of colonialism and imperialism in the making of Latin America. In the second part of the course, the role of U.S. foreign policy will be discussed, particularly the specific policies the U.S. deployed in Latin America to "contain" alternative economic models deemed dangerous to U.S. capitalism. We also will examine the underlying assumptions of Western-centered development models imposed in Latin America and their relation to neo-colonialism and globalization. The final part of the course will explore revolutionary movements as they respond to the encroaching forces of capitalism. Prerequisite: ANSO-103

ANSO 236 Race and Racism This course equips students with a comprehensive understanding of "race" as a socio-political construct, and of racism as a structural and institutional process. Focusing primarily on the twentieth and twenty-first century United States, the course explores how race operates as an organizing principle of American life. It examines the historical development of notions of racial difference and the creation of racial inequality through science, philosophy, the law, and public policy; analyzes how contemporary social institutions perpetuate racial inequality; and considers the landscape of modern racial politics. Prerequisite: Take ANSO-103

ANSO 245 Qualitative Research Methods This course provides students with the methodological tools and concepts that provide the foundation of sound, ethical, qualitative, ethnographic research. Using a project-based approach, students learn about and gain experience with conceptualizing, designing, implementing, and writing up the results of a qualitative research project. Prerequisite: ANSO-103 and Sophomore Standing

ANSO 252 Political Ecology of Waste This course introduces students to the realities and constructions of waste as a complex economic, political, environmental, public health and cultural 'problem' in diverse global settings. Drawing upon a diverse set of literatures in social sciences, humanities, engineering, and economics, the course encourages students to gain an appreciation of inter-and trans-disciplinary knowledge forms, each of which constructs, problematizes, and proposes solutions for the issue of waste. Prerequisite: Take ANSO-103

ANSO/SEMN 255 You Are What You Eat: Food and Identity In a Global Perspective The goal of this course is to examine the social, symbolic, and political-economic roles of what and how we eat. While eating is essential to our survival, we rarely pay attention to what we eat and why. We will look at the significance of food and eating with particular attention to how people define themselves differently through their foodways. We will also study food's role in maintaining economic and social relations, cultural conceptions of health, and religion. Finally, the class examines the complex economic and political changes in food systems and the persistence of food's role as an expression of identity, social and ethnic markers. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only. Take ANSO -103

ANSO/SEMN 262 Real and Imagined Cities This course explores the city as an idea, as material reality and the interconnections between the two. As an interdisciplinary field, urban geography draws from theories and frameworks in urban planning, anthropology, sociology and economics. This course introduces students to that field. Because the field is broad, the course has been structured into themes that we will explore each week. Prerequisite: Take ANSO-103; Only open to sophomores

ANSO 270 Communities and Schools Drawing on anthropological theories, this course will explore the role of schooling and other educational practices in the production of knowledge and the reproduction of hierarchies both in the United States and abroad. Through their participation in the service-learning component of the course, students will be able to examine firsthand how reproduction occurs in the local educational system. Prerequisite: ANSO-103

ANSO/HIST 288 Sports in East Asia Whether it's Yao Ming on the basketball court, Ichiro in Seattle breaking records, or the ubiquitous martial arts, "East Asian" sports seem to be everywhere these days. How did this come about? What can we learn about East Asian societies, and our own, from studying sports? These are some of the questions we will be tackling as we explore the history and significance of sports in East Asia. Drawing from a combination of primary materials, theoretical writings, comparative studies, and secondary works focused on East Asia, we will consider sports in terms of several issues: invented traditions, nationalism, body culture, gender, stardom, and the modern Olympics, to name just a few.

ANSO 290 Africa in Global Context An examination of contemporary African societies. Particular emphasis is given to the ways that people and places on the African continent have been and continue to be connected to global dynamics and the implications of these past and present connections for people's lives as they are lived today. Prerequisite: ANSO-103

ANSO/SEMN 292 Development and Dispossession This course takes a critical approach to the study of development, focusing particular attention on the displacement and dispossession of local populations. Using contemporary case studies, we examine how neoliberal policies and practices play out in various development sectors, including agriculture, infrastructure, and the extractive industry, in both rural and urban spaces in the U.S. and around the world.

ANSO 295 Special Topics Special Topics offerings focus upon topics not addressed in the department's regular offerings. The course can be repeated with a different topic. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: ANSO-103

ANSO 310 Social Research for Social Change Drawing primarily from applied sociology and applied anthropology, the course examines the types of approaches taken in applied research as well as ethical issues that commonly arise in the context of doing applied work. Examples from a variety of areas of applied research will be considered. Prerequisite: ANSO-245 or Instructor permission

ANSO/MUSC 315 Sound & Culture in the Middle East An introduction to the popular culture and cultural politics of the modern Middle East, as heard through the medium of sound. Exploring the varied soundscapes and musical cultures of the region, we will examine how sound shapes, reinforces, critiques, and transforms social life, from the local to the international level. Listening to music as both an aesthetic object and a site for the contestation of ideas, we will learn about the ways in which music is used to articulate an array of competing visions: of the nation, colony and post-colony; religion, gender, and sexuality; globalization, hybridity, and modernity. Prerequisite: MUSC-103, ANSO-103 or Instructor Permission

ANSO 320 Advanced Seminar: Special Topics in Anthropology and Sociology A seminar for students who wish to explore significant issues in sociology or anthropology at a more advanced level. Topics may vary from year to year. Prerequisite: Must take one 200-level ANSO course

ANSO 320 Action Research: Gov. & Public Services The class will focus on public policy connected to the provision of public services (water, roads, education, health, etc.), the role of local government, the way that role has simultaneously expanded and become limited through decentralization, and how communities mobilize to demand that the system become more effective. While we will discuss the way these issues are playing out around the world, we will also be working with data from a Ugandan public policy research and advocacy organization to undertake policy- and program-relevant analyses of these issues. Prerequisite: Take a ANSO-245 and be sophomore standing.

ANSO 322 Prisoners and Detainees Prisoners and Detainees: Race, Citizenship, and Imprisonment: This course examines the ways laws and imprisonment have become means to discipline bodies imagined as dangerous, disposable, and detrimental to the state, in short, non-citizens. It specifically merges two social processes that define non-citizenship -the prison industrial complex and deportability- as mechanisms that actively prohibit entry into the space of belonging for those who are illegalized and strips citizenship from those who are criminalized. We will analyze illegalization and criminalization as social, political, and cultural processes that function to police, discipline, distinguish, and re/form the "other". Prerequisite: Take one 200-level ANSO course

ANSO 325 States, Bodies & Epidemics This course examines epidemics as social events. Students will become familiarized with major anthropological and sociological works on contagion and social responses to epidemic disease. This course explore epidemics through the frames of national security discourse, migration and diaspora studies, and social justice activism and scholarship. This course analyzes the historical and philosophical genealogy of social and state responses to epidemics and the politicized representations of such epidemics. Students engage with key works in theories of the state, theories of the body and embodiment, and social analyses of communicable disease through the framework of critical medical anthropology. Prerequisite: One 200-level ANSO course

ANSO 335 Money, Technology and Material Culture This course will examine the relationship among money, material culture and technology. Human culture revolves around "things." We use money to buy things and we use things to tell the world that about our relationship with money. Recent technological advancements, i.e., credit cards, internet banking and mobile banking, threaten to render money (currency) obsolete. Throughout the quarter we will look at the ways that things, money and technology create and maintain relationships, identities and cultures. Prerequisite: One 200-level ANSO course

ANSO/ENVS 350 Political Histories of Western Environment This course explores a partial (Western) history of how humans have understood themselves in relation to nature. To do so, this course relies on a landmark text in the field along with a series of primary texts, tracing the continuities and ruptures in thought during different historical periods have engaged with the idea of nature and the place of the human within it. Although, the course relies mostly on a broadly defined Western thought tradition in this course but students are encouraged to undertake research on other traditions and bring those into the classroom. The readings for this course are organized temporally, starting with the oldest. Prerequisite: One 200-level ANSO course

ANSO 357 Immigrants and Exiles From its classical reference to displaced communities as a result of wars of conquests or natural disasters to current movements of population across borders as a result of global capitalism, the concept of diaspora has accumulated an archive of academic and imaginative literature. This course, a comparative introduction to the study of diaspora, focuses on the development of diverse diasporic communities and their role on the current global stage. Our specific focus will be on how members of these communities stake their claims both to their home countries and to the countries in which they reside. Prerequisite: One 200-level ANSO course

ANSO 412 Capitalism and Its Discontents This course aims to get students to read and explore the contemporary relevance of Marx's writings. In addition to classroom discussions on the texts' relevance to contemporary issues during the first eight weeks of the course, we will spend the final two weeks discussing the idea of "community capitalism in Kalamazoo" set of community development programs such as the Kalamazoo Promise, the Foundation for Excellence, and the establishment of community-based venture funds that are designed to create jobs and grow the local economy. Prerequisite: Take a 300-level ANSO course.

ANSO 420 Border Epistemologies Border Epistemologies offers a framework for thinking about thinking the border. Through the analysis of theories and ethnographies of the border, this course responds to the theoretical challenges presented by Border Studies to Anthropology and Sociology. This course engages questions about solidarity work and border gnosis in relation to scholarship. Focused on critical questions of mobility, difference, exclusion, production, reproduction, and resistance, this course offers students the opportunity to consider the relationship between nationalism, capitalism, and social theory; center the praxis of migrants; and interrogate the epistemological and ontological bases of social science practice. Prerequisite: ANSO-212, ANSO-245, and one 300-level ANSO course.

ANSO 422 Anticolonial & Antiracist Theory What is the "anti" in Anti-Colonial theory and Antiracism? How have communities across the globe theorized their experience as colonial subjects both in their lands as well as in the heart of empire? This course serves as a platform to collectively review key writings in both of these tomes of literature. Students will look at the basic tenets for each theory as well as ways they have been utilized to examine social structures and institutions. Prerequisite: Must take a 300-level ANSO course.

ANSO 490 Senior Seminar: Current Dialogues in Anthropology and Sociology Study of contemporary debates in sociology and anthropology, with particular attention to ways of knowing about and representing the social world. Prerequisite: Senior ANSO majors only

ANSO 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Arabic

Arabic Program

The Arabic Program at Kalamazoo College introduces students to both Modern Standard Arabic (MSA), the written lingua franca of the Arab World, and at least one colloquial dialect (Egyptian and/or Levantine). The three-course sequence emphasizes reading and writing in MSA and listening comprehension and speaking in both MSA and dialect, in addition to introducing students to the history, geography and cultures of the Arabophone region through authentic media and diverse projects. Students also have the opportunity for service learning initiatives serving the Arab refugee population of Kalamazoo. Successful completion of the sequence fulfills the college's language requirement, prepares students for the college's new [study abroad program](#) in Amman, Jordan, and provides them with a rare ability to engage with Arabic-speaking communities in Michigan and elsewhere.

Arabic courses

ARBC 101 Beginning Arabic I This is a beginning course in Modern Standard Arabic (written) and colloquial Arabic (spoken), and the first in a three-course sequence. The first quarter of study will cover the Arabic alphabet and phonology, basic morphology and syntax, and introductory conversational skills, as well as an introduction to the geography and cultures of the Arabophone region. Students will demonstrate their beginning skills largely through oral presentations and dictation.

ARBC 102 Beginning Arabic II This is the second course in a three-course sequence in Beginning Arabic, with continuing instruction of Modern Standard and colloquial Arabic. This course emphasizes vocabulary acquisition and foundational grammar (gender and number agreement, subject and object pronouns, present-tense verb conjugation), building toward simple narration in compositions and presentations. Students will explore Arab cultures as well as practice reading and listening skills through a variety of authentic media. Prerequisite: ARBC-101

ARBC 103 Beginning Arabic III This course completes the three-course sequence in Beginning Arabic. Students will continue intensive vocabulary building and move on to grammatical topics including gerunds, superlatives, past and future tense verb conjugation, conditional and comparative phrases, as well as Arabic's dazzling verb pattern system. Students will continue to explore Arab cultures and practice reading and listening through a variety of authentic media, and develop their composition and presentation skills through written and oral projects. Prerequisite: ARBC-102

Art and Art History

Professors: Hahn, Koenig, Lindley, Rice (Chair), Vinson

In an ever-increasingly visual world, art and art history cultivate essential critical looking skills that allow students to better navigate and respond to their communities, both local and global. Courses in the department take advantage of the interdisciplinary nature of the liberal arts experience, and we encourage students to interweave their personal and academic interests with artistic expression and research across visual cultures. Many classes have no prerequisites and are open to all students; while more advanced courses provide training for those interested in postgraduate study of studio art or art history. Senior projects can provide internships and other opportunities for experiential learning in the context of the arts: commercial art, arts management, museums and galleries, or professional studio practice. In every case, our goal is to enrich students' experience of their visual world and to develop the necessary analytical and communication skills in order to thrive upon graduation.

Our studio art courses provide instruction in drawing, painting, sculpture, ceramics, photography, printmaking, digital art, documentary video, and combined media. These courses are designed to help you explore creative visual modes of expression and learn both traditional and innovative media practices. The curriculum's directive is to familiarize students with contemporary issues in the visual arts, while developing practical and professional skills for future pursuits. To supplement coursework, studio classes participate in visiting artists' and critics' lectures, gallery and museum visits, studio visits, and a senior class trip to Chicago.

The art history curriculum offers courses across time periods and geographies, all of which provide a solid foundation in visual analysis, historical frameworks, and theoretical interpretations. The surveys provide a broad introduction to western art; while intermediate and advanced courses more closely scrutinize specific cultures, ranging from ancient Greek art to contemporary global art. Art history majors are rigorously trained to conduct independent and collective research, developing strong problem-solving and critical reading and writing skills. Augmenting coursework, students visit numerous museums, work with visiting artists and art historians, and participate in the senior trip to Chicago.

The department offers a major or minor in Studio Art and a major or minor in Art History.

AP, Dual Enrollment, Transfer, and Study Abroad Credits

Majors

Students who major in the department can use a total of only three units of eligible transfer, dual enrollment, AP, and credits from study abroad combined to count toward their major, with approval of the department. Only two units from study abroad can be used toward the major.

Minors

Students who minor in Studio Art or Art History can use a total of two units of eligible transfer, dual enrollment, AP, and credits from study abroad combined to count toward their minor, with approval of the department. Only one unit from study abroad can be used toward the minor.

Requirements for the Studio Art Major

It is highly recommended that a minimum of two classes in an area of focus, including at least one second-level or intermediate course, should be completed by the end of the junior year. Areas of focus include painting, photography, documentary video, ceramics, and sculpture (three sculpture courses expected for students planning a sculpture SIP).

Number of Units

Ten units are required. A SIP is not counted as part of the ten units.

Required Courses: Six Units**To be completed by the end of the sophomore year:**

ARTX 105 Basic Drawing

ARTX 134 Sculpture: Object Investigation or ARTX 234 Sculpture: Structure and Space

ARTX 145 Survey of Art I: 1100-1600 or ARTX 150 Survey of Art II: 1600-1945

ARTX 201 Visual Fundamentals (taken sophomore spring)

To be completed by the end of the junior year:

One Intermediate Studio Course in the intended area of focus (300-level)

To be completed by the fall of the senior year:

ARTX 224 Art Since 1945

ARTX 490 Advanced Studio (pre-requisite of at least one intermediate level studio art course)

Additional Electives

The remaining three units are to be selected from the studio art offerings.

Requirements for the Studio Art Minor**Number of Units**

Six units are required. A SIP is not counted as part of the six units.

Required Courses

ARTX 105 Basic Drawing or ARTX 134 Sculpture: Object Investigation

ARTX 150 Survey of Art II: 1600-1945 or ARTX 224 Art Since 1945

One Intermediate Studio Course (300-level preferred)

Three additional units to be selected from any of the studio art offerings

Requirements for the Art History Major

Recommended Timeline: Students should take the required 100-level courses as early as possible and then proceed to 200- and 300-level courses in the sophomore and junior year, in preparation for ARTX-440 Ways of Seeing and the SIP in the senior year.

Number of Units

Ten units are required. One unit may be the SIP.

Required Courses**To be completed by the end of the sophomore year:**

ARTX 105 Basic Drawing or ARTX-134 Sculpture: Object Investigation

ARTX 145 Survey of Art I: 1100-1600

ARTX 150 Survey of Art II: 1600-1945

To be completed by the end of the junior year:

ARTX 224 Art Since 1945

To be taken during the fall quarter of senior year:

ARTX 491 Ways of Seeing

Additional Courses

One Ancient Course: ARTX 208 Introduction to Greek Art and Archaeology or ARTX 209 Introduction to Roman Art and Archaeology

One Topics Course: ARTX 223 The Long 19th-Century Art, ARTX 227 Seeing and Perceiving in the Modern Museum, or ARTX 290 Art and Gender

Three Additional Units: Selected from any of the Art History offerings, including alternates listed above, one-time offerings, and/or an Art History SIP.

Requirements for the Art History Minor**Number of Units**

Six units are required. A SIP is not counted as part of the six units.

Required Courses

ARTX 145 Survey of Art I: 1100-1600

ARTX 150 Survey of Art II: 1600-1945

ARTX 224 Art Since 1945

Additional Courses

One Ancient Course: ARTX 208 Introduction to Greek Art and Archaeology or ARTX 209 Introduction to Roman Art and Archaeology

One Topics Course: ARTX 223 The Long 19th Century, ARTX 227 Seeing and Perceiving in the Modern Museum, or ARTX 290 Art and Gender

One Additional Unit: Selected from any of the Art History offerings, including one-time offering or the alternatives listed above; ARTX-491: Ways of Seeing is strongly recommended.

Senior Individualized Project (SIP)

All SIPs are to be advanced-level work. Students are expected to complete preparatory coursework and seek out a SIP advisor in the department prior to the fall of their senior year. Proposals must meet departmental expectations for Studio Art and Art History SIPs. Approval is based on the quality of the proposal, the student's preparation for the proposed topic, and the faculty advisor's ability and availability to supervise the proposed topic, approach or technique.

A Senior Individualized Project in art for a non-major is possible only if the student has taken the relevant courses in the department and secures approval for the proposed project.

Studio Art SIP Guidelines

SIPs in Studio Art are usually one unit, typically executed in the winter quarter of senior year. The bulk of a Studio Art SIP includes the creation of a significant body of artwork in an area of focus. Students should have considerable experience, including at least one intermediate/advanced course, in the medium or area of the SIP. Sculpture and ceramics students should take at least three sculpture or ceramics courses, respectively. All Studio Art majors are required to enroll in ARTX490 (Advanced Studio) in the fall before the SIP; this may also be required for non-majors who plan to do Studio Art SIPs. Beyond the production of work, the SIP consists of a midterm and final defense of the project. The SIP document (a reflective narrative description of the project with the addition of supporting research, materials and images) will be due upon completion of the creative work. The student will also have the opportunity to have an exhibition and public presentation of their completed project during the spring term.

Art History SIP Guidelines

SIPs in Art History are usually a one-unit research SIP.

The research SIP (one unit) is a paper of 40 to 50 pages on a topic in which the student has sufficient background to do advanced research. The topic must be approved in consultation with the SIP advisor prior to the fall of the senior year. Students are required to enroll in ARTX-491: Ways of Seeing in the fall quarter of their senior year in preparation for writing their SIP in the winter quarter.

Internship SIP Guidelines

The internship portion of an Internship SIP usually takes place during the summer between the junior and senior year. Students participate in an arts internship that will be a substantial experience, with most students working for approximately 20-30 hours a week. Students should consult with a faculty member about their plans and internship applications early in their junior year and no later than the end of winter quarter.

Studio Art Internship SIP students should register for a one-unit summer SIP. The SIP internship documentation (detailed daily journal, descriptions of the institution and personnel, 15-page research paper, reflective essay) is due at the beginning of the fall term.

The Art History Internship SIP frequently takes place in a museum or gallery. Students should register for a one-unit winter SIP. Students are also required to enroll in ARTX-491 Ways of Seeing in the fall quarter of their senior year prior to the completion of their written documentation and research paper during the winter quarter of the senior year.

Art History courses

ARTX 145 Survey of Art I: 1100-1600 This survey course focuses on painting, sculpture, manuscripts, and architecture produced in the Christian and Islamic worlds from the 12th through 17th century. We will consider the visual cultures of cosmopolitan cities such as Paris, Isfahan, Venice, and Constantinople, which were centers of power as well as points of exchange. Throughout the course, we will think about how objects structured both religious practices and complex relations between different social groups. Major goals of the course include honing skills in looking critically and using art historical terms to interpret works of art.

ARTX 150 Survey of Art II: 1600-1945 Artistic revolutions from the 17th through the 20th centuries in the East and West caused radical visual and institutional transformation. This course surveys the development of modern art from a global perspective, tracing the influence of East and West upon one another from the Rococo to the Neoclassical, from Romanticism to Realism, to Cubism, Expressionism, and Postmodernism. We will examine how artists interpret the world around them and how these interpretations change over time.

ARTX 195 Art, Power, and Society At the heart of art history is a desire to understand the complex ways art functions within various systems of power: who made it, who possesses it, how it circulates, and who benefits. The overarching goal of this course is to make visible the processes by which the invisible power of cultural hegemony operates. Through reading, writing, discussion, site visits, and guest lectures, we will explore various questions that seek to probe the relationship between art, power, and society. Our case studies will range widely through time and space, from Silla dynasty Korea to present-day Bronson Park in Kalamazoo.

ARTX/CLAS 208 Introduction to Greek Art and Archaeology This introduction to the multidisciplinary field of Greek archaeology examines the art and architecture of the Greek world from a contextual perspective. The course traces Greek material culture from Bronze Age origins through Hellenistic transformations. (This is a designated Greek literature or culture course in Classics.)

ARTX/CLAS 209 Introduction to Roman Art and Archaeology This introduction to the multidisciplinary field of Roman archaeology examines the art and architecture of the Roman world from a contextual perspective. The course traces Roman material culture from Iron Age and Etruscan origins through Early Christian transformations. (This is a designated Roman literature or culture course in Classics.)

ARTX 215 A History of Photography Photography was invented at two different geographic locations more or less simultaneously, which coincided with the rise of the modern political state and the industrial revolution in Western Europe. This course is a survey of that medium, and its cultural implications, from the beginning in France and England in the early 19th century, through the modern era of the 20th century, to touch upon conceptual, postmodern, and contemporary trends.

ARTX 221 Renaissance Art I This course provides an introduction to the art and visual culture of Northern Europe in the period between c. 1350 and 1600. Artists such as Jean Fouquet, Jan van Eyck, Hieronymus Bosch, and Albrecht Dürer famously experimented with new pictorial genres and illusionistic techniques in large-scale religious works, including altarpieces, as well as smaller works intended for private display. We will explore how methods of representation were related to social developments, including new forms of piety, technological innovations, and changes in the art market. Toward the end of the course we will consider the topic of idolatry and iconoclasm during the Protestant Reformation, examining how religious conflicts affected contemporary attitudes toward images.

ARTX 222 Renaissance Art II A strong papacy and its patronage in 16th-century Rome brought Michelangelo, Raphael, and many others from Florence and other cities to work there. They established an idealized classical style that was soon transformed into elegant, anti-classical Mannerism in much of Italy. At the same time, Venetian painters developed a distinctive style, less classical but more sensual.

ARTX 223 The Long 19th Century Eric Hobsbawm coined the period of time from the French Revolution to the end of WWI as "The Long 19th Century." This course takes a selective, topics-based approach to exploring this period of rapid change in the visual arts. We will explore how the creation and distribution of art from both the metropole and the periphery led to a visual revolution, creating many of the conditions for the modern visual world we exist in today.

ARTX 224 Art Since 1945 Painting, sculpture, architecture, performance, and installation art from approximately 1945 to the present day. The emphasis will be on examining the visual arts of this period from both a formal and socio-historical standpoint, using primary texts such as artist manifestos and the writings of critics to help guide an understanding of the visual. In the process, we will seek to better understand how the terms "modern," "postmodern," and "global," were expressed, evaluated, defined and shaped in the visual arts during the latter half of the 20th century.

ARTX 227 Modern Art Museum This course addresses the ideological aims and critical functions of art museums, from the 19th century to the present day. Course topics include: the origins of the modern art museum, the politics of collecting and exhibiting art, the ethics of collecting practices, and the relationship between art history and the museum. Case studies of curators and artists who have pushed the boundaries of traditional museum display will be used to examine how the relationship between objects, artists, and institutions has changed over time.

ARTX 260 Baroque Art In 17th-century Europe, exploration and scientific discovery expanded the world. Similarly, beginning in Rome, artists such as Caravaggio and Bernini both expanded and modified Renaissance innovations. Artists from all over Europe flocked to Rome, and Flemish, Spanish, French, and even some Dutch painters were transformed there, but political, religious, and cultural differences modified the styles they practiced when they returned, and those of other painters who had never left.

ARTX 290 Art and Gender This course explores the intersection of visual culture and gender through the lens of critical theory. We will examine how gender has been constructed both in and through the visual arts historically as well as in the present through various interrelated topics such as the myth of the artist; the gaze, the voyeur, and desire; the gendered body in visual art; and the gendered body's intersection with race, class, and sexual orientation.

ARTX 295 Public Art and Its Public(s) in the United States In the history of art, public art has been the source of much commentary and controversy. After all, to call an artwork "public" is to suggest that it belongs to everyone-"the public"-and thus that anyone might have a say in it. But what makes an artwork public? This course is an opportunity to reflect on this and other questions, as we explore shifting conceptions and practices of public art in the United States from the 18th Century to the present, when older models of site-specific public art objects have ceded to an emphasis on community-oriented "social practice."

ARTX 295 Art and Environmental Justice This interdisciplinary course explores the relationship between contemporary art-making practices and environmental justice concerns. With the recent devastation of the Flint water crisis, the Dakota Access Pipeline, and continually increasing global temperatures, this seminar examines how visual artists have explored the ecological crisis through various modes of mediation, including installation, performance, and socially-engaged art projects. The course combines readings in art history, critical theory, and environmental studies in conjunction with individual and group studio practice. While no prior experience in art is required, this is a jointly-conceived seminar in studio art and art history, so research effort will be manifested through reading, writing, and making. Contributes to the Environmental Studies Concentration.

ARTX 395 Art & Revolution in Russia, 1910-1935 This course introduces students to the highly experimental art created prior to and immediately following the Russian Revolution. Looking first to Paris for models of avant-garde painting, these artists quickly started to apply theoretical political models to radical modes of making: constructions, textile design, advertising, furniture, photography, and film. The artists' unique commitment to both utopian politics and modern formalist techniques was a distinctive combination that would decidedly distance them from the advent of Soviet Realism and Stalinism. The course is formed around intensive reading of primary and secondary sources, class discussion, and written responses. Prerequisite: Take at least one (1) 100- or 200-level art history course or by permission.

ARTX/WGS 395 Performance Art in the 20th C. This course examines the dynamic history of performance art in the twentieth century, from the historical avant-garde to contemporary practices. A chronological exploration of performance art, the course also studies the themes inherent to live performance works, most especially gender, sexuality, and race. We will trace the alternative models of artistic-subjectivities and spectatorship produced when the body - and its vulnerabilities - is the subject of art. Such themes include: the politicization of daily life; the problem of documentation; the inherent narcissism of body art; the role(s) of the body in psychological and phenomenological experience; and the body and its modern mechanizations.

ARTX 491 Ways of Seeing: Methods in Visual Analysis This course begins with a basic but fundamental question: how do we describe what we see? We will explore how philosophers, artists, and critics have grappled with this issue throughout history, seeking to understand the critical issues that can arise when communicating vision in verbal form. Because the practice of art history rests upon translating the expressive content of the visual world into words, a significant component of this class will focus on methodology, writing, and the critical analysis of classic theoretical texts that have formed the approach and structure of the discipline. Art and art history majors should plan to take this course during the fall of their senior year. Offered Fall. Prerequisite: Two Art History courses and Senior Standing

ARTX 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum (Curriculum Details and Policies) section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Studio Art courses

ARTX 105 Basic Drawing This course is a study of drawing fundamentals, with emphasis on line, value, and shape organization as instruments of precision and expression. Students planning to major or minor in art should take this course by the spring quarter of the sophomore year. Prerequisite: Open to First-Years & Sophomores

ARTX 110 Digital Art The course provides the student with a working knowledge of, and skills associated with, computer-based art production. We will be using Macintosh computers with Adobe software (both raster- and vector-based programs). Early the student will create work that consists primarily of images and text, but later will move to time-based and/or conceptual forms. To help contextualize this kind of artistic production, participants will spend some time looking at a brief history of digital art as well as its relationship to artwork in general.

ARTX 115 Digital Photography The objective of this studio art course is to provide the student working knowledge of, and experience with, the fundamental creative tools used in fine art photographic practice. We will use digital cameras, optimize with Photoshop, and make archival pigment prints in the Center for New Media. Participants learn to analyze and discuss their work in critiques; discussion will be centered on technical, formal, and conceptual characteristics. We will also discuss subject matter and content and the difference between the two. In this critical "reading" of images, like that of a text, we will explore the basics of visual literacy. A digital camera with manual exposure capabilities is required.

ARTX 125 Ceramics: Wheel Throwing In this course, students explore clay through the use of the potters' wheel, their hands and class discussion. Course content is focused on the role of function in relation to utilitarian wares for sharing and serving food. Individual students will reflect on their personal experiences with food in an attempt to better understand the potential and specific use of pottery forms. Students will also be encouraged to consider new ideas and challenge themselves in regards to form, function and technique, as they develop technical abilities and a broader understanding of the possibilities of clay and pottery forms.

ARTX 128 Painting: Traditional Practices This course is an introduction to traditional oil painting techniques. Students will work directly from life whenever possible and will have the opportunity to work from still life, landscape and the human figure. The course will emphasize working methods that stress critical judgment, mark making, space, color, light and composition from direct observation.

ARTX 134 Sculpture: Object Investigation This hands-on studio course investigates how objects are created, used, transformed and/or combined to make art. Student projects may be fabricated from found objects, wood, paper, fabric, 3D printing, and "non-traditional" materials. Concept-driven assignments ask students to create work that addresses the presence, history, meaning, materiality, and form of objects. Assignments also incorporate fundamentals of three-dimensional design. Discussion and critiques focus on issues prominent in contemporary art. This course includes a series of woodshop trainings outside of class time and is designed to be accessible to non-majors at any point in their academic career and may be of particular interest to students in anthropology, psychology, biology, literature and philosophy, in addition to a major in studio art.

ARTX 200 TV Production Designed for students with significant involvement in producing Kalamazoo College TV productions and production studio work. Students must meet a minimum 30-hour commitment within one term to receive 1/4 unit of credit. Various activities may include: studio equipment operator, producer, director, writer, and talent. There is no limit on how many times a student may repeat the course, but a student may only receive credit for one unit. Cannot be used for the Art History, Studio Art, or Art and Art History majors or minors. Does count towards Media Studies Concentration.

ARTX 201 Visual Fundamentals This course explores the basic elements (line, shape, repetition) and principles (figure/ground relationships, emphasis) of visual art and design. Basic color theory is also covered. Critical discussion accompanies a sequence of hands-on studio exercises and projects, which include work in collage, drawing, painting, and digital imaging. Readings and discussion will also be included as an art theory primer. Prerequisite: ARTX-105, ARTX-110, ARTX-115, or ARTX-128

ARTX 203 Figure Drawing Figure drawing focuses on drawing issues related to working from the nude model while emphasizing proportion, foreshortening, and planar structures of the figure. Students will work from very short poses to extended poses, creating drawings with approaches uniquely designed for drawing the figure. This course continues the process begun in basic drawing of building a solid foundation in drawing skills through observation. Students aim to develop sensitivity to the structure, anatomy and expressive qualities of the human form. Homework is assigned for each class period and there is an evening drawing session on Wednesday nights for the purposes of completing assignments. Prerequisite: ARTX-105

ARTX/SEMN 206 Ceramics: World Pottery World Pottery is a hands-on studio course with significant research and reflection components. Class time will be used to introduce students to a variety of clay bodies and clay-forming techniques from historical and regional perspectives (wheel-throwing will not be taught). Creative assignments ask students to consider and critique the role of cultural exchange and image appropriation within historical ceramics and in their own creative work. Projects will also investigate the roles of different types of pottery within contemporary American society, as a point of reference and departure. Each student will propose, execute, and present a research project. Lectures, critiques, and discussions will focus on individual and societal assumptions about pottery. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

ARTX/SEMN 214 Framing Difference This course will combine research and studio components, split more or less evenly. The research topic, broadly painted, will be fine art documentary practices, grounded with an entry-level hands-on studio component (using both film and digital photography). There are two motivations for this course: to give students creative control of photographic tools (technical, formal, conceptual) prior to their leaving for study away, but also to explore the issues and ethics of photographic documentary practice. While the broad research topic is documentary practice (theory/tradition), this course will place particular emphasis on the ethics of photographing outside of one's own group. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only.

ARTX 220 Ceramics: Clay in Community Throughout the term, students use clay as a sculptural medium through the use of traditional, exploratory, and experimental hand building techniques. Concepts/topics for creative projects address definitions of space, place, community, and participatory art. Civic engagement sections may include lab hours spent with an off-campus community partner. Civic engagement sections will focus on a specific theme addressing access and equity, as they exist in our own lives and within the greater Kalamazoo community. Technical, contextual, and conceptual considerations specific to ceramics are also covered. Wheel-throwing will not be taught.

ARTX 228 Painting: Contemporary Practices This course is designed for students who have had some previous studio art experience in painting, drawing, or design. Some knowledge of drawing and composition will be expected of students enrolling in this course. Students will learn about modern and contemporary issues in art and will be asked to produce work that investigates some of these themes. The primary medium for the class will be acrylic paint, but students will be encouraged to experiment with mixed media and alternative materials. In addition to technical experimentation students will address complex conceptual issues. Students will have the opportunity to explore a variety of styles and approaches to painting. Prerequisite: ARTX-201 (old ARTX-100) or ARTX-105 or ARTX-128

ARTX 230 Analog Photography This course provides the student working knowledge of, and experience with, the fundamental creative tools used in fine art photographic practice using traditional (analog) processing and printing techniques. In addition to producing chemically based photographs, participants learn to analyze and discuss their work in critiques. To inspire and contextualize we will view historical examples from the Daguerreotype to contemporary practice. Assignments will be directed (to make the most of the inherent aspects of traditional analog materials) but will be open to interpretation. Students interested in pursuing photography at the advanced level are encouraged to take Digital Photography prior to Analog Photography, if possible.

ARTX 233 Printmaking An introduction to and development of basic techniques in intaglio and relief processes. Linoleum cut, wood cut, etching, and soft ground techniques will be some of the print methods explored. Prerequisite: ARTX-201 (old ARTX-100) or ARTX-105

ARTX 234 Sculpture: Structure and Space This mixed-media studio course explores concepts of structure and space as source material and necessary elements in the creation of sculpture and installation art. Assignments incorporate the use of linear and planar art materials, fundamentals of three-dimensional design, concept and critical thinking skills. Materials may include wood, paper, cardboard, wire, string, fabric and/or other non-traditional materials. Material skills are developed through experimentation and exploration, as opposed to technical demonstrations with the exception or a woodshop practicum that takes place during evening and weekend woodshop hours. Readings, discussion and critiques focus on issues prominent in contemporary art. This course is recommended for art majors and non-majors at the sophomore level and above and may be of particular interest to those pursuing studio art, physics, engineering, architecture, sociology and philosophy. Students interested in pursuing sculpture at the advanced level should also take Object Investigation prior to enrolling in Structure and Space, if possible.

ARTX 240 Watercolor This course is an exploration of basic watercolor techniques to help assist students in developing the necessary skills to work independently in this medium. Technical experiments, wash painting, and wet-into-wet techniques teach students to control the medium and layer color. Students learn to work for an extended period of time on one piece, eventually developing their own subject matter and content. Prerequisite: ARTX-201 (old ARTX-100) or ARTX-105

ARTX 250 Introduction to Documentary Video Production Designed to introduce students to the fundamentals of documentary filmmaking, this course will cover every aspect of the craft, beginning with pre-production through production and post-production. Students will learn to generate story ideas, interview subjects, transcribe and write scripts, capture and log footage, and edit finished films with music and graphics. Class lectures will prepare students to accomplish every step of the process; students will then work outside of class time to apply the techniques and skills. Students will also watch scenes from films and critique them as to style, content, and narrative structure. Ethical issues pertaining to documentary filmmaking will also be discussed. Equipment will be provided, but students will need to purchase a SDXC card and hard drive.

ARTX 295 Ceramics: Intermediate Wheel Throwing This course will explore the possibilities of personal expression and function in the ceramic medium with a focus on traditional wheel throwing. Hand building and altering techniques will also be covered in challenging new ways. Pottery offers a unique historical and cultural context. Discussions and assignments will reflect on those contexts as well as the value of handmade pottery and the role of object makers in contemporary society. Students enrolling in this course must have taken Artx125 or another college level wheel throwing course. Prerequisite: ARTX-125

ARTX 295 Ceramics: Handbuilding and Ekphrasis The overarching theme is "Ekphrasis", meaning to translate one work of art into another using a different material (e.g., writing a poem about a painting). Historically potters have replicated objects traditionally made in other materials; there is a contemporary art trend whereby artists remake and reenact artworks. We will research this inclination, and through our making investigate the allure, the controversy and the substance surrounding reconstructing. Through the use of traditional, exploratory and collaborative techniques we will make functional and sculptural work. Basic clay and glaze technology are covered through concept-based projects addressing form, surface treatment, translation, and appropriation.

ARTX 301 Advanced Documentary Video Production Advanced Documentary will reinforce skills and explore alternatives to the techniques and aesthetics learned during the Introduction to Documentary course (ARTX-250). Students will be taught a broader repertoire of techniques and skills beyond the introductory level with respect to proposing a story, interviewing subjects, transcribing and writing a script, capturing and logging footage, and editing finished films with music and graphics. Students will individually produce between three and four short documentaries that incorporate every step of the filmmaking process. Class lectures will examine the structure and technique of films; students will then work outside of class time to apply what they have learned. Prerequisite: ARTX-250

ARTX 316 Intermediate Photography Photography taught as a creative and expressive medium from a fine art perspective. In this course, the student will expand their knowledge, skills, and experience in the medium by focusing on an individual project for the duration of the term. The student can use either analog or digital tools to create this small body of work. Critiques will be held and a written component will be due as well (structured reflection and artist statement). A camera with manual exposure capabilities is required. Prerequisite: ARTX-230 and ARTX-115, ARTX-214, or SEMN-214

ARTX 320 Intermediate Ceramics: State of Clay The intermediate levels of Ceramics: Hand Building and Ceramics: Wheel Throwing are taught as one joint course in the same time slot. Concept-based and technical assignments are designed to be accessible and applicable for both sets of students. Assignments help students question what it means to choose clay as a medium while developing a more advanced body of work. Lectures and discussions focus on the expanding role and definition of ceramics within contemporary art, with an emphasis on the development of American ceramics in the twentieth and twenty-first centuries. Basic clay, glaze and firing technology are covered through a series of technical labs. Offered Spring (odd years) Prerequisite: ARTX-220 or ARTX-125 (Both are preferred). Students may also use ARTX-206 or SEMN-206 as a prerequisite with instructor permission.

ARTX 327 Sculpture: Mold Processes A ceramics and sculpture course focusing on the many techniques of mold-making as a means to create and reproduce forms. Assignments and discussions geared towards the use of multiples and repeated forms in art. Materials include wax, clay, plaster, and non-traditional materials. Prerequisite: Take one of ARTX-134, ARTX-135, ARTX-234, or ARTX-220.

ARTX 328 Intermediate Painting This course builds upon the conceptual approach to painting that began in Painting: Contemporary Practices and will emphasize individual direction and innovation. Most assignments will begin with an introduction to a broad contemporary theme in the visual arts and will ask students to respond to some aspect of the topic by generating artwork. The last three weeks will be given over to a series of works that address one of the topics covered earlier in the quarter or a topic that a student has a particular interest in investigating. Prerequisite: ARTX-228

ARTX 330 Alternative Photographic Processes The objective of this intermediate (and specialized) studio art course is to provide the student working knowledge of, and experience with, large format view-cameras and alternative photographic printing processes. In addition to producing photographs using these admittedly obsolete tools and materials, participants learn to analyze and discuss their work in critiques. Through this study, as well as the production of a small body of work, each student should finish this course with a deeper understanding of photographic practice. No equipment is necessary for enrolling in this course, as the college will provide several view cameras that students will share. Prerequisite: ARTX-115, ARTX-116, ARTX-214 or ARTX-230

ARTX 335 Intermediate Sculpture Students may register for Intermediate Sculpture in their junior or senior year, once they have completed at least two other sculpture courses and if Mold Processes is not offered during the term of registration. Individualized projects and assignments build on concepts and skills developed in earlier courses. Emphasis will be placed on portfolio development in preparation for advanced-level work. Intermediate students are required to attend meetings for an introductory course in sculpture throughout the term where they participate in critiques, conduct a research presentation and help mentor lower-level students. Prerequisite: Take two courses from ARTX-134 ARTX-135 ARTX-234 and ARTX-327

ARTX 416 Advanced Photography Photography taught as a creative and expressive medium from a fine art perspective. In this course, the student will continue to expand their knowledge, skills, and experience in the medium by focusing on an individual project for the duration of the term. The student can use either analog or digital tools to create this small body of work. Critiques will be held and a written component will be due as well (structured reflection and artist statement). A camera with manual exposure capabilities is required. Prerequisite: ARTX-316

ARTX 420 Advanced Ceramics Students may register for Advanced Ceramics in their junior or senior year, once they have completed at least three other ceramics courses. In consultation with the faculty, students develop the content and methodology that they feel fits their own personal objectives as artists. Emphasis will be placed on portfolio development and learning to function as an independent artist. Advanced students are expected to attend meetings for an introductory or intermediate course in ceramics throughout the term where they participate in critiques and help mentor lower-level students. Prerequisite: ARTX-320; ARTX-125; ARTX-220

ARTX 428 Advanced Painting The objective of this course is to help students develop direction in their art and to produce a coherent body of work. Students will be considered independently working artists responsible for developing the content and methodology that they feel fits their own personal objectives as artists. Placing their own work in the context of current trends and art history will help students produce artwork that is both personally satisfying and artistically significant. This course is intended for students who are considering graduate school or a career in studio art. Prerequisite: ARTX-328

ARTX 435 Advanced Sculpture Students may register for Advanced Sculpture in their junior or senior year, once they have completed at least 3 other sculpture courses. In consultation with the faculty, students develop the content and methodology that they feel fits their own personal objectives as artists. Emphasis will be placed on portfolio development and learning to function as an independent artist. Advanced students are expected to attend meetings for an introductory or intermediate course in sculpture throughout the term where they participate in critiques and help mentor lower-level students. Prerequisite: Permission

ARTX 490 Advanced Studio Advanced Studio is a senior-level Shared Passages Seminar for studio art majors and/or students planning a studio SIP. The many facets to this course are designed to emulate both the SIP process and an independent studio practice and include a) the creation of a body of artwork b) research of topics relevant to your project c) contextualizing your work by deepening your knowledge of contemporary artists/theory in your area of focus and d) participating in professional practice exercises, exhibitions and written work. Students in this course come together, regardless of preferred media, to support and challenge each other as they develop their own contemporary practice. Class time is used for critiques, presentations, discussions and professional exercises and does not usually include open studio time. Prerequisite: Senior art majors with at least one 300-level studio art course; non-majors with permission.

ARTX/SEMN 496 S.P.A.C.E. Experience or "S.P.A.C.E." is a senior-level civic-engagement art course that explores the relationship between Art and Activism, Social Justice, Community and/or Civic Engagement. This course is designed to be a collaborative experience for students from multiple disciplines and majors, regardless of prior experience in art. Throughout the term, students work together in small groups similar to mini "think tanks". Course content focuses on collaborative approaches to creating art for and with communities, with an emphasis on socially-just practices. Among the questions students will investigate during the term are: "How can art facilitate our experiences in public and private spaces? Who has access to a space? How do we share space and interact within it? What is the potential of the artist as an agent of change?" Professional skills such as responsible engagement, grant seeking/writing and project design will also be covered. Class and project workspace is housed in the Kalamazoo College Community Studio in the Park Trades Center. Each student will engage in a field experience, working with an organization or program in the city of Kalamazoo, for the duration of the term. This course is a Shared Passages Senior Capstone. Prerequisite: Seniors Only

Biology

Professors: Fraser, Girdler (Chair, W,S), Langeland, Moore (Chair F), Salinas, A. Wollenberg, M. Wollenberg

The mission of our department and curriculum is to educate students in the field of biology and within the context of a Kalamazoo College liberal arts education. Through our courses, research collaborations, and advising we help each of our students become an intrinsically motivated, self-directed learner who enjoys a biologist's keen awareness of the natural world. Specifically, we foster development of the following attributes in our biology majors: 1) knowledge of the diversity of living organisms and levels - from molecules to ecosystems - at which those organisms can be studied; 2) understanding of how organisms are affected by their evolutionary and developmental trajectories and how these are influenced by environmental contingency; 3) ability to discover new biological knowledge and then communicate it effectively to others; and 4) curiosity about and empathy toward our shared environment.

Requirements for the Major in Biology

Consonant with the experiential-learning focus of the *K-Plan* and motivated by the biology department mission, our emphasis on an empirical approach to biology creates an environment in which students develop a strong foundation in biology. We encourage our students to ask and seek answers to probing questions, interpret primary literature, design and perform experiments, and make original observations of biological phenomena. The developmental progression from introductory core courses through upper-level electives prepares students well for the challenges of carrying out their Senior Individualized Projects, presenting results of those projects at our annual Diebold Symposium, and then continuing their education or seeking employment after graduation.

Number of Units

- A minimum of nine biology courses (five required and four electives) and four cognates exclusive of lab credit, all at C- or better are required to complete a major in biology.
- Among biology electives, at least three must be at the 300 level or higher, two of which must be a lab course. Other than BIOL 112 and BIOL 123, students may not count 100-level courses towards units required for the major.
- Biology majors are encouraged to complete their Senior Individualized Project in biology.
- The biology department will accept for credit in the major a maximum of one unit from the following sources:
 - AP/IB credit (if score on Biology AP exam is 4 or 5, or score on IB exam is 5 or above)
 - Study Abroad course in biology
 - Dual enrollment or transfer course in biology
 - A SIP in biology

Required Courses

BIOL 112 Evolution and Genetics with lab
BIOL 123 Form and Function with lab
BIOL 224 Ecology and Conservation with lab
BIOL 246 Cell and Molecular Biology with Lab
BIOL 490 Functioning as a Biologist

Four cognates:

CHEM 110 (Chemical Composition and Structure), CHEM 120 (Chemical Reactivity), and CHEM 210 (Organic Chemistry I) as well as one of the following courses: CHEM 220 (Organic Chemistry II) or MATH 261 (Biostatistics). Because BIOL 246 requires Organic Chemistry as a prerequisite, CHEM 110, CHEM 120, and CHEM 210 must be completed before enrolling in BIOL 246.

Comprehensive Examinations

Senior biology majors are required to take a written comprehensive examination as part of BIOL 490.

Related Concentrations

Students interested in the following concentrations should refer to the full program descriptions and requirements provided in this catalog.

- Biochemistry and Molecular Biology
- Biological Physics
- Community and Global Health
- Environmental Studies
- Neuroscience

Biology Courses for Nonmajors

All biology courses at the 100 level are open to nonmajors without prerequisite. Courses we offer for nonmajors have goals consistent with those for the biology curriculum focused on majors. To attain those goals, general education courses directed primarily at students not majoring in biology should help students:

- Appreciate, understand, and engage in the process of doing science.
- Evaluate validity of scientific communications. For example, our students should be able to read, understand, and evaluate any *New York Times* article, especially those in the Tuesday Science Times.
- Be comfortable with ambiguity and uncertainty.
- Learn that science is a fascinating human endeavor, applicable to everyday life.

Biology courses

BIOL 112 Evolution and Genetics with Lab An introduction to principles of evolution and genetics. Includes a comprehensive overview of genetics from molecular, classical, and population perspectives, as well as in-depth treatment of evolutionary mechanisms, phylogenetic analysis, and the history of life on Earth. Laboratories include the purification and analysis of DNA, *Drosophila* and bacterial genetics, computer and class simulations of evolutionary processes, and bioinformatics.

BIOL 115 Environmental Science In this course you will (1) build a basic understanding of the physical and natural systems that make up the biosphere on Earth (land, water, atmosphere, and life) stressing the dynamics of these interconnected systems; (2) develop a scientific understanding of the causes and consequences of several of the major environmental problems facing today's society; (3) acquire the tools to enable you to think critically about other current and future environmental challenges you will face as a member of contemporary society. One weekend field trip is required. Intended for non-majors and as an entry to the Environmental Studies Concentration.

BIOL 123 Form and Function with Lab Organism-level phylogeny, morphology, and physiology are the major subject areas of this course; organisms interacting with, and adapting or adjusting to, their environments is the underlying theme running through these subject areas. Through this course students will learn how the environment, biotic and abiotic, shapes the form (morphology) and function (physiology and behavior) of organisms over ecological and evolutionary time.

BIOL 200 Research Apprenticeship in Biology Apprenticeships intended to provide opportunities for biology majors to become regularly involved in ongoing research projects with faculty, either with the same faculty member for a number of quarters or with different faculty in different quarters. A minimum of 50 hours of work is expected for each quarter. Three apprenticeships earn one full unit toward graduation.

BIOL 222 Vertebrate Biology with Lab Broad-based study of comparative anatomy and life histories of adult vertebrates and how these influence our understanding of vertebrate phylogeny; laboratories in comparative anatomy and diversity of vertebrates. Prerequisite: BIOL-123 All course prerequisites must be met with a minimum grade of C-.

BIOL 224 Ecology and Conservation with Lab Ecology is rooted in natural history, the description of organisms in their environments. Ecologists study interactions in nature across many levels of biological organization, from individuals to populations, communities, ecosystems, and, finally, the entire biosphere; this course is organized along this continuum. How do we explain the distribution and abundances of organisms? How do populations of different species interact as competitors, as predators and prey, as pathogens and hosts, and as mutualists? And finally, given the planet-wide environmental impact of our species, how can ecologists apply their knowledge to the conservation of natural resources? Prerequisite: BIOL-123 All course prerequisites must be met with a minimum grade of C-.

BIOL 232 Plant Biology with Lab In this course we will explore the consequences of being a plant: they make their own food; generally they are stuck in one place; they are as dumb as posts; they are modular; they have some very cool genetics; they have evolved some critically important symbioses with bacteria and fungi. Moreover, plants can live without us, but we cannot live without them. We will review the plant kingdom generally, but we will focus on the angiosperms (flowering plants), covering broad aspects of structure, development, growth, and reproduction. Laboratory will focus on field identification and ecology. Prerequisite: BIOL-123 or Permission All course prerequisites must be met with a minimum grade of C-.

BIOL 246 Cell and Molecular Biology with Lab The complex workings of individual cells will be explored from a molecular perspective. Topics include the flow of genetic information, cell structure and mechanics, metabolism, cell signaling, and regulation. An integrated laboratory will introduce cutting-edge cell and molecular techniques, including cell culture, transfection, immunoprecipitation, electrophoresis, and Western blotting. Prerequisite: BIOL-112 and CHEM-210 All course prerequisites must be met with a minimum grade of C-.

BIOL/PSYC 290 Animal Behavior with Lab The study of animal behavior seeks to describe and explain behavior on multiple levels - from underlying physiological causation to evolutionary origin. Using examples from barnacles and worms to birds and mammals, this course examines behaviors such as orientation, communication, foraging, territoriality, reproduction and sociality. Through lectures, research literature and laboratory studies students will build proficiency in designing, conducting, analyzing and evaluating behavioral studies and gain new appreciation for the subtlety and complexity of behavior and its application to fields such as animal welfare and conservation. Prerequisite: BIOL-112, or BIOL123, or PSYC-101 All course prerequisites must be met with a minimum grade of C-.

BIOL 295 Computational Tools for Biologists Students progress through the biology major at K learning about many laboratory tools that biologists use to perform research. One tool that is essential for modern biologists is the personal computer. Simply put: modern biology research requires a working knowledge of computers and scripting. This course introduces students to their personal computer and teaches them the possibilities of basic shell use, scripting (with the Python language), simple relational database creation and use, and basic graphics manipulation in a practical, problem-based framework. This course aims to help sophomores/juniors learn these skills in preparation for their SIP research and future biology research. Prerequisite: BIOL-112 and BIOL-123 or permission of instructor

BIOL 312 Population and Community Ecology with Lab This course builds upon principles studied in BIOL 224. Using both theoretical and empirical approaches, we will explore in greater depth: population ecology, demography, life history strategies, species interactions, community structure and dynamics for both aquatic and terrestrial communities. Labs will focus on the methods ecologists use to answer questions about the distribution and abundance of organisms; students will explore local habitats and conduct independent research. Prerequisite: BIOL-224 All course prerequisites must be met with a minimum grade of C-.

BIOL 322 General and Medical Microbiology with Lab This course includes a general introduction to microbiology including the structure and function, metabolism, and genetics of bacteria, archaea, viruses, and eukaryotic microbes. This basic introduction is expanded by topics including the roles of microorganisms in biogeochemical cycling, food microbiology, the pathogenesis of infectious diseases, and the benign and beneficial role that microorganisms play in the human body. Labs will focus on using standard microbiological techniques (e.g. sterile technique, dilution and culture-dependent assays, microscopy, molecular and computational biology) as tools for inquiry-based explorations of the microbial world. Prerequisite: BIOL-246 All course prerequisites must be met with a minimum grade of C-.

BIOL 350 Neurobiology with Lab Structure and function of the nervous system will be considered, in addition to the molecular and cellular workings of individual neurons. Topics include cell biology of neurons, electrophysiology, sensory and motor systems, brain development, and dysfunction of the nervous system. An integrated laboratory will focus on neuroanatomy, histology, physiological simulations, and neuronal cell culture. Prerequisite: BIOL-246 or Permission All course prerequisites must be met with a minimum grade of C-.

BIOL/CHEM 352 Biochemistry Overview of the chemical mechanisms underlying biological processes including structure and function of proteins, polysaccharides, and lipids; enzymatic catalysis and kinetics; an introduction to bioenergetics; detailed treatment of carbohydrate metabolism; survey of lipid and amino acid metabolism; and integration of metabolism. Prerequisite: CHEM-220. All course prerequisites must be met with a minimum grade of C-. Prerequisite: CHEM-220 All course prerequisites must be met with a minimum grade of C-.

BIOL/CHEM 352L Biochemistry Lab Overview of basic biochemical laboratory techniques with emphasis on protein isolation and characterization, enzyme kinetics, and bioinformatics. Students will devise and execute independent research projects as part of the course final project. Laboratory and scientific writing, oral communication, and preparation of quality figures and tables will also be emphasized. Prerequisites: CHEM-220 and CHEM/BIOL352 (can be taking concurrently). All course prerequisites must be met with a minimum grade of C-. Prerequisite: CHEM-220, Minimum grade of C- CHEM/BIOL-352 Lecture must be taken previously or concurrently

BIOL 360 Immunology and Human Health with Lab Introduction to basic principles of the mammalian immune system, including recognition of pathogens, mechanisms of pathogen clearance, the regulation of immune cells, and the evolution of immunity. We will explore current topics in immunology and human health, including personalized medicine, the rise of autoimmune diseases, and the cost of health care. Labs will cover both experimental infection models (e.g. nematodes) and molecular techniques in immunology (e.g. nucleic acid analysis). Prerequisite: BIOL-246 All course prerequisites must be met with a minimum grade of C-.

BIOL 376 Human Physiology with Lab This course explores the functioning and regulation of the human body. We will cover a variety of body systems as well as relevant emerging fields (e.g., evolutionary medicine). Emphasis will be placed in unifying themes (integrative physiology, homeostasis and the external environment, the role of evolution in shaping human physiology). Laboratories will include student-led experiments, primary literature discussions, presentations, and case studies. Prerequisite: BIOL-123 All course prerequisites must be met with a minimum grade of C-.

BIOL 396 Entomology with Lab A comprehensive introduction to the biology and classification of insects. Topics covered include insect structure, function, development, behavior, principles of control, identification, systematics, and evolution. Laboratories include field trips to local sites to observe and collect insects, and to view ongoing basic and applied research projects by local entomologists. Students will gain experience in rearing and handling insects. All are required to assemble a collection of local insects. Prerequisite: BIOL-123 and BIOL-224 All course prerequisites must be met with a minimum grade of C-.

BIOL 420 Advanced Molecular Genetics W/ Lab Advanced treatment of principles and methods of modern molecular genetics. Building on principles from core biology courses, this course covers multiple perspectives on genetics, including gene structure and regulation, modes and patterns of inheritance, identification and manipulation of specific genes, as well as population and quantitative genetics. Laboratories feature classical and molecular approaches including gene mapping with *Drosophila*, PCR and sequencing-based human genotyping, and accessing and utilizing bioinformatics databases. Prerequisite: Take BIOL-112 and BIOL-246 All course pre-requisites must be met with a minimum grade of C-.

BIOL 484 Topics in Biology: Neurodegenerative Disorders The molecular underpinnings of nervous system disease and injury states will be investigated. A combination of lectures, discussions, and student presentations of research articles will be employed. Course readings will come exclusively from the primary literature. Topics covered will include neurodegenerative diseases, nervous system injury states, drug addiction, and brain tumors. Prerequisite: BIOL-246 All course prerequisites must be met with a minimum grade of C-.

BIOL 485 Topics in Biology: Trees This course focuses on how trees impact human welfare and influence the environment. We will examine tree structure, physiology and ecology. We will discuss how conventional and urban forests are managed, how fire and climate change influence tree growth and regeneration, and how forests could provide climate change mitigation. We will also examine how trees impact social behavior and provide ecosystem services. Students will discuss current peer reviewed and popular press literature. The class will be discussion, lecture and field based. Students will experience activities that will enhance their understanding and appreciation of trees on campus and at the Lillian Anderson Arboretum.

BIOL 486 Animal Development and Evolution This course will explore the developmental and evolutionary basis of the morphological biodiversity of animals. Topics will include the fundamental pathways by which cells, tissues, organ systems and body plans develop, and how those pathways are modified during evolution. The course will integrate multiple levels of biological organization, ranging from molecular genetics, to cell biology, to organismal biology. Emphasis will be placed on reading and analysis of primary literature. Prerequisite: Must have previously taken BIOL-112; BIOL-123; BIOL-224 BIOL-246; All course prerequisites must be met with a minimum grade of C-.

BIOL 488 Topics in Biology: the Symbiotic Habit A comprehensive overview of current symbiosis research literature, focusing on animal-microbe relationships and with special emphasis on the human microbiome. This course will highlight both model- and non model-based approaches for understanding topics ranging from molecular biology to ecology and symbiotic relationships. Students will be responsible for reading primary literature and participating in discussion, oral presentations, and concise scientific writing. Prerequisite: BIOL-112, BIOL-123, BIOL-224, and BIOL-246 All course prerequisites must be met with a minimum grade of C-.

BIOL 489 Topics in Biology: Chemical Ecology Chemical ecology uses an evolutionary framework to understand the origin, function and significance of the chemistry underlying biological interactions. Through lectures, reading, discussion, student presentations and hands-on exercises we will explore how a diversity of life forms synthesize, use and respond to naturally-produced chemicals at the molecular through ecosystem level. Topics will be investigated from both basic and applied perspectives and include chemical ecology of defense, aggregation, feeding, mating, social interactions and deceit. Prerequisite: Must have previously taken BIOL-112, BIOL-123, BIOL-224, BIOL-246 and CHEM-210; All course prerequisites must be met with a minimum grade of C-

BIOL 490F Senior Seminar (Full Year) Participation in a seminar involving teaching and research in the literature and consideration of current biological questions; preparation for SIP research through literature search and critical discussion of pertinent papers; preparation and defense of completed thesis based upon SIP research. (Fall component of full-year course.) Prerequisite: Senior Standing

BIOL 490S Senior Seminar (Full Year) Participation in a seminar involving teaching and research in the literature and consideration of current biological questions; preparation for SIP research through literature search and critical discussion of pertinent papers; preparation and defense of completed thesis based upon SIP research. (Spring component of full-year course.) Prerequisite: Take BIOL-490F and BIOL-490W and Seniors Only

BIOL 490W Senior Seminar (Full Year) Participation in a seminar involving teaching and research in the literature and consideration of current biological questions; preparation for SIP research through literature search and critical discussion of pertinent papers; preparation and defense of completed thesis based upon SIP research. (Winter component of full-year course.) Prerequisite: Take BIOL-490F and Senior Standing

BIOL 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Biochemistry & Molecular Biology

Professors: Furge, Langeland, Moore, Stevens-Truss (Director)

A major focus of modern scientific inquiry is uncovering the physical and chemical mechanisms underlying biological systems. Therefore, an interdisciplinary concentration in Biochemistry and Molecular Biology is offered for students interested in advanced study at the interface between biology and chemistry. Courses include a selection from the physical and biological sciences; most are laboratory based and make use of sophisticated, cutting-edge instrumentation and techniques. Students interested in graduate studies of molecular-level phenomena are especially encouraged to consider this plan of study.

The Concentration in Biochemistry and Molecular Biology

Prerequisite Coursework

BIOL 112 Evolution and Genetics with Lab

CHEM 110 Chemical Composition and Structure with Lab

CHEM 120 Chemical Reactivity with Lab or CHEM 125 Chemical Composition, Structure, and Reactivity with Lab

CHEM 210 Organic Chemistry I with Lab

MATH 112 Calculus I

MATH 113 Calculus II

PHYS 150 Introductory Physics I with Lab

PHYS 152 Introductory Physics II with Lab

Required Courses

BIOL 246 Cell and Molecular Biology with Lab

BIOL/CHEM 352 Biochemistry with Lab

CHEM 220 Organic Chemistry II with Lab

CHEM 310 Physical Chemistry I with Lab

One unit from:

BIOL 420 Advance Molecular Genetics with lab

CHEM 460 Advanced Biochemistry with Lab

In accordance with College policy, concentrators in biochemistry and molecular biology must pass the required courses with a C- or better.

Biological Physics

Professor: Peter Erdi

The biological and medical sciences are changing rapidly. Many new discoveries now require an understanding of biological systems from a physical point of view. In particular, physics, mathematics, and computer science are becoming more essential now than ever before. Contemporary research areas in biological physics include phenomena at different levels of the organization from molecular, cellular, network and system levels. Protein conformational dynamics and folding, structure and dynamics of viruses, DNA conformational dynamics, kinetics of genetic expression, single molecule dynamics such as molecular motors, cell mechanics, information transfer in biological systems, membrane biophysics, multi-cellular phenomena, biological networks, evolutionary dynamics and neuroscience are particular examples. The biological physics concentration is designed to supplement the background usually provided in a standard biology, chemistry, or physics majors.

Requirements for the Biological Physics Concentration

Prerequisite Coursework

CHEM 110 Chemical Composition and Structure with Lab

CHEM 120 Chemical Reactivity with Lab

MATH 112 Calculus I

MATH 113 Calculus II

PHYS 150 Introductory Physics I with Lab

PHYS 152 Introductory Physics II with Lab

Required Courses

BIOL 112 Evolution and Genetics with Lab

BIOL 246 Cell and Molecular Biology with Lab

CHEM 210 Organic Chemistry I with Lab

CHEM 310 Physical Chemistry I with Lab

Two units from:

PHYS 205 Applications of Physics in the Biosciences

PHYS 215 Introduction to Complex Systems

PHYS 270 Nonlinear Dynamics and Chaos

COMP/PSYC 415 Computational Neuroscience

In accordance with College policy, concentrators in Biological Physics must pass the required courses with a C- or better.

Chemistry

Professors: Bartz (Chair W, S), Frantz, Furchak, Furge, Slough, T. Smith, Stevens-Truss (Chair), Williams

The chemistry program stresses the art of scientific thought and the role of chemistry in society. Chemistry students benefit from a close working relationship with faculty members in an atmosphere that encourages research. Majors can gain preparation suitable for graduate study in chemistry, biochemistry, chemical and materials engineering, environmental sciences, pharmacology, medicinal chemistry, clinical chemistry, or molecular biology. Other professional schools open to chemistry graduates include the following: human, dental, or veterinary medicine; business administration; or patent or environmental law. Majors will also have a background appropriate for becoming a professional research or process chemist in industrial, pharmaceutical, or government laboratories; teaching high school or community college chemistry; doing environmental monitoring or remediation; working in sales, product development, or in laboratory safety; becoming a writer on science topics, working in science libraries or other information services, doing conservation work in art museums; or performing forensic analyses for law enforcement agencies.

Requirements for the Major in Chemistry

Number of Units

A minimum of eight units from credited courses, excluding courses designed for non-chemistry majors. Also does not include the SIP.

Advanced Placement

With a chemistry advanced placement score of 4 or 5 or IB score of 5, 6, or 7, one unit of AP credit will be awarded towards the minimum of eight units required for the major in chemistry provided a student begins the chemistry sequence at CHEM 120 or higher.

Required Courses

CHEM 110 Chemical Composition and Structure with Lab (exempted if student begins in CHEM 120 or CHEM 125)

CHEM 120 Chemical Reactivity with Lab or CHEM 125 Chemical Composition, Structure, and Reactivity with Lab

CHEM 210 Organic Chemistry I with Lab

CHEM 220 Organic Chemistry II with Lab

CHEM 240 Analytical Chemistry with Lab

CHEM 310 Physical Chemistry I with Lab

CHEM 490 Senior Seminar (minimum of 0.7 units required)

Two additional 300- or 400- level credited courses with lab

Required Cognates

MATH 112 Calculus I

MATH 113 Calculus II (Additional work in mathematics is encouraged.)

PHYS 150 Introductory Physics I with Lab

PHYS 152 Introductory Physics II with Lab

In accordance with College policy, chemistry majors must pass eight units of chemistry and the mathematics and physics cognates with a C- or better.

Kalamazoo College appears on the American Chemical Society's list of schools that offer approved pre-professional undergraduate programs in chemistry. This program includes: CHEM 210, 240, 310, 352, 430, a chemistry research-based SIP, and three additional chemistry courses above the 100-level. In addition MATH 112 and 113 and PHYS 150 and 152 are required and Math 214 and 240 are recommended. This curriculum, which provides thorough preparation in chemistry, mathematics, and physics, is recommended for students contemplating graduate study in chemistry.

A research-based SIP work in chemistry is typically done in the summer following the junior year, worked on during fall of senior year, and defended during either the winter or spring departmental symposia.

All students enrolling in the beginning Chemistry courses (CHEM 110, 120, or 125) **must** complete the placement examination prior to enrolling in either of these courses. Results from the placement examination may permit exemption for one or both beginning courses (with exemption from CHEM 120 also requiring proof of extensive laboratory preparation). Students entering Kalamazoo College with Advanced Placement or IB scores of 4 or 5 on the Chemistry examination are automatically exempt from CHEM 110.

3/2 Pre-Engineering in Chemical Engineering

Students intending to follow the 3/2 Pre-Engineering Program in chemical engineering should follow the course sequence for the chemistry major through the third year and meet the requirements for admission to chemical engineering schools after the third year. Each student pursuing this program must successfully complete the following courses while in residence at Kalamazoo College: CHEM 110, 120, 210, 220, 240, 310; MATH 112, 113, 214, 240, 280; PHYS 150, 152, 220.

Biochemistry and Molecular Biology Concentration

Students interested in Biochemistry and Molecular Biology should refer to the full program description for the concentration.

All courses offered by the chemistry department may be used as a Natural Sciences (NS) Area of Study (AOS) courses.

Chemistry courses

CHEM 105 The Physical Earth Introduction to an integrated structural, geochemical, and geophysical description of the Earth: emphasis on the interaction of the planet's solar and internal heat engines considered from the perspective of plate tectonics; historical origins of current views of Earth's structure and dynamics; experimental component includes both laboratory exercises and a field project. Intended for students of the natural sciences, for students who are not majoring in the natural sciences, for Environmental Studies concentrators, and for students intending to teach Earth Sciences in high schools.

CHEM 108 Toxicology and Carcinogenesis Examination of the basics of chemical carcinogenesis, the environmental contributions to cancer, current methods for studying cancer in both clinical and basic research settings, and the development and uses of chemotherapeutic and chemopreventative medicines. The course aims to prepare students to evaluate discussions of cancer risk, diagnosis, and treatments in the lay press and to examine ambiguity and varying viewpoints on the causes and prevention of cancer. The course will also examine the impact of cancer on individuals and society. Laboratory work includes an experiment using the Ames Test for chemical mutagens and a written scientific report based on laboratory findings. Intended for students who are not majoring in the natural sciences.

CHEM 110 Chemical Composition and Structure with Lab Fundamental principles of chemistry: chemical calculations and symbolism; atomic and molecular structure and bonding; periodic properties; intermolecular interactions, classification of chemical reactions, and the solid state. Laboratory work includes introduction to chemical instrumentation.

CHEM 120 Chemical Reactivity with Lab Classification of chemical reactions; chemical kinetics; chemical equilibrium; energetics of chemical reactions (thermodynamics); acid-base, solubility-precipitation, oxidation-reduction, complexation reactions; electrochemistry; descriptive chemistry of selected elements. Laboratory work includes use of chemical instrumentation. Prerequisite: CHEM-110 All course prerequisites must be met with a minimum grade of C-.

CHEM 125 Chemical Structure, Composition, and Reactivity Fundamental principles of chemistry: chemical calculations and symbolism; atomic and molecular structure and bonding; periodic properties; intermolecular interactions; the solid state; classification of chemical reactions; chemical kinetics; chemical equilibrium; energetic of chemical reactions (thermodynamics); acid-base, solubility-precipitation, oxidation-reduction, complexation reactions; electrochemistry; descriptive chemistry of selected elements. Laboratory work includes use of chemical instrumentation. Intended for students with strong high school preparation in chemistry as demonstrated on the Chemistry Placement Examination. Prerequisite: Chemistry Placement Exam Required or Instructor Permission

CHEM 200 Research Apprenticeship in Chemistry Students who anticipate majoring in chemistry may participate in apprenticeships, which are intended to provide opportunities for the students to become involved in ongoing research projects with faculty on a regular basis. To be considered for a research apprenticeship position, a student must approach a faculty member regarding joining the faculty member's research laboratory. A minimum of 50 hours of work is expected for each quarter. A student may work with the same faculty member for a number of different quarters or may opt to work with different faculty in different quarters. Enrollment is by permission of instructor only and availability of apprenticeships vary over time and are not guaranteed.

CHEM 210 Organic Chemistry I with Lab Basic principles of structure, nomenclature, and reactivity applied to aliphatic hydrocarbons; valence bond and molecular orbital structure models; inductive, resonance, and steric effects on reactivity; stereoisomerism; laboratory emphasis on techniques used in the synthesis and purification of organic compounds. Prerequisite: CHEM-120 or CHEM-125 All course prerequisites must be met with a minimum grade of C-.

CHEM 220 Organic Chemistry II with Lab Continuation of CHEM 210 that includes classroom and laboratory study of the structure, nomenclature, chemical properties, and spectrometric identification of common organic compounds; emphasis on reaction mechanisms and organic synthesis. Intended for research-oriented natural science students with career interests in chemistry, chemical engineering, or biochemistry and related fields. Prerequisite: CHEM-210 All course prerequisites must be met with a minimum grade of C-.

CHEM 240 Analytical Chemistry with Lab Treatment of experimental data; systematic solution stoichiometry; the study of acid-base, precipitation-solubility, oxidation-reduction, and complex formation-dissociation equilibria; introduction to quantitative applications of gravimetry, titrimetry, and chromatography, electrochemistry, and spectrophotometry. Prerequisite: CHEM-120 or CHEM-125 All course prerequisites must be met with a minimum grade of C-.

CHEM 310 Physical Chemistry I Study of chemical thermodynamics, statistical mechanics, and kinetics. Intended for chemistry majors and biologists with a strong cellular or molecular orientation. Prerequisite: CHEM-120 or CHEM-125, MATH 113, and PHYS-152 All course prerequisites must be met with a minimum grade of C-.

CHEM 310L Physical Chemistry I Lab Study of chemical thermodynamics, statistical mechanics, and kinetics. Intended for chemistry majors and biologists with a strong cellular or molecular orientation. Prerequisite: CHEM-120 or CHEM-125, MATH 113, and PHYS-152 All course prerequisites must be met with a minimum grade of C-. CHEM-310 may be taken concurrently

CHEM/BIO 352 Biochemistry Overview of the chemical mechanisms underlying biological processes including structure and function of proteins, polysaccharides, and lipids; enzymatic catalysis and kinetics; an introduction to bioenergetics; detailed treatment of carbohydrate metabolism; survey of lipid and amino acid metabolism; and integration of metabolism. Prerequisite: CHEM-220. All course prerequisites must be met with a minimum grade of C-. Prerequisite: CHEM-220 All course prerequisites must be met with a minimum grade of C-.

CHEM/BIO 352L Biochemistry Lab Overview of basic biochemical laboratory techniques with emphasis on protein isolation and characterization, enzyme kinetics, and bioinformatics. Students will devise and execute independent research projects as part of the course final project. Laboratory and scientific writing, oral communication, and preparation of quality figures and tables will also be emphasized. Prerequisites: CHEM-220 and CHEM/BIO 352 (can be taken concurrently). All course prerequisites must be met with a minimum grade of C-. Prerequisite: CHEM-220, Minimum grade C- CHEM/BIO 352 must be taken previously or concurrently

CHEM 395 Organic Spectroscopy and Structure Determination Organic molecules are everywhere including a growing inventory throughout the universe. With and unimaginable array of possibilities, how is organic chemical structure elucidated? This course examines modern spectroscopic techniques through in-class activities. With data collected, strategies will be developed to assign chemical structure and identify dynamic processes within a molecule. Mass spectroscopy and 1D- and 2D-NMR methods will be emphasized. Intended for students interested in the molecular and chemical sciences. Prerequisite: CHEM-220. All course prerequisites must be met with a minimum grade of C-.

CHEM 410 Physical Chemistry II with Lab Further study of chemical kinetics; elementary quantum mechanics applied to simple atoms and molecules; spectroscopy. Prerequisite: CHEM-120 or CHEM-125, MATH-113, and PHYS-152 All course prerequisites must be met with a minimum grade of C-.

CHEM 420 Instrumental Analysis with Lab Study of instrumental methods of analysis including trace techniques; emphasis on spectroscopy, electrochemistry, and chromatography, introduction to electronic signal processing, and computer data acquisition. Prerequisite: CHEM-240 and CHEM-310 All course prerequisites must be met with a minimum grade of C-.

CHEM 430 Inorganic Chemistry with Lab Exploration of the properties of the elements and their compounds except for hydrocarbons and their organic derivatives; emphasis on structures, bonding, and reactivities of main-group, transition-metal, and organometallic compounds; laboratory work emphasizing synthesis, analysis and reactivity characterization of inorganic compounds. Prerequisite: CHEM-310 All course prerequisites must be met with a minimum grade of C-.

CHEM 440 Advanced Organic Chemistry with Lab Study of local and reaction stereochemistry, conformational analysis, and molecular orbital theory; preparative methods for asymmetric chemicals; applications of chiral transition metal complexes in catalyzed organic reactions; laboratory work emphasizing chromatographic techniques and 1D and 2D NMR analysis. Prerequisite: CHEM-220 and CHEM-310 All course prerequisites must be met with a minimum grade of C-.

CHEM 450 Molecular Structure and Reactivity with Lab An advanced course dealing with molecular symmetry and group theory applied to the description of molecular structure and bonding in inorganic, organic, organometallic, and solid-state systems; molecular and electronic structure determination by spectroscopy, magnetism, and X-ray crystallography; examination of selected chemical reactions with focus on transition metal and metalloprotein redox and energy generation; laboratory work emphasizing synthesis and reactivity studies on and physical characterization of inorganic, organic, and organometallic compounds. Prerequisite: CHEM-430 recommended

CHEM 460 Advanced Biochemistry with Lab Study of selected topics in biochemistry through review articles and primary research literature, emphasizing experimental methods, critical analysis and interpretation of data, and integration of biochemical concepts. Laboratory will utilize an investigative approach to strategies of enzyme studies and bioinformatics. Prerequisite: BIOL/CHEM 352 and BIOL/CHEM-352L All course prerequisites must be met with a minimum grade of C-.

CHEM 470 Principles of Medicinal Chemistry with Lab This course will survey the world of medicinal drug design, from target choice to structural drug determinants, to drug toxicology and disposition. The course will illustrate to students the significance of chemical structure and their physiochemical properties, and address molecular modification of molecules in the rational design of drug entities. The ultimate goal is to help students relate drug chemistry to therapeutic applications. We will review some general principles learned in Introductory and Organic Chemistry, Biochemistry, and Cell Biology, and will introduce several Pharmacological and Physiological principles, as they relate to the molecular mechanism of action of select drug classes. Emphasis will be placed on drug-target interactions at the molecular level by employing 3-D visualization tools. Prerequisite: CHEM-220 and BIOL/CHEM-352 All course prerequisites must be met with a minimum grade of C-. Senior Chemistry majors only

CHEM 490F Senior Seminar - Professional Development for Chemists Senior Seminar combines activities currently in the Chemistry senior program and two practicum experiences with the goal of preparing senior majors to present a public seminar covering their Senior Individualized Project and to present themselves professionally as they move into chosen professions. The Chemistry discipline relies heavily on both written and verbal communication skills to disseminate scientific information, and as such, practitioners must be able to articulate concise and scientifically accurate descriptions of their work. This course utilizes a series of seminars by guest chemistry professionals, on-campus resources, practical applications, and peer workshops to develop oral and written presentation skills. This course is for SENIORS only. Prerequisite: Senior Chemistry majors only

CHEM 490S Senior Seminar - Professional Development for Chemists Senior Seminar combines activities currently in the Chemistry senior program and two practicum experiences with the goal of preparing senior majors to present a public seminar covering their Senior Individualized Project and to present themselves professionally as they move into chosen professions. The Chemistry discipline relies heavily on both written and verbal communication skills to disseminate scientific information, and as such, practitioners must be able to articulate concise and scientifically accurate descriptions of their work. This course utilizes a series of seminars by guest chemistry professionals, on-campus resources, practical applications, and peer workshops to develop written and oral presentation skills. This course is open to juniors and seniors. Prerequisite: Junior or Senior Standing only.

CHEM 490W Senior Semn - Professional Development for Chemists Senior Seminar combines activities currently in the Chemistry senior program and two practicum experiences with the goal of preparing senior majors to present a public seminar covering their Senior Individualized Project and to present themselves professionally as they move into chosen professions. The Chemistry discipline relies heavily on both written and verbal communication skills to disseminate scientific information, and as such, practitioners must be able to articulate concise and scientifically accurate descriptions of their work. This course utilizes a series of seminars by guest chemistry professionals, on-campus resources, practical applications, and peer workshops to develop oral and written presentation skills. This course is for SENIORS only. Prerequisite: Senior Chemistry majors only

CHEM 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Chinese

Professors: Chen, Chamness

The Chinese Department provides students with an exposure to the language, literature, and culture of China. Seven levels of Chinese language courses, with a balanced emphasis on listening, reading, writing, and speaking, set a good foundation. Students may study abroad in China or take part in other forms of advanced study to master the language used by one-quarter of the world's population. Literature (in English translation) and culture courses acquaint students with the Chinese literary works and their social/political/cultural texts and contexts, facilitate their enjoyment of literature in general, and enhance their capability to understand the meaning of Chinese literary and cultural expressions, and traditional and contemporary Chinese society.

Requirements for the Minor in Chinese

Number of Units

Six units are required.

Required Courses

CHIN 103 Beginning Chinese III
CHIN 201 Intermediate Chinese I
CHIN 202 Intermediate Chinese II
CHIN 203 Intermediate Chinese III

Electives

Chinese Literature Elective (Must be taken on campus.)

Chinese Literature or Studies Elective (May be taken during study abroad or on campus.)

Related Programs

The Chinese Department is also an essential part of the East Asian studies program. Students may major in international and area studies with a focus on East Asia or major in East Asian Studies, China Track. Interested students should consult with Ms. Chu. For "Requirement for the Major in East Asian Studies, China Track", see catalog listing for East Asian Studies.

Study Abroad Opportunities

The College has established an exchange program in Beijing and Harbin in the People's Republic of China. Students who are interested in study abroad opportunities are strongly recommended to complete CHIN-203 before leaving for China. It is also important to note that Chinese language courses are offered in the Fall-Winter-Spring sequence for both CHIN-101-102-103 and CHIN-201-202-203. In other words, CHIN-101 and CHIN-201 are only offered in the Fall Quarter. For more details about language preparation for Study Abroad, consult early with Ms. Chu and the Center for International Programs.

Chinese courses

CHIN 101 Beginning Chinese I This course is an introduction to the Chinese language. Pronunciation system, basic vocabulary, written script, fundamental grammatical structures, as well as some cultural background of the language will be studied. The goal of this course is to set a good foundation for making Chinese a functional language for the students. Students are asked to follow three principles: (1) make Chinese a part of daily life, (2) use Chinese actively in class and outside of class, and (3) be creative in finding ideas for using the Chinese language.

CHIN 102 Beginning Chinese II This course follows Beginning Chinese I. All four skills -- listening, speaking, reading, and writing -- are equally emphasized. By the end of this course, students are expected to understand simple questions and answers, to be able to ask and respond to simple questions, to understand simple statements, and to be able to participate in simple conversations on a few familiar topics. Students will also be expected to read and write simple notes, meaningful sentences, and short passages constructed with basic grammatical patterns. Prerequisite: CHIN-101

CHIN 103 Beginning Chinese III A continuation of Beginning Chinese II, this course further consolidates the essential skills in reading, writing, listening to, and speaking Chinese. The goals are to increase vocabulary, to form a clear understanding of the language through knowledge of the meaning of words and structures, and to advance the ability of students to express themselves in the language accurately and properly on some selected topics. Prerequisite: CHIN-102

CHIN 201 Intermediate Chinese I This course follows CHIN 103 and starts the Intermediate Chinese language sequence. It will create an authentic language environment for the students and help make learning Chinese an interesting experience. The students will develop their fundamental language skills with a balanced emphasis on listening, speaking, reading, and writing. A communicative approach will be adopted, and accuracy will be emphasized at the same time. Culture will be brought into the classroom through songs, poems, and so on. Short cultural talks related to course material will be given. Prerequisite: CHIN-103

CHIN 202 Intermediate Chinese II This course follows CHIN 201, Intermediate Chinese I, and emphasizes interactive skills. More authentic materials will be used, and more topics and situations concerning contemporary Chinese society will be introduced. Class activities include visiting local Chinese communities and interviewing native speakers of Chinese language. Prerequisite: CHIN-201

CHIN 203 Intermediate Chinese III The course concludes the Intermediate Chinese sequence. Students should be prepared for exposure to various spoken and written styles of Chinese and for a steady expansion of their vocabulary. After completing three quarters of Intermediate Chinese, students will have gained a solid foundation in Chinese grammar and vocabulary and have developed good strategies for effective reading and listening comprehension. In addition, students will have acquired further confidence in their ability to speak Chinese. Prerequisite: CHIN-202

CHIN 215 Chinese Cultural Motifs through Calligraphy Chinese scripts are windows to East Asia cultures. This course traces the etymology and introduces the cultural background of Chinese scripts. It also provides hands-on practice of Chinese calligraphy. This course combines aesthetic training and language learning. Students learn the Chinese scripts not only as linguistic symbols but also as cultural motifs and art forms. Learning the etymology and cultural background of the scripts helps one to understand the linguistic formation of Chinese and other Asian languages that use Chinese scripts. It further provides useful references to the value system, thinking process, and aesthetic principles behind the Chinese language. The hands-on practice of calligraphy is a unique cultural experience. Through frequent review and constant practice, the students become familiar with Chinese scripts, learn the linguistic and cultural meanings associated with these scripts, and acquire the artistic skill of creative expression.

CHIN/SEM 220 Chinese Food Culture Chinese culture is among the most food-conscious ones. Through China's long history, food has always been a means of communication, a symbol of good life, and at the same time a target of criticism for its indulgence and improper distribution. Additionally, it has been a provision for healthcare, and a rich resource of linguistic expressions and literary allusions and metaphors. These will be the topics of the seminar, which should be a meaningful and effective pathway to the core of Chinese life and philosophy. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

CHIN 222 20th-Century Urban China This course interrogates literary and cinematic representations of Chinese cities in the twentieth century. By examining urban narrative in Chinese fiction, drama, poetry and film from the Republican and People's Republic periods, this class offers a new understanding of Chinese modernity as marked by its unique urban sensibilities and configurations.

CHIN 225 Traditional Chinese Literature in Translation This course examines the relationship between the individual and society in traditional Chinese literature. We will read a wide selection of important texts from China's long history, including the Classic of Poetry, early assassin narratives, medieval nature poetry and romantic tales, vernacular stories, urban drama, and novels from the late imperial period. Among the more important questions that we will investigate is the complex role that Chinese literature played in articulating the place of the individual vis-à-vis the community and state.

CHIN 235 Modern Chinese Literature in Translation This course will examine the literary world of modern China by closely analyzing representative stories and novels written during the 20th century. As will quickly become clear in the course, literature in modern China has had and continues to have a close relationship with politics as well as with a wide variety of discussions on cultural identity in post-traditional China. Among the main goals of the course will be to explore how literature comes to grips with a thoroughgoing crisis of an established culture that results in a series of consequences unprecedented in Chinese history. Above all, the course will seek to understand how and why literature has played the role that it has, and what implications for the meaning of literature can be determined from examining the relationship between writing and society in modern China.

CHIN 260 Women in China As in many countries subject to imperialism, women's movements in China were an important part of China's modernization project. How, then, have Chinese feminist theories and women's movements been different from those in the West? What is it like to live as a woman in a rapidly changing China through the 20th and 21st centuries? This course takes three approaches to explore these questions. To examine the characteristics and changes of gender roles we look at the representations of women in literature and film. To understand women's experiences we read women writers' essays, memoirs and fictions. To think about how women work as historical agents who make historical changes, we look at women activists, feminist thinkers and women's movements.

CHIN 295 Reading of Chinese Poetry This course provides students with an opportunity to read, discuss, and enjoy Chinese poetry. All readings are in English translation. While the primary focus is on close reading of poetic texts, students will be analyzing poetry from scholarly perspectives, writing research papers of poetic studies, and composing their own poems. Students will also acquire knowledge on the history of Chinese poetry and poetics from the beginnings to the eighteen century. This course may be of the interest of East Asian Studies majors, students who want to learn about Chinese culture, and those who are interested in poetry in general.

CHIN 300 Advanced Chinese This course is a continuation of the Intermediate Chinese language sequence. The objective is to make a transition from textbook Chinese to real-life communication situations. For this purpose, the course surveys materials including texts from literature, the social sciences and cultural history, and students will be exposed to a wide variety of written and spoken styles of Chinese. Some of the materials selected are original publications drawn from books, magazines and newspapers. The opportunity to work directly with lively, authentic materials will be valuable for studying Chinese language, literature, society and culture. This course focuses on content and style with extensive discussion and frequent written assignments in Chinese. It will consolidate what the students have learned in the past and help them develop better reading and writing skills. In addition, the improvement of speaking and listening abilities will also be emphasized. This course may be tailored to the needs of the participants and may be taken for credit up to three times. Prerequisite: CHIN-203

CHIN 495 Social & Cultural Issues in Today's China This course is designed for, and only open to, seniors who have returned from study in China. It is built upon the students' on-site experiences, language ability and newly gained understanding of contemporary China. The class is conducted in Chinese and all reading materials are in the original language, including essays and articles published in newspapers, periodicals, and literary journals in China. Class activities include discussing and debating on contemporary affairs, and analyzing and summarizing key points of the course materials. In addition to reading, frequent written assignments such as reading comprehension and essay writing, are expected.

CHIN 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Classics

Professors: Haeckl (Co-Chair), Hartman, Lincoln, Manwell

Classics is the original interdisciplinary major—and the study of classics at Kalamazoo College allows students to experience every facet of the cultures of the Greeks and Romans, spanning a period of more than a thousand years and the entire Mediterranean world. The study of the classical languages, classical Greek and Latin, is essential to this, but the department also encourages exploration of antiquity through courses in archaeology, art, history, religion, philosophy, as well as literature in translation.

The department offers four majors—in Classics, Latin, Greek and Classical Civilization—and three minors—in Latin, Greek and Classical Civilization. Students intending to pursue the study of classical languages at the graduate level are encouraged to major in classics; those who are interested in secondary school teaching, divinity school, or graduate work in a cognate area are encouraged to major in either Greek or Latin. Students who discover a passion for classical history or archaeology, or who discover the field late in their college careers may be drawn to the major in Classical Civilization, which emphasizes work in translation.

Majors and minors in classics often enhance their studies of the ancient world through experiences that give them a first-hand appreciation of Roman and Greek civilizations. Through participation in our study abroad programs at American University in Rome, the Intercollegiate Center in Rome and College Year in Athens, students learn about the ancient cities through on-site instruction, and augment their studies with courses in ancient and modern languages and cultures. In addition we work with students to find appropriate summer internships and archaeological fieldwork opportunities. Such a summer experience often provides the basis for a senior individualized project, which can span a wide range: creative writing, historiography, archaeological fieldwork, literary analysis, and comparative studies of literature and culture.

Faculty interact with students in and out of the classroom. The classics department has an active lecture series, promotes classically themed activities and works with students to craft a major program that will help them attain their career goals. Our majors pursue graduate work in classics, as well as careers in the ministry, secondary school education, business, law, and the military.

Placement

All incoming students who have previously studied Latin or Ancient Greek in high school or elsewhere must take the College's placement test. Placement can also be determined by a student's score on the College Board's SAT II test or the advanced placement test in Latin.

SAT II

SAT II students with scores of 425 or lower (and with fewer than three years of high school Latin) will be placed in LATN 101 or 102; 426–500 = LATN 102; 501–550 = LATN 102 or 201; 551–670 = LATN 201. If an SAT II score indicates a choice of two levels, a student should consult with a Classics faculty member for placement. A score of 670 or higher may qualify a student for more advanced courses.

Advanced Placement

For students with an advanced placement (AP) score of 4 or 5, credit toward the B.A. degree will be awarded automatically upon admission. Study must begin with Latin 401 or above to receive credit in Latin at Kalamazoo College. Students with AP scores of 3 may be granted the waiver of a prerequisite, but may not count an AP 3 for credit.

Units from Study Abroad and Transfer Credit

Students may receive up to three units of credit toward the major or the minor for classes taken on study abroad. The courses must first receive approval from the chair of the department. Students may also receive no more than one unit of transfer credit. As with courses being considered from study abroad, the course must get pre-approval from the chair of the department. Exceptions to these policies may be granted in unique circumstances and only through prior approval by the department.

Requirements for the Major in Classics

Number of Units

Nine units are required.

Required Courses

Five courses in one classical language above 201

Three courses in the other classical language above 102

CLAS 390 Junior seminar

Students considering a major in Classics are urged to begin their study of Latin or Ancient Greek in their first year.

Requirements for the Major in Latin

Number of Units

Eight units are required, not including Latin 101, 102, and 201 (the eight may include the SIP).

Required Courses

Five courses in Latin above 201

CLAS 390 Junior Seminar

One course in Roman history or archaeology

One other course on Roman literature or culture, or an additional Latin course.

Requirements for the Major in Greek

Number of Units

Eight units are required, not including Greek 101, 102, and 201 (the eight may include the SIP).

Required Courses

Five courses in Greek above 201

CLAS 390 Junior Seminar

One course in Greek history or archaeology

One other course on Greek literature or culture, or an additional Greek course.

Requirements for the Major in Classical Civilization

Number of Units

Nine units are required, not including Latin or Greek 101, 102, and 201 (the nine may include the SIP).

Required Courses

Two courses in Latin or Greek above the 201 level

CLAS 210 Classical Mythology

CLAS 390 Junior seminar

At least one course in classical history

CLAS/HIST 227 The Roman Army and the Frontiers of Empire

CLAS/HIST 225 Greek Civilization

CLAS/HIST 226 Roman Civilization

At least one course in classical art or archaeology

CLAS/ARTX 208 Introduction to Greek Art and Archaeology

CLAS/ARTX 209 Introduction to Roman Art and Archaeology

Three electives: any Classics, Latin or Greek course not previously taken.

Requirements for the Minor in Latin

Number of Units

Six units are required, not including Latin 101 and 102.

Required Courses

Four courses in Latin above 102

CLAS 210 Classical Mythology

One other course on a Roman topic

Requirements for the Minor in Greek

Number of Units

Six units are required.

Required Courses

Four courses in Greek above 102
CLAS 210 Classical Mythology
One other course on a Greek topic

Requirements for the Minor in Classical Civilization

Required Courses

CLAS 210 Classical Mythology

At least one course in classical history

CLAS/HIST 227 The Roman Army and the Frontiers of Empire

CLAS/HIST 225 Greek Civilization

CLAS/HIST 226 Roman Civilization

At least one course in classical art or archaeology

CLAS/ARTX 208 Introduction to Greek Art and Archaeology

CLAS/ARTX 209 Introduction to Roman Art and Archaeology

Three electives: Any Classics course not previously taken; any Latin or Greek course above 102.

Classics courses

CLAS/RELG 110 Introduction to New Testament This course explores the writings of the New Testament, their relationship to the history and culture in which they were produced, and their relevance to more recent issues in modern religious discourse. We will cover a range of topics, including the historical perspective on who Jesus was, the impact of Paul on Christianity, the formation of the canon, political religion in the Roman empire, ethics, and gender. We will apply several modern approaches as well as survey at various points the "afterlife" of the Christian scriptural traditions in Christianity. No prior knowledge of or experience with the subject is assumed or required.

CLAS/SEMN 203 Romans R Us: Identity & Empire Young men and women who came of age during the heyday of the Roman Empire in the second century CE faced many of the same challenges now confronting Kalamazoo College sophomores as they prepare for study abroad: how can you best harness the transformative potential of international, experiential education to become productive citizens and leaders in a global, multicultural world? What theoretical foundations can help you negotiate issues of self-definition and representation that emerge from encounters with cultural diversity? How will performing rites of passage into adulthood on a world stage, while learning new dialogues of national, ethnic, class, gender and sexual politics, affect your own sense of public and private identity? This course is designed to interrogate the impact of international education on personal identity by fostering reflective connections between the lived reality of 21st-century American students and their academic study of the Classical past. Prerequisite: Sophomores only.

CLAS/PHIL 205 Ancient Philosophy A study of ancient views on nature, knowledge, soul, the self, morality, and the good life. This is a history of philosophy course rather than a history course; we will be studying the ideas, arguments, and theories put forth by ancient philosophers, rather than biographical, cultural, anthropological, or historical issues about them or their time period. We will largely be trying to understand what these thinkers were trying to say, and why they thought what they did. In addition, we will be discussing the merits of the various positions and reasons offered. Readings will focus on selections from Plato and Aristotle, but will also include readings from the pre-Socratic and Hellenistic philosophers, all major sources of the Western philosophical tradition. Recommended for classics students. . (This is a designated Greek literature or culture course in Classics.)

CLAS/ARTX 208 Introduction to Greek Art and Archaeology This introduction to the multidisciplinary field of Greek archaeology examines the art and architecture of the Greek world from a contextual perspective. The course traces Greek material culture from Bronze Age origins through Hellenistic transformations. (This is a designated Greek literature or culture course in Classics.)

CLAS/ARTX 209 Introduction to Roman Art and Archaeology This introduction to the multidisciplinary field of Roman archaeology examines the art and architecture of the Roman world from a contextual perspective. The course traces Roman material culture from Iron Age and Etruscan origins through Early Christian transformations. (This is a designated Roman literature or culture course in Classics.)

CLAS 210 Classical Mythology A literary and art-historical survey of the major myths from ancient Greece and Rome; examination of how myths were viewed and used in antiquity and how they have been used in subsequent literature and culture; introduction to the most important schools of myth-interpretation. (This is a designated Greek and Roman literature or culture course in Classics.)

CLAS/SEMN 216 Making History? We will examine various cinematic interpretations of the ancient Romans. Students will explore the historical, social and cultural differences between ancient and modern accounts of Roman history and examine our modern desire for "watching" the ancient world. Readings by Roman writers and secondary source material will be paired with film screenings. Special attention will be given to why we retell some stories (i.e. Cleopatra), as well as to the way that this form of "Roman history" encourages us to visit difficult cultural topics, such as political imperialism, slavery, sex and gender difference, and racism. Prerequisite: Sophomores Only

CLAS/HIST 225 Greek Civilization From Homer to Alexander the Great with emphasis on arts and letters.

CLAS/HIST 226 Roman Civilization From the foundation of the Republic to the empire of Constantine.

CLAS/HIST 227 The Roman Army and the Frontiers of Empire This course considers the Roman army from the perspectives of both military and social history. After a chronological survey of the development of the Roman army, case studies of the army in action in specific frontier provinces will be considered. From Hadrian's Wall in Britain to the desert wastes of Egypt, ancient texts and archaeological evidence illuminate the army-driven process of "Romanization," through which former barbarian enemies became assimilated Roman citizens. (This is a designated Roman literature or culture course in Classics.)

CLAS 255/RELG 211 Religion From Alexander to Constantine This course examines various forms of ancient religion and worship in the classical world. Topics included are concepts of divinity, varieties of religious space and practices, distinctions between civic and private worship, religious festivals and rituals, attitudes towards death and afterlife, importations of Near-Eastern and African religions, and political and philosophical appropriations of religion. Specifically, the course will focus on classical Greek and Roman religion, new religious movements, Judaism, and Christianity within classical culture. Students will become acquainted with a variety of texts, archaeological sites, and religious art and artifacts. (This is a designated Greek and Roman literature or culture course in Classics.)

CLAS/POLS 257 Justice and Political Community in Antiquity This course examines political thought from the Greek period through the Italian Renaissance. We will pay particular attention to classical conceptions of human nature, justice, the ideal political order, and the obligations of citizens to their political communities. We will also form an appreciation for the Greek and Roman foundations of subsequent political systems. Thinkers covered include Plato, Aristotle, Cicero, St. Augustine, and Machiavelli.

CLAS 261/RELG 260 Judaism in Antiquity This course examines the history and literature of Judaism from the Second Temple Period to the beginnings of Rabbinical Judaism (400 BCE - 400 CE). This course explores the diversity of ancient Judaism and explores themes of religious and cultural identity. We shall consider the political and religious implications for Jews living under the Persian, Greek, Roman, and Christian empires, while briefly ruling themselves in the Hasmonean period. We will read a series of primary sources in translation from ancient Jews and non-Jews, as well as modern scholarly treatments of these works.

CLAS 295/HIST 239 Greco-Roman Slavery This course studies the institution of slavery in ancient Greece and Rome within its own contexts and as it has impacted the modern world. While our study will mainly be historical and cultural, we will also examine the literary and philosophical discussions of slavery from the Classical world.

CLAS/HIST 295 Greek and Roman Sport Ancient Greece gave rise to traditions of competitive athletics that are still with us today - but how should we understand the legacy? Through a combination of illustrated lectures, in-class discussions, and interactive and creative exercises (e.g. composing your own Victory Poetry and 'tweet-grams', tweets modeled off of ancient epigrams of athletes), we will study the development of sport in ancient Greece and Rome. While we make our way through Greek and Roman history, we will spend considerable time comparing ancient athletic practice with modern athletic culture and formulate ways to undertake meaningful historical and cross-cultural analysis.

CLAS 390/CLAS 490 Junior Seminar An examination of current trends in the field of Classics, through the exploration of cross-cultural exchange in the ancient Mediterranean. Students will be introduced to various subspecialties within the field, but emphasis will be on writing, research skills and the development of the students' own research interests. This course will also prepare students for the writing of the SIP and for the essay portion of the comprehensive exam. Prerequisite: Junior standing and declared major, minor, or concentration in Classics, Greek, Latin, or Classical Civilization, or permission of the instructor.

CLAS 490/CLAS 390 Classics Senior Seminar Students conduct in-depth research on a disciplinary topic, mentor junior Classics majors and engage in structured reflection on the role of Classics in their K-Plans and as preparation for life and careers after graduation. Prerequisite: Senior standing and declared major, minor, or concentration in Classics, Greek, Latin, or Classical Civilization, or permission of the instructor.

CLAS 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Greek courses

GREK 101 Beginning Greek I Fundamentals of grammar, composition, and reading of ancient Greek. Selected readings from graduated texts, short stories, and dramas; introduction to ancient Greek civilization.

GREK 102 Beginning Greek II Continuation of GREK 101; development of fundamentals of grammar, composition, and reading of ancient Greek. Selected readings from graduated texts, short stories, and dramas; introduction to ancient Greek civilization. Prerequisite: GREK-101

GREK 201 Intermediate Greek Intensive grammar review; polishing and reinforcement of basic skills in ancient Greek; readings and discussions of selected works; continued exploration of the ancient Greek legacy. Prerequisite: GREK-102

GREK 405 Homer Representative readings, in Greek, from either the Iliad or the Odyssey. May be repeated. Prerequisite: GREK-201

GREK 410 Attic Prose Representative readings, in Greek, from one or more Attic prose authors (e.g. Plato, Lysias, Xenophon). Possible genres include oratory, philosophy, history, and criticism. May be repeated. Prerequisite: GREK-201

GREK 475 Topics in Greek Readings to be offered in response to the needs and interests of majors and minors. Topics and/or authors typically include those not offered in the standard curriculum, and may include tragedy, Hellenistic poetry, historians, and lyric, among others. May be repeated. Prerequisite: GREK-201

Latin courses

LATN 101 Beginning Latin I Fundamentals of grammar, composition, and reading. Selected readings from graduated texts, short stories, and dramas; introduction to ancient Roman civilization.

LATN 102 Beginning Latin II Continuation of LATN 101; development of fundamentals of grammar, composition, and reading. Selected readings from graduated texts, short stories, and dramas; introduction to ancient Roman civilization. Prerequisite: LATN-101

LATN 201 Intermediate Latin Intensive grammar review; polishing and reinforcement of basic skills; readings and discussions of selected works; continued exploration of the Roman legacy. Prerequisite: LATN-102

LATN 415 Latin Elegy, Lyric and Pastoral Representative readings, in Latin, from one or more elegists (Catullus, Tibullus, Propertius, Sulpicia, Ovid), lyric poets (Catullus, Horace) or Vergil's pastoral. May be repeated. Prerequisite: LATN-201

LATN 425 Latin Epic Representative readings, in Latin, from one or more writers of epic (typically Vergil or Ovid). May be repeated. Prerequisite: Take LATN-201

LATN 430 Republican Prose Representative readings, in Latin, from one or more Republican prose authors (Cicero, Caesar, Nepos). Possible genres include oratory, philosophy, history, criticism, and epistles. May be repeated. Prerequisite: LATN-201

LATN 435 Imperial Prose Representative readings, in Latin, from one or more Imperial prose authors (Pliny the Younger, Seneca, Sallust, Livy, Tacitus, Suetonius). May be repeated. Prerequisite: Take LATN-201 or instructor's permission

LATN 440 Roman Comedy Reading, in Latin, of one or more plays by Plautus or Terence. May be repeated. Prerequisite: LATN-201

LATN 475 Topics in Latin Readings to be offered in response to the needs and interests of majors and minors. Topics and/or authors typically include those not offered in the standard curriculum, such as the Roman novel (including Petronius and Apuleius), satire, and Medieval Latin. May be repeated. Prerequisite: Take LATN-201 or instructor's permission

Computer Science

Professors: Brady (Co-Chair), Cutter (Co-Chair), Vargas-Pérez, Érdi, Tobochnik

The mission of the computer science program at Kalamazoo College is to provide students with a foundation in the concepts and skills underlying computer science, in the context of an integrated, multi-dimensional liberal arts program. The program serves the needs of students at several levels, including students who take only one or two courses in the program, computer science minors, and computer science majors. At every level, the program is designed to expose students to the central theoretical concerns of this rapidly evolving discipline, and to generate an understanding of the principal techniques and algorithms necessary to support meaningful applications. The study of computer science enriches a liberal arts education by fostering skills in problem-solving, logical reasoning, organizing information to make it easier to understand and manipulate, expressing ideas precisely and effectively, and managing complexity.

The computer science program is committed to providing a firm foundation in computing to our majors and minors, and to creating an environment in which students who do not think of themselves as computer scientists can learn about the discipline, discover an interest in it, explore, and thrive. Students who graduate with a major in computer science go on to careers in computing and to graduate school in computer science.

Advanced Placement

A student with a score of 4 or 5 on the Computer Science Principles exam will be awarded credit for COMP 105 (Introduction to Computer Science). A student with a score of 4 or 5 on the Computer Science A exam will be awarded credit for COMP 110 (Introduction to Programming). Note that both COMP 105 and COMP 110, or their Advanced Placement equivalents, are required for the major or minor. (COMP 107 or 108 may be used as substitutes for COMP 105, but COMP 110 may not.) Computer Science majors are strongly encouraged to take advantage of advanced placement to take additional courses in the major.

Transfer, Dual Enrollment, Study Abroad Credit

Courses taken at other institutions will be awarded credit in computer science if they meet one of the following criteria: 1) the course is similar in content and rigor to an existing course in the Computer Science department, or 2) the course covers some important topic of computer science not offered at Kalamazoo College. Students are responsible for meeting with the director of the computer science program in advance to determine whether a course offered elsewhere will transfer back as a computer science credit. External credits may also be used to satisfy the mathematics cognates for the major or minor.

Requirements for the Major in Computer Science

Number of Units

Nine units are required, not including SIP, plus the cognate courses in mathematics, all of which must be earned at a grade of C- or above. Taking the comprehensive exam in computer science is required for program assessment purposes, and results are considered in determining honors in the major.

Required Courses

Introduction to the Discipline: COMP 105 Introduction to Computer Science (recommended), or COMP 107 Pictures and Sounds, or COMP 108 Introduction to Scientific Computing
COMP 110 Introduction to Programming
COMP 210 Data Structures
COMP 215 Design and Analysis of Algorithms
COMP 230 Computer Organization

Four additional computer science courses at the 300-level or higher. Students may take MATH 240 (linear algebra) as a fourth mathematics cognate in place of the fourth computer science elective.

Required Cognates

MATH 112 Calculus I
MATH 113 Calculus II
MATH 250 Discrete Mathematics

Other mathematics courses with particular application to computer science include MATH 240 (Linear Algebra), 330 (Abstract Algebra I), 362 (Probability) and 365 (Mathematical Statistics).

Additional Requirements

Just as the study of computer science enriches the liberal arts, the study of arts, humanities, and social sciences enrich computer scientists. All students are encouraged to take a broad range of courses across the liberal arts, including at least one writing-intensive course.

Students who plan graduate work in computer science are expected to take additional computer science and mathematics courses appropriate to their interests. COMP 300 (Automata) is particularly recommended.

Requirements for the Minor in Computer Science

Number of Units

Six units are required, plus the cognate courses in mathematics, all of which must be earned at a grade of C- or above.

Required Courses

Introduction to the Discipline: COMP 105 Introduction to Computer Science (recommended), or COMP 107 Pictures and Sounds, or COMP 108 Introduction to Scientific Computing
COMP 110 Introduction to Programming
COMP 210 Data Structures
COMP 230 Computer Organization or COMP 215 Design and Analysis of Algorithms

Two additional computer science courses at the 200-level or higher.

Required Cognates

MATH 112 Calculus I
MATH 250 Discrete Mathematics

Computer Science courses

COMP 105 Introduction to Computer Science with Lab Computers have had an impact on almost every aspect of modern life. Why is this? What has been their impact on other disciplines and on the society in which we live? What do we need to know about computing so that we control the technology rather than being controlled by it? This course will address these and other questions while giving hands-on practice in a particular context, such as creating animations or web applications. Topics include fundamental computer programming concepts and constructs, how computers represent information, limits to what is computable, human-machine interaction, and ethical and social issues raised by the widespread use of computers. Except in unusual circumstances, students who have already taken 107 or 108 should generally not take this course.

COMP 107 Pictures and Sounds: Programming with Multimedia with Lab This course provides an introduction to multimedia programming: developing programs that create and manipulate text, pictures, sound, and movies. Topics include creating negative and gray-scale images, reversing and splicing sounds, creating sound visualizations, and creating animations. Students will learn some of the concepts and techniques underlying software applications like Photoshop or SoundEdit as well as fundamental concepts underlying all of computing, such as algorithms, abstractions, and how computers represent numbers, text, images, and sound. Hands-on programming is a central component of the course, embodied in weekly labs and frequent programming assignments. No previous programming experience is required. Except in unusual circumstances, students who have already taken 105 or 108 should generally not take this course.

COMP 108 Introduction to Scientific Computing The purpose of this course is to give students an introduction to scientific modeling and data analysis. The course will provide an introduction to computer programming and will cover a selection of topics relevant to scientific research, emphasizing the process of modeling, simulation, visualization, and evaluation of data. It will also introduce fundamental computer science topics, including the limits of computation and algorithm analysis. This course is intended for students with a strong interest or background in science, math, and/or computer science. Prior programming experience is not required. Except in unusual circumstances, students who have already taken 105 or 107 should generally not take this course.

COMP 110 Introduction to Programming w/Lab An introduction to object-oriented programming. Topics include basic language features and the fundamentals of the programming process, including design, implementation, and testing. Hands-on programming is a central component of the course, embodied in weekly labs, in-class mini-labs, and frequent programming assignments. Some previous exposure to programming or strong math skills are recommended; see a faculty member if you have questions about taking this course. Prerequisite: COMP 105, 107, or 108, or 1 200-level Math course, or 1 200-level Physics course, or instructor permission All course prerequisites must be met with a minimum grade of C-.

COMP 200 Professional Apprenticeship Students majoring in computer science may participate in apprenticeships, which are opportunities for the students to learn computer science concepts through professional internships. To be considered for a professional apprenticeship, a student must approach a faculty member with a proposal of the expected work and learning goals to be accomplished in the project or internship. A written reflection will be required at the end of the apprenticeship. A minimum of 10 hours of work per week is expected. Enrollment is by permission of instructor only. Prerequisite: By Instructor Permission only

COMP 210 Data Structures Provides students an opportunity to further develop and refine their design, implementation, and testing skills. In particular, the emphasis of this course is on the organization of information, the implementation of common data structures such as lists, stacks, queues, trees, and graphs, and techniques of data abstraction, including encapsulation and inheritance. The course will also explore recursion and the close relationship between data structures and algorithms. Hands-on programming is a central component of this course, through numerous mini-labs and outside programming assignments. Prerequisite: COMP-110 All course prerequisites must be met with a minimum grade of C-.

COMP 215 Design and Analysis of Algorithms Introduction to a variety of algorithms and algorithm design techniques that recur in computer science literature and applications. These include common sorting and searching algorithms, divide-and-conquer and dynamic programming algorithms, and algorithms in the areas of string processing, geometry, and graph theory. This course also provides an introduction to the mathematical analysis of the complexity and performance of algorithms. Prerequisite: COMP-210 and MATH-250 All course prerequisites must be met with a minimum grade of C-.

COMP 230 Computer Organization Introduction to computer organization; gates, truth tables, and logic design; number representation and arithmetic; assembly-language programming and the assembly process; and current techniques for improving computer performance. Prerequisite: COMP-210 All course prerequisites must be met with a minimum grade of C-.

COMP/PSYC 265 Cognitive Science Cognitive science is the interdisciplinary study of mind and the nature of intelligence. It is a rapidly evolving field that deals with information processing, intelligent systems, complex cognition, and large-scale computation. The scientific discipline lies in the overlapping areas of neuroscience, psychology, computer science, linguistics and philosophy. Students will learn the basic physiological and psychological mechanisms and computational algorithms underlying different cognitive phenomena. This course is designed mostly for psychology and computer science students, but other students interested in interdisciplinary thinking might take the course. Prerequisite: PSYC-101 or COMP-105 All course prerequisites must be met with a minimum grade of C-.

COMP/MATH 300 Automata, Formal Languages, and Computability Study of automata as mathematical models of computation; of formal languages, which play a central role in the specification and translation of programming languages; and of the fundamental capabilities and limitations of computers. Prerequisite: MATH-250 or MATH-330, and 1 COMP course. All course prerequisites must be met with a minimum grade of C-.

COMP 320 Principles of Programming Languages Study of programming language concepts and paradigms. Students will look at the historical progression of language design, study the distinctive characteristics of major programming paradigms, discuss design decisions and tradeoffs, and develop fluency in a new language. Typical topics include syntactic and semantic differences among languages, type theory, static and dynamic binding of variables, and scope rules. Prerequisite: COMP-210 All course prerequisites must be met with a minimum grade of C-.

COMP/PSYC 415 Computational Neuroscience Study of mathematical models, computational algorithms, and simulation methods that contribute to our understanding of neural mechanisms. Brief introduction to neurobiological concepts and mathematical techniques. Both normal and pathological behaviors will be analyzed by using neural models. Prerequisite: PSYC-101 and MATH-113 All course prerequisites must be met with a minimum grade of C-.

COMP 430 Operating Systems and Networking Provides an introduction to operating system and networking concepts. In particular, the course covers processes and threads, process synchronization, deadlocks, CPU scheduling, memory management, file systems, security, and network structures and protocols. Prerequisite: COMP-230 All course prerequisites must be met with a minimum grade of C-.

COMP 480 Special Topics Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: Usually COMP-210, although specific prerequisites depend on the topic. All course prerequisites must be met with a minimum grade of C-.

COMP 480 Special Topics: Distributed Systems A distributed system is a network of processes collectively performing a meaningful job. This course will cover the theory and algorithmic aspects of distributed systems, such as how processes communicate and interact with one another, how to guarantee correctness and build tolerances to various kinds of failures or dynamic behaviors, and how to design distributed algorithms for specific problems, manage replicas, and provide group communication services.

COMP 481 Topics: Comp Networking & Internet Open standards for communications between computers (and similar devices) are defined by the Open Systems Interconnection (OSI) model. The seven layer OSI model will be used as a structure to explore the hardware and software most commonly used to interconnect devices to form computer networks. The INTERNET will be used as an example of how these concepts are used to create real world networks using TCP/IP. Many of the most important high-level protocols that comprise the current INTERNET will be explored to aid in understanding why the INTERNET works and what can be done to protect the INTERNET from some common attacks. Prerequisite: COMP-230 or Instructor Permission

COMP 481 Applied Parallel Algorithms Prerequisite: Take COMP-210

COMP 482 Special Topic: Software Development Focuses on the patterns and process of large(ish)-scale software development, including topics from Databases, Design Patterns, and Software Engineering. Prerequisite: Take COMP-210

COMP 483/MATH 450 Special Topics: Cryptography Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: COMP-110 and MATH-250 or MATH-316 or MATH-330 All course prerequisites must be met with a minimum grade of C-.

COMP 485 Special Topics: Numerical Methods Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: COMP-210

COMP 486 Special Topics: Machine Learning Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: COMP-110 All course prerequisites must be met with a minimum grade of C-.

COMP 487/COMP 490 Special Topics: Software Development Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: Usually COMP-210, although specific prerequisites depend on the topic. All course prerequisites must be met with a minimum grade of C-.

COMP 488/COMP 490 Special Topics: FOSS Development Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: COMP-210

COMP 488/COMP 490 Special Topic: Open Source Project Dev. This course is a combination of advanced seminar and software development work environment, in which teams of students develop software products in support of a community, whether that is the college community, an organization in the larger, local community, or the online open-source community. In addition to collaborating on a specific project, students present material on a wide range of software development topics, including software engineering, professional ethics, web-based development, open source, and current trends in languages, tools, and methodologies. Prerequisite: Prerequisite: COMP-210 All course prerequisites must be met with a minimum grade of C-.

COMP 489/COMP 490 Special Topics: Mobile Computing Special Topics offerings focus upon topics not addressed in the department's regular offerings. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: COMP-210 All course prerequisites must be met with a minimum grade of C-.

COMP 490/COMP 487 CS Senior Seminar: Collaborative Software Development This course is a combination of advanced seminar and software development work environment, in which teams of students develop software products in support of a community, whether that is the college community, an organization in the larger, local community, or the online open-source community. In addition to collaborating on a specific project, students present material on a wide range of software development topics, including software engineering, professional ethics, web-based development, open source, and current trends in languages, tools, and methodologies. Prerequisite: COMP-210 and Seniors Only

COMP 490/COMP 489 CS Senior Seminar: Mobile Computing This course is a combination of advanced seminar and software development work environment, in which teams of students develop software products in support of a community, whether that is the college community, an organization in the larger, local community, or the online open-source community. In addition to collaborating on a specific project, students present material on a wide range of software development topics, including software engineering, professional ethics, web-based development, open source, and current trends in languages, tools, and methodologies. Prerequisite: CS Senior major or minor or permission

COMP 490/COMP 488 Senior Seminar: FOSS Development This course is a combination of advanced seminar and software development work environment, in which teams of students develop software products in support of a community, whether that is the college community, an organization in the larger, local community, or the online open-source community. In addition to collaborating on a specific project, students present material on a wide range of software development topics, including software engineering, professional ethics, web-based development, open source, and current trends in languages, tools, and methodologies. Prerequisite: COMP-210 and Senior Standing

COMP 490/COMP 488 SR Sem: Open Source Project Dev. This course is a combination of advanced seminar and software development work environment, in which teams of students develop software products in support of a community, whether that is the college community, an organization in the larger, local community, or the online open-source community. In addition to collaborating on a specific project, students present material on a wide range of software development topics, including software engineering, professional ethics, web-based development, open source, and current trends in languages, tools, and methodologies. Prerequisite: Prerequisite: COMP-210 and Senior Standing

COMP 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Community and Global Health

Professors: Geist and Parker (co-directors)

The Community and Global Health (CGHL) interdisciplinary concentration enables students to broadly explore the determinants and consequences of individual and community health, critically examine relevant global, national, and local policies and programs, learn theories and methodologies important to the study of public health, and gain and apply practical skills through community-based courses and projects, internships, study abroad, and/or research. Coursework and experiences in the concentration emphasize the importance of structures and systems that shape wellness, longevity, disease, and disability, and their disproportionate distribution across gender, race, class, sexual and gender identity, nationality, statelessness, incarceration or documentation status, and place of residence. With an emphasis on our collective and individual responsibility to advance health equity, the concentration prepares students, as engaged members of their communities, to recognize the spectrum of contemporary global health issues and to exercise intellectual and practical skills in response. It also prepares students interested in careers in public health or human, dental, or veterinary medicine and the allied health professions for graduate and professional school.

The CGHL Concentration

Required core:

- CGHL 120 Epidemiology and Global Health
- CGHL 210 Contemporary Issues in Public Health: An Introduction
- Four additional electives, at least one chosen from each of the following three categories below.

Please note that while we make every attempt to compile a list that is comprehensive and accurate, not every course is offered every year, and new courses may be added from time to time without enough notice to be included here. Students should check with the Registrar, individual departments, and their advisor as they plan to complete the concentration.

Natural sciences and quantitative reasoning

ANSO 212 Quantitative Analysis

BIOL 322 General and Medical Microbiology

BIOL 360 Immunology and Human Health

MATH 105 Quantitative Reasoning & Statistical Analysis

MATH 260 or 261 Applied Statistics or Biostatistics (preferred)

MATH 360 Applied Statistics II

PED 210 Nutrition

SEMN 207 Global Health and Social Justice

Social and cultural determinants of health

ANSO 210 Medicine and Society

ANSO 225 Sex and Sexualities

ANSO 295 Understanding Violence

ANSO 245 Qualitative Methods

ANSO/SEMN 255 You Are What You Eat (check with your Advisor to see if this "counts")

ANSO 310 Social Research for Social Change

ANSO 325 States, Bodies, and Epidemics

ANSO 350 Political History of Western Environmental Thought

PHIL 305 Biomedical Ethics

PSYC 211 Adolescent Development

PSYC 270 Feminist Psychology of Women

PSYC 295 Health Psychology

PSYC 424 Drugs, Addiction, and Behavior

PSYC 495 Advanced Psychology of Sexuality

PSYC 441 Psychology and the Law (when it has a service-learning component)

SPAN 205 Cultures of Health and Disease in Hispanic Communities

SEM 408 -01 (and lab, 408-02) Slow Farming

Public policy

ECON 225 Economics of Development and Growth

ECON 235 Environmental and Resource Economics

ECON 265 Issues in Urban Economics

ECON 290 Health Economics

POLS/WGS 265 Feminist Political Theories (cannot count towards both social/cultural determinants & public policy elective)

POLS 270 The European Union: Institutions, Actors, Aliens, and Outcomes

POLS 310 Women, States, and NGO's

POLS 330 Politics of the Holocaust

POLS 380 Drugs, Democracy, and Human Rights

POLS/SEM 406 Male Violence Against Women

Experiential requirement

CGHL requires students to incorporate at least one immersive public health experience into their concentration. When CGHL 210 is offered as a service-learning seminar, it fulfills this requirement. Otherwise, students must seek community-based learning experiences, approved in advance by the director/s that will count towards this requirement. Examples that may be approved include health-related service-learning courses, ICRPs abroad, SIPS, internships and community-based research with an explicit public health focus, employment within a public health field; and/or certain Center for Civic Engagement (CCE) programs at K. *Clinical experiences –e.g. working in a doctor's office or hospital -- may or may not count, depending on context.* The CCE has built many health-related community partnerships in Kalamazoo, and offers a limited number of paid, six-week summer Community Building Internships with local organizations, many of them in health fields.

To fulfill this requirement, students may also be required to write a reflection or essay that combines their experience and a scholarly literature review to explicitly demonstrate connections to and learning about community and global health, in particular the social determinants of health.

Community and Global Health courses

CGHL 120 Epidemiology

This course provides students with the fundamental concepts, skills and perspectives of epidemiology and epidemiological thought and introduces some of the major issues and challenges in global and community health today. Students will learn and apply epidemiological methods.

CGHL 210 Contemporary Issues in Public Health

This discussion-based introductory survey explores contemporary issues, theories, and methods in public health. We use the social determinants of health framework to examine critically how race, gender, age, environment, class, and access to culturally appropriate health services have historically and dynamically shaped the health of communities and persons, as well as their influence on the "the modern plagues." Student work emphasizes and will further develop skills in collaboration, critical thinking and reasoning, cultural humility, the application of theory to practice, and written and oral communication in diverse media.

CGHL 593 Senior Individualized Project

A small number of students may do SIPs in the concentration each year, but are encouraged to work with faculty advisors in their major.

The Academic Catalog contains the most accurate information available at the time of publication. Statements contained therein are not contractual obligations, and verbal or other representations that are inconsistent with or not contained within the catalogues' offerings or policies are not binding. Kalamazoo College reserves the right to change, without specific notice, offerings, policies, procedures, qualifications, fees, and other conditions.

Critical Ethnic Studies

Professors: Baptiste, Gómez (director), Katanski, Salinas, and Sinha

Critical Ethnic Studies interrogates the production of knowledge. CES Majors are required to theorize from multiple, and simultaneous, narratives of silenced peoples and epistemologies. Critical Ethnic Studies untangles and analyzes colonial and racial projects that attempt to govern the relationship between people and land.

Critical Ethnic Studies is an interdisciplinary field and process of engagement. The field seeks to change the logic governing the academy, and does not accept an uncomplicated grafting of content onto a universal idea. This change is realized through the relentless pursuit of multiple means of engagement. These processes invert, rethink, and displace universalities. Central to the field is a refusal to consume the other. Critical Ethnic Studies requires that scholars go beyond themselves, and devise conversations that move beyond voyeurism and consumption.

Requirements for the Major

Eight units are required.

Required Courses

CES 200: Argument with the Given (key concepts)
CES 240: Language: The Colonial and Imperial Difference
CES 260: Insurgency, Solidarity and Coloniality of Power
CES 490: CES Senior Colloquium

Four Electives chosen from Critical Ethnic Studies Elective List:

ANSO 270 Communities and Schools
ANSO 357 Immigrants and Exiles
ANSO-420: Border Epistemologies
ENGL 150 RTW*: Beyond Realism: Imperial Romance
ENGL 155 RTW*: Identities
ENGL 156 Reading the World: Social Justice
ENGL 220 African American Literature
ENGL 221 African Literatures
ENGL 222 American Indian Literatures
ENGL 230 US Ethnic Literature
ENGL 260 African Cinemas
ENGL 310 Constructing Blackness
ENGL 318 Post-colonial Literatures
ENGL 323 Chicana/o Literature
ENGL 331 East Asian Diasporic Literatures
ENGL 435 Advanced Literary Studies: American Indian Literature and the Law
GERM 430 Contemporary German Minority Cultures
GERM 435 Minority Cultures in Germany
RELG 120 Religion in the Early U.S.
RELG 121 Religion in the Modern U.S.
RELG 122 Religions of Latin America (and the Caribbean)
RELG 220 Catholicism in the Americas
RELG 221 Black Religious Experience in the Americas
RELG-295: Race and Islam in America
SEMN 499 Social Justice and the American City (when taught by Drs. Fong and Salinas)
WGS-390: Feminist and Queer Inquiry

*Courses taught as part of the RTW series in the English Department must be approved of by CES Director. Only those RTW courses taught by Drs. Salinas and Sinha will be approved.

Courses that fit into the major will be designated CES courses under course type. The elective lists will continue to develop. For a list of current electives please consult the Critical Ethnic Studies website.

Courses taken at other U.S. colleges and universities, or on Study Abroad, may count for an elective course. We usually only accept one transfer credit toward the major. Please speak with the Director of the program for final approval and clarification.

Critical Ethnic Studies courses

CES 200 Argument With the Given This course is a survey course; consequently a wide breadth of topics will be covered. The primary work will consist of developing a sophisticated understanding of central themes, and key concepts, in the field of Critical Ethnic Studies. Students will pursue that understanding via an interdisciplinary process. The secondary goal will be to acquire and build the skills necessary to pursue further learning in Critical Ethnic Studies; these include identifying your own research agenda (obsessions and desires), stocking your analytical tool kit (bibliographic skills, critical thinking, and the identification of knowledge demands), and lighting your intellectual fire (interest in the field).

CES 240 Language: the Colonial & Imperial Difference This course is an interdisciplinary survey course designed to introduce students to the study of language and power. Our primary objective will be to assert linguistic rights and interrogate the politics of language in light of colonization, imperialism and the transit of empire. We will consider ideas and practices of literacy, language revitalization, translation and identity. These explorations will serve as a means to counter the monologism, monoculture, and monolingualism often invoked in nationalist projects.

CES 490 CES Senior Colloquium The Critical Ethnic Studies Senior Colloquium, 1-unit course collaboratively shaped by the CES faculty and senior majors. The colloquium will focus on the planning and executing of an intellectual social-political project that contributes to the CES program, to the larger community, and to the field of Critical Ethnic Studies. The Critical Ethnic Studies Senior cohort will decide the form and content project, in collaboration and consultation with CES faculty, who will provide leadership and organizational support. Infused in the project and the work of the course are professional development, collaborative scholarly work, and learning community development. Prerequisite: Must be a CES Major

CES 593 Senior Individualized Project

Critical Theory Concentration

Director: Professor Latiolais

The central goal of critical theory is (1) to analyze the various forces that shape contemporary societies, (2) to diagnose their crises, antagonisms, ruptures, and (3) to identify and mobilize agents of social change. Critical theory is a term that describes a wide array of approaches to understanding and criticizing the myriad relations of domination characterizing contemporary society. Although there are many disagreements among critical theorists, most agree about the terrain under consideration: how do human beings create the social world, and how are they created by it, in ways that disempower social agents and disfigure their desires? Or, what is the relationship between structure and agency, and what does this tell us about relations of power and domination? Human freedom and social justice are generally the ethical ideals animating these investigations, so that critical theory is necessarily both descriptive and normative in nature while it presumes a close connection between theory and practice. Most simply, critical theorists ask, what is wrong with our world, and how can we make it better? At a deeper methodological level, critical theorists also see themselves as practitioners in a distinctive orientation to knowledge. Interdisciplinary in nature and drawing primarily from numerous fields in the humanities and social sciences, critical theory offers a genealogy of social reality on one hand and a genealogy of its own critical stance within it on the other. Many critical theorists presume that language both creates and interprets reality, that agents are historically constituted, or that knowledge is bound up with power relations so that there is no objective "outside" from which to view the "truth." Thus, critical theory poses a challenge to many of the traditional disciplines that assume that facts can be ascertained and deployed free of a normative framework.

Requirements for the Concentration

Number of Units

6 units

Required Course

PHIL 208 19th-Century Philosophy: The Critique of Modernity

Five additional courses taken from at least three different departments:

ANSO 205 Urban Sociology
ANSO 225 Sex and Sexualities
ANSO 236 Race and Racism
ANSO 275 Thinking Theoretically
ANSO 330 Class, Status, and Power
ANSO 345 Theories of Society and Culture
ARTX 224 20th-Century Art
ARTX 227 Modern Art Museum
ARTX 290 Art and Gender
ARTX 340 Ways of Seeing
ENGL 108 Global Media & Visual Culture
ENGL 218 Post-Colonial Literature
ENGL 390 English Junior Seminar
ENGL 435 Advanced Literary Studies: American Indian Literature and the Law
ENGL 436 Literary Theory
PHIL 212 Philosophy of the Social Sciences
PHIL 211 Philosophy of Law
PHIL/SEMN 215 Human Rights & International Law
PHIL 291 Theorizing Citizenship & Immigration
PHIL 306 Philosophy of Language
PHIL 310 Critical Social Theory
PHIL 311 Postmodern Critical Theory
POLS 260 Liberty, Equality, and Authority
POLS 265 Feminist Political Theories
POLS 360 Contemporary Political Theory
POLS 320 Democracy and Democratic Theory
PSYC 430 Interviewing and Narrative Analysis
RELG 201/ARTX 205/SEMN 205 Religious Art and Material Culture
RELG 202 Same-Sex, Gender, and Religion
RELG 212 Contemporary Biblical Studies
WGS 390 Feminist and Queer Inquiry

Critical Theory Courses

CRIT 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

East Asian Studies

Professors: Sugimori (Director, Japan Track), Chamness, Frost (Director), Walker

East Asian Studies is an interdisciplinary major that introduces students to the region that includes China, Japan, and Korea. Home to some of the world's most ancient and complex cultures, East Asia continues to be a significant, though little understood region today. The East Asian Studies major requires at least two years of either Chinese or Japanese (or demonstrated equivalency) and at least six months of study abroad in China or Japan. In addition to language courses in Chinese or Japanese, students take courses taught in English on the literatures, histories, cultures, and societies of China, Japan, and Korea to develop both in-depth knowledge of one country (China or Japan) and broader familiarity with the region in general. The skills and cultural expertise that East Asian Studies majors acquire are applicable in a wide variety of career fields, including, but not limited to, education, business, government, law, and communications.

To maximize their experiences abroad, students are advised to begin their language study in the freshman year. Those who are particularly interested in languages are encouraged to consider supplementing their East Asian language with the other East Asian language offered on campus or another second language. Whether planning to attend graduate school or to seek employment in an East Asia-related occupation, students are encouraged to choose a SIP project that serves as a meaningful capstone to their work in the major.

Requirements for the Major

Number of Units

8 units, not including language courses. The 8 units may include the SIP (if undertaken as an EAS, CHIN, or JAPN program SIP). SIPs in EAS, or in the Japanese or Chinese programs should be undertaken in the spring in conjunction with the senior seminar.

Required Courses

A. Language courses:

For the China Track: CHIN 201, 202, 203 (or demonstrated equivalent competence)

For the Japan Track: JAPN 201, 202, 203 (or demonstrated equivalent competence)

B. Non-language courses: (4 Units)

HIST 103 Introduction to East Asian Civilizations

Three courses from among:

CHIN 225, 235; JAPN 236, 237, 238, 239;

CHIN 215, 220, 245; JAPN 215, 245, 250

Students are strongly encouraged to take a sophomore seminar related to East Asia.

C. Senior Seminar (1 unit)

EAST 490 East Asian Studies Senior Seminar

Electives (3 units)

Three, non-language courses from at least two different areas below. (With written permission, students may apply one course from a six-month study abroad program or two relevant courses from a nine-month program toward the elective requirement.) Students are strongly encouraged to take at least one course specifically about the country that is not their focus. Note: students who wish to count on-campus, one-time offering courses related to East Asia that are not on the list below should consult the directors.

Literature: CHIN 225, 235; JAPN 236, 237, 238, 239

Culture: CHIN 215, 220, 245, 260; JAPN 215, 245, 250

Humanities: HIST 280, 282, 283, 285, 288, 289, 397

Economics and Business

Professors: Apps (Chair), Geremew, Gonzalez (President), Hultberg, Hussen, MacMillan, Moffit, Stull

Mission Statement

Integrating Economics and Business, theory and practice, we develop creative, broad-minded problem-solvers and leaders.

The department's primary objective is to ensure that our students can apply economic and business principles to the world around them. To achieve this objective, the department introduces the students to economic and business problems, theories, and policies within the context of a liberal arts education. The department's courses fall into four broad categories: (1) economic theory at the introductory and intermediate levels, (2) quantitative tools and methods, (3) fundamental business principles, and (4) economic and business field courses. In addition to the department's course work, students also benefit from practical experience through internships, a senior individualized project, and a senior seminar. The math cognate courses are required to provide students with a strong foundation in contemporary business and economic decision-making processes that are increasingly based on marginal analysis, optimization, and descriptive and inferential statistical analysis. The department encourages additional mathematics and statistics courses for all our majors, especially for majors who wish to pursue graduate degrees.

The department offers two distinct majors: a major in economics and a major in business, both of which require a total of ten units for completion. A student cannot major in both economics and business.

Advanced Placement

Students with AP scores of 4 or 5 in Economics may, in consultation with the Department Chair, replace the ECON-101 Principles of Economics requirement with an elective course from within the major.

Course Classification

Courses cross-listed as between Business (BUSN) and Economics (ECON) can apply to elective requirements in either major.

Requirements for the Major in Economics

Number of Units

Eight units plus two math cognate courses are required, exclusive of the SIP.

Required Courses

ECON 101 Principles of Economics

ECON 305 Intermediate Microeconomics

ECON 306 Intermediate Macroeconomics

Economics Elective Courses

Take five out of the following set of courses: ECON 225, 235, 245, 262, 265, 270, 275, 280, 290, 360, 405, 410, 415, 490 or 491

Two of these courses must be taken from 300-level courses or above, at least one of them must be a 400-level course.

Required MATH Cognate Courses

Take two courses; one from each of the following two categories of courses:

1. Differential Calculus: BUSN/ECON 155 Mathematical Methods for Business and Economics or MATH 112 Calculus I or MATH 110 & 111 Calculus I with Review or AP Credit.
2. Statistical Analysis: BUSN/ECON 160 Statistics for Business and Economics, MATH 260 Applied Statistics I, MATH 360 Applied Statistics II, or AP credit.

Requirements for the Major in Business

Number of Units

Eight units plus two math cognate courses are required, exclusive of the SIP.

Required Courses

ECON 101 Principles of Economics

BUSN 150 Principles of Accounting

ECON 305 Intermediate Microeconomics

ECON 306 Intermediate Macroeconomics

Electives

Take four out of the following: BUSN 205, 210, 215, 220, 245, 250, 275, 290, 325, 340, 350, 355, 365, 370, 492 or 493;

Two of these courses must be taken from 300-level courses or above, at least one of them must be a 400-level course

Required MATH Cognate Courses

Take two courses, one from each of the following two categories:

1. Differential Calculus: BUSN/ECON 155 Mathematical Methods for Business and Economics or MATH 112 Calculus I or MATH 110 & 111 Calculus I with Review or AP credit.
2. Statistical Analysis: BUSN/ECON 160 Statistics for Business and Economics, MATH 260 Applied Statistics, or AP credit.

Economics and Business courses

ECON 101 Principles of Economics An introduction to the concerns and methods of economics, covering both microeconomic and macroeconomic principles. This course analyses how markets work and how economic decisions are made. It considers the interactions of firms and households in individual markets as well as the workings of national and international economies. The class will examine current economic issues and study how policy can be used to address economic problems.

ECON/BUSN 160 Statistics for Business and Economics Designed to give economics and business students the quantitative skills necessary to understand as well as undertake a serious research project. The emphasis in this course is on statistical inference and basic econometrics. The principal topics covered are probability and probability distributions, sampling distributions, confidence intervals, hypothesis testing, and regression analysis. Computer software will be used to apply these techniques to relevant economic problems. Students may substitute MATH 260 for ECON 160. Prerequisite: ECON-101

ECON 225 Economics of Development and Growth The course explores the topic of economic development; what is the meaning of economic development and why some countries are "developed," while others are not. It explores what tools and policies can be used to improve the level of income and development in nations. It studies theories of economic development and models of economic growth and sheds light on topics such as population growth, human capital, income inequality, environmental impacts, and institutional frameworks. Prerequisite: ECON-101

ECON 235 Environmental and Resource Economics Study of the economic perspective of environmental and resource problems and issues; the management and allocation of renewable and nonrenewable resources; the trade-off between economic growth and environmental amenities; and the impacts of natural resource availability on economic growth. Emphasis on the development and application of economic theory to contemporary natural resource issues. Prerequisite: ECON-101

ECON/SEM 240 Economics for Global Travelers This Sophomore Seminar examines how economics can contribute to a better understanding of the world and our place in it. We will look at differences, similarities, and linkages among the economics of various nations. We will study flows of money, products, people, technologies, and ideas across national borders. The approach will be non-technical with an emphasis on understanding economic ideas. We will spend more time writing and discussing than on models or equations. Does not count toward economics or business major. Prerequisite: Sophomores Only

ECON/BUSN 245 Money, Banking, and Financial Markets This course is intended to give students a broad overview of the functions of the financial system and monetary policy in the U.S. and the global economy. It covers the Bond, Stock and Foreign exchange markets and how interest rates, stock prices and the value of the dollar in terms of foreign currency are determined. Bank balance sheets, Interest rate risk, liquidity, asset and capital adequacy management are also covered. The functions, history and role of the Federal Reserve (The Fed), the goal of monetary policy and monetary policy tools are discussed in detail. Prerequisite: ECON-101

ECON 262 Fiscal & Monetary Policy in Times of Crisis Since the financial crisis of 2009, countries have used unusual and novel fiscal and monetary policies in their attempts to stabilize and grow their economies. New policies include austerity bail-outs, zero interest rates, and quantitative easing. We will examine the theoretical underpinnings of these policies as well as their real world impacts. Prerequisite: ECON-101

ECON 265 Issues in Urban Economics This course is both an introduction to urban economics and an in-depth study of one current urban issue. We will examine why cities exist, where they develop, and how they grow and decline. We will also study the economic aspects of contemporary urban planning and development policy issues such as land use zoning, housing, traffic congestion, publicly vs. privately provided goods. Prerequisite: ECON-101

ECON 270 Labor Economics The aim of this course is to provide an understanding of how labor market function. The topics include labor supply and labor demand, wage determination, human capital and education, unemployment, discrimination, and labor mobility. By the end of the course, students should be able to understand the theoretical concepts and empirical tools used to analyze labor markets and related public policy issues. Prerequisite: ECON-101 and ECON-160

ECON 280 Law and Economics Law and Economics studies the interaction between the legal system and the market system. It examines why law is necessary for markets to function and it uses economic principles to analyze laws. This course uses basic tools of economics to understand a variety of legal issues. Topics covered include property and contracts, civil vs. criminal law, antitrust, environmental regulation, and international trade policy and regulation. Prerequisite: ECON-101

ECON/BUSN 290 Selected Topics in Economics Special Topics offerings focus upon topics not addressed in the department's regular offerings. The course can be repeated with a different topic. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: ECON-101 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

ECON 290 Health Economics This course is designed to provide students with issues related to efficiency, effectiveness, value, and behavior in the production and consumption of health and health care. The course will cover the following topics: the production of health, the demand for health care, government's influence on health behaviors, health insurance's effect on the demand for medical care, employer-sponsored health insurance's impact on labor market outcomes, and insurance's effect on health. The class will also include guided discussions of current health care topics. Students should be able to think critically about health-related policy issues by the end of the class. This course can count for the Economics Major. Prerequisite: ECON-101

ECON 305 Intermediate Microeconomics This course deals with (1) the study of the theories of household and firm behavior, equilibrium analysis, market structure, pricing, economic efficiency, and social welfare; and (2) the applications of microeconomics theory to solve real problems faced by actual decision makers in industry and government. Students are encouraged to take a 200 level Economics or Business course before taking ECON 305 though it is not a requirement. Prerequisite: ECON-101; ECON-155 BUSN-155 or MATH-112; 200-level Economics or Business course recommended. Open to Junior and Senior Business majors and all Sophomore and First-Year students.

ECON 306 Intermediate Macroeconomics This course introduces the major schools of thought in macroeconomics theory, including the Classical, Keynesian, Monetarist, New Classical, and New Keynesian models. Topics covered include: the determinants of long-run economic growth; IS-LM framework and aggregate demand and supply framework in both closed and open economies; the short run fluctuation of the economy; the influence of monetary, fiscal, and exchange rate policy; and alternative theories about aggregate supply. Students are encouraged to take a 200 level Economics or Business course before taking ECON 306 though it is not a requirement. Prerequisite: ECON-101; ECON-155 BUSN-155 or MATH-112; 200-level Economics or Business course recommended. Open to Junior and Senior Business majors and all Sophomore and First-Year students.

ECON 360 Econometrics A course that focuses on econometric theory and practice. Topics covered include the classical regression model, serial correlation, and time series estimation. In this computer lab based course, students will apply econometric techniques to economic questions and issues. Prerequisite: ECON/BUSN-160 or MATH-260 or 261 and ECON-305 or ECON-306 Open to Junior and Senior Economics and Business majors and all Sophomores and First-Year students.

ECON 380 Research Methods in Economics This course is a required junior research seminar for those wishing to do a SIP in the Economics Department. The overarching goal of this course is for students to learn basic business research methods and skills sufficiently to complete a Economics Department SIP successfully. Rising senior class students will learn how to design meaningful research projects, organize and write a compelling literature review, collect and analyze data with statistical methods appropriate for testable hypotheses, and write a final research report. This course is mandatory for those planning to do a SIP in economics. A companion course, Research Methods in Business, will be taught at the same time. Prerequisite: ECON-305, ECON-306 and BUSN/ECON-160 Open to Junior Economics majors only.

ECON 405 International Trade Explores the gains from specialization and trade within the context of various international trade models. Studies the instruments of trade policy and their welfare effects and carefully explores the political economy of trade policy. Prerequisite: ECON-305

ECON/BUSN 410 Open Economy Macroeconomics This course introduces basic concepts and analytical framework of open economy macroeconomics. It explores balance of payments, fixed and floating exchange rate, international financial markets, as well as equilibrium income in the open economy. It also provides students basic knowledge about how government policies affect private-sector performance in a global setting. Prerequisite: ECON-306

ECON 415 Public Sector Economics Examination of federal, state, and local budget priorities and programs from both theoretical and case study approaches. Implications of different taxing and spending decisions will be analyzed. Prerequisite: ECON-305

ECON 490 Advanced Topics in Economics Or Business The content for this course varies each quarter. Prerequisite: Take ECON-235 and Seniors Standing

ECON/BUSN 490 The Opioid Crisis This senior seminar explores the intersection of the War on Drugs, pharmaceutical company profit seeking, international poverty and the search for marketable crops, and impacts on American communities and families. We will examine markets, market failures, business models, and government intervention along the way. Prerequisite: ECON-305 and ECON-306 Open to Senior Economics and Business majors.

ECON/BUSN 490 Financial Frictions & Monetary Policy This seminar provides a critical in depth understanding of the relationship between the financial sector and monetary policy in the context of the 2008/09 financial crisis. It covers the topics related to conventional and unconventional monetary policy, the Zero Lower Bound (ZLB) and forward guidance, the effect of monetary policy on asset prices, monetary transmission mechanisms, moral hazard and adverse selection in financial markets, the yield curve and term premiums and the role of monetary policy in financial stability. Most of the topics will be supported by empirical exercises on Eviews or Matlab. Prerequisite: Econ 306 Open to Senior Economics and Business majors Prerequisite: ECON-306 Open to Senior Economics and Business majors

ECON 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: ECON 380, permission of department and SIP supervisor required.

Business courses

BUSN 150 Principles of Accounting Study of financial accounting theory as a tool for effective business management and control. Emphasis will be placed on the accounting cycle and cash-flow analysis as well as analysis and comprehension of standard financial statements. Prerequisite: ECON-101

BUSN/ECON 155 Math Methods for Business and Economics Designed to give economics and business students the quantitative skills necessary for upper-level courses in the department. The principal topics covered are graphing of linear and nonlinear functions, basic rules of differentiation, optimization techniques, and mathematics of finance (compounding and discounting). Students may substitute MATH 112 for ECON/BUSN 155. Students that have successfully completed MATH-112 will not be allowed to earn credit for ECON/BUSN 155. Prerequisite: ECON-101, and at least a high school algebra course.

BUSN/ECON 160 Statistics for Business and Economics Designed to give economics and business students the quantitative skills necessary to understand as well as undertake a serious research project. The emphasis in this course is on statistical inference and basic econometrics. The principal topics covered are probability and probability distributions, sampling distributions, confidence intervals, hypothesis testing, and regression analysis. Computer software will be used to apply these techniques to relevant economic problems. Students may substitute MATH 260 for BUSN/ECON 160. Prerequisite: ECON-101

BUSN 205 Principles of Management Explores fundamental management concepts, strategies, combining theory with practical application. Core course topics revolve around leadership, team motivation, goal-setting and evaluation, effective communication, and results-oriented practices. Team work and oral presentation skills are heavily emphasized. Students ultimately define their own authentic leadership styles and purposes. Speakers, texts, and articles will supplement class discussions. Prerequisite: ECON-101. Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 215 Principles of Managerial Accounting Study of managerial accounting theory including cost accounting, production variance analysis, responsibility accounting and reporting, differential accounting, and budgeting. Prerequisite: BUSN-150. Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 220 Principles of Marketing Study of the marketing discipline as it applies to the effective management of small and large businesses. The course emphasizes marketing strategy, consumer motivation, market research, product positioning, target market segmentation, product development, pricing, promotion and distribution, and effective resource allocation. A team project, evaluated by industry experts, ties together course concepts. Students should be familiar with accounting and basic statistical concepts. Prerequisite: ECON-101 Open to Junior and Senior Economics and Business majors and all Sophomore and First-Year students.

BUSN/ECON 245 Money, Banking, and Financial Markets This course is intended to give students a broad overview of the functions of the financial system and monetary policy in the U.S. and the global economy. It covers the Bond, Stock and Foreign exchange markets and how interest rates, stock prices and the value of the dollar in terms of foreign currency are determined. Bank balance sheets, Interest rate risk, liquidity, asset and capital adequacy management are also covered. The functions, history and role of the Federal Reserve (The Fed), the goal of monetary policy and monetary policy tools are discussed in detail. Prerequisite: ECON-101 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN/ECON 275 Industrial Organization and Public Policy Industrial Organization studies the impact of market structure on strategy, conduct, and economic performance. This course will use industry studies to develop the theoretical framework of industrial organization, to examine economic problems related to different market structures, and to analyze public policy. We will spend a substantial amount of time on the history of individual industries. We will explore U.S. public policy towards industry, with an emphasis on antitrust. Prerequisite: ECON-101 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 290 Selling Strategy The course examines the strategy, skills and art involved in selling - primarily as it applies in for-profit U.S. businesses - but also considers the selling skills needed within non-profit organizations. Topics will include: building a customer-centric strategy, understanding transactional vs consultative selling, networking, and preparing for/executing/following up from sales calls. The course will link wherever possible to real world business situations through case study analyses and guest lecturers. Each student will develop a sales plan for their selected product or service, culminating in a role play presentation at the term's end. Prerequisite: ECON-101 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 290 Leading Teams and Organization This experiential course fosters deep self-reflection about what behaviors we choose to use, the consequences of those behaviors, and given choices, how we might be even more productive. This course helps you cultivate mindsets and build skills to understand the ways in which groups and their members affect each other. You will also learn frameworks for identifying and resolving current problems in organizational settings. Open to Econ and Busn majors and sophomores.

BUSN 290 Social Innovation & Entrepreneurship This ambitious course is for students interested in understanding entrepreneurial mindset to design and develop innovative, social solutions/ventures addressing key public interest challenges in domestic or global context in such areas as health, environment, social justice, public safety, arts, wellness, and education. This class is open to students of all majors, and combines design thinking exercises, small group teamwork, presentations, and faculty feedback to support development of your ideas. Limited enrollment. Admission by application.

BUSN 290 Design Thinking & Entrepreneurship How do you create a successful start-up? What does it take to solve big problems? What if we don't consider ourselves creative? What are differences between idea and great opportunity? This ambitious course uses a wide variety of experiential methods and design thinking approach, including small team exercises, simulations, and presentations. Sample topics include how to frame and re-frame problems, how to change assumptions, how to generate and test ideas, and how to tell a compelling story to communicate your ideas. Students also take on a quarter-long, team-based challenge that allows them apply the tools they learn to a real-world problem. Open to Econ and Busn majors and sophomores

BUSN 290 Posing Research Questions

BUSN 290 Selected Topics in Business Special Topics offerings focus upon topics not addressed in the department's regular offerings. The course can be repeated with a different topic. Check the course schedule to see when Special Topics courses are being offered. Prerequisite: ECON-101 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 325 International Marketing Explores consumer marketing and business practices across the world. Students will compare consumer motivation, purchase behavior, cultural norms, branding, and marketing practices in different areas of the globe, as well as within racial, ethnic, and gender groups domestically. Global branding case studies will supplement texts and discussions. Prerequisite: BUSN-220 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 340 Advertising & Promotion Promotion and Advertising is an intermediate level business course that builds on fundamental marketing principles. Students apply advertising and promotion principles to create, communicate and deliver brand equity value in products and services, organizations, and within the individual students themselves. The course explores the fundamentals of an integrated marketing communications campaign, from consumer behavior and communication theory to creative strategy and implementation. At each juncture, social, cultural, technological and regulatory issues will be considered. Prerequisite: BUSN-150 and BUSN-220 Open to Junior and Senior Business majors and all Sophomore and First-Year students.

BUSN 350 Principles of Corporate Finance Study of finance theory as it applies to corporate management and institutional investments. The course emphasizes present value analysis as an analytical tool, working capital management, resource budgeting, market efficiency, stock and bond valuation, dividend policy, financial leverage and risk, and mergers and acquisitions analysis. Prerequisite: BUSN-150 and BUSN/ECON-160 or MATH-260.

BUSN 355 Principles of Investments This course will provide a general overview of personal investing. We will discuss portfolio theory; equity, bond and commodity markets; investment tools and vehicles; and the construction of an effective investment portfolio. This will be taught from the perspective of the individual investor. Prerequisite: BUSN-150, and BUSN/ECON-160 or MATH-260

BUSN 370 Negotiation and Persuasion This course aims to give you a competitive advantage in situations that require you to influence others. Drawing from theory and research, the course will attempt to improve your understanding of negotiation and persuasion. Using case studies and exercises, the course will provide skills that enhance your ability to influence, negotiate, and manage conflicts. Prerequisite: Two 200-level BUSN courses

BUSN 380 Research Methods in Business This course is a required junior research seminar for those wishing to do a SIP in the Business Department. The overarching goal of this course is for students to learn basic business research methods and skills sufficiently to complete a Business Department SIP successfully. Rising senior class students will learn how to design meaningful business research projects, organize and write a compelling literature review, collect and analyze data with statistical methods appropriate for testable hypotheses, and write a final research report that meets minimum business scholarship requirements. This course is mandatory for those planning to do a SIP in business. A companion course, Research Methods in Economics, will be taught at the same time. Prerequisite: Take ECON-305, ECON-306, BUSN/ECON-160 and at least one of the following: BUSN-220, BUSN-350 or BUSN-355

BUSN/ECON 410 Open Economy Macroeconomics This course introduces basic concepts and analytical framework of open economy macroeconomics. It explores balance of payments, fixed and floating exchange rate, international financial markets, as well as equilibrium income in the open economy. It also provides students basic knowledge about how government policies affect private-sector performance in a global setting. Prerequisite: Take ECON-306

BUSN/ECON 490 Advanced Topics in Business The content for this course varies each quarter. Prerequisite: ECON-305 and ECON-306 Open to Senior Economics and Business majors.

BUSN/ECON 490 Financial Frictions & Monetary Policy This seminar provides a critical in depth understanding of the relationship between the financial sector and monetary policy in the context of the 2008/09 financial crisis. It covers the topics related to conventional and unconventional monetary policy, the Zero Lower Bound (ZLB) and forward guidance, the effect of monetary policy on asset prices, monetary transmission mechanisms, moral hazard and adverse selection in financial markets, the yield curve and term premiums and the role of monetary policy in financial stability. Most of the topics will be supported by empirical exercises on Eviews or Matlab. Prerequisite: ECON-306 Open to Senior Economics and Business majors.

BUSN 492 Financial Statement Analysis This course is designed to prepare students to analyze, interpret and use financial statements effectively, both from a general management and investment perspective. A central theme is "value creation" - how a manager may use financial statements to guide value creating behavior and how investors use financial statements to identify value-creating opportunities.

BUSN 493 Strategic Marketing Management Strategic Marketing Management is intended for seniors who wish to explore marketing and business strategy. Prerequisite: BUSN-150, BUSN-220, and Seniors Standing

BUSN 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: BUSN 380, permission of department and SIP supervisor required.

3/2 Engineering Program

Professor: Askew

The dual degree program in engineering consists of three years of study at Kalamazoo College followed by approximately two years at an approved school of engineering. While at Kalamazoo, students complete the language requirement, physical education requirement, and Shared Passages First-Year and Sophomore Seminar requirements, along with specific science and mathematics course work. Students in the 3/2 program are excused from the SIP. Students must have 27 units of academic credit and one unit of PE before leaving Kalamazoo College. They then transfer to an engineering program accredited by the Accreditation Board for Engineering and Technology (ABET). Upon completion of sufficient work at that institution to satisfy the remaining requirements for a Kalamazoo College degree, those credits are transferred back to Kalamazoo College and the Kalamazoo Bachelor of Arts degree is awarded. Students in the 3/2 program are required to meet the Shared Passages Senior Capstone requirement by working with the Director of the program at Kalamazoo College to identify a single capstone course at the approved school that reasonably fits the published Senior Capstone guidelines. Upon transfer of the credit for this course back to Kalamazoo College, the student will have completed the Senior Capstone requirement. When the remainder of the specified work for the student's particular field of engineering has been completed, the Bachelor of Science in engineering is awarded from the engineering school.

The college is a dual degree affiliate of Washington University St. Louis (WUSL). This relationship eases the transfer process and provides access to supplemental financial aid funds at WUSL. In addition to a dual degree BA/BS level program, WUSL provides an unusual dual-degree into master's level program in engineering. Transfer to other engineering programs approved by the Accreditation Board for Engineering and Technology (ABET) is both possible and encouraged. In recent years Kalamazoo students have transferred into engineering programs at a variety of public universities with the most popular choices being Michigan Tech, Western Michigan University, Oakland University and the University of Michigan. Kalamazoo financial aid does not transfer to other schools, but some public universities have transfer scholarships that are added to their awards of need-based financial aid. Course and GPA requirements for transfer into these programs vary, and may change at any time.

English

Professors: Bade, Fong, Heinritz, Katanski, Mills, Mozina, Salinas, Seuss, Sinha, Smith (Chair)

The primary mission of the English Department is to create communities of learning in which students can enter into the power of language. Through the study of literature in English across global and historical cultures, the study of film and critical theory, the discipline of writing in a variety of genres, and the constant practice of collaboration, we lead students toward a comprehension of the complexity of their world, of themselves, and of the way word and image shape reality. Throughout history, writers and readers have acted as witnesses to the human situation, never more so than in the twenty-first century. Ultimately, we aim for our students to become witnesses in and for the word.

Advanced Placement/International Baccalaureate

Advanced Placement (AP) and International Baccalaureate (IB) credit may not count toward the major but may be applied toward the total number of units needed to graduate.

Units from Study Abroad and Transfer Credit

Students may receive up to one unit of credit toward the major or the minor for a class taken on study abroad. The course must first receive approval from the chair of the department. Students may also receive no more than one unit of transfer credit. As with a course being considered from study abroad, the course must get pre-approval from the chair of the department. Exceptions to these policies may be granted in unique circumstances and only through prior approval by the department.

Requirements for the Major in English

Number of Units

Ten units are required. A SIP in English is encouraged but not required.

An Advanced Literary Studies (ENGL 435) or Applied Theory (any 300-level) course may satisfy another requirement for the major, depending on its subject matter, but it may not be double-counted for two requirements. In such a case, students must pass a second, different Advanced Literary Studies or Applied Theory course.

Some courses have changed their numerical designation. If you have taken a course and see it listed under a different number, do not retake the course.

The major in English does not require a senior comprehensive exam.

Required Courses

Foundations

One Reading the World course chosen from the following (only one can count toward the Major): ENGL 150, 151, 152, 153, 154, 155, 156
ENGL 105: Introduction to Journalism OR ENGL 107: Introduction to Creative Writing
ENGL 109: Introduction to Literary Theory and Research Methods

Historical and Cultural Breadth

Four courses representing the three historical periods:

Pre-19th-Century Literature: ENGL 265, 266, 269, 324

19th-Century Literature: ENGL 267, 268, 270, 275, 325

20th- and 21st-Century Literature or Film ENGL 219, 220, 221, 230, 244, 245, 246, 247, 260, 276, 310, 318, 323, 326, 331

One of these four courses must focus on literature that draws significantly from
minoritarian, diasporic, or transnational traditions: ENGL 217, 219, 220,
221, 222, 227, 230, 264, 310, 318, 323, 331

Advanced Literary Study

ENGL 435: Advanced Literary Studies

Craft Sequences and Capstones

One of the following course sequences

Literary Criticism and Theory: ENGL 109: Introduction to Literary Theory and Research Methods; one Applied Theory course (any 300-level course); ENGL 436: Advanced Topics in Literary Theory

Film Criticism and Theory: ENGL 153: RTW: Classical Hollywood in Global Context; ENGL 260: Studies in Film; ENGL434: Advanced Film Theory

Fiction: ENGL 107: Introduction to Creative Writing; ENGL 211: Intermediate Fiction Workshop; ENGL 438: Advanced Fiction Workshop

Poetry: ENGL 107: Introduction to Creative Writing; ENGL 210: Intermediate Poetry Workshop; ENGL 437: Advanced Poetry Workshop

Nonfiction: ENGL 107: Introduction to Creative Writing; ENGL 215: Creative Nonfiction Workshop; ENGL 439: Advanced Nonfiction Workshop

Journalism: ENGL 105: Introduction to Journalism; ENGL 205 Feature Writing; ENGL 439: Advanced Nonfiction Workshop

Students planning on graduate work in English or film should take as many units of ENGL 435 as possible as well as the relevant craft sequence. Students planning on graduate work in journalism or creative writing should complete at least one craft sequence in your genre of interest.

Requirements for the Minor in English

Number of Units

Six units are required.

An Advanced Literary Studies (ENGL 435) or Applied Theory (any 300-level) course may satisfy another requirement for the minor, depending on its subject matter, but it may not be double counted for two requirements. In such a case, students must pass a second, different Advanced Literary Studies or Applied Theory course.

Required Courses

One Reading the World course (only one may count toward the minor): ENGL 150, 151, 152, 153, 154, 155, 156

One course in literature before the 20th century: ENGL 265, 266, 267, 268, 269, 270, 275, 324, 325

One course in literature or film from 1900 to the present, or one course in literature or film that draws significantly from a minoritarian, diasporic or transnational tradition: ENGL 217, 219, 220, 221, 222, 227, 230, 244, 245, 246, 247, 260, 264, 276, 310, 318, 323, 326, 331

One of the following course sequences:

Literary Criticism and Theory: ENGL 109: Introduction to Literary Theory and Research Methods; one Applied Theory course (any 300-level course); ENGL 436: Advanced Topics in Literary Theory

Film Criticism and Theory: ENGL 153: RTW: Classical Hollywood in Global Context; ENGL 260: Studies in Film; ENGL434: Advanced Film Theory

Fiction: ENGL 107: Introduction to Creative Writing; ENGL 211: Intermediate Fiction Workshop; ENGL 438: Advanced Fiction Workshop

Poetry: ENGL 107: Introduction to Creative Writing; ENGL 210: Intermediate Poetry Workshop; ENGL 437: Advanced Poetry Workshop

Nonfiction: ENGL 107: Introduction to Creative Writing; ENGL 215: Creative Nonfiction Workshop; ENGL 439: Advanced Nonfiction Workshop

Journalism: ENGL 105: Introduction to Journalism; ENGL 205 Feature Writing; ENGL 439: Advanced Nonfiction Workshop

Writing workshops

ENGL 105 Introduction to Journalism: Newswriting Principles and Techniques This course introduces students to the basic reporting and writing skills essential to creating "hard news" stories for print and online publications. In this class, students will write and re-write regularly to master key types of news stories. This course fulfills a Foundations requirement.

ENGL 107 Introduction to Creative Writing An introduction to the process of writing both poetry and prose, pairing the study of published work with the workshoping and development of student writing. This course fulfills a Foundations requirement.

ENGL 205 Feature Writing This course builds upon the fundamental writing and reporting skills and techniques introduced in ENGL 105. It introduces students to the process of creating feature stories, in the tradition of narrative or literary journalism, for print and online publications. This class will consist of regular writing workshops, intense self- and peer-editing, reading, and discussion. This course counts toward the Journalism craft sequence. Prerequisite: Take ENGL-105

ENGL 207 Arts Journalism This course explores the nature of arts, entertainment, and cultural criticism. Its purpose is to help students develop critical skills and express their views creatively, convincingly, and in a way that will engage a popular print or online reader. Students will also learn how to review specific works of art or popular culture, how to critically profile a major artist or popular celebrity, as well as write a broader piece of criticism that looks at larger artistic or cultural issues. This course does not count toward the Journalism craft sequence but will enrich your journalism background.

ENGL/SEMN 208 Food and Travel Writing In this writing-intensive class we will study the possibilities of journalism and creative nonfiction through the various forms of food writing and its relationship to place. Through reading and writing, we will explore food as sustenance, as a route through memory, as a reflection of culture and place, as both personal and public, and as history and politics. This course is a Shared Passages Sophomore Seminar. This course does not count toward the Journalism craft sequence but will enrich your journalism background. Prerequisite: Sophomores only

ENGL 210 Intermediate Poetry Workshop A workshop in which students practice and study poetic craft and both traditional and untraditional form by reading model texts and sharing their work. This course counts toward the Poetry craft sequence. Prerequisite: ENGL-107 and Sophomore Standing

ENGL 211 Intermediate Fiction Workshop A workshop in which students study and practice the elements of short fiction by reading model texts and sharing their own work. This course counts toward the Fiction craft sequence. Prerequisite: ENGL-107 and Sophomore Standing

ENGL 215 Creative Nonfiction Workshop A workshop that offers model texts and writing assignments that explore the possibilities of this hybrid form in which its practitioners look both inward and outward, drawing on the traditions and techniques of poetry, fiction, journalism, and critical writing to tell true stories. This course counts toward the Nonfiction craft sequence. Prerequisite: ENGL-107 and Sophomore Standing

ENGL 437 Advanced Poetry Workshop A workshop which enables students to develop and complete an independent writing project. Includes deeper discussion of poetic craft and form. This course is the required capstone course for the Poetry craft sequence. Prerequisite: ENGL-210 and Junior standing

ENGL 438 Advanced Fiction Workshop A workshop which enables students to develop and complete an independent writing project in fiction. Includes a discussion of longer forms (the novella and novel) as well as short stories. This course is the required capstone for the Fiction craft sequence. Prerequisite: ENGL-211 and Junior standing

ENGL 439 Advanced Nonfiction Workshop This course is the capstone workshop for both the journalism and creative nonfiction tracks in the English Department and allows student to develop and complete an independent writing project in nonfiction writing. Includes discussion of book-length works of literary nonfiction that seeks to find intersections between creative nonfiction and narrative journalism. This course is the required capstone for the Nonfiction and Journalism craft sequences. Prerequisite: ENGL-205 or ENGL-215, and Junior standing.

Literature and Film courses

ENGL 109 Introduction to Literary Theory and Research Methods This course will introduce critical schools and theoretical frameworks for prospective and declared English majors. It will focus on one literary text (or a limited set of literary texts) as a focus of analysis in order to understand literary studies within a historicized field of development. Students will read and research critical analyses of this text and the theories that underpin them. Possible theoretical perspectives include: New Historicism, Deconstructionism, Reader-Response, Feminist, Sexuality, Psychoanalytic, Critical Race, Postcolonial, Marxist. This course is a requirement for all English majors (and a prerequisite for all 300-level courses). By the end of the term, students will complete a curricular design, a document that will articulate their path through their major. This course fulfills a Foundations requirement.

ENGL 150 Reading the World: Beyond Realism An introductory study of works that go beyond realism, including attention to their cultural and social contexts. Focus areas may include fantasy or speculative fiction. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 151 Reading the World: Environments An introductory study of literary and cultural texts that articulate how human beings are connected to the natural world. The course will explore how locations and ecosystems shape and are shaped by human systems of meaning. Topics may include gardens, sustainable worlds, urban environments, and deep ecology, among others. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 152 Reading the World: Genre This course explores representations of the world through the lens of genre. Just as human understanding emerges from historical and cultural positions, so too does the choice of literary genres (fictional and nonfictional narratives, drama, and poetry) shape meaning. This class will focus on a genre (or a pairing of genres) as a way to examine how aesthetic and historically-rooted dimensions of literary forms give rise to representations of the world. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 153 Reading the World: Classical Hollywood in Global Context An introduction to the language of cinema, foregrounding historical and theoretical contexts of classical Hollywood cinema (1930-1945) and various aesthetic alternatives from around the world. Requires a weekly film screening outside of class. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 154 Reading the World: Global Stages An introduction to drama, examining a particular theme from a cross-cultural perspective. Focus areas may include theater's portrayal of ethnic/race relations or gender and sexuality, among other topics. Students will also consider the relationship of text and performance by attending local theatre productions. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 155 Reading the World: Identities This course explores literary and cultural texts addressing the nature of human identity and its development, particularly through issues of difference. Focus may be on one or more of the following: race, class, gender, nationality, sexuality, the body. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL 156 Reading the World: Social Justice This course examines social justice from a literary perspective, focusing on a particular issue, event, movement, or historical moment. It will emphasize areas of power difference, such as race and ethnicity, disability/ability, class, gender, and sexuality. All Reading the World courses stress the development of critical writing ability, critical thinking, and active discussion. This course fulfills a Foundations requirement.

ENGL/SEM 217 World Indigenous Literatures: The People and the Land A selective study of the literary traditions and contemporary texts of indigenous peoples around the world, focusing on indigenous communities in regions where Kalamazoo College students study and with a particular emphasis on texts that explore the complex relationships between indigenous communities and the land they claim as their own. This course is a Shared Passages Sophomore Seminar. For the Historical and Cultural Breadth requirement, this course fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: Sophomores only.

ENGL/SEM 219 Magical Realism Magical realism is a genre that combines elements of the fantastic with realism often in order to imagine utopias or resist restrictive aspects of society. This course will examine the genre, interrogate its relationship to other genres of fantasy, and consider the relationship between the aesthetic patterns of the genre and its potential for social advocacy. This course is a Shared Passages Sophomore Seminar. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-century course, or it fulfills the minoritarian, diasporic or transnational requirement. Prerequisite: Sophomores only

ENGL 220 African American Literature A study of central writers, works, and eras in African American literature with an emphasis upon how more contemporary texts engage in a kind of improvisational on conversations between authors, periods, and movements. This course will consider a variety of In addition to such genres (fiction, nonfiction, and poetry) as well as vernacular and lyrical traditions (as the slave narrative, autobiography, poetry, and fiction, the class will examine vernacular traditions and their influence on content and aesthetics, including the blues, jazz, and/or hip hop) and their influence on content and aesthetics. . For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-century course, or it fulfills the minoritarian, diasporic, or transnational requirement.

ENGL 221 African Literature This course will reflect on modern literatures in English from Africa. We will take a multi-genre approach, reading short stories, magic realist novels, and political tracts and reflect on the problems of diaspora in modern postcolonial states, the economic impact of colonial and neo-colonial practices, the policies responsible for dispossession, the use of English as an African language, and the rhetorical and political strategies used to combat forms of oppression. For the Historical and Cultural Breadth requirement, this course counts as 20th- or 21st-century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: A Reading the World course or instructor permission.

ENGL 222 American Indian Literatures A selective study of the literary traditions and contemporary texts of American Indian people with a focus on building an interdisciplinary understanding of cultural production. For the Historical and Cultural Breadth requirement, this course counts as 20th- or 21st-century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: A Reading the World course or instructor permission.

ENGL/SEM 227 Opium & the Making of the Modern World This course traces the social and literary history of opium across the nineteenth, twentieth, and twenty-first centuries. In addition to exploring the drug as a trope of the "exotic East," this course also understands opium as an important catalyst of imperial development and global domination. Analyzing autobiography, poetry, and fiction, the course focuses on depictions of travel and circulation to understand how opium has activated anxieties about gender, sexuality, and race over the last two centuries and to recognize how the illicit drug trade continues to shape current patterns of diasporic movement and global exchange. This course is a Shared Passages Sophomore Seminar. For the Historical and Cultural Breadth requirement, this course fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: Sophomores Only

ENGL 230 US Ethnic Literature A study of American literary texts primarily of the 20th and 21st centuries, from the perspective of their ethnic origins. For the Historical and Cultural Breadth requirement, this course counts as a 20th- and 21st-Century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: A Reading the World course or instructor permission.

ENGL 244 Studies in 20th-Century Literature An examination of radical departures from conventional technique in the most innovative modern poetry, fiction, and drama. For the Historical and Cultural Breadth requirement, this course counts as a 20th- and 21st-Century course. Prerequisite: A Reading the World course or instructor permission

ENGL 245 Electronic, Hypertext, and Multimedia Literature A study of digital and print literatures that emerge from computing and internet technologies, with a particular emphasis on the medium through which they are produced and rendered. Forms include CD-ROM, cybertext, hyperlink, mobile apps, and GPS/satellite synchronized. Through these forms, this course will explore how digital culture impacts textuality and challenges reading practices. For the Historical and Cultural Breadth requirement, this course counts as a 20th- and 21st-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 246 Modernism to Millennium: British Literature 1900-PRESENT A study of the literary culture of Britain and Ireland during this period through its literature. The course will highlight the aesthetic innovations that took place over the course of the twentieth century and examine their intersection with their historical context, including imperialism and decolonization, the World Wars, immigration and shifts in ethnic identity, class politics, and challenges to gender and sexual norms. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 247 Contemporary Literature A study of recent literature (fiction, poetry, and/or nonfiction), with emphasis on textual analysis, innovative technique and form, and sociocultural context. For the Historical and Cultural Breadth requirement, this course counts as a 20th- and 21st-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 260 Studies in Film This course enables an in-depth study of genre, national/regional cinema, or aesthetic movement. Topics vary by year. For the Historical and Cultural Breadth requirement, this course counts as a 20th- and 21st-Century course. This course counts toward the Film Criticism and Theory craft sequence. Prerequisite: ENGL-153 or Instructor Permission

ENGL/SEM 264 Global Shakespeares Shakespeare is the most translated, adapted, performed, and published Western author. Just what this means to Western and non-Western cultures is at the heart of this course. Many cultures have written back to Shakespeare, addressing race, sexuality, gender, and religion from their own cultural perspectives. What do exchanges between differently empowered cultures produce and reproduce? We'll tackle such questions as we read works by Shakespeare and literary/film adaptations from around the globe. And, closer to home, how do different communities in the United States receive and write back to Shakespeare? A service learning project with the Intensive Learning Center of the Kalamazoo County Juvenile Home will allow your students there, and our class, to consider those questions. As we work with these students to write their own adaptations of Othello, we'll all consider how writing back to Shakespeare might be a good way to empower students to question the assumptions his plays make. This course is a Shared Passages Sophomore Seminar. For the Historical and Cultural Breadth requirement, this course fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: Sophomores Only

ENGL 265 Shakespeare A study of Shakespeare's histories, comedies, and tragedies. Historical context, various critical perspectives, close textual explication, and analysis of film versions will be subjects for discussion. For the Historical and Cultural Breadth requirement, this course counts as a Pre-19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 266 Discoveries: British Literature 1550 -1750 A study of British literature emerging during the Renaissance/early modern period. This course will pair literary analysis with investigations of the artistic, political, religious, and social developments of the period, setting the literature amidst the various discoveries of the period. For the Historical and Cultural Breadth requirement, this course counts as a Pre-19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 267 Romantic Revolutions: Early 19th Century British Literature A study of poetry, fiction, and nonfiction from this tumultuous period of political and social upheaval and artistic innovation, emphasizing connections between cultural background and aesthetic production. For the Historical and Cultural Breadth requirement, this course counts as a 19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 268 The Victorians: British Literature 1832-1900 A study of British culture of the period through its literature, with emphasis on novels, poetry, and nonfiction. The course focuses on several defining themes of this tumultuous age: imperialism and racism, industrialism and its discontents, the Women Question, Darwin and the crisis of faith. For the Historical and Cultural Breadth requirement, this course counts as a 19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL/AMST 269 New World Narratives: American Literature 1500-1790 A study of the divergent and complementary tales emerging from those settled in or settling "America." Texts include American Indian and European creation myths, exploration narratives, Puritan poetry, captivity narratives, and late 18th-century fiction and nonfiction. For the Historical and Cultural Breadth requirement, this course counts as a Pre-19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL/AMST 270 Reform and Renaissance: U.S. Literature 1790-1865 "American" identity, the unsettling of indigenous populations, the movement of European populations westward, and the Slavery and Woman questions. Through an exploration of diverse texts, students will examine a literature shaped by an impulse to transform or reform pre-existing perspectives and genres. For the Historical and Cultural Breadth requirement, this course counts as a 19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL/AMST 275 American Realisms: U.S. Literature 1865-1914 This course examines a variety of approaches to knowing a literary period. We will explore theoretical, socio-historical, formal, and thematic paradigms that can organize our understanding of the wide variety of written and cinematic texts produced in the period between the end of the Civil War and the beginning of World War I. Through a study of the frequently conflicting stories about gender, race, sexuality, art, and Americanness that come to voice during this period, students will challenge and complicate their definitions of literary realism. For the Historical and Cultural Breadth requirement, this course counts as a 19th-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL/AMST 276 Modernism and Postmodernism: U.S. Literature 1914 - Present A study of the rise of a modern aesthetic in the wake of World War I and the postmodern response in the second half of the 20th century with an eye toward the diversity of voices and formal choices that mark this period. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course. Prerequisite: A Reading the World course or instructor permission.

ENGL 285 Writing Pedagogy This course will introduce students to fundamentals of writing pedagogy and teach them strategies for helping writers with diverse backgrounds and learning styles strengthen their writing skills.

ENGL 310 Constructing Blackness In this course, we will examine the social construction of race and how race and racial identities are consciously, and subconsciously or un-consciously, represented in literature, film, popular culture, and socio-cultural phenomena. As such, we will use Critical Race Theory as a lens to read and to analyze texts--historical, literary, filmic, and cultural--that specifically address the socio-historical construct of Black racial representation. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: ENGL-109, CES-200, CES-240, or CES-260, or instructor permission.

ENGL 318 Post-Colonial Literature This course will investigate some of the central issues in the field of post-colonial literature and theory, such as how literature written in the colonial era represented the colonized and impacted those who were depicted and how writers and readers deployed literature as a method of exploring new possibilities of identity. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: ENGL-109 CES-200, CES-240, or CES-260 or instructor permission.

ENGL 323 Chicana/o Literature A selective study of Chicana/o literary and cultural texts. Possible emphases could include colonialism and conquest, indigenismo, geopolitical conflict or "the Borderlands," identity formations and identifications, and/or sociocultural resistances. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course, or it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: ENGL-109, or CES-200, CES-240, or CES-260; or instructor permission.

ENGL 324 Early Modern Women's Literature: Shakespeare's Sisters A study of the women writers that Virginia Woolf termed "Shakespeare's Sisters" when she (we now know mistakenly) lamented the lack of early women writers. We'll study these, primarily British, women writers of the period, emphasizing the social, political, economic, and cultural conditions of women's authorship before the nineteenth century. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a Pre-19th-Century course. Prerequisite: ENGL-109 or WGS-101 or instructor permission.

ENGL 325 19th-Century Women's Literature: The Epic Age A study of British and U.S. women writers of the period, emphasizing social, political, economic, and cultural conditions for women's authorship as well as recurring concerns and themes of women authors and the emergence of African American women's writing. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 19th-Century course. Prerequisite: ENGL-109 or WGS-101 or instructor permission.

ENGL 326 Women's Literature 1900 - Present: Modern Voices A study of women's writing in English in the 20th and 21st centuries, emphasizing cultural diversity, thematic commonalities, and questions of voice and gender. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course. Prerequisite: ENGL-109 or WGS-101 or instructor permission.

ENGL 331 East Asian Diasporic Literatures This course will analyze literature written in English by people in the East Asian Diaspora. This includes writers from China, Korea and Japan and their descendants living in the U.S., Great Britain, Canada, Australia, the Caribbean, and Latin America. The course takes a transnational approach in considering questions around racial and ethnic identity, global capitalism, nationality and citizenship, as well as issues of gender and sexuality. This course fulfills the Applied Theory requirement for the Literary Criticism and Theory craft sequence. For the Historical and Cultural Breadth requirement, this course counts as a 20th- or 21st-Century course and it fulfills the minoritarian, diasporic, or transnational requirement. Prerequisite: ENGL-109; or CES-200, CES-240, or CES-260; or instructor permission.

ENGL 434 Advanced Film Theory: Cinema & Spectator This upper-level course introduces students to significant movements in film theory, including feminism, structuralism/poststructuralism, transnationalism, cultural studies, formalism, and psychoanalysis, via a reflection on the experience of spectatorship. We will reflect upon film's relationship to material reality, the cultural impact of the medium, the history and diversity of audience response, and the roles of gender, race, and sexual interpretation on spectatorship. We will consider how the filmgoer is situated by the medium as a recipient of a film's message and how s/he has historically been an active and critical presence who challenges and transforms the text. We will take a theoretical as well as a historical approach to these questions, thinking not only of films and filmmakers but also of the experiences of movie-going publics. We will approach film theory with an eye to its history, to the ways in which film theories dialogue with each other, and how cinema instantiates film theory. This is the required capstone course for the Film Criticism and Theory craft sequence. Prerequisite: ENGL-153 and Junior Standing; ENGL-260 strongly recommended.

ENGL 435 Advanced Literary Studies Seminars focusing on major figures and movements in English and American literature. May be repeated for credit when content changes. This course fulfills the Advanced Literary Studies requirement. Prerequisite: Junior standing.

ENGL 436 Advanced Topics in Literary Theory An intensive study of selected perspectives in contemporary critical theory. This is the required capstone course for the Literary Criticism and Theory craft sequence. Prerequisite: Junior standing.

ENGL 485 Advanced Writing Pedagogy This course will allow students who have successfully completed Writing Pedagogy to deepen their experience and understanding through the exploration of specific topics related to the teaching of writing. Prerequisite: Previously take Writing Pedagogy

ENGL 491/SEMN 495 Building the Archive: Baldwin & His Legacy In February of 1960, James Baldwin delivered an address, "In Search of a Majority," at Stetson Chapel which he later included in his collection of essays, "Nobody Knows My Name." This seminar will approach this visit (and Baldwin) as a site of analysis. As an actual event, the occasion left artifacts (correspondence, publicity, newspaper accounts, published essay). The event also can be read within the legacy of other Civil Rights era visitors to the college, including Charles V. Hamilton (co-author of "Black Power: The Politics of Liberation") and others. Moreover, as a writer who addressed national and international identity, racial politics (personal and cultural), and sexuality, Baldwin's various writings remain relevant even as they locate themselves within particular historical moments. Through close attention to Baldwin and his milieu, this course will invite students to engage their own experiences and disciplinary knowledge in their reading, writing, and archival research. Students will also document (in film and transcript) oral histories of participants in the Civil Rights period as part of their course work. This is a Shared Passages Senior Seminar and fulfills the Advanced Literary Study requirement. Prerequisite: Seniors only.

ENGL 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Environmental Studies

Professors: Girdler, Hussen (Co-Directors)

The concentration in environmental studies is based upon the recognition that environmental and resource problems are not just biological, geological, economic, or political. Therefore, the concentration is structured as an interdisciplinary study by selecting appropriate courses from the natural and social sciences, as well as the humanities, in order to pool knowledge from across traditional disciplinary lines. This information is essential for an interdisciplinary assessment, analysis, and evaluation of environmental problems.

The Concentration in Environmental Studies

Number of Units

Six units are required.

Required Courses

One from each group is required of all concentrators:

BIOL 115 Environmental Science or BIOL 224 Ecology & Conservation with Lab

CHEM 101 Chemistry and Society or CHEM 105 The Physical Earth or CHEM 120 Chemical Reactivity

ECON 235 Environmental and Resource Economics

(pre-requisite of ECON 101)*

ENVS 490 Environmental Studies Senior Seminar or **SEMN 408 Slow Farming: Resilient, Just, and Joyful Agriculture**

Electives

BIOL 115 Environmental Science (if not used above)

BIOL 312 Population and Community Ecology with Lab

BIOL 322 General Microbiology with Lab

CHEM 105 The Physical Earth (if not used above)

CHEM 240 Analytical Chemistry with Lab

CHEM 420 Instrumental Analysis with Lab

ECON 490 Senior Topic (if topic relates to env. economics)

ENGL 151 RTW: Environments

ENGL 217 World Indigenous Literature: The People and the Land

HIST 212 American Environmental History

HIST 217 History of Leisure and Recreation in America

PHIL 108 Ecological Philosophy

PHYS 105 Energy and the Environment

SEMN 401 Energy Policy & Use Worldwide

*Additional special topics one-time course offerings may count as electives depending on content (e.g. ENGL, RELG); please discuss the suitability of these courses with Dr. Girdler or Dr. Hussen.

The concentration in environmental studies is open to students regardless of their majors and prepares students for graduate work and/or careers in a variety of areas including resource economics and management, city and regional planning, natural resource conservation, aquatic or terrestrial environments, environmental law, environmental education, environmental journalism, public administration, agribusiness, and food and population. For general advice and effective planning of their schedules, all students desiring this concentration are encouraged to see one of the directors as early as possible, preferably no later than the sophomore year.

Students interested in environmental studies are urged to keep this interest in mind when selecting a site for study abroad. If approved ahead of time by the co-directors, up to one course from study abroad can count toward the completion of the concentration. Moreover, pursuing these interests abroad emphasizes the important international dimensions of many environmental issues while often permitting students to gain familiarity with some problems (and their possible solutions) in other countries. Courses from study abroad sites in Costa Rica, Ecuador, Kenya, and Thailand are particularly suitable.

Additional courses that may be relevant to students interested in this concentration include BIOL 232, 296; COMP 105, 110; ECON 240, 412; MATH 260, 360.

Environmental Studies courses

ENVS/ANSO 350 Political History of Environmental Thought This course explores a partial (Western) history of how humans have understood themselves in relation to nature. To do so, this course relies on a landmark text in the field along with a series of primary texts, tracing the continuities and ruptures in thought during different historical periods have engaged with the idea of nature and the place of the human within it. Although, the course relies mostly on a broadly defined Western thought tradition in this course but students are encouraged to undertake research on other traditions and bring those into the classroom. The readings for this course are organized temporally, starting with the oldest. Prerequisite: ANSO-103

ENVS/SEMN 401 Energy & Environmental Policy Worldwide National patterns of energy use and approaches to environmental policy vary over a wide range around the World. An intelligent analysis of these divergent behaviors and their environmental and financial consequences requires input from the fields of Science, Political Science, and Economics, and is also informed by international experiences. Possible careers involving environmental science, engineering and politics/policy will be discussed. Prerequisite: At least three courses in either natural science, economics, or political science, with a major in one preferred.

ENVS 490 Environmental Studies Senior Seminar Examination and analysis of selected contemporary environmental and resource problems and issues from an interdisciplinary perspective. In addressing these issues, special attention is given to the application and integration of principles, theories, and analytical techniques introduced in the core courses. Topics covered in the seminar are likely to vary annually as new problems, policies, and solutions develop. Prerequisite: Core courses plus senior standing, or permission.

ENVS 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Film and Media Studies

Professor: Sinha (Director)

The Film and Media Studies concentration at Kalamazoo College offers an interdisciplinary, liberal arts approach to the study of film. We seek to engage critically with aesthetics, history, reception, race, gender, and class in production and consumption as well as issues of ethics, politics, and economics. We explore mainstream as well as oppositional forms and are investigators of film representation in the broadest sense: visually, aurally, and verbally.

Advanced Placement (AP) and International Baccalaureate (IB) credit may not count toward the concentration but may be applied toward the total number of units needed to graduate.

Units from Study Abroad and Transfer Credit

Students may receive up to one unit of credit toward the concentration for a class taken on study abroad or at another institution. The course must first receive approval from the director of the concentration.

Requirements for the Concentration in Media Studies

Number of Units

Six are required.

Required Course

ENGL 153 RTW: Classical Hollywood (offered twice yearly, cap of 25)

Five additional courses from any of the categories below. At least two of the five courses must have film as their primary focus. The courses with a film focus have been marked with an asterisk.

History/Theory/Criticism

ARTX 215 History of Photography
ARTX 224 Art Since 1945
ARTX 227 Modern Art Museum
ARTX 290 Art and Gender
ARTX 430 Ways of Seeing
* ENGL 260 Studies in Film (various topics, year by year)
* ENGL 434 Advanced Film Theory
MUSC 100 Program Music: Stories in Sound
MUSC 155 Western Art Music after 1750
* PHIL 109 Existentialism and Film
PHIL 214 Philosophy of Art
PHIL 208 19th Century Philosophy
PHIL 311 Postmodern Critical Theory
THEA 270 Theatre of Illusionism

Applied

ARTX 110 Digital Art
ARTX 115 Digital Photography
*ARTX 200 TV Studio Production (1/4 credit)
ARTX 214 Framing Differences
ARTX 230 Analog Photography
*ARTX 250 Introduction to Documentary Video Production
*ARTX 295 Production and Post-production
*ARTX 301 Advanced Documentary Video Production
ENGL 207 Arts Journalism
MUSC 105 Introduction to Music
THEA 120 Fundamentals of Acting
THEA 210 Lighting Design
THEA 225 Developing a Character
THEA 255 Playwrighting
THEA 380 Directing I with Lab
THEA 420 Advanced Acting with Lab
THEA 480 Advanced Directing

International Media

ARTX 215 A History of Photography
* CHIN 245 Chinese Film and Culture (taught in English)
ENGL 264 Global Shakespeares
FREN 435 Space and Identity in French Cinema (taught in French)
GERM 200 Myth of a Nation: German Film
* ENGL 260 Studies in Film (only when the topic is African Cinemas or Bollywood)
* GERM 135 Weimar German Cinema (taught in English)
* GERM 420 Introduction to German Cinema (taught in German)
* GERM 421 Classic German Cinema (taught in German)
* GERM 423 Topics In German Cinema
* HIST/RELG/SEMN 268 Jews on Film
* JAPN 240 Japanese Culture through Film (taught In English)
* JAPN 250 Magna/Anime in Modern Japan
* SPAN 401 Topics In Hispanic Culture (when the topic Is film)
SPAN 445 Visual Practices in Latin America

French and Francophone Studies**French Studies**

Professors: Chatton, Dugas (Chair)

The French program emphasizes a critical understanding of the French-speaking world by focusing on language skills, analytical tools, and the study of a variety of kinds of cultural expressions. These studies are one effective way of gaining a deeper understanding of the world, which is an important element of a liberal arts education. The department offers courses in French literature and culture and the literatures and cultures of Francophone Africa, Canada, Asia, and the Antilles. Students of French may study abroad in Strasbourg and Clermont-Ferrand in France and in Dakar, Sénégal.

Coursework and off-campus experiences are complemented by on-campus opportunities that maintain and improve a student's language skills and expand students' understanding of the Francophone world. These opportunities include viewing French language films, conversing with classmates and native speakers at the French conversation hours, and attending area cultural events.

Faculty members meet students inside and outside the classroom, participate in campus activities, and counsel students regarding graduate and professional career choices in music, high school and college teaching, science, publishing, government, international trade, international banking, non-governmental organizations, and other fields. French students at Kalamazoo College have a high rate of acceptance when applying for French government teaching assistantships for teaching English in France after graduation.

Placement

All incoming students who have previously studied or have had significant exposure to French must take the College's placement test. Those students who wish to receive credit for language courses that they have taken at another college or university before enrolling at Kalamazoo College must take the French language placement test and test into a higher-level course than the one for which they are seeking transfer credit. Any appeal of the placement test results should be directed to a French faculty member.

Advanced Placement (AP) and International Baccalaureate (IB) Credit for the Major or Minor

Students who took AP or IB examinations in French must still take the Kalamazoo College French placement test. An Advanced Placement (AP) score of 4 or 5 in French language can be counted as one credit toward the French major or minor provided that the student take French 203 or beyond as her/his first French course at the college. IB scores of 5-6-7 on the Higher Level may count toward a major or minor at the discretion of the department faculty.

Requirements for the Major in French

Number of Units

Eight units are required. Units that may be counted towards the major are:

FREN 202, FREN 203, FREN 301 and all FREN 400-level courses

FREN 593 (SIP)

AP score of 4 or 5 (see above)

IB score of 5, 6 or 7 (see above)

Up to two units from study abroad (see below)

Required Courses

FREN 301 Introduction to French and Francophone Studies (prerequisite to all 400-level courses)

FREN 490 Senior Seminar

At least two additional units in 400-level French courses on campus

French majors are encouraged to develop appropriate cognate programs in areas such as History, Political Science, Film and Media Studies,

Economics, Music, Philosophy, Anthropology, Sociology, International and Area Studies, or International Economics and Business.

Cognate courses of particular interest to French and francophone studies majors : HIST 244, HIST 252, HIST 256, ENGL 260 Studies in Film: African Cinemas, ENGL 260 Studies in Film: The Post-Classical and the New Waves

Units from Study Abroad

French majors are expected to participate in a study abroad program and acquire a high level of language proficiency.

Only two units to be used toward the major in French may be earned in a long term (6 month) or an extended term (9 month) program. One unit only from a short term (3 month) program may be used. The unit(s), which must have been taught in the French language, may be in the literature of the Francophone world, or in language, or in a cultural/topical course pertaining to the Francophone world. Please consult the department.

Those who did not take French 301 before Study Abroad will normally take that course upon their return to campus, but should consult with the department before doing so. All students will then take the senior seminar plus the requisite number of 400-level courses (and possibly write a SIP) in order to complete the French major.

Requirements for the Minor in French

Number of Units

Six units are required. (FREN 101 & 102 do not count towards the minor.) For the minor, no more than two units may be earned off campus.

Required Courses

FREN 301 Introduction to French and Francophone Studies

Two 400-Level courses taught on campus.

Electives

Three courses chosen selected from the following :

FREN 200 (a total of one unit)

FREN 201

FREN 202

FREN 203

Up to two units in French language, literature, culture, film, history, etc. taught in French may be counted from a long-term French-language study abroad program. One unit in French language, literature, culture, film, history, etc. taught in French may be counted from a short-term French-language study abroad program.

Additional French courses at the 400-level

FREN 593 (SIP)

Units from Study Abroad

1. A student may count only one unit from study abroad towards the minor in French. The unit, which must have been taught in the French language, may be in the literature of the Francophone world, or in language, or in a cultural/topical course pertaining to the Francophone world. Please consult the department.
2. Normally, students who go on Study Abroad before taking French 301 will take that course upon their return to campus, but they should consult with the department before doing so.

French courses

FREN 101 Beginning French I Introduction to the French language and the French-speaking world. Students begin developing competency in the four basic skills(reading, writing, listening, and speaking) through communicative activities and cultural exploration.Prerequisite: Placement test if student has any prior experience with French.

FREN 102 Beginning French II Further development of the four skills through continued exploration of the French-speaking world. Students will work to acquire the linguistic skills and cultural knowledge needed to navigate a variety of cultural settings.Prerequisite: FREN-101 or Placement Test

FREN 200 French Pronunciation Designed to improve learners' pronunciation of French, this course will help students understand the sound system of French and practice producing French sounds through focused exercises and creative activities. Class will be tailored to the proficiency level and needs of students. Repeatable for credit.Prerequisite: FREN-102 or placement into FREN-201 or higher

FREN 201 Intermediate French The refining and expansion of communicative skills. Students develop critical thinking and cross-cultural competency by reading, discussing, and writing about authentic texts.Prerequisite: FREN-102 or Placement Test

FREN 202 Conversation and Composition Critical explorations of the French-speaking world through focused reading, discussion, and related written and speaking assignments.Prerequisite: FREN-201 or Placement Test

FREN 203 Engaging With Texts Students enrich their vocabulary and increase their sensitivity to nuance while examining a wide variety of texts (fiction, non-fiction, image, film, songs, etc.). New reading skills will result in the ability to produce texts (both oral and written) in a wide variety of styles. Students begin to acquire a more sophisticated knowledge of the intricacies of the French-speaking world while putting into practice more complex forms of written and oral expression.Prerequisite: FREN-202 or Placement Test

FREN 301 Introduction to French and Francophone Studies An interactive, discussion-based course helping student acquire skill in the reading and interpretation of French and other Francophone texts, presented in their cultural and historical contexts. Course offers opportunities for refinement of written and presentational skills.Prerequisite: FREN-203 or Placement Test

FREN 401 Topics in French and Francophone Cultures Reading, research, and discussion on selected topics and issues in the French-speaking world. Please consult with the instructor about the current topic. Past topics have included "Immigration in Contemporary France" and "Le handicap: a multi-disciplinary approach." May be repeated for credit if content is different.Prerequisite: FREN-301

FREN 435 Advanced Literary and Cultural Studies Courses focused on major authors, cultural and philosophical movements, or themes in the French-speaking world. Topics will vary according to student or faculty interest. May be repeated for credit if content is different.Prerequisite: FREN-301 or FREN-301S

FREN 490/FREN 435 Senior Seminar Topics in French and/or Francophone literatures, culture, and history. Recent topics have included Vietnamese History and Culture; Francophone African Literature; Intercultural Encounters; and Camus, the Algerian. Prerequisite: FREN-301; Senior French major or permission.

FREN 495 French Film in Context In this course, we will view and discuss a variety of French-language films from the 1980's to the present representing a cross-section of genres, themes, and directors. We will use these films as a vehicle for understanding a sampling of historical and cultural contexts in the French-speaking world. Prerequisite: FREN-301

FREN 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

German Studies

Professors: Moti (Chair), Sederberg

In studying foreign languages, students acquire not only a linguistic skill but also an understanding of other peoples' literatures, histories, and cultures. They gain a new perspective from which to view their own country, way of life, and language. Knowledge of a second language is an important facet of the liberal arts program. Proficiency in a second language at the 201 level is a graduation requirement.

German courses at all levels emphasize speaking, reading, writing, and listening while addressing topics related to German culture. The disciplinary basis for the program, German Studies, draws on literature, history, gender studies, popular culture, music, architecture, and film (among other things) to aid students in the development of a critical understanding of the German-speaking world and their own. The German Studies curriculum uses a genre- and literacy-based approach to foreign language learning that is dedicated to integrating linguistic knowledge, cultural learning and textual analysis throughout the four-year major curriculum, top to bottom. For example, through genre-focused courses such as those on film and contemporary German culture, the German program recognizes the importance of new media in the 20th and 21st centuries and how these media have reshaped the nature of German culture. Other advanced courses take a wider historical view, examining the changing nature of German culture through the lens of a particular genre (such as film) or theme (such as minority cultures).

Most Kalamazoo College students participate in the study abroad program; for students interested in German, there are opportunities in Erlangen and Bonn. Course work and off-campus experiences are complemented by on-campus opportunities that maintain or improve a student's language skills, including conversation groups led by native speaking teaching assistants and a quarterly film series.

Faculty members meet students inside and outside the classroom, participate in campus activities, and counsel students regarding career choices in foreign service, education, publishing, international business, and other fields. A number of German majors, as well as students in the German program, have been able to participate in Career and Professional Development internships with German companies, both in the United States and in Europe.

As part of the study abroad program at Kalamazoo College, scholarships for one year of further study at the German universities of Bonn and Erlangen are available to qualified graduates of the College. Kalamazoo students have often succeeded in obtaining Fulbright fellowships and other support for further study in Germany. Competition for these scholarships is not limited to German majors.

Placement

All incoming students who have previously studied German in high school or elsewhere must take the College's placement test in German.

Students with three or more years of high school German will not be placed into GERM 101. Those students who wish to receive credit for German courses that they have taken at another college or university before enrolling at Kalamazoo College must take the German language placement test and test into a higher-level course than the one for which they are seeking credit. Any appeal of the placement test results should be directed to a faculty member in the Department of German Studies.

Advanced Placement

For students with an advanced placement (AP) score of 4 or 5, credit toward the B.A. degree will be awarded automatically upon admission. Study must begin with GERM 203 or above to receive credit in German at Kalamazoo College. Students with AP scores of 3 may be granted the waiver of a prerequisite, but may not count an AP 3 for credit.

Requirements for the Major in German

Number of Units

Eight units are required, not including GERM 101 and 102 (the eight may include the SIP), plus one cognate course in German or European studies from the list below. No more than two of these units may be earned during study abroad.

Required Courses

GERM 203 Advanced German I: Germany Today
GERM 204 Advanced German II: German Stories and Histories
GERM 301 Introduction to German Cultural Studies: Reading Texts and Contexts
GERM 470 Contemporary German Culture
GERM 490 Senior Seminar

Also required: Passing a German language proficiency test, either the Goethe-Zertifikat B1, B2 or C1 (as recommended by the department). The exams are designed by the Goethe Institute and offered on campus during spring quarter.

Electives

Three courses above 201, two of which must be at the 400-level

German and European Studies Cognate

(One course required; does not count toward required 8 units)

ARTX 140, 145, 150 Introduction to History of Art I/II/III

HIST 101, 102 Introduction to Europe I/II

HIST 246 Germany and Central Europe in the 19th Century

HIST 247 History of Germany and Central Europe: 1890-Present

HIST 250 Revolution, Industry, Imperialism: Europe in the 19th Century

HIST 255 Contemporary Europe

HIST/RELG 263 Modern Jews in Enlightenment and Revolution

HIST/RELG 264 Modern Jewry: Upheaval and Response

MUSC 330 Western Music in the Classic and Romantic Eras

PHIL 207 18th Century Philosophy

PHIL 208 19th Century Philosophy

PHIL 307 Contemporary Continental Philosophy

POLS 210 Comparative Political Institutions: Social Europe

POLS 270 The European Union

POLS 330 The Politics of the Holocaust

THEA 270 The Theatre of Illusionism: Western Theatre from the Renaissance to Early Film

All of the 400-level German courses count toward the Cultures requirement (Europe) for graduation and toward the literature Area of Study requirement for graduation.

Students considering a major in German are urged to begin their study of German in their first year. German majors are encouraged to take courses in appropriate cognate areas such as history, political science, economics, art history, international and area studies, and international commerce, and are strongly urged to study abroad in a German-speaking country.

Requirements for the Minor in German

Number of Units

Six units are required, not including GERM 101 and 102.

Required Courses

GERM 201 Intermediate German

GERM 203 or 204 Advanced German I or II

GERM 301 Introduction to German Cultural Studies: Reading Texts and Contexts

GERM 470 Contemporary German Culture

Electives

Two 400-level German Studies courses above 201.

German Studies courses

GERM 101 Beginning German I: The Personal World An introduction to the German language with an emphasis on the personal world. Through communicative activities covering the four language skills (listening, speaking, reading, and writing), students learn to ask and answer questions and share information about themselves, their families, and their daily activities.

GERM 102 Beginning German II: The German-Speaking World Expansion of the skills acquired in GERM 101. Students build on their basic knowledge of everyday German-speaking culture (through topics such as tourism and transportation, health care, and leisure activities), improve their communicative competence, and develop skills needed to negotiate a variety of cultural settings.

GERM 200 Myth of a Nation: German Film One of the most revealing ways to explore the complexities of German history and the construction of national identity in the 20th and 21st centuries is through film. This course examines German cinema as a reflection of one of the most dynamic, if problematic, nations in the modern world. Along with a basic understanding of the terms used in the formal description of film, this course provides students with the socio-historic background to be able to evaluate the role that films played in shaping and reflecting German cultural ideals from the early 20th century through the present. In English.

GERM 201 Intermediate German: Topics in German Culture Continued expansion of the skills acquired in GERM 101 and 102. Students further develop their ability to communicate in German and their understanding of the German-speaking world by engaging with increasingly complex topics (such as education, environmental issues, politics, history, and multiculturalism). As in German 101 and 102, all four language skills are practiced, and comparisons between American and German society provide the basis for class discussions. Prerequisite: GERM-102

GERM 202/SEMN 241 Reading European Cities: Istanbul, Vienna, Berlin This course addresses the questions of how we may understand a culture by learning to "read" its cities. Texts range from maps, histories, architecture, theories of urbanism and urban ecology, to films, documentaries, memoirs, and music - an array of genres that highlights the status of the modern city as both a physical place and an imaginary construct. The broad aim of course is to provide students with conceptual tools for "reading" a city as well as a new culture critically, and thus to facilitate their intercultural competency. Berlin, Vienna, and Istanbul will serve as case studies for the practice of interpreting urban narratives, and the course will culminate with student research projects and presentations on the cities in which they plan to study abroad, or a city of their choice. In English. This course is a Shared Passages Sophomore Seminar.

GERM 203 Advanced German I: Germany Today This course centers around themes related to life in contemporary Germany, with special emphasis on developing students' writing skills in various genres. In a unit on current events in Germany, for example, students read and listen to news reports, practice vocabulary items and linguistic structures typical of journalistic texts, and finally compose (in multiple drafts) a newspaper article on a topic of their choice. In German. May be taken after German 204. Prerequisite: GERM-201

GERM 204 Advanced German II: German Stories and Histories This course centers around children's and youth novels presented within the historical and cultural context of 20th century Germany, with special emphasis on developing students' reading skills and cultural literacy. Continued practice of linguistic structures and systematic vocabulary building are also central to the course. In German. May be taken before German 203. Prerequisite: GERM-201

GERM 301 Introduction to German Cultural Studies: Reading Texts in Contexts This course serves as an introduction to upper-level courses in German Cultural Studies. It stresses the central role that culture plays in fostering an understanding of German society, and it introduces students to the tools and theories of cultural analysis. Readings and genres range from literature and film to documentaries, magazine articles, blogs, cartoons, and music, and they may be focused on a single theme across a number of time periods to provide a context toward an understanding of how a particular text reflects cultural identities. In German. Prerequisite: GERM-203 or GERM-204

GERM 410 German Songs and Sagas, Folk and Fairy Tales This course examines common structural and thematic elements in German epic and lyric poetry, folk and fairy tales from the Middle Ages to the Second World War. The first half of the course will be devoted primarily to a key text in the history of German literature, the medieval epic *Das Nibelungenlied*. After reading the text closely (in modern German translation), students will study the reception of the *Nibelungenlied* in 19th and early 20th century German culture (through Wagner's opera and Fritz Lang's film) and its importance for burgeoning German nationalism. In the second half of the course, students will trace key themes from the *Nibelungenlied*--love and loss, honor and war, and the nature of the heroine and hero/warrior--in folk and fairy tales and in lyric poetry from the Enlightenment to the 20th century. In German. Prerequisite: GERM-301

GERM 411 Writing One's Life and Times: Autobiography and Personal Writing in Germany In this course, students will engage with a variety of texts written in German in the 20th century that fall into the genre of person writing (autobiographies, journals, and letters). Readings will center around three themes: defining an artistic identity in the modern age, living through times of crisis, and women's struggle for social recognition and a public voice. Students will gain a critical understanding of the many and varied ways in which individuals use personal texts to communicate with others, to define identity, to call for social change, and to come to terms with the world in which they live. Student responses to the texts under study will take the form of informal discussions, discussion leadership, oral presentations, and formal essays, and they will also author their own short autobiographical texts and journals or web logs. In German. Prerequisite: GERM-301

GERM 412 German Drama Workshop The essence of drama lies in its performance. Despite the fact that dramas have often been written that were never performed during the lifetimes of their authors (sometimes quite intentionally so), most dramas only blossom into their full range of meaning when realized upon the stage by actors. It is also true that in order to gain a deep understanding of the internal mechanics of the drama, and an appreciation for the craft of the playwright, it is invaluable to take part in the production of the play in question. Here one sees the play "from the inside," a radically different perspective than that afforded by the comfortable seat in the audience or the library. In this course students will play the parts of both actor and director with a view to gaining access to these deeper levels of understanding found within a selection of German dramas. Following collective reading and discussion of the dramas, each course participant will have the chance to act or direct a scene for him/herself. A critical element of this course will be discussion of the cultural contexts in which each drama was originally written and performed, including comparative acting techniques and what these tell us about the epoch of German culture in which they emerged. Taught in German. Prerequisite: GERM-301

GERM 420 Introduction to German Cinema This course will offer an overview of German cinema through the analysis of nine films from the Weimar Republic through the post-Wende period. We will screen and discuss films from a wide variety of periods of German cinematic history during this course: the Weimar Era, the Third Reich, Postwar Cinema, New German Cinema, East German or DEFA Cinema, Women's Cinema, and post-Wende cinema. Our primary focus in this course will be on learning the basics of film language and analysis; developing skill in close textual reading of film through sequence analysis; and understanding the film both as art and as cultural artifact within its historical (and film historical) contexts. In German. Prerequisite: GERM-301

GERM 421 Classic German Cinema of the 1920s and 30s This course seeks to acquaint its participants with the rich world of Weimar-era German culture, and specifically with the vibrant production of films during the 1920s and 30s. The German film industry was the only significant challenger to Hollywood's domination of the big screen during this era, and it crafted its own distinctive style with directors and performers whose accomplishments served as cinematic milestones for world cinema. A second, but not less important, goal of this course is to instill the vocabulary and analytical skills necessary to read and comprehend filmic texts that both filter and reflect the cultures and historical periods in which they emerged. In German. Prerequisite: GERM-301

GERM 423 Topics in German Cinema This addresses a variety of topics (on a rotating basis) related to German cinema. These may include "The Films of Fritz Lang," "East German Cinema," and "Women in German Cinema." An important goal of the course is to instill the vocabulary and analytical skills necessary to read and comprehend filmic texts that both filter and reflect the cultures and historical periods in which they emerged. May be repeated for credit (consult with the department). In German. Prerequisite: GERM-301

GERM 430/GERM 490 Themes in German Literature and Culture This course examines the changing nature of German culture through a variety of texts (ranging from literature, history, and popular culture to music, architecture, and film) on a particular theme. Possible themes for the course include "German-Jewish Literature and Culture," "Germany Imagines Itself: Culture and Identity in the 18th and 19th Centuries," and "Reading Berlin." May be repeated for credit (consult with the department). In German. Prerequisite: GERM-301

GERM 430 The Nature of the Book This course examines the nature of the book from two perspectives. The first focuses on how depictions of nature have evolved since Johann Wolfgang von Goethe's catalogization of plants. The second focuses on the importance of materiality to the construction of a book. These two perspectives collide in texts by contemporary author Judith Schalansky, who incorporates images of natural history in her novels. Schalansky also edits a tactile series on natural history. Thus this course will consider the evolution of the book and book printing culture through select engagement with the book as nature and the book as material good. Central questions under consideration are the intersection of form and genre and the relationship between content and materiality. Course materials include: illuminated manuscripts, catalogues on natural history, writings by early natural scientists, graphic novels, and e-books. Students will acquire and practice specialized vocabulary and review relevant grammatical structures. In German. Prerequisite: Take GERM-301

GERM 435 Minority Cultures in Germany This course focuses on Germany as a multicultural society and on related popular cultural discourse. It explores issues surrounding immigration in Germany since 1960, focusing on the period after 1990. It examines various cultural practices as staged in film, fiction, blogs, political articles, Hip Hop, television (documentaries, talk shows, sitcoms), with an emphasis on the constructions of ethnicity, nation, race, class, and gender. We analyze several political and cultural debates that dominated the media in Germany and Europe at large (e.g. the headscarf and integration debates), and read theoretical articles examining the relationship between immigration, culture, and identity. In German. Prerequisite: Take GERM-301

GERM 470 Contemporary German Culture This course examines a selection of topics, themes, and issues that are part of the contemporary German cultural and political landscape. These include relations between east and west Germans, efforts to reform German higher education, social challenges posed by Germany's aging populace, German immigration laws, ongoing efforts to come to terms with the history of National Socialism, and the influence of the United States on German popular culture. Students will work with a wide variety of texts that range from autobiographical and fictional works (novels and short stories), to films, film reviews, music, on-line newspaper articles, government press releases, surveys, and political cartoons. Students will acquire and practice sophisticated vocabulary, grammatical structures, and discourse markers that will allow them to comprehend and discuss these texts. Student responses will take the form of informal conversations, prepared debates, formal presentations, discussion leadership, and written essays in various genres. In German. Prerequisite: GERM-301

GERM 490/GERM 430 Senior Seminar Offered annually in conjunction with GERM 430, this course examines the changing nature of German culture through a variety of texts on a particular theme. Senior German majors will complete a research project related to the subject of the course and will present their work in a public forum. In German. Prerequisite: GERM-301 and Senior Standing

GERM 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

History

Professors: Bangura (Chair), Boyer Lewis, Brock, Carroll, Frost, Haus, Lewis, Rojas

Historical narrative occupies a central position in a liberal arts education. Such education equips individuals to understand and appreciate the world and to meet its challenges. The study of History contributes much to these ends, maintaining that people and societies are, in important respects, the products of their past; therefore, the story of the past provides insight helpful to both personal and social development.

History stands at the core of a liberal arts education, moreover, since one aim of that education is to integrate the various disciplines. Taking as its subject a narrative of individuals and society in the past, History draws upon all disciplines to discuss that past. It provides a narrative framework for the study of other disciplines and helps the advanced student integrate various academic perspectives.

AP, IB, Transfer, and Study Abroad Credits

With department approval, one unit (AP/IB, Study Abroad, transfer, etc.) may be applied to the major or minor but cannot be used to fulfill the one-course requirement for any of the four fields. See department for specific information.

Requirements for the Major in History

Number of Units

At least nine units are required, not including the SIP.

Required Courses

Majors **must** complete at least one course at Kalamazoo College in each of the four fields of the department:

1. Early History (HIST 100, 101, 225, 226, 227, 230, 231, 232, 234, 236, 237, 238, 239, 240, 393)
2. Modern European History (HIST 102, 242, 244, 254, 257, 259, 263, 264, 265, 290, 394)
3. United States History (HIST 110, 111, 200, 203, 206, 209, 211, 212, 213, 214, 215, 217, 218, 219, 220, 221, 223, 268, 391)
4. African/Asian History (HIST 103, 104, 271, 272, 273, 274, 276, 277, 279, 280, 282, 283, 285, HIST/ANSO 288, 289, 290, 397)

Majors **must** complete at least three courses in their major field and at least two courses in their minor field.

Required Seminars

HIST 299 Historical Methods

HIST 490 History Senior Seminar

Plus one of the following:

- HIST 391 Seminar in United States History
- HIST 393 Seminar in Early European History
- HIST 394 Seminar in Modern European History
- HIST 397 Seminar in East Asian History

All majors are required to present their SIP at and participate in the department's SIP colloquium and to pass a comprehensive exam.

Requirements for the Minor in History

Number of Units and Required Courses

1. Six units are required, not including the SIP.
2. Minors must take courses at Kalamazoo College in three of the four fields of the department: Early History, Modern European History, U.S. History, or African/Asian History.
3. Minors must complete one of the research seminars (391, 393, 394, 397).

History courses

HIST 100 Introduction to the World of Antiquity A survey of ancient societies, politics, and religio-philosophic systems. These will include ancient Egypt, Israel, and classical Greece and Rome. Emphasis on comparative institutions and the character and expansion of ancient empires.

HIST 101 Introduction to Europe I: Medieval and Early Modern Europe This introduction to medieval Europe takes a two-fold approach. First, it serves as a chronological introduction to the history of Europe and the Mediterranean world during the Middle Ages, from the end of the Roman Empire in the West until the late fifteenth century. Next, a thematic approach identifies key social, cultural, intellectual, political, and economic developments between 500 and 1500. Rather than learning only about kings, queens, and prelates, we will broaden our thinking about the many peoples of the pre-modern world: poor as well as rich, women as well as men, slave as well as free, Jewish and Muslim as well as Christian.

HIST 102 Introduction to Europe II: From Early Modernity to Post-Modernity, 1648-present A consideration of the forces that have shaped European history since the end of the wars of religion. Among the issues to be discussed are: the trajectory of the "Westphalian" state system, 1648-1945; the contradictory legacy of the Enlightenment; empire-building and the disruption of the global balance of civilizations; industrialization and societal change; the rise and decline of the nation-state; the age of ideology and Europe's attempted civilization suicide in the twentieth century; the idea of Europe and Europe's place in a transnational world of regions since 1945.

HIST 103 Introduction to East Asian Civilizations Surveys of the histories of China, Japan, and Korea, with particular attention to religious, political, and social patterns. Topics include Confucianism and its influence in East Asia, China's modernization dilemma, Korea's division and its implication, Japan's rise as a major power, and importance of East Asia in world history, among others.

HIST/AFST 104 Introduction to African Studies This course introduces students to selected themes, paradigms, and concepts in African Studies. It is divided into four sections: section one deals with "Pre-colonial African societies;" section two examines "The Idea of Africa;" section three focuses on "African Studies as an academic discipline;" section four addresses "Colonialism and its impact on Africa." It is strongly recommended that students take the Introduction to African Studies course before taking any of the upper level African Studies classes.

HIST/RELG 107 Introduction to Jewish Traditions This course explores the development of Judaism from its ancient origins until the present. We will discuss the biblical foundations of Judaism and the impact that different historical contexts have produced on its rituals and beliefs. This approach raises a number of questions, which we will keep in mind throughout the course: What is Judaism? Who are the Jews? What is the relationship between Judaism and "being Jewish"? How have historical circumstances shaped this relationship? What has changed and what has stayed the same, and why? The class will address these questions through discussions and readings.

HIST/AMST 110 History of the United States I America from contact times to 1865, with emphasis on economic, social, intellectual, and political developments.

HIST/AMST 111 History of the United States II America from 1865 to the present, with emphasis on economic, social, intellectual, and political developments.

HIST 200 Colonial America An examination of political, cultural, social, and economic developments in America to 1760. Topics include Native American societies, founding of the English colonies, the adoption of slavery, religious diversification, the Salem witchcraft trials, the consumer revolution, the French and Indian war, and changes in the family.

HIST 203 Revolutionary America, 1760-1800 An examination of the era of the American Revolution, with lectures, readings, and discussion covering issues ranging from national and international politics to class, gender, and race relations, from economic and demographic developments to culture and society.

HIST 206 Culture and Society in Victorian America Consideration of the main aspects of Victorian culture and society. Special attention will be given to reactions to the industrial revolution and its impact on the natural and social environment, racial and gender relations, and organized religion.

HIST 209 Post World War II America Broad examination of American political, social, diplomatic, economic, and cultural life in the three decades after World War II, highlighting the links between foreign affairs and domestic politics and society. Topics include the Cold War, Red Scare, Civil Rights, baby boom, Vietnam War, counterculture, women's movement, and Watergate.

HIST 211 Native American History A broad survey of the field of Native American history, spanning the full range of Indian-white relations -- social, economic, cultural, political, and military -- with a focus upon the region ultimately included within the United States.

HIST 212 American Environmental History Focusing upon that part of North America that became the United States, this class examines the long history of the interactions of human societies and the natural world. We will trace three key issues through time: changing ideas about nature; humanity's impacts on the natural world; and the natural world's impacts on culture, broadly defined.

HIST 213 The Slave South The distinctiveness of Southern society before the Civil War lay essentially in its system of black slave labor. This course will examine how slavery shaped the politics, the economy, society, culture, and even the family. It will consider the relationships between master and slave, free and unfree, slaveholders and nonslave holders, parents and children, and men and women -- black and white. It will look at the myths of the Cavalier, the Southern Lady, the "happy darky," and "our family, black and white."

HIST 214 African-American Hist.: Slavery & Resist Resistance This course will examine African-American History from 1619 when the first Africans are documented as entering colonial Virginia to the Civil War of 1860-65. We will explore the Slave Trade, the colonial era and the ante-bellum period, examining the exploitation and resistance of both enslaved and "free" blacks in the US.

HIST 215 African-American History: Civil War to Civil Rights This survey course examines African American history from the Civil War to the Civil Rights Movement. It explores key themes, including: Reconstruction, the Jim Crow era, the Harlem Renaissance, the Depression, WWI, WWII, and the Cold War. Students will gain a solid understanding of how the decedents of Africans - kidnapped and brought to the US as property - politically, socially and creatively worked after emancipation to forge a place and space for themselves in the US and the world.

HIST 217 History of Leisure and Recreation in America An examination of the history of leisure and recreation in America from the Puritans to the present. Discussion of the importance of leisure, the rise of public amusements, spectator sports and vacations, the growth of tourism, tensions between work and leisure, and why recent Americans choose more work over more leisure.

HIST/RELG 218 American Jewish Experience This course will explore the religious, social, political, cultural, and economic history of the Jewish people in America from the first settlement until the present. The major themes of study will focus upon the development of Judaism in America. We will take into account a number of historical factors that shaped that development: the economic, social, and political evolution of American Jewry and its institutions; Jewish immigration to the United States and its consequences; American Jewish self-perception; and the relationship between Jews and non-Jews in American society. Assignments will draw upon a wide range of materials, from secondary historical studies and primary documents to fiction and film.

HIST 219 Special Topics: U.S. This course will focus upon a topic in the United States history that is not addressed in the department's regular offerings. The course can be repeated with a different topic.

HIST 220 American Women's History to 1870 An in-depth survey of the lives of women in America from the beginning of the colonial era to 1870. Topics include: the differences of class, religion, and race in women's lives, religion, work, friendships, family life, community, health and sexuality, the women's rights movement, and the impact of the American Revolution and Civil War.

HIST 221 American Women's History since 1870 An in-depth survey of the lives of women in America from 1870 to today. Topics include the impact of race, class, and region in women's lives, paid and unpaid labor, prostitution, family life, community, birth control, the women's rights movement, and the impact of US involvement in international wars.

HIST 223 American Diplomacy Since 1898 An examination of American foreign policy and relations in the 20th century. Topics include the Spanish-American War, dollar diplomacy, World Wars I and II, the Cold War, the Vietnam War, American intervention, and the post-Cold War world.

HIST/CLAS 225 Greek Civilization From Homer to Alexander the Great with emphasis on arts and letters.

HIST/CLAS 226 Roman Civilization From the foundation of the Republic to the empire of Constantine.

HIST/CLAS 227 The Roman Army and the Frontiers of Empire This course considers the Roman army from the perspectives of both military and social history. After a chronological survey of the development of the Roman army, case studies of the army in action in specific frontier provinces will be considered. From Hadrian's Wall in Britain to the desert wastes of Egypt, ancient texts and archaeological evidence illuminate the army-driven process of "Romanization," through which former barbarian enemies became assimilated Roman citizens. (This is a designated Roman literature or culture course in Classics.)

HIST/CLAS 230 Women in Classical Antiquity A literary, historical, and cultural survey of social structures and private life in ancient Greece and Rome. Issues covered include constructions of sexuality, cross-cultural standards of the beautiful, varieties of courtship and marriage, and contentions between pornography and erotica. Students will examine sources from medical, philosophic, lyric, tragic, comic, and rhetorical writers as well as representative works from vase painting, the plastic arts, graffiti, etc. (This is a designated Greek and Roman literature or culture course in Classics.)

HIST 231 Europe Meets the World: Cross-Cultural Encounters Before 1450 Rather than focusing on Europe, this course takes a wider, trans-national view of the medieval world, comparing cultures in Europe, the Middle East, North Africa, and Asia. Topics include exploration, migration, conquest, and assimilation; lectures, readings, and discussions look closely at specific moments of cultural contact, such as the Mongol invasions, the spread of Islam, the Crusades, long-distance trade networks, intellectual collaboration in Muslim Spain, and Viking settlements.

HIST 232 Life in Medieval Europe: Manor, Monastery Town This social, cultural, and economic exploration of medieval Europe focuses on the central and later Middle Ages - from 1000 to 1500 - and examines both broad intellectual, social, and economic shifts as well as the lives of ordinary people. Topics include: the Great Plague, carnival and popular culture, the growth of towns, monastic reform, gender relations, new forms of piety, and popular revolts.

HIST 233/SEMN 232 Christians, Muslims, & Jews in the Mediterranean World This course examines social, cultural, political, and economic interactions among the cultures of the Mediterranean World between 500 C.E and 1500 C.E. Rather than offering a chronological overview, this course explores multiple perspectives on cross-cultural contact, conflict, and exchange. We examine specific geographic areas of contact - the Crusader States, medieval Iberia - as well as more fleeting encounters through travel and trade. Prerequisite: Only Sophomores May Register

HIST 234 The Other in Early Modern Europe This course offers an in-depth survey of early modern Europe from 1450 to 1789, examining the intellectual, social, economic, and political transformations that characterized the era. Topics include: the Renaissance, European exploration, religious reformations, the European witch-hunts, the rise of capitalism, the growth of nation-states, and the Enlightenment.

HIST/SEMN 235 Traders & Travelers in Early Europe In this course, we examine the narratives of traders, travelers and pilgrims in Early Europe (c. 800 BCE - 1400 CE) in order to better understand the ways in which the peoples of Europe understood other regions and the peoples that inhabited them. In doing so, we explore ideas about geography, boundaries, cultural differences, stereotypes, and the construction of identities (both internal and external to societies). These explorations help expose us to the ways in which we might construe similar kinds of knowledge in contemporary societies by providing us with a reflection point in earlier European cultures.

HIST 236/SEMN 234 End of Christendom: Piety, Ritual, and Religious Upheaval in the Sixteenth Century This course examines the complex social, cultural, religious, and political repercussions of religious reform over the course of the long sixteenth century, from the earliest glimmers of discontent among Hussites and Lollards to the violent wars of religion that characterized the seventeenth century. Topics include lay piety and religious ritual, the reform of daily life, confessional antagonism, print culture and propaganda. Primary sources on this topic are plentiful, and we pay particular attention to the exceptionally rich visual sources of this period. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

HIST 237 Women in European Society, 1200-1700 This course takes a chronological and thematic approach to the history of women and gender in pre-modern Europe. It provides a historical overview of women's history in medieval and early modern Europe, examining the effects of historical change on the lives of women and evaluating how women experienced these changes differently from men. Topics include women's roles in the family and household, women's work, female mysticism, prostitution, and witchcraft.

HIST 238 Gender and Sexuality in Pre-Modern Europe Part social history, part cultural history, this course examines gender and sexuality in medieval and early modern Europe, particularly the ways in which perceptions of gender difference were used to construct political and social relationships. The course is organized thematically rather than chronologically, and topics include medicine, marriage, prostitution, gender and state-building, and same-sex relations.

HIST 239 Special Topics in Early European History This course will focus upon a topic in early European history that is not addressed in the department's regular offerings. The course can be repeated with a different topic.

HIST 242 Enlightenment and Its Legacies This course serves both as an introduction to some key questions that characterize intellectual and cultural history and to the intellectual developments that shaped European culture, society, and political life between 1650 and 1850. We will analyze the intellectual tensions that defined this era - between, for example, traditionalism and progress, reason and the unconscious, freedom and authority, hierarchy and equality, and the individual and society. We will consider the historical context in which these intellectual tensions emerged and consider how they spread. We will thus be reflecting critically on the relationship between philosophical ideas, artistic expression, social structures, and political movements.

HIST 244 French Revolution and Napoleon Study of France from Louis XIV to Napoleon with emphasis on structure and problems of the ancient regime, origins of the revolution itself, and the Napoleonic period.

HIST 252 European Colonialism and Decolonization This course explores the history of European colonialism and decolonization, beginning with the emergence of early modern empires in the sixteenth century and ending with the contradictions that have characterized the post colonial era. We will explore the meaning and significance of imperialism using both a chronological and thematic framework. Key themes will include military conflict and violence; strategies of domination; resistance to imperial rule; economics and trade; relations between center and periphery; the role of beliefs about racial and cultural difference; the relationship between empire and the modern nation-state; decolonization; and the legacy of empire.

HIST 254 History, Memory, and Identity in Modern Europe This course will explore historical memory's role in shaping twentieth-century European politics and identities. We will begin by exploring theoretical approaches to the study of individual and collective memory. We will then turn to case studies that have shaped European memory culture, including World Wars I and II, the Holocaust, European imperialism, and the collapse of the USSR. Along the way, we will explore different "sites" of memory such as monuments, museums, memoirs, novels, and films. We will also discuss the relationship between collective memory and collective forgetting.

HIST 256/SEMN 257 Refugees and Migrants in Modern Europe The course explores the history of migration from the mid-nineteenth century to the present day, focusing on people moving from, within, and to Europe. Prerequisite: Sophomores Only

HIST 257 World War II A consideration of World War II in its various dimensions -- military, geographic, economic, cultural, and social -- between 1930 and 1945. It focuses not only on grand strategy but also on the war as a lived and shared human experience.

HIST 259 Special Topics in Modern European History This course will focus upon a topic in Modern European history that is not addressed in the department's regular offerings. The course can be repeated with a different topic.

HIST/RELG 263 Jews in a Changing Europe, 1750-1880 Between 1780 and 1880 enormous changes took place in Jewish religious, political, social, intellectual, and economic life. These changes worked in tandem with developments in general European life to create new forces within Judaism and new ways of looking at the connections between Jews. In this course, we will study these developments as they affected the Jews on the European continent. In so doing, we will explore their consequences for both Jews and non-Jews, and the issues and questions they raised.

HIST/RELG 264 Jewish Revolutions: 1881-1967 Between 1881 and the period immediately following the Second World War, the world's Jews experienced momentous demographic, religious, political, economic, and social changes. These changes in turn shaped their relationship to non-Jews with whom they lived. This course will study the context of change across the globe from Europe and America to the Middle East and North Africa. Through primary and secondary documents, we will explore the forces that produced these changes and the results they produced for both Jews and non-Jews.

HIST/RELG 265 Zionism: From Idea to State This course explores the origins, development, and manifestations of Zionism. The course examines the transformation of traditional religious conceptions of the connection between Jews and the Land of Israel (Palestine) into a nationalist ideology in the 19th century. This transformation entailed parallel changes to the idea of Jewish peoplehood. Through the use of primary documents we will follow these trends through intellectual, religious, social, and political changes that culminated in the establishment of the State of Israel in 1948.

HIST/RELG 267 Women and Judaism This course explores the religious and social position women have historically occupied in Jewish society. We will discuss religious practice and theological beliefs as well as social and economic developments as a means of addressing questions such as: What role have women played in Jewish tradition? How are they viewed by Jewish law? How has their status changed in different historical contexts, and why might those changes have taken place? What are contemporary ideas about the status of Jewish women, and how have these ideas influenced contemporary Jewish practices and communal relations? What do the historical and religious experiences of Jewish women teach us about the way that Judaism has developed?

HIST/SEMN/RELG 268 Jews on Film It will examine themes in Jewish history and culture as expressed through the medium of film. Through readings, lectures, and class discussions, students will explore issues such as assimilation and acculturation, anti-Semitism, group cohesion, interfaith relations, Zionism, and the Holocaust. We will consider questions, such as: How are Jewish characters portrayed on film? Which elements of these portrayals change over time, and which remain constant? How do these cultural statements speak to the historical contexts that produced them? What choices do filmmakers make regarding the depiction of Jewish life, and how do those choices influence perceptions of Jews in particular, or minorities generally?

HIST 269 Special Topics in Jewish History This course will focus upon a topic in Jewish history that is not addressed in the department's regular offerings. The course can be repeated with different topics.

HIST/AFST/SEMN 271 Nelson Mandela & the Anti-Apartheid Movement There are times when specific people, places and moments in history capture the imagination of the world. This occurs when that specificity speaks volumes to the human condition and offers lessons that we all sense are important. Such has been the case with Nelson Mandela and anti-apartheid movement. This course will use Mandela and the evolution of, and struggle against, apartheid as a window into some of the 20th century's most complex issues. Prerequisite: Sophomores Only

HIST/AFST/WGS 272 Gender Relations in Africa This course explores categories of masculinity and femininity that relate to and inform one another. It analyzes how these identity categories interact with other axes of social and political power, such as ethnic affiliation, economic status, and age in various places and times in Africa.

HIST/AFST 273 Atlantic Slave Trade This course examines the complex web of connections that linked together the various lives and fates of Africans, Europeans, and Americans via the Atlantic slave trade. It analyzes the mode of enslavement of Africans by slavers in Africa, the experiences of slaves in the Middle Passage, and the impact of the trade on continental and Diasporan Africans. It also explores the role played by Africa-based abolitionist movements in ending the trade in Atlantic Africa.

HIST/AFST/RELG 274 Islam in Africa This course explores the spread of Islam from the Arab peninsula to the African continent in the seventh century through the nineteenth century and limns the factors which facilitated this advance. It examines the methods and principles of Islam and how the religion affected the life styles of its African neophytes and adherents. As a result of the interaction between Muslim and African civilizations, the advance of Islam has profoundly influenced religious beliefs and practices of African societies, while local traditions have also influenced Islamic practices. Muslims were important in the process of state-building and in the creation of commercial networks that brought together large parts of the continent. Muslim clerics served as registrars of state records and played a role in developing inner-state diplomacy inside Africa and beyond.

HIST/AFST 275/SEMN 274 African Christianity This course explores the complex and disparate trends of Christianity in Africa since the first century C. E. It highlights Africa's role in the development and growth of Christianity as a global religion. Prerequisite: Sophomores Only

HIST/AFST 276 Civilizations of Africa Study of Africa south of the Sahara including the origins of man and the emergence of food producing communities; Ancient Egypt and pre-colonial African kingdoms and federations; medieval empires of western Sudan, Ethiopia, and Bantu-speaking Africa; and the Atlantic slave trade. Emphasis on socio-political and economic history.

HIST/AFST 277 Contemporary Africa Study of Africa south of the Sahara including colonialism and the anti-colonial struggles of the post-WWII period.

HIST/AFST 279 Special Topics in African History This course will focus upon a topic in African history that is not addressed in the department's regular offerings. The course can be repeated with different topics.

HIST 280 Modern China Survey of Chinese history from the 17th century to the present; focus on major developments in China's interaction with the modern world, its struggle in modernization, the origins of the Chinese revolution, and China's reform policies in the late 20th century and their impact on Chinese society and the world.

HIST 282 Early China Survey of Chinese history from earliest times to 1600. Topics include the emergence and evolution of Confucianism, the rise of centralized empires, the tributary system of foreign relations, dynastic rise and decline, the scholar-official system, shifting gender roles, and early China's place in world history.

HIST 283 Occupiers/Occupied in Post-World War II East Asia How does one country occupy another? What is it like to live in an occupied society? By exploring the post-World War II occupations of Japan, Okinawa, and both North and South Korea, we will seek to address these questions and understand how this period of occupation shaped East Asia and its people in positive and negative ways. We will examine how the goals and attitudes of the occupiers, particularly those from the US and the USSR, influenced the region. In our comparative study of these occupations we will draw from the rich English-language archive of primary and secondary materials, including historical studies, memoirs, government and military documents, as well as works of fiction, cartoons, and film.

HIST 285 Modern Japan Study of Japanese history from the 17th century to the present. Topics include samurai society, economic and political modernization, the rise of militarism, World War II, the American occupation, the postwar economic miracle, and the current challenges Japan is facing.

HIST/SEMN 287 What If: Alternate Pasts This is a class about what might have been. Taking history itself as an object of analysis, this seminar will ask us to reconsider how we understand the past by thinking and acting in counterfactual ways. We will explore debates for and against counterfactualism and examine diverse counterfactual writings. We will also experience counterfactualism by participating in two role-playing activities, one set in a critical moment of reform in 19th century Korea, and the other set in Japan in the months before Pearl Harbor. As we seek to achieve the goals associated with specific roles, we will gain insights on the contingent, complex, and often messy reality of the past.

HIST/ANSO 288 Sports in East Asia Whether it's Yao Ming on the basketball court, Ichiro in Seattle breaking records, or the ubiquitous martial arts, "East Asian" sports seem to be everywhere these days. How did this come about? What can we learn about East Asian societies -- and our own -- from studying sports? These are some of the questions we will be tackling as we explore the history and significance of sports in East Asia. Drawing from a combination of primary materials, theoretical writings, comparative studies, and secondary works focused on East Asia, we will consider sports in terms of several issues: invented traditions, nationalism, body culture, gender, stardom, and the modern Olympics, to name just a few.

HIST 289 Special Topics: East Asia This course will focus upon a topic in East Asian history that is not addressed in the department's regular offerings. The course can be repeated with different topics.

HIST 290 The History of the Modern Middle East This course follows the history of the Middle East from the late Ottoman period to the Arab Spring. We will begin by looking at how political pressures from Europe and the spread of new ideas led to the transformation and breakup of the Ottoman Empire. We will then consider how European powers attempted to control and reshape the Middle East in the years following World War I and trace the formation of the new nation-states that emerged in that era. Finally, we will explore the post-colonial societies that emerged in the mid-twentieth century.

HIST/CLAS 295 Greek and Roman Sport Ancient Greece gave rise to traditions of competitive athletics that are still with us today - but how should we understand the legacy? Through a combination of illustrated lectures, in-class discussions, and interactive and creative exercises (e.g. composing your own Victory Poetry and 'tweet-grams', tweets modeled off of ancient epigrams of athletes), we will study the development of sport in ancient Greece and Rome. While we make our way through Greek and Roman history, we will spend considerable time comparing ancient athletic practice with modern athletic culture and formulate ways to undertake meaningful historical and cross-cultural analysis.

HIST 299 Historical Methods This course will introduce the various approaches used by professional historians to reconstruct and interpret the past. Students will develop their research, writing, and critical thinking skills. The class focuses on the issues and questions historians explore and debate today. Open to Sophomore Majors or students with permission.

HIST 391 Seminar in United States History A reading- and discussion-based seminar in some topic of U.S. History, culminating in a substantial research paper. Intended for History majors and minors. **SPRING 2018 DESCRIPTION:** This course will investigate the history of social justice and social reform in the United States from 1790 to 1980. We will read widely from secondary sources about the origination of social reform in the Early Republic, its progression throughout the nineteenth and early twentieth centuries, and its changing focus on social justice in the mid to late twentieth century. The focus will be on a variety of reforms and a variety of perspectives, both progressive and reactionary. The course will also consider the effect of these reforms on the various people they were trying to help, and the ways in which people from different backgrounds (whether based on race, gender, sexual orientation, or class) approached reform. Rather than a comprehensive examination of all types of reform, the class is meant to highlight important moments and changes in social reform and social justice. Since it is intended for history majors and minors, the culmination of the course will be an original research paper that examines some aspect of social reform or social justice in the United States, and that significantly engages both primary and secondary sources. Prerequisite: One course in US History

HIST 393 Seminar in Medieval History A reading- and discussion-based seminar in some topic of Medieval History, culminating in a substantial research paper. Intended for History majors and minors. Prerequisite: HIST-101, HIST-231, HIST-232, HIST-234, HIST-236, HIST-237 OR HIST-238

HIST 394 Seminar in Modern European History Examination of selected topics in modern European history from 1700 to the present. Prerequisite: One course in Modern European History at the 200 level. History Majors or Minors only.

HIST 397 Seminar in East Asian History A reading- and discussion-based seminar in some topic of East Asian History, culminating in a substantial research paper. Prerequisite: One course in East Asian History or political science.

HIST 490 History Senior Seminar Intended as a capstone to the History major, the senior seminar is an advanced class in the work that historians, the discipline of History, and the changing understanding of the past do in the world within and beyond the academy. It is also designed to help History majors with the SIP process. Required of all History majors; departmental permission required for non-majors. Prerequisite: Senior History Majors only

HIST 593 Senior Individualized Project History SIPs can be either one unit (generally Fall) or two units (Fall/Winter). History majors are not required to write History SIPs. Non-majors can write SIPs in History with the permission of the department and SIP supervisor. See the department chair or SIP supervisor for more information about the nature and format of one- and two-unit History SIPs. Prerequisite: Permission of department and SIP supervisor required.

Independent Interdisciplinary Programs

Independent Interdisciplinary Major

The Independent Interdisciplinary major is intended for students who have a strong, well-articulated desire to pursue depth in an interdisciplinary area where the College does not have a defined major. The proposal must, however, be feasible in the context of the College's existing curriculum and faculty expertise. The student must demonstrate a record of discipline and academic success in coursework, including independent work. Students submitting a proposal for an Independent Interdisciplinary Major must have a minimum GPA of 3.0 and may not declare a second major.

A student interested in pursuing an Independent Interdisciplinary Major must first form an advisory committee consisting of at least three faculty members, including faculty from each relevant department or program and the student's academic advisor. One faculty member is identified as the chair of the committee. Faculty are not obligated to participate in Independent Interdisciplinary Major advisory committees, and participation must be approved by the relevant department or program chairs.

Once the committee has been approved, the student develops a proposal, engaging all members of the committee. In addition to meetings with the student, the committee should meet at least once without the student to discuss and evaluate the proposal, providing feedback to the student. The proposal must be approved by the entire committee and the Educational Policies Committee, in consultation with the Registrar. Proposals for Independent Interdisciplinary Majors must be submitted by the end of the sophomore year.

After the proposal has been approved and filed with the registrar's office, any changes or course substitutions must be approved by the committee chair, in consultation with the other members of the committee.

An Independent Interdisciplinary Major Proposal includes the following:

- **Purpose:** The proposal must clearly articulate the topic or theme for the major, describe the student's interest in the topic, and explain why that interest cannot be met by existing majors, minors, or concentrations.
- **Plan of Study:** The proposed plan of study must include at least 10 courses from at least two departments or programs, making clear how the number, combination, sequencing, or level of specific courses provide breadth and depth in the interdisciplinary topic. The committee may also require courses that provide a theoretical basis for some aspect of the topic, cognate courses, or courses that involve reading or engaging in the scholarly or professional literature of the field.
- **SIP:** The student must complete a Senior Individualized Project related to the topic of the Independent Interdisciplinary Major and the SIP advisor(s) must be a member of the student's interdisciplinary major advisory committee. The proposal for the major should indicate how the student intends to meet this requirement.
- **Senior Seminar:** The student should participate in at least one senior seminar related to the project or in a related discipline. The proposal should indicate how the student intends to meet this requirement.

Independent Interdisciplinary Concentration

The Independent Interdisciplinary Concentration is intended for students who have a strong, well-articulated desire to explore a coherent area where the College does not have a defined major, minor, or concentration. The proposal must be feasible in the context of the College's existing curriculum and faculty expertise. Students may have only one Independent Interdisciplinary Concentration but may have additional majors or minors.

A student interested in pursuing an Independent Interdisciplinary Concentration must first form an advisory committee consisting of at least two faculty members, including one from the department or program whose courses comprise the majority of the concentration. Faculty members are not obligated to participate in Independent Interdisciplinary Concentration advisory committees. The student should develop a proposal in consultation with all of the members of the committee and all of the members must approve it. Approved proposals must be submitted to the Registrar before the end of the Winter Quarter of the senior year. After the proposal is filed with the Registrar, any changes must be approved by the faculty committee and filed with the Registrar.

An Independent Interdisciplinary Concentration Proposal must include the following:

- **Purpose:** The proposal must clearly articulate the topic or theme of the concentration, describe the student's interest in that topic or theme, and explain why that interest cannot be met by existing majors, minors, or concentrations.
- **Program of Study:** The proposed program of study must include at least 6 courses and make clear how the number, combination, sequencing, or level of specific courses provide breadth and coherence in the interdisciplinary topic. The committee may also require courses that provide a theoretical basis for some aspect of the topic, cognate courses, or courses that involve reading or engaging with the scholarly or professional literature of the field.
- **SIP:** The student may complete a Senior Individualized Project related to the topic of the Independent Interdisciplinary Concentration and may apply one SIP unit toward the 6 required courses. If a SIP unit is to be counted toward the concentration, the proposal should indicate how the SIP fits within the program of study.
- **Senior Seminar:** The student may participate in a senior seminar related to the Independent Interdisciplinary Concentration and may count it toward one of the 6 required courses.

Interdisciplinary Courses

Interdisciplinary courses

IDSY/PHYS 215 Introduction to Complex Systems Study of how collective behavior emerges from the interaction between a system's parts and its environment. Model systems from the natural sciences and social sciences will be used as examples. Both historical and contemporary approaches will be discussed.

IDSY/MATH 305/PHYS 482 Dynamic Models in Social Science The study of why mathematical and computational methods are important in understanding social phenomena, and how different social phenomena can be described by proper mathematical models. Specifically, applications of the theory of dynamical systems will be presented. Designed for math/science and social science students. Either MATH/PHYS 270 or this course, but not both, may be counted towards the major in mathematics.

IDSY/JAPN/SEMN 495 Thinking About Nature: East and West This course is designed to be the senior seminar for the East Asian Studies major and also a Senior seminar course for other seniors. We will look at how the West (mostly the US) and Asian cultures have thought about nature and the human-nature relationship. Prerequisite: Seniors Only

IDSY 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

International and Area Studies

Professor: Dugas (Director)

This program is designed for students who have strong international *and* regional (area studies) interests and wish to pursue these interests systematically in their academic studies. The program reflects the belief that several kinds of skills and knowledge are essential for understanding the contemporary global system. The first of these is the ability to analyze issues that are global—issues that pertain to the interrelationships among the peoples and states of the world. The second is skill in making explicit, systematic comparisons between dimensions of political, socioeconomic, or cultural life in two or more societies, as well as acquiring the special kinds of insights resulting from such comparative analysis. The third is in-depth knowledge of a particular area of the world—its geography, history, culture, and institutions. These areas may be a state, a subcontinent, or a continent.

With a mix of courses providing global/comparative and area-specific knowledge, mastery of a second language, study abroad, the IAS sophomore and senior seminars, a discipline-specific major or minor, and an internationally-oriented Senior Individualize Project (SIP), students majoring in International and Area Studies should be well prepared to live in and to make sense of the interdependent system of nations and regions that make up the modern world. They will also have received a solid foundation for graduate study and/or further training for careers in the international realm.

The program in international and area studies is open to all students.

In addition to meeting formal requirements, majors are urged to consider international Career and Professional Development internships as well as SIPs in consultation with the Career and Professional Development Center.

Requirements for the Major in International and Area Studies

Number of Units

Ten units are required, not including language courses or the SIP.

Required Core Courses

Any History course in an area different from the student's area of geographic study

ANSO 103 Introduction to Society and Culture

ECON 101 Principles of Economics or POLS 375 International Political Economy

IAST 290 Sophomore Seminar

IAST 490 Senior Seminar

POLS 106 Introduction to Comparative Politics or POLS 107 Introduction to International Politics

Other Requirements

1. Area-specific courses: Four (4) courses from at least two different disciplines focusing on a specific area or region (see lists of acceptable courses in each geographic area below). Prior to going on study abroad, an IAS major must pass two courses in her/his area of geographical specialization (in addition to foreign language courses).
2. Foreign Language proficiency: Proficiency in a foreign language appropriate to the student's geographical area of study at a level equivalent to five (5) units, typically two (2) courses beyond the intermediate level. Literature courses may also count as area-specific courses. This must be a modern spoken language. (This does not preclude a student's also studying an ancient language). A student seeking to fulfill this requirement with a non-traditional language must first petition the Director of the IAS major.
3. Study abroad: IAS majors must complete a long-term (6 month) or extended-term (9 month) study abroad program in their geographical area of study. Long-term participants may apply one course and extended-term participants may apply two courses toward the major.
4. Cognate Minor or Major: IAS majors must have a minor or second major in one of the disciplines recognized by the departments of the College. Students may double count courses toward the fulfillment of a cognate minor or toward a second major.
5. Comprehensive examinations: The written comprehensive examination for the major in international and area studies will include questions drawn from global and comparative courses and the area of geographical emphasis. Students will be expected to demonstrate an ability to integrate their experiences with a global perspective and to bring a multidisciplinary approach to the analysis and discussion of international and area issues and problems.

Potential majors should consult with the director early in their college careers to assure proper program planning and to obtain a list of appropriate courses.

Students are strongly encouraged to pursue a SIP that incorporates an international and/or area studies dimension.

In order to qualify for honors in the major, an IAS student must meet two of the following three criteria: a minimum of 3.5 GPA in IAS courses (excluding foreign language courses); honors in the senior comprehensive examination; honors on an IAS-related SIP.

Geographical Area of Study

Four units from at least two (2) different departments are required. One (1) of these four courses may be taken while on study abroad; however, the student must supply a syllabus and other detailed information about the content of that course to the IAS program director, who will then determine whether or not it may count.

African Studies

AFST/HIST 104 Introduction to African Studies

AFST/POLS 248 Politics of Sub-Saharan Africa

AFST/HIST 272 Gender Relations in Africa

AFST/HIST 273 Atlantic Slave Trade

AFST/HIST/RELG 274 Islam in Africa

AFST/HIST 276 Civilizations of Africa

AFST/HIST 277 Contemporary Africa

AFST/HIST 279 Special Topics in African History

AFST/ANSO 290 Africa in the Context of Globalization

ENGL 221 African Literature

FREN 435 Advanced Literary and Cultural Studies (when the topic is African literature)

East Asian Studies

Students may wish to concentrate their area courses around one country, but are not required to do so.

Required Courses:

HIST 103 Introduction to East Asian Civilizations

Additional Electives:

CHIN 225 Traditional Chinese Literature in Translation
CHIN 235 Modern Chinese Literature in Translation
CHIN 245 Chinese Film
CHIN 260 Women in Modern China
HIST 280 Modern China
HIST 282 Early China
HIST 283 Occupiers/Occupied in Post-World War II East Asia
HIST 285 Modern Japan
HIST 288 Sports in East Asia
HIST 289 Special Topics in East Asian History
HIST 397 Seminar in East Asian History
JAPN 236 Pre-Modern Japanese Literature
JAPN 237 Japanese Literature in Translation: Tokugawa (Early Modern)
JAPN 238 Post-war Japanese Literature in Translation
JAPN 239 Modern Japanese Literature in Translation
JAPN 240 Japanese Culture Through Film
JAPN 242 Contested History
JAPN 245 Japanese Language in Society
JAPN 250 Manga/Anime and Gender in Modern Japan
RELG 250 Buddhism in East Asia
THEA 290 Asian Theatre

Latin American Studies

ANSO 234 Latin America in Global Context
POLS 245 Politics of Latin America
RELG 122 Religions of Latin America
SPAN 401 Topics in Hispanic Culture (when the topic is Latin America)
SPAN 435 Advanced Literary Studies (when topic is Spanish-American literature)
SPAN 455 Limits of Genre: Latin America
SPAN 475 Conquest, Colonization, and Independence
SPAN 480 Constructing Spanish America
SPAN 485 Literary Revolutions of Spanish-America
SPAN 492 Spanish-American Seminar

Western European Studies

Given the richness of the College curriculum related to modern Europe, the requirements for European area studies are somewhat more specific than are those for other areas. In particular, students must choose two courses (from different departments) that deal with modern Europe and two courses that relate to a specific nation.

Modern Europe

Two units from different departments.
ANSO 345 Theories of Society and Culture
ARTX 150 Survey of Art II: 1600-1945
ARTX 223 The Long 19th-Century Art
HIST 237 Women in European Society
HIST 254 History, Memory, and Identity in Modern Europe
HIST 259 Special Topics in Modern European History
HIST 263 Jews in Changing Europe
HIST 394 Seminar in Modern European History
MUSC 330 Western Music in the Classic and Romantic Eras
MUSC 335 Western Music in the 20th Century
PHIL 109 Existentialism and Film
PHIL 207 18th-Century Philosophy
PHIL 208 19th-Century Philosophy
POLS 210 Comparative Political Institutions: Social Europe
POLS 231/SEMN 209 The Politics of Rights & Immigration
POLS 270 The European Union: Institutions, Actors, Aliens, and Outcomes
POLS 330 The Politics of the Holocaust
THEA 280 The Theatre of Revolt: Modernism and Post-Modernism in Western Theatre

British Studies

ENGL 265, 266, 267, 268 (British Literature), 435 (when the topic is British literature)

French Studies

ARTX 223 The Long 19th-Century Art
FREN 301 (when the topic is French literature), 401 (when the topic is French culture), 435 (when the topic is French literature), 450, 490 (French literature)
HIST 244 French Revolution and Napoleon

German Studies

GERM 200 (German film, taught in English)
GERM 301, 410, 411, 412, 420, 421, 423, 430, 435, 490 (German literature and cinema)
GERM 470 Contemporary German Culture

Spanish Studies

SPAN 401 (when the topic is Spanish culture), 495 (when the topic is Spanish literature)

SPAN 460, 465, 470, 491 (Spanish literature)

International and Area Studies courses

IAST 222 20th-Century Urban China This course interrogates literary and cinematic representations of Chinese cities in the twentieth century. By examining urban narrative in Chinese fiction, drama, poetry and film from the Republican and People's Republic periods, this class offers a new understanding of Chinese modernity as marked by its unique urban sensibilities and configurations.

IAST 290 Sophomore Seminar The sophomore seminar in international and area studies is intended to provide an opportunity for IAST majors to bring their skill in comparative study and their knowledge of a specific area of the globe together around a common theme. Students will compare the regional and area similarities and differences with regard to the topic of the seminar as well as develop increased expertise in their area of focus through exploration of the seminar topic's ramifications in that region. Upcoming topics -- Spring 2011: Human Rights Issues that Affect Children; Winter 2012: Capitalisms and Socialisms. Prerequisite: Sophomore IAST Majors Only

IAST/WGS 295 Women in Latin America This seminar provides an anthropological and historical introduction to the study of gender, gender-based violence, and women's activism in Latin America, with a focus on the realities and lived experiences of women in Latin America not only as victims of violence and oppression, but also as survivors and agents of their own herstory. Emphasis is placed on the phenomenon of gender violence, gender inequality, state terror, racism and socio-economic marginalization of women, children and LGBTIQ individuals.

IAST 490 Senior Seminar Consideration of issues and problems affecting the global whole and the various geographical areas of the world through focusing on a broad topic or theme; emphasis on discussion of the topic and problems from a broadly interdisciplinary perspective. Specific topics will change from year to year. Possible topics: hunger, war, the environment, international relations, population and migration, human geography and ecology, race and class, religious fundamentalism, the literature of women, and the literature of war. Prerequisite: Senior IAST Majors Only

Japanese

Professors: Walker, Sugimori

Requirements for the Minor in Japanese

Number of Units

Six units are required.

Required Courses

JAPN 103 Beginning Japanese III, or its approved equivalent.

Three more Kalamazoo College units (or their equivalent) of upper-level Japanese language courses through at least the JAPN 203 level. These may comprise JAPN 201, 202, 203; equivalent units earned during study abroad; or other approved alternatives. Students who repeat the beginning level of language [100 level equivalent] on study abroad, after having taken the first-year sequence on campus already, will be required to take one more language course on campus upon return, at the level in which they place. One Japanese literature in translation course, taken on campus (JAPN 235-239). One other Japanese studies course (may include an approved course taken during study abroad).

Japanese courses

JAPN 101 Beginning Japanese I Introductory course; basic grammar and vocabulary; emphasis on listening and oral foundations; hiragana and katakana and an introduction to kanji. Students are encouraged to begin this course sequence in their first year in order to complete the three-quarter sequence (JAPN 101, 102, 103) required for study abroad, as well as the second year sequence (JAPN 201, 202, 203) before study abroad.

JAPN 102 Beginning Japanese II Further introduction to basic grammar and vocabulary; development of fundamental reading and writing skills using hiragana, katakana, and approximately 50 kanji. Prerequisite: JAPN-101

JAPN 103 Beginning Japanese III Reinforcement of basic listening and development of oral and aural competency; further achievement of reading and writing skills using the kana and approximately 100 kanji. Prerequisite: JAPN-102 or equivalent placement

JAPN 201 Intermediate Japanese I Further work in conversation, oral interpretation, and elementary composition using approximately 200 kanji; study of idioms fundamental to an active use of spoken and written Japanese. Prerequisite: JAPN-103 or equivalent placement

JAPN 202 Intermediate Japanese II Further refinement in areas studied in JAPN 201. Prerequisite: JAPN 201 or equivalent placement

JAPN 203 Intermediate Japanese III Further refinement in areas studied in JAPN 202. Prerequisite: JAPN-202 or equivalent placement

JAPN 236 Pre-Modern Japanese Literature This course deals with literature produced in the Japanese court in the Japanese language between the ninth and fourteenth century and will focus on the of the women's tradition of the court. Japan is the only nation in the world whose early canonical works of prose literature in the vernacular are consistently and overwhelmingly by women. This course will examine several major texts of that early tradition, the second of which, Tale of Genji, is the earliest piece of long prose fiction in the world. We will be analyzing the various texts in relation to such questions as the following: What sorts of social/cultural circumstances supported the flowering of a woman's literary tradition? What have been the themes of their writings? What role did these texts serve in the lives/consciousness of their predominately female audience?

JAPN 238 Post-War Japanese Literature in Translation This course surveys important Japanese writers of the post-World War II era, with special attention to the profound transformations that followed the dissolution of the Japanese Empire in 1945. In the immediate postwar period the physical map of "Japan" shrank dramatically, and a national imagination that had for decades ranged across the plains of Manchuria and far into South Asia collapsed in on itself. This course investigates the ways in which prominent writers (and a few filmmakers) confronted this collapse and everything it implied, from a tentative renegotiation of Japan's place in the world (largely via its relationship with the United States), to a rapidly urbanizing society's relationship to its own hinterlands. Authors covered include Dazai Osamu, Abe Kobo, Murakami Ryu, Tawada Yoko, and Furukawa Hideo. All readings, lectures, and discussions in English.

JAPN 239 Modern Japanese Literature in Translation This course will examine a number of Japanese authors, from the late 19th century through the early 20th century, who have addressed the cultural and psychic disease that resulted from Japan's encounter with the West and transformation of Japan into a modern, nationalistic state. Authors read will include: Natsume Soseki, Mori Ogai, Higuchi Ichiyo, and Tanzaki Jun'ichiro.

JAPN 245 Japanese Language in Society This course explores several major aspects of language use associated with Japanese culture and society. The course aims not only at familiarizing students with various aspects of Japanese language with reference to culture and society, but also their developing an appreciation for a different culture. When discussing the inherent inter-relationship between language and culture, including the beliefs, values, and social organization, we will focus on the ideas of power, hierarchy, gender, and history. No previous knowledge of Japanese or linguistics is assumed or required. Readings, lectures, and discussion are all in English.

JAPN 250 Manga/Anime and Gender in Modern Japan Why are manga/anime so popular? Let's find out. This course undertakes a critical analysis of manga (comics) and anime (animation). We will examine these media's historical origins, narrative features, the world's reception and much more. The samurai warrior, the bishōnen (beautiful boy), and the sexy cyborg-gender in Japanese culture has vivid representations. This course explores constructions of masculinity and femininity, paying attention to the figures of the girl as the postwar descendant of the bishōnen, the ostensibly undersocialized otaku and yaoi culture and transgender manga where imagination opens the door to alternate and critical realities.

JAPN 301 High Intermediate Japanese Language This course is the first level of the third-year Japanese language sequence, offering more advanced training in the four skills of speaking, listening, reading, and writing. Prerequisite: JAPN-203 or equivalent placement

JAPN 302 High Intermediate Japanese Language II This course is the second of the third-year Japanese language sequence, offering more advanced training in the four skills of speaking, listening, reading, and writing. Prerequisite: JAPN-301 or equivalent placement

JAPN 401 Advanced Japanese This class is an advanced level class. It is expected that students will have a strong base in Japanese grammar and the four language skills of Japanese: reading, writing, listening, and speaking, as well as aspects of Japanese culture and society. Prerequisite: Placement or at least six-month study abroad and permission.

JAPN 490 Senior Seminar Prerequisite: Senior Standing

JAPN 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Jewish Studies

Professor: Dion, Elman, Haus (Director), Petrey

The Jewish Studies Concentration at Kalamazoo College immerses students in the history, religion, and culture of the Jewish people. Exploring these subjects engages students of all backgrounds in important intellectual and ethical issues, such as:

- majority/minority relations
- identity formation
- the relationship between the religious and the secular

Students receive training in textual traditions, teaching them to read beyond the page and to consider the broader impact of the written word. As an interdisciplinary field, Jewish Studies intersects with different areas of the liberal arts.

Outside of the classroom, the Concentration enables students to develop service learning and social justice projects. In this manner, Jewish Studies concentrators become morally aware and socially engaged scholars.

Requirements for the Concentration in Jewish Studies

Number of Units

Six units are required.

Required Course

HIST/RELG 107, Introduction to Jewish Traditions

Electives

5 additional courses from the following list:

CLAS 261/RELG 260 Judaism in Antiquity
HEBR 101 Beginning Hebrew
HEBR 102 Beginning Hebrew II
HEBR 201 Intermediate Hebrew
HIST/RELG 218 The American Jewish Experience
HIST/RELG 263 Jews in a Changing Europe, 1750-1880
HIST/RELG 264 Jewish Revolutions, 1881-1967
HIST/RELG 265 Zionism: from Idea to State
HIST/RELG 267 Women and Judaism
HIST/RELG/SEMN 268 Jews on Film
POLS 295 Israeli Politics
POLS 330 Politics of the Holocaust
RELG 160 Hebrew Bible
RELG 210 Sex and the Bible
RELG 211/CLAS 255 Religion from Alexander to Constantine

Hebrew studies are recommended, but not required, for the concentration.

Study Abroad

Concentrators are encouraged (but not required) to consider Study Abroad programs that will expand their knowledge in Jewish Studies. These include programs at the Hebrew University in Jerusalem and Ben-Gurion University in Be'er Sheva, as well as several European sites. The Israel programs provide opportunities to study Middle Eastern affairs as well as aspects of Jewish culture that complement the course offerings at the College. Students are encouraged to discuss their academic plans with the director in advance of studying abroad, as certain courses may count toward the concentration.

Hebrew Language courses

HEBR 101 Beginning Hebrew First in a three course sequence of study. This course is an introduction to the Modern Israeli Hebrew language. Hebrew alphabet in both print and script, pronunciation of unique sounds within the language, vocabulary and fundamental grammar structures will be introduced. Beginning reading, writing and speaking skills emphasized. Prerequisite: Placement exam if student has had prior experience with Hebrew.

HEBR 102 Beginning Hebrew II Second in a three course sequence, this course follows Beginning Hebrew I, focusing on the continued development of basic comprehension and communication skills. By the end of this course students should be able to respond to simple questions, to understand simple statements and to participate in simple conversations. Students will also be able to write short paragraphs about themselves and some limited topics. Prerequisite: HEBR-101 or language placement exam. Prerequisite: HEBR-101

HEBR 103 Beginning Hebrew III Third in a three course sequence, this course follows HEBR 102, building on the basics already learned as well as improving vocabulary, language nuance and verb conjugation skills. By the end of this course students will have reached the intermediate level and should be able to participate in more complex conversations, be able to read short stories and express themselves more clearly. Prerequisite: HEBR-102 or language placement exam. Prerequisite: HEBR-102

Language Courses

Language courses

LANG 121 International Civil Rights Movements This course is for non-native speakers of English. This unique classroom environment is created especially for multilingual students. We discuss and debate issues from civil rights movements in the US, South Africa, and India. We practice and use the techniques of leaders such as Martin Luther King, Jr, Nelson Mandela, and Gandhi. This class will study and develop communications skills and strategies that students need to speak and be understood in their academic and professional communities.

LANG 131 Comedy & Resistance: A Content-Based Academic Writing Course ESOL For international students and non-native speakers of English, this course is designed to improve academic writing and reading skills. Content will focus on comedy and the role of comedy to resist oppression, injustice and discrimination. Student experiences outside of the mainstream and outside of the US will be valued and encouraged. Materials will include comics, political cartoons, articles, short stories, anecdotes and stand-up routines. The work of influential satirists such as Aldous Huxley, Richard Pryor, Sarah Silverman and Stephen Colbert will be used to discuss comedy's power to disrupt and threaten powerful cultural assumptions. Students will engage in thoughtful discussion and argumentation in the classroom and create deliberate academic writing that is thoroughly edited and polished. Skills acquired in this course will be transferable to a variety of writing opportunities and academic settings.

LANG 210 Foreign Language Teaching Methods and Practicum I This course will broaden your understanding of second language learning and currently espoused foreign language teaching methodologies while helping you to develop your own skills as a foreign language instructor. The main topics covered will be teaching speaking, listening, and reading skills, lesson planning, and teaching language in context. *This course is only open to foreign language teaching assistants.

LANG 211 Foreign Language Teaching Methods and Practicum II This course will broaden your understanding of second language learning and currently espoused foreign language teaching methodologies while helping you to develop your own skills as a foreign language instructor. The main topics covered will be motivating students, teaching for cultural understanding, teaching vocabulary, and error correction. *This course is only open to foreign language teaching assistants. Prerequisite: Visiting International Students or permission

LANG 212 Foreign Language Teaching Methods and Practicum III Prerequisite: Visiting International Students or permission

LANG 593 Senior Individualized Project

Mathematics

Professors: Barth, Cutter, Intermont, Nordmoe (Chair), Oloo, West

The mission of the Mathematics Program is to foster in all our students critical habits of mind: description, analysis and interpretation. The Program is designed to prepare its majors for successful lifetime engagement with mathematics whether it be through applied work in industry or government; research in mathematics, statistics, or one of the other mathematical sciences; teaching; or applying mathematics in the physical, computing, or social sciences. For non-majors, the Program builds substantive skills in quantitative and abstract reasoning and in their application to the study of modern society.

Advanced Placement

For purposes of course placement and prerequisites, a score of 4 or 5 on the AB calculus exam (or an AB subscore of the BC calculus exam) is regarded as equivalent to successful completion of MATH 112. A score of 4 or 5 on the BC calculus exam is equivalent to MATH 113. A score of 4 or 5 on the statistics exam is equivalent to MATH 260.

Transfer, Dual Enrollment, Study Abroad Credit

Courses taken at other institutions will be awarded credit in mathematics if they meet one of the following criteria:

1. The course is similar in content and rigor to an existing course in the Mathematics Department (and there are legitimate reasons why the student is not able to take the class at the College)
2. The course covers some important topic of mathematics not offered at Kalamazoo College. .

Students are responsible for meeting with the department chair in advance to determine whether a course offered elsewhere will transfer back as a mathematics credit.

Requirements for the Major in Mathematics

Number of Units

Nine units of mathematics are required, exclusive of SIP and CS Cognate. Typically up to two units from outside courses (AP, transfer, dual enrollment, or study abroad) may count towards the major or minor in mathematics. MATH 260 and MATH 261 do not count for the major. Students who wish to apply additional external units toward the major must consult with the department.

Required Courses

MATH 112-113 Calculus I and II

MATH 214 Calculus III

MATH 240 Linear Algebra and Vectors

MATH 310 Complex and Vector Variables, MATH 316 Topics in Number Theory or MATH 318 Topics in Topology

MATH 320 Real Analysis I or MATH 330 Abstract Algebra I

One two-term sequence beyond calculus (e.g., Real Analysis I and II, Abstract Algebra I and II, Probability and Mathematical Statistics, Abstract Algebra I and Linear Algebra II)

Required Cognate

One computer science course or one applied statistics course (MATH 260 or MATH 261)

Major Guidance

Among the courses we offer, MATH 320 and MATH 330 are at the highest level of abstraction. Before enrolling in one of these courses, students are strongly encouraged to complete MATH 310, MATH 316 or MATH318.

For students interested in graduate work in one of the mathematical sciences, additional work in MATH 280, 310, 314, 316, 320, 330, 420, 430, and 450 is appropriate. Those with a strong interest in computing should elect the minor in computer science in addition to MATH 300. For those students interested in applied work (mathematical biology, mathematical economics, operations research, etc.), election of MATH 270, 280, 310, 362, 365, 440, and at least two courses in computer science is appropriate. Other departments offer classes that use mathematical ideas: BIOL 112, 426, and 436; CHEM 310 and 410; ECON 305 and 412; PHIL 107; PHYS 340, 400, 410, and 420; and PSYC 390.

Mathematics Colloquium Credit

In addition to the requirements stated above, mathematics majors are required to complete the Mathematics Colloquium requirement. See the Mathematics Department for details.

Comprehensive Exams

Mathematics majors are required to satisfactorily complete the Sophomore Comprehensive exam and the Senior Comprehensive Exam. See the Mathematics Department for details.

Requirements for the Minor in Mathematics

There are four options for the minor in mathematics, each of which requires six units of credit in mathematics. Each of these options requires the "core" courses: Single variable calculus (MATH 112 and MATH 113), Multivariable Calculus (MATH 214), and Linear Algebra (MATH 240). The other required courses for each option are as follows:

Statistics Option

MATH 362 Probability

MATH 365 Mathematical Statistics

Computational Mathematics Option

MATH 250 Discrete Mathematics or MATH 330 Abstract Algebra I

MATH 300 Automata, Formal Languages, and Computability

Applied Mathematics Option

MATH 280 Differential Equations

MATH 310 Complex and Vector Variables

Pure Mathematics Option

MATH 320 Real Analysis I or MATH 330 Abstract Algebra I

And one other mathematics course from the following list:

MATH 310, MATH 314, MATH 316, MATH 318, MATH 320, MATH 330, MATH 362, or any

400-level course in Mathematics

****Note: MATH-260 and MATH-261 do not count for the Mathematics minor******Study Abroad**

Students interested in mathematics are especially encouraged to consider the study abroad program in Budapest. The Budapest program is given in English; no prior knowledge of Hungarian is needed. It offers a number of mathematics courses as well as history, language, and literature courses. Mathematics majors have also studied mathematics in Erlangen, Quito, Perth, Aberdeen, and Lancaster. Early consultation with the department is strongly urged.

Mathematics courses

MATH 105 Quantitative Reasoning and Statistical Analysis An introduction to some of the quantitative techniques used to clarify ordinary experience and to some of the statistical ideas used to shape public policy and human sciences, with emphasis on the concepts involved in producing, organizing, and drawing conclusions from data. Does not count toward the major or minor. Not open to students who already have credit from ANSO-212, MATH-260, or MATH-261.

MATH 110 Calculus I with Review, Part 1 MATH 110 and 111 cover in two terms the material covered in Mathematics 112. In addition, topics from precalculus mathematics are reviewed and practiced as needed. Precalculus topics include: algebra and analytic geometry; linear, quadratic, polynomial and rational functions; and trigonometric functions. Enrollment is restricted to those who were advised to take Math 110-111 on the basis of the department's placement examination. The two-term Math 110-111 sequence serves as an alternate prerequisite for all college courses requiring MATH 112. Prerequisite: Placement into MATH-110 required

MATH 111 Calculus I with Review, Part 2 This course continues the study of calculus begun in MATH 110. Review of precalculus mathematics continues as needed. Prerequisite: Take MATH-110 All course prerequisites must be met with a minimum grade of C-.

MATH 112 Calculus I Differential calculus of single-variable functions: limits, derivatives, differentiation rules, related rates, optimization. An emphasis on problem solving using the tools of differential calculus with application to the natural and social sciences. Prerequisite: Math Placement Exam Required

MATH 113 Calculus II Integral calculus of single-variable functions: the fundamental theorem of calculus, techniques of integration, infinite sequences and series. An emphasis on problem solving using the tools of integral calculus with application to the natural and social sciences. Prerequisite: MATH-112 All course prerequisites must be met with a minimum grade of C-.

MATH 214 Calculus III Series, vectors in two and three dimensions, and integral and differential calculus of functions of several variables. Prerequisite: MATH-113 All course prerequisites must be met with a minimum grade of C-.

MATH 240 Linear Algebra and Vectors Study of vector spaces, matrices, determinants, linear transformations, systems of equations and eigenvalues. Prerequisite: MATH-113 All course prerequisites must be met with a minimum grade of C-.

MATH 250 Discrete Mathematics Introduction to formal structures and mathematical reasoning. Graphs, sets, logic, induction, structure of mathematical proof, counting, relations, and algebraic structures. Prerequisite: MATH-112 and one computer science course. All course prerequisites must be met with a minimum grade of C-.

MATH 260 Applied Statistics I Introduction to statistics including methods of data collection and description, correlation and regression, chance, and statistical inference. The course makes extensive use of technology and is designed for students in the behavioral, biological, and social sciences. Does not count towards the major or minor in mathematics. Not open to students who already have credit from MATH-261 Prerequisite: Not open to students who already have credit from MATH-261

MATH 261 Biostatistics Introduction to statistics with particular attention to applications in biology and health sciences. Topics include sampling methods, design of experiments, exploratory data analysis, estimation, tests of significance, ANOVA, and correlation and regression analysis. BIOL 112 and 123 highly recommended. Does not count towards the major or minor in mathematics. Not open to students who already have credit from MATH-260 Prerequisite: Not open to students who already have credit from MATH-260

MATH/PHYS 270 Nonlinear Dynamics and Chaos Dynamical systems are mathematical objects used to model phenomena of natural and social phenomena whose state changes over time. Nonlinear dynamical systems are able to show complicated temporal, spatial, and spatiotemporal behavior. They include oscillatory and chaotic behaviors and spatial structures including fractals. Students will learn the basic mathematical concepts and methods used to describe dynamical systems. Applications will cover many scientific disciplines, including physics, chemistry, biology, economics, and other social sciences. Appropriate for Math or Physics Majors. Either MATH 305 or this course, but not both, may be counted towards the major in mathematics.

MATH 280 Differential Equations and Numerical Methods Introduction to key concepts underlying analytical methods for the solution of ordinary differential equations and first-order systems studied together with techniques for constructing approximate numerical solutions. Prerequisite: MATH-214 and MATH-240 All course prerequisites must be met with a minimum grade of C-.

MATH/COMP 300 Automata, Formal Languages, and Computability Study of automata as mathematical models of computation; of formal languages, which play a central role in the specification and translation of programming languages; and of the fundamental capabilities and limitations of computers. Prerequisite: MATH-250 or MATH-330, and 1 COMP course All course prerequisites must be met with a minimum grade of C-.

MATH/IDSY 305/PHYS 482 Dynamic Models in Social Science The study of why mathematical and computational methods are important in understanding social phenomena, and how different social phenomena can be described by proper mathematical models. Specifically, applications of the theory of dynamical systems will be presented. Designed for math/science and social science students. Either MATH/PHYS 270 or this course, but not both, may be counted towards the major in mathematics. Prerequisite: MATH-113 All course prerequisites must be met with a minimum grade of C-.

MATH 310 Complex and Vector Variables Generalizations of differentiation and integration to spaces of higher dimension: divergence, curl, and the classical integration theorems of multivariable calculus. Introduction to analytic functions of a complex variable, including Laurent series, Cauchy's formula, and conformal mapping. Prerequisite: MATH-214 and MATH-240 All course prerequisites must be met with a minimum grade of C-.

MATH 316 Topics in Number Theory Study of classical number theory including distribution of primes, congruences, the Euler Phi function, and quadratic reciprocity. This course will also focus on developing proof writing skills. Prerequisite: MATH 214 and MATH 240

MATH 318 Topics in Topology An introduction to topological spaces including the study of connectedness, metric spaces, and compactness. This course will also focus on developing proof writing skills. Prerequisite: MATH-214 MATH-240; All course prerequisites must be met with a minimum grade of C-.

MATH 320 Real Analysis I Introduction to basic topological concepts in metric spaces followed by rigorous development of classical real analysis including sequences and series of functions, continuity, differentiability, and Riemann-Stieltjes integration. This course is among the most theoretical in our curriculum. Before enrolling, students are strongly encouraged to complete MATH 250, MATH 310, MATH 314, or MATH 318. Prerequisite: MATH-214 and MATH-240 All course prerequisites must be met with a minimum grade of C-.

MATH 330 Abstract Algebra I Study of modern abstract algebra including groups, rings, fields, and other algebraic structures together with advanced topics of linear algebra. This course is among the most theoretical in our curriculum. Before enrolling, students are strongly encouraged to complete MATH 250, MATH 310, MATH 314, or MATH 318. Prerequisite: MATH-214 and MATH-240 All course prerequisites must be met with a minimum grade of C-.

MATH 360 Applied Statistics II This course uses real data case studies to review descriptive statistics and to explore statistical inference for means, proportions, and transformations; analysis of variance; and regression. Statistical software is used throughout. The course is recommended both for students planning to do graduate coursework in the behavioral, biological, and social sciences and for mathematics majors seeking a comprehensive introduction to statistical methods. Prerequisite: 200-level math course. All course prerequisites must be met with a minimum grade of C-.

MATH 362 Probability Study of mathematical theory of probability. Topics include data analysis, discrete and continuous sample spaces, combinatorial problems, random variables, probability densities and distributions, expected value, moment-generating functions, functions of a random variable, sampling distributions, and the central limit theorem. Prerequisite: MATH-113 All course prerequisites must be met with a minimum grade of C-.

MATH 365 Mathematical Statistics Study of statistical inference. Topics include sampling theory, point and interval estimations, hypothesis testing, and regression. Stochastic processes, analysis of variance, simple experimental design, and nonparametric statistics may also be included. Prerequisite: MATH-362 All course prerequisites must be met with a minimum grade of C-.

MATH 420 Real Analysis II Continuation of MATH 320. Prerequisite: MATH-320 All course prerequisites must be met with a minimum grade of C-.

MATH 430 Abstract Algebra II Continuation of MATH 330. Prerequisite: MATH-330 All course prerequisites must be met with a minimum grade of C-.

MATH 440 Linear Algebra II Treatment of topics such as linear equations, orthogonal projections and least squares, pseudoinverses, eigenvalues and eigenvectors, diagonalization, canonical forms of linear transformations, positive definite matrices, the norm of a matrix, linear programming, and game theory. Prerequisite: MATH-240 All course prerequisites must be met with a minimum grade of C-.

MATH 450 Topics in Pure and Applied Mathematics Readings in pure and applied mathematics. Content varies from year to year. Possible topics include: set theory, number theory, geometry, topology. Prerequisite: 1 COMP course and MATH-250 or MATH-316 or MATH-330 All course prerequisites must be met with a minimum grade of C-.

MATH 490 Senior Seminar In this course we will explore some of the meta-themes of mathematics. In particular, we will examine how themes such as continuity and approximation are evident - or not - in various branches of mathematics. We will also reflect on such topics as the role of proof in mathematics versus the role of intuition, and what literacy in mathematics means.

MATH 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Music

Professors: Bothwell, Evans, Ludwa, Koehler (Chair), Moon, Schumaker

The music department seeks to cultivate an understanding of the language and history of music and to nurture artistic skill and musicianship. All music performance opportunities, both solo and ensemble, are available to majors and non-majors alike. Academic courses in music theory, music history, and practical musicianship combine with music performance to provide an integrated approach to the discipline.

The major or minor in music intensifies this integrated approach to create highly creative, analytical thinkers with self-discipline and independent organizational skills. They are welcomed by graduate schools and employers alike.

Requirements for the Major in Music

Number of Units

Eleven units are required in addition to the prerequisite. AP credit accepted to meet prerequisite only.

Required Courses

Prerequisite: MUSC 105 completed with a grade of C or above. This prerequisite may also be met by examination or an AP score of 4 or 5.

MUSC 130, 135, and 235 Music Theory Sequence

MUSC 150 and 155 Music History Sequence

MUSC 148 Music of World Cultures

MUSC 490 Senior Seminar

Electives

Four elective courses in the student's focus area (see "About Focus Area" for more information) selected from:

Ensembles (at least one of the four electives *must* be an ensemble; see "About Music Ensembles" for more information)

Applied Music (see "About Applied Music" for more information)

MUSC 161, 162, or 163 Instrumental Methods

MUSC 165 Jazz Explorations

MUSC 205 Music and Identity (Sophomore Seminar)

MUSC 207 Listening Across Cultures (Sophomore Seminar)

MUSC 260 Conducting

MUSC 300 Intellectual Flows of Black Music

MUSC 315 Sound and Culture in the Middle East

MUSC 320 Arts Entrepreneurship

MUSC 465 Music Education Seminar

Additional Expectations

In order to successfully complete the Music Major, students must also pass a comprehensive integrative exam (administered as part of the Senior Seminar), and demonstrate aural and basic keyboard proficiency (accomplished through labs attached to the three-course theory sequence). With permission of the department, limited transfer courses and coursework completed abroad may count towards the Major. Majors who plan advanced music studies in graduate school or who aspire to professional careers are strongly encouraged to complete their senior individualized project in the department. Majors are also encouraged to participate in an ensemble beyond their one required unit, and to study applied music in each quarter of residency. With few exceptions, a full unit of applied music credited toward the Major must be achieved by the study in the same instrument. Musical performances on campus should be attended by Music Majors, including concerts by invited guests, by Music Department Faculty, and by fellow music students.

About Focus Areas

Music Majors and Minors, in consultation with their advisors, are encouraged to choose electives that combine to form a focused approach to a musical sub-discipline, such as - but certainly not limited to - Education, Performance, Jazz, Musicology, or Composition/Theory. Where appropriate, taking cognates in other fields (Business courses for those interested in arts administration or Psychology courses for those interested in Education or Music Therapy, for example) can strengthen the experience of the Music Major.

In addition, Majors may consider incorporating three recommended programs available to all students at the College into their own musical K Plan:

1. The Career and Professional Development Cooperative Education & Internship Program.
2. Study Abroad: The University of Aberdeen in Scotland offers particularly robust opportunities for qualified students to continue actively making music while abroad. In addition, with sufficient advance consultation with music faculty and the CIP office, it may be possible to create opportunities to continue music at several other study abroad sites.
3. New York Arts Program: This domestic study away program offers an opportunity for qualified sophomore and junior student artists to live in New York City and work as interns with professional artists. The application process begins in late spring quarter for internships the following winter quarter. Information is available from campus faculty representative Andrew Koehler.

Requirements for the Minor in Music

Number of Units

A minimum of six units in addition to the prerequisite are required for the minor in music. AP credit accepted to meet prerequisite only.

Required Courses

Prerequisite: MUSC 105 completed with a grade of C or above. This prerequisite may also be met by examination or an AP score of 4 or 5.

At least one unit from MUSC 130, 135, or 235 Music Theory Sequence

At least one unit from MUSC 148 World Music, MUSC 150, or 155 Music History Sequence

Electives

Four elective courses in the student's focus area (See "About Focus Area" above for more information) selected from additional courses in the required list and/or:

Ensembles (See "About Music Ensembles" for more information)

Applied Music (See "About Applied Music" for more information)

MUSC 161, 162, or 163 Instrumental Methods

MUSC 165 Jazz Explorations

MUSC 205 Music and Identity (Sophomore Seminar)

MUSC 207 Listening Across Cultures (Sophomore Seminar)

MUSC 260 Conducting

MUSC 315 Sound and Culture in the Middle East

MUSC 320 Arts Entrepreneurship

MUSC 465 Music Education Seminar

Additional Expectations

With permission from the department, limited transfer courses and coursework completed abroad may count toward the Minor. Music Minors are encouraged to participate in an ensemble and to study applied music in each quarter of residency. With few exceptions, each full unit of applied music credited toward the Minor must be achieved by study in the same instrument. Musical performances on campus should be attended by Music Minors, including concerts by invited guests, by Music Department Faculty, and by fellow music students.

Music courses

MUSC 100 Program Music: Stories in Sound Program music is instrumental music influenced by an extra-musical source. In other words, the music contains a "program" or story. The program can be drawn from any source, but is usually taken from literature, myths, legends, landscapes, paintings, or personal dramas. Therefore, in addition to studying the music, this course will examine the extra-musical influences associated with the music. To further enhance your understanding and appreciation of this genre, you will produce four programmatic works of your own by creating multimedia presentations using music and images in support of an original story or borrowed program. No prior training or experience in music is assumed or necessary, and the course is intended for non-majors. The cultivation of intelligent and perceptive responses to programmatic music will be the primary focus as we explore the many aspects of this genre, be they cultural, mechanical, or expressive.

MUSC 105 Introduction to Music Study of the language, power, and communicative properties of music in the Western tradition. Students will acquire basic skills in music literacy, theory, and aural comprehension. In addition, selected works, both popular and classical and ranging in time from the Middle Ages to the present, will be listened to and discussed with an emphasis on their musical style and cultural-social context. Class activities will include guest performances, concert attendance (on and off campus), and behind-the-scenes looks at what goes into making music. Students considering a major in Music should enroll in MUSC 105 in the winter quarter of their first year. No prior music reading or basic theory knowledge is expected. Advanced students may request to test out of MUSC-105; please consult the Department Chair.

MUSC 130 Western Music Theory and Analysis I Building upon the skills acquired in MUSC 105, students use two voice counterpoint as a gateway to fluency in writing complete four-part phrases in tonal harmony. They will discover how these principles of voice-leading and harmonic grammar form the foundation of historic and contemporary musical styles. Aural comprehension skills are acquired from the concurrent lab for the course. Prerequisite: MUSC-105 or permission

MUSC 135 Western Music Theory and Analysis II Building upon the skills acquired in MUSC 130, students will study techniques of modulation, as well as expressive and coloristic devices leading to late 19th century chromaticism, leading into 20th century practices. These elements will be part of further study of popular and art song form, theme and variations, rondo and sonata. Class meetings will include both lecture and workshops. Coordinated aural comprehension skills are acquired from the concurrent lab for this course. Prerequisite: MUSC-130 or permission

MUSC 148 Music of World Cultures Study of music of various cultures within their social contexts. The course includes folk, traditional, classical, and popular music from selected traditions in Africa, India, Asia, Europe, and the Americas. It presents music as an evolving process and the performance of music as an expression of individual and cultural identity. Using readings, discussions, guest lectures and performances, CDs, and films, the course provides a framework for comparison of musical cultures from different parts of the world. No music reading or basic theory knowledge required.

MUSC 150 Western Music Before 1750 Study of the developments in musical style from the Middle Ages through the Baroque including sacred and secular music of Italy, Germany, France, England, and the Netherlands. Representative works from all topics will be presented in their stylistic and cultural contexts. Prerequisite: Music reading and basic theory knowledge is expected

MUSC 155 Western Art Music After 1750 A historical and textual survey of the music produced during the Classical, Romantic and Modern eras. Representative works - among the topics considered will be Lied, Opera, Symphony, Programmatic Music, Atonal and Serial Music - will be presented in their stylistic and cultural contexts. Prerequisite: Music reading and basic theory knowledge is expected

MUSC 161 Beginning Band Methods: Brass Basic techniques of playing orchestra and band instruments; emphasis on understanding the principles and problems of playing brass. No music reading or basic theory knowledge is required.

MUSC 162 Beginning Band Methods: Woodwinds Basic techniques of playing orchestra and band instruments; emphasis on understanding the principles and problems of playing woodwinds. No music reading or basic theory knowledge is required.

MUSC 163 Instrumental Music Methods: Strings Basic techniques of playing the four orchestral stringed instruments. No music reading or basic theory knowledge is required.

MUSC 165 Jazz: A Creative and Cultural Exploration This course is intended to introduce students to the cultural context, instrumentation, theory, form, and analysis of jazz from its early West African roots to contemporary times. Emphasis will be placed on listening to various artists and styles. No music reading or basic theory knowledge is required.

MUSC 205/SEMN 256 Music and Identity Music serves multiple roles: a force for social transformation, a flag of resistance, a proclamation of cultural identity, a catalyst for expressing emotion, an avenue to experiencing the sacred. Students will look at identity through the lens of contemporary and traditional American music and will consider how race, ethnicity, age, gender, national identity, and other factors express themselves in and are shaped by music. The ability to read music or understand basic music theory is not required; a love of music and an interest in American culture are essential. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores only

MUSC 207/SEMN 210 Listening Across Cultures What does it mean to be a knowledgeable music listener? An expert listener? A native listener? Hip hop has its "heads," French opera has claqueurs, and Syrian tarab has the samm'i'a (expert listeners), but is the act of listening the same across cultures, or is there something to the local perception of music that goes beyond style and genre? Questioning the adage that "Music is the universal language," this course will examine how people assign meaning and power to music. Analyzing music from around the world, we will attune our ears to the ways in which people across cultural borders conceptualize music, sound and the act of listening. No music reading or basic theory knowledge is required. Prerequisite: Sophomores Only

MUSC 235 Music Theory & Analysis III Building upon the skills acquired in MUSC135, students will refine their facility with the extended tonal harmony of the late-19th and early 20th centuries through analysis and model composition in multiple styles, including jazz and popular music. Students will also explore post-tonal and non-common practice repertoires (including serialism, process music, spectralism, indeterminacy, electroacoustic music, rock and pop) through set theory and extended harmonic methods as well as analytic paradigms centered on rhythm and timbre. Coordinated aural comprehension skills are acquired from the concurrent lab for this course. Prerequisite: MUSC-135

MUSC 260 Conducting A study of the general rudiments of ensemble conducting through an emphasis on the orchestral literature. After an introduction to critical score-reading concepts (analysis skills, transposition, special terms, historical background), the remainder of the course is dedicated to practical application, with students receiving weekly podium time in front of a small laboratory ensemble. Offered spring quarter, even years. Prerequisite: MUSC-105 or permission

MUSC 295 Social Transformation Through US Arts How have the arts stimulated and informed social transformation in America over the last 100 years? This interdisciplinary course will involve a brief period of individual research and discussion of student findings which forms the basis for an original performance-art piece incorporating spoken word, song, dance, and/or visual art to tell this story through an engaging final performance at the Arcus Center, a local high school, and a local non-profit targeting underserved populations who might benefit from the performance. Designed to accommodate students who enjoy creative activity in a variety of disciplines.

MUSC 310 Intellectual Flows of Black Music This seminar-style course explores the histories of black music in the US and the broader African diaspora through the lense of music-making as intellectual practice. We will examine the work of black musicians, critics, and scholars as both aesthetic statements and attempts to illuminate, interrogate, and advance the philosophical, artistic and social issues of particular moments in history, and ultimately as ways of creating new possibilities for social and musical life. Ranging across genres, topics covered will include the African origins of American popular music, improvisation and experimentalism, music and faith, Afrofuturism, nationalism, sexuality and gender politics, blackface and 'blacksound', and issues of appropriation, ownership, and value. Offered fall quarter, even years. Prerequisite: Any 100-level Music course (excluding MUSC 161, 162, and 163) or Instructor Permission

MUSC/ANSO 315 Sound & Culture in the Middle East An introduction to the popular culture and cultural politics of the modern Middle East, as heard through the medium of sound. Exploring the varied soundscapes and musical cultures of the region, we will examine how sound shapes, reinforces, critiques, and transforms social life, from the local to the international level. Listening to music as both an aesthetic object and a site for the contestation of ideas, we will learn about the ways in which music is used to articulate an array of competing visions: of the nation, colony and post-colony; religion, gender, and sexuality; globalization, hybridity, and modernity. Prerequisite: MUSC-105, ANSO-103 or Instructor Permission

MUSC 320 Arts Entrepreneurship A look at the relationship between art, artists, presenters, audience, and funding in the 21st Century. Explore themes of entrepreneurship through case studies of successful artistic ventures and investigate the lessons learned from failed arts organizations. This course will be centered around the discussions of what it means to be an artist in the 21st century, what will engage future audiences, and how students with art degrees will pursue viable careers in the arts. Concepts studied will include but not be limited to: networking, non-profit leadership, organizational structure, non-linear career paths, fundraising, and audience engagement.

MUSC 465 Music Education Seminar An examination of the philosophy, methods, and materials for teaching instrumental, vocal, and general music, K-12. The course is designed to prepare students for successful careers in music education. Topics include rehearsal techniques, budgeting time and money, classroom methods and management, developing and maintaining an inventory, recruitment strategies, library acquisition and management, and networking skills. As part of the course of study, each student will be assigned to a large ensemble to serve as an assistant to the director. Each student will also engage in off-campus classroom observation. Offered by request. Prerequisite: MUSC-105 or permission; junior or senior standing.

MUSC 490 Senior Seminar Upper-division course whose objective is to encourage integration and discovery of relationships between such areas as academics, performance, career development, the SIP, and careers in music. Research and analysis skills will be connected to contemporary issues in musical life, themes in music history, and alternative perspectives in style analysis. Prerequisite: MUSC-148, MUSC-150, MUSC-155, AND MUSC-235; junior or senior standing

MUSC 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

About Music Ensembles

All students at Kalamazoo College may participate in ensembles. Generally meeting twice a week for periods of an hour and a half, ensembles should not conflict with the regular course schedule. A student may earn up to 5 full units in music ensembles and applied music (See "About Applied Music") combined toward graduation; as many as three of those may be applied to the Major or Minor, and at least one unit of ensemble credit is required for the Major.

Music Ensembles

MUSC 200A College Singers The largest choral organization on campus emphasizing diverse repertoire and varied performance experiences, including a major performance each quarter. Prerequisite: Vocal evaluation

MUSC 200C Bach Festival Chorus Participation in the annual College Festival in conjunction with the Kalamazoo community. Prerequisite: Audition

MUSC 200D Symphonic Band Emphasizing a variety of music for brass, woodwinds, and percussion; ability to play a band instrument required. Previous band experience expected.

MUSC 200F International Percussion Ensemble Performance and study of International percussion traditions from around the world. Students may choose to participate in West African drumming or Japanese Taiko. One college concert is presented each quarter.

MUSC 200G Jazz Band Performance of standard and contemporary jazz arrangements for band and/or small combo; music reading required, but no previous improvisational or jazz band experience needed. Prerequisite: Audition

MUSC 200H Kalamazoo Philharmonia A full symphonic orchestra that rehearses once weekly and performs at least one full program each quarter. Philharmonia members include community members and professional leaders in addition to students. Registered students also are required to participate in additional sectional rehearsals. Proficient string, wind, brass, and percussion players are invited to audition; previous experience is preferred. Prerequisite: Audition

MUSC 200I Improvisation Workshop For the inquisitive musician who desires to learn the why and how of jazz improvisation, theory, and composition, juxtaposed with intimate jazz ensemble playing with emphasis on improvisation.

MUSC 200K Pit Orchestra Offered during quarters in which the Theatre Department presents a musical.

MUSC 200L Bayati Middle Eastern Ensemble The Bayati Ensemble is a joint student-community chamber orchestra that performs a range of musical styles from Arabic, Kurdish, Turkish, and related traditions. Some proficiency on an instrument/voice is assumed, but no audition is required.

About Applied Music

Professional performers and teachers from the community join with the regular faculty of Kalamazoo College to teach individual lessons for a wide range of instruments and voice. These courses are open to all students, regardless of level, and each accrues 1/5 unit per quarter of participation. A student may earn up to 5 full units in music ensembles (see "About Music Ensembles") and applied music combined toward graduation; as many as three of those may be applied to the Major or Minor. With few exceptions, each full unit of applied music credit toward the Major or Minor must be achieved by study in the same instrument.

At the end of each quarter, every student taking applied music must play a hearing before a group of music faculty members. Attendance at two performance area classes and the applied music recital each quarter is also required of students enrolled in applied music.

Upon the recommendation of the instructor, very advanced students may present a department-sponsored recital.

An extra fee is charged for applied music instruction. Please see the section of the catalog entitled "Policies: Expenses, Refund Policies, Fees" for more information.

Applied Music courses

MUSC 201 Chamber Music Instrumental and/or vocal ensembles arranged with the music faculty. Offered by request.

MUSC 210 Group Guitar Fundamentals

MUSC 213 Group Music Production Fundamentals

MUSC 214 Music Production Prerequisite: MUSC-213 or MUSC-214 or Permission

MUSC 221 Composition

MUSC 221J Jazz Arranging and Composition

MUSC 222 Piano

MUSC 222J Jazz Piano

MUSC 223 Collaborative Piano

MUSC 224 Harp

MUSC 225 Organ

MUSC 230 Voice

MUSC 230J Jazz Voice

MUSC 240 Viola

MUSC 240A Violin

MUSC 241 Cello

MUSC 242 String Bass

MUSC 242J Jazz Bass

MUSC 243 Guitar

MUSC 243J Jazz Guitar

MUSC 250 Clarinet

MUSC 252 Flute

MUSC 253 Oboe

MUSC 254 Bassoon

MUSC 255 Saxophone

MUSC 261 Advanced Conducting Prerequisite: MUSC-260

MUSC 270 Trumpet

MUSC 271 Trombone

MUSC 272 French Horn

MUSC 273 Tuba

MUSC 274 Euphonium

MUSC 280 Percussion

MUSC 281 Mallet Percussion

Neuroscience

Professors: Batsell, Érdi, Moore (co-directors)

Neuroscience, an academic discipline concerned with investigation of nervous system structure and function, has been a cornerstone of biology since the turn of the 20th century. Modern biological examination of the brain and behavior of organisms has incorporated other fields of inquiry, namely biochemistry, psychology, physics, mathematics, computational modeling, and philosophy, making neuroscience a truly interdisciplinary effort. A concentration in neuroscience is offered for advanced students who want to study at the confluence of these traditional disciplines.

The Concentration in Neuroscience

Number of Units

Nine

Required Courses

BIOL 246 Cell and Molecular Biology with Lab*
BIOL 350 Neurobiology with Lab
PSYC 101 General Psychology
PSYC 226 Physiological Psychology
PHYS 215 Introduction to Complex Systems
COMP/PSYC 265 Cognitive Science

Any three from the following list:

BIOL 484 Topics in Biology: Neurodegenerative Disorders
COMP/PSYC 415 Computational Neuroscience
PSYC 280 Cognition
PSYC 420 Learning
PHIL 107 Logic and Reasoning
PHIL 308 Metaphysics and Mind
COMP 480 Special Topics: TBA
PHYS 210 Nuclear and Medical Physics

Up to two of the three additional course units may be fulfilled by transfer credit from the Budapest Semester in Cognitive Science.

Concentrators in neuroscience must pass the 9 units with a C- or better. Note that courses taken for fulfillment of major requirements may "double count" towards the concentration (for example, BIOL 246 can "double count" for the biology major AND the neuroscience concentration).

* *BIOL 246 may be taken with special instructor permission or by successful completion of course prerequisites.*

Philosophy

Professors: Latiolais (Chair), Cherem, Ahern

What is Philosophy?

Philosophy is a historically evolving, self-reflective inquiry into the fundamental questions that humans confront in making sense of their lives. It examines essential features of the human condition—e.g., morality, knowledge, nature, society, happiness, justice, beauty, selfhood, and friendship – all in the search for knowledge that both preserves and transforms enduring dimensions of human self-understanding. Philosophy emerges in the Western tradition as a rational, systematic, and self-critical inquiry committed to grounding its own claim to knowledge. Contemporary philosophy continues to examine the fundamental principles that guide our thought and action, our pursuit of knowledge, and our desire to live well. Because philosophy adopts a radically self-critical orientation to its own historical formation, philosophers often disagree profoundly about what philosophy is and how it differs from other disciplines. Such disagreements – openly, critically, and vigorously deliberated – are vital to the type of radical questioning that characterizes philosophy.

Philosophy challenges students to (1) reflect upon naively lived patterns of thought, action, speech, and perception; (2) identify how practices, institutions, and perceptions are shaped by philosophical traditions; (3) critically examine and assess the fundamental assumptions that inform such human enterprises; and (4) conduct this inquiry in the spirit of open critical communication committed to mutual understanding and respect for difference. Students learn the basic skills of identifying and analyzing arguments, and the department actively fosters an environment committed to the vigorous, respectful exchange of ideas to protect both commonalities and differences. Philosophy also cultivates ethical responsibility by balancing (1) the articulation, justification, and application of normative principles with (2) the deepening of moral imagination and sensibility.

Curriculum

The department offers eight "History and Traditions" courses that represent important periods and traditions of Western philosophy:

- History and Traditions Courses
 - Ancient Philosophy
 - Early Modern Philosophy
 - 18th-Century Philosophy
 - 19th-Century Philosophy
 - Existentialism and Film
 - Analytic Philosophy and Science
 - Critical Social Theory: The Dialectic of Enlightenment
 - Postmodern Critical Theory: The Critique of Modernity.

These historical courses reconstruct the debates, issues, concerns, questions, and concepts that define a historical period from within. They also offer linkages among historical periods, allowing students to appreciate the larger, "paradigmatic" shifts in Western philosophy. Students gain an awareness of how canonical philosophers characteristically address their own historical precedents and shape their views in critical dialogue with predecessors. Students are required to engage in close textual interpretation and careful critical evaluation of original texts. Instructors identify contemporary advocates for, or illustrations of, traditional schools of thought and, in this way, underscore the real historical effects of philosophical creativity. Students write detailed, textually supported expository and argumentative essays that are graded for their balance between interpretive charity and critical acuity. Emphasis is placed upon cultivating a student's ability to first reconstruct the historical debates among canonical philosophers and to then critically evaluate their bearing upon contemporary concerns. Many of the Philosophy Department's history courses have interdisciplinary units of instruction that link historical debates to contemporary research programs within the natural and social sciences and to interpretive approaches in the Humanities.

The department also offers courses in the classic subfields of philosophy: logic, ethics, metaphysics, and aesthetics. These courses explicate the fundamental conceptual tools we need to systematically address particular types of contemporary issues:

How do we know? (*Theories of Knowledge*)
What ought we to do? (*Ethics*)
What is beauty? (*Philosophy of Art*)
What is good reasoning? (*Logic and Reasoning*)
What is being and what is it to be human? (*Metaphysics and Mind*)

In these courses, students are asked to identify, reflect upon, and exercise the key concepts, theories, and viewpoints that allow us to competently address ethical, epistemological, logical, metaphysical, and aesthetic issues. Subfield courses cultivate a student's ability to systematically, self-consciously, and flexibly manage a repertoire of conceptual tools to discern, analyze, and deliberate about contemporary problems. By gaining a sensitivity for different ways of perceiving and thinking about a single issue, students develop an appreciation for the complexity of actual problem solving.

The department also offers specialized subfield courses under the following three categories:

- Applied Ethics (*Ecological Philosophy, Biomedical Ethics, Philosophy of Law*)
- Applied Epistemology (*Philosophy of Science and Philosophy of the Social Sciences*)
- Linguistics (*Philosophy of Language*)
- Political Theory (*Classical and Contemporary Social Contract Theory, Human Rights and International Law, Theorizing Citizenship and Immigration*)

In these courses, emphasis is placed upon genuine problem solving in contemporary circumstances. The applied ethics courses introduce students to the systematic analysis of contemporary problems encountered in jurisprudence, political legitimation, healthcare practices, and environmental stewardship. Students learn to unravel the factual, conceptual, and normative threads interwoven in current crises. They also develop the ability to reflectively manage different theoretical perspectives upon a single, multifaceted problem. The applied epistemology courses examine fundamental questions concerning the logic and practices of the natural and social sciences. The philosophical linguistics courses analyze language competencies (semantics and pragmatics) and literary discourse (narratology).

Outcomes

The philosophy program is committed to five overarching outcomes for students in our classes and in our major:

1. Knowledge: Gain appropriate breadth and depth of knowledge of the major traditions, figures, issues, and theories studied.
2. Skills:
 1. Write in a style appropriate to scholarly philosophy;
 2. Think clearly, rigorously, and logically about conflicting philosophical points of view;
 3. Engage in open, critical, cooperative discussion and interrogation;
 4. Cultivate philosophical impulses and insights and reflectively employ philosophical techniques;
 5. Comprehend, accurately represent, and originally construct arguments in the philosophical style;
 6. Conduct independent philosophical research;
 7. Present independent research in a professional setting.
3. Integration:
 1. Connect philosophical learning to other learning abilities, career goals, daily life, and roles in the world;
 2. Deepen a shared commitment to critical self-reflection as a fundamental dimension of living well.
4. Preparation:
 1. Thrive in selected post-graduate studies;
 2. Address vocational challenges by mobilizing critical thinking, writing, and verbal skills;
 3. Confront personal challenges with an awareness of philosophical resources.
5. Attitude: Gain a "philosophical sense" of curiosity, a willingness to engage in "meta-level" thinking, a determination to understand complex issues, and a cooperative and constructive spirit in critical deliberation with others.

Preparation

Philosophy is a sound choice for those seeking a broad liberal arts undergraduate education and for those who value the skills and outlook imparted by studying the discipline. The major program prepares students for graduate studies in philosophy, law, social policy, and political theory, to name just a few areas of formal specialization. Students preparing for graduate studies in philosophy are strongly advised to follow a more structured majors program with additional course recommendations.

Transfer and Study Abroad Credit

The Philosophy Department's transfer policies are as follows. All transfer courses in Philosophy must be approved by the Philosophy faculty upon consideration of a course catalog description and a syllabus for the course (to be provided by the student). If the course is taken during a student's enrollment at Kalamazoo College (for instance, on study abroad or during the summer), the approval must be obtained before the course is taken. In addition, the Department will consider only courses taught by instructors with a Ph.D. in Philosophy, or who are "ABD" (all but dissertation) in Philosophy.

Requirements for the Major in Philosophy

Number of Units

Minimum of 8 total units are required, which may include the SIP.

- **Required Individual Courses**
 - PHIL 107 Logic and Reasoning
 - PHIL 208 19th-Century Philosophy
 - PHIL 490 Philosophy Seminar

• **2 Required History and Traditions Courses from the following list:**

- PHIL 109 Existentialism and Film
- PHIL 205 Ancient Philosophy
- PHIL 206 Early Modern Philosophy
- PHIL 207 18th-Century Philosophy
- PHIL 218 Analytic Philosophy & Science
- PHIL 310 Critical Social Theory: The Dialectic of Enlightenment
- PHIL 311 Postmodern Critical Theory

Majors Preparing for Graduate Studies in Philosophy are Strongly Recommended to pursue the following programs

Number of Units

Minimum of 10 total units are recommended, which may include the SIP.

• **Required Courses**

- PHIL 107 Logic and Reasoning
- PHIL 208 19th Century Philosophy
- PHIL 490 Philosophy Seminar

• **4 History & Traditions Courses chosen in close consultation with the department:**

- PHIL 109 Existentialism and Film
- PHIL 205 Ancient Philosophy
- PHIL 206 Early Modern Philosophy
- PHIL 207 18th-Century Philosophy
- PHIL 218 Analytic Philosophy & Science
- PHIL 310 Critical Social Theory: The Dialectic of Enlightenment
- PHIL 311 Postmodern Critical Theory: The Critique of Modernity

Requirements for the Minor in Philosophy

Number of Units

Six units are required.

Required Courses

- PHIL 208 19th-Century Philosophy
- Two History & Traditions courses (See list under Required Courses for the Major in Philosophy)
- Three electives chosen in consultation with the department. We also recommend either supervisory or advisory involvement with the SIP.

A SIP in Philosophy does not count toward minor requirements.

Philosophy courses

PHIL 105 Ethics Ethics is a sub-field of philosophy with rather lofty goals. Among its objects of study, it investigates what is valuable, what people have practical reason to do, and what is right and wrong. This course is only an introduction to part of this rich subfield: normative ethics. At the end we may have time for a small taste of applied ethics. We start by engaging with standard attempts to question ethics (amoral-ism, relativism, egoism, etc). We then survey the main ethical frameworks: virtue ethics, utilitarianism and deontology. We will read a variety of classical texts in these traditions as well as some more contemporary authors. The course is designed to demonstrate why ethics matters, to expose students to a variety of ethical frameworks and to equip them with the conceptual resources to think critically about each framework.

PHIL 107 Logic and Reasoning An introduction to methods for evaluating the validity and strength of reasoning. The course will investigate (1) the theory and practice of constructing and analyzing arguments as they occur in ordinary, informal contexts (reasoning), and (2) the concepts and techniques of elementary formal logic: the art of symbolizing English-language statements and arguments in terms of formalized languages and applying logical principles to them. Topics explored include informal fallacies, critical thinking, evaluating evidence, deciding between hypotheses, propositional logic, natural deduction, and predicate logic. Recommended for computer science, psychology, and pre-law students.

PHIL 108 Ecological Philosophy This course investigates the question of our understanding of, and ethical responsibility to, animals, plants, microorganisms, non-living beings, ecosystems, and "nature" as a whole. The first part of the course critically assesses whether traditional ethical theories adequately capture our ethical responsibilities to the environment. The second part surveys traditional Western conceptualizations of nature, reason, body, and space, which ecologists severely criticize as detrimental to developing an ecological ethic. Special emphasis will be placed upon developing a philosophical conception of life (bios) that is appropriate for both evolutionary biology and the development of a normative theory of environmental care. Contemporary positions such as anthropocentrism, deep ecology, radical ecology, ecofeminism, and social environmentalism will be studied. Recommended for environmental studies and biology students.

PHIL 109 Existentialism and Film Survey of key existentialist thinkers, such as Kierkegaard, Nietzsche, Heidegger, De Beauvoir, Merleau-Ponty, and Sartre, with a special emphasis upon their radical ideals of freedom and self-responsibility. Films are shown as depictions of existentialist themes, such as alienation, authenticity, bad faith, despair, passion, anonymity, and anguish. Existentialists oppose traditional, "essentialist," "teleological," and "cognitivist" conceptions of human life, and they reject the hierarchical dualities of reason/will, knowledge/choice, mind/body, thought/being. Special emphasis will be placed upon the existentialist analysis of interpersonal relations in contemporary circumstances. Students are required to see seven films in addition to regularly scheduled classes. Discussion-based course with two writing assignments. Recommended for psychology, media studies, and literature students.

PHIL 195 Philosophical Explorations of Happiness What is happiness? What would it mean to live happily? Are there some conditions in which happiness can be realized and others in which it would be restricted? The question of what happiness entails, and what are the ways and conditions in which human beings can experience happiness has been a persistent concern of philosophers since antiquity to the present day. In this class, we will look to a variety of ways that Western thinkers have responded to both the question of what happiness is and what it would mean to live happily. We will also examine the way in which our happiness could be tied to both the nature of our desires and the freedom that we may have to realize happiness.

PHIL 195 Knowledge & Reality: An Introduction How much do you really know? Do you know that you are not dreaming right now? Do you know that an intelligent evil spirit is not deceiving you right now? Do you know that your senses are not deceiving you right now as they have so many times in the past? Do you know that a world separate from you even exists? How about God; do you know that God exists? Come to think of it, do you even know that you exist? And even if you do exist, can you make free choices? Can you freely decide to take this class, or it already predetermined? Readings will include classics from such philosophers as Plato, Aristotle, Rene Descartes, John Locke, David Hume, and Immanuel Kant, as well as more contemporary works from such philosophers as Bertrand Russell, W. V. O. Quine, Susan Wolf, John Searle, and Jennifer Lackey.

PHIL/CLAS 205 Ancient Philosophy A study of ancient views on nature, knowledge, soul, the self, morality, and the good life. This is a history of philosophy course rather than a history course; we will be studying the ideas, arguments, and theories put forth by ancient philosophers, rather than biographical, cultural, anthropological, or historical issues about them or their time period. We will largely be trying to understand what these thinkers were trying to say, and why they thought what they did. In addition, we will be discussing the merits of the various positions and reasons offered. Readings will focus on selections from Plato and Aristotle, but will also include readings from the pre-Socratic and Hellenistic philosophers, all major sources of the Western philosophical tradition. Recommended for classics students. . (This is a designated Greek literature or culture course in Classics.)

PHIL 206 Early Modern Philosophy Historical study of the "Early Modern" period in Western philosophy (17th and 18th century). The course will explore the profoundly influential development of rationalist and empiricist approaches to philosophical thinking; topics may include the connection between mind and body, skepticism and the possibility of knowledge, the existence of God, knowledge of the external world, the nature of minds and their ideas, and the proper method of philosophical method. Readings from Descartes, Leibniz, Berkeley, Locke, Hume, and others. Recommended for computer science and psychology students. Sophomore standing recommended.

PHIL 207 18th-Century Philosophy Study of the Enlightenment period through a critical comparison of two of its most famous 18th-century philosophers -- David Hume and Immanuel Kant -- who set the stage for contemporary debates in psychology, cognitive science, and artificial intelligence. Hume proposed to study humans just as Sir Isaac Newton had proposed to study nature: namely, through observation and experimentation. We will study Hume's *A Treatise of Human Nature* as a manifesto for the modern, naturalistic study of human experience and judgment. We will then study Kant's powerful arguments against Hume, examining in close detail Kant's *Critique of Pure Reason*, his demonstration that humans actively synthesize sensory data according to rules that they "spontaneously" impose to make experience possible. The film *Memento*, literary narratives, and studies of Alzheimer patients are used to illustrate the logical and temporal construction of human experience. A reading-intensive course with three essay assignments. Recommended for psychology, computer science, and English students.

PHIL 208 19th-Century Philosophy This course examines how 19th-century European philosophers inherit and develop Kant's radical claims that (1) human agents are radically free, (2) knowledge is constructed, and (3) hope in moral progress is rational. We will examine how Fichte, Schiller, Hegel, Marx, Kierkegaard, and Nietzsche work out how humans could really be "free," "autonomous," or "self-determining" while remaining natural animals and socially-situated subjects. Films such as *Memento*, *American Beauty*, *Waterland*, *Babette's Feast*, *The Hairdresser's Husband*, and *Sex, Lies, and Videotape* are shown. Lecture and discussion course with three paper assignments. First-year students with strong writing skills welcome. Recommended for psychology, English, and political science students.

PHIL 209/SEM 212 Philosophy of Science A philosophical examination of scientific methods and reasoning. Topics may include the analysis of explanation, the nature of scientific truth, instrumentalist and realist interpretations of science, confirmation and falsification, observational and theoretical terms, inter-theoretic reduction, the relation among various sciences, scientific revolutions, and the possibility of scientific progress. Recommended for science majors. Sophomore standing recommended.

PHIL 210 Classical & Contemporary Social Contract Theory The social contract tradition is a foundational pillar of modern political philosophy. Authors in this tradition hold that life without any government (the hypothetical "state of nature") would be so problematic that it motivates people to set up a "contract" of sorts with one another that institutes a system of government. This account of the move from the state of nature to government supposedly explains why we have an obligation to obey existing governments. According to this tradition government and laws of some kind are prerequisites to any minimally just society. This is how the tradition differs from philosophical anarchism (another class). Although the social contract tradition is an overarching framework authors within it have very different views on topics such as just and unjust systems of government, consent to governance, the sources and limits of political obligation, property rights and the supposed "right to revolt". We will study this tradition by reading excerpts from Hobbes, Locke, Rousseau, and Kant. We end the course by reading a few contemporary authors who critique the social contract tradition based on what it neglected to account for in terms of gender and race, and how this impacts the notion of consent to governance.

PHIL 211 Philosophy of Law Historical examination of the two opposing paradigms in the study of legal systems: namely, factual ("positivist") and normative ("natural law") models of law. Selected topics may include (1) the relation between law and morality, (2) the nature of legitimation and authority; (3) the nature of juridical interpretation and legal reasoning; (4) the role of the legal system within ethical traditions, market forces, and political institutions; and (5) the Critical Legal Studies challenge to liberal jurisprudence. Readings from Aquinas, Austin, Holmes, Hart, Fuller, Dworkin, Scalia, Unger, Raz, MacKinnon, and Habermas. Seminar format with an emphasis upon discussion and structured debate. Suggested for pre-law and political science students.

PHIL 214 Philosophy of Art This course introduces students to a variety of traditional and contemporary philosophical theories of art: namely, Platonic, Aristotelian, rationalist, empiricist, idealist, Marxist, phenomenological, hermeneutic, existentialist, feminist, psychoanalytic, semiotic, deconstructivist, and more contemporary "postmodernist" aesthetics theories. Such theoretical positions inform, but are also tested by, critical and interpretive articles about particular artworks: for example, painting, sculpture, film, architecture, and handcraft. We will focus our attention upon the visual arts -- as opposed to literary, musical, theatrical and the dance media. Students will gain an appreciation of the difficulties philosophers have encountered in framing a theory of "aesthetic perception" and, more importantly, of the remarkable variety of visual art forms.

PHIL/SEM 215 Human Rights & International Law People often invoke human rights and international law in the course of debate. However, these are highly contested concepts. This course introduces some theoretical clarity with respect to their conceptual grounding, history and contemporary practice. Our primary focus will be on different philosophical theories of human rights, with secondary attention to international human rights law. We start with an orientation on human rights practice and try to move past some of the so-called "challenges" to human rights. This is followed by a look at the main contemporary approaches for conceptualizing human rights: the basic human-interest approach, the capabilities approach and the newer "political" approach (among others). We will spend a few weeks on various debates within the human rights literature as well: Whether there is such a thing as "group rights", whether and how there is a distinction between civil and political human rights on the one hand versus social and economic human rights on the other, when human rights violations might trigger external, international intervention, etc. Prerequisite: Sophomores Only

PHIL 218 Analytic Philosophy & Science Historical introduction to analytic philosophers who studied the foundations of logic, mathematics, science, and linguistics as a critique of traditional philosophy. Recommended for students of the natural sciences, mathematics, cognitive science, and neuroscience interested in the analysis of scientific change and revolution. We examine (1) Frege and Russell's development of formal logic and the foundations of mathematics, (2) Wittgenstein, the Vienna Circle, and logical positivism, (3) ordinary language philosophy, (4) Quine's and Putnam's destruction of logical positivism and the "analytic" conception of language, and (5) formal developments such as Goedel's incompleteness theorem, Tarski's truth schema, Chomsky's generative grammar, modal logic, and direct-reference theories of meaning.

PHIL 291 Theorizing Citizenship & Immigration This course examines normative questions raised by citizenship and immigration. The first part of the course surveys different models for political community and how they affect the way we view formal membership status in such communities. We will cover the main philosophical theories for how the ideal of citizenship ought to be conceived. The second part of the course covers refugees: How are they different from immigrants? What special claims do they have? How might recognizing these claims affect the resources and attention nations should give to immigrants? The third part of the course covers more standard cases of immigration. We will cover key philosophical arguments that advocate either more or less restrictive immigration policies: arguments about the acceptable criteria that may be used in deciding who to admit, regarding how much weight the preservation of "national culture" should hold (and who decides what that is, anyhow?), about the moral (un)desirability and (im)practicability of open borders, on whether and to what extent receiving nations should seek to mitigate the "brain-drain" from sending nations, and finally arguments about the priority immigration reform should take vis-à-vis other reforms of issues that might "cause" mass migration (global poverty, weak international institutions, repressive, incompetent or exploited/exploitative governments abroad, etc.).

PHIL 295 Special Topics Special Topics offerings focus upon topics not addressed in the department's regular offerings. The course can be repeated with a different topic. Check the course schedule to see when Special Topics courses are being offered.

PHIL 295 History and Freedom Critical examination of ancient, modern, and contemporary conceptualizations of human history in connection with the theme of human freedom. Special emphasis is given to the contrast between dualistic conceptions of history, both theological and philosophical, and materialist conceptions of history that link the unfolding of time with the advent of human freedom. Readings from St. Augustine, Kant, Hegel, Marx, Nietzsche, Adorno, and Benjamin. We conclude with reflections upon contemporary emancipatory movements and their varying conceptualizations of how freedom might redeem, not only the future generations, but past ones as well.

PHIL 305 Biomedical Ethics This course focuses on a variety of ethical issues brought about by modern medical technology and practice. We start by surveying the normative frameworks used by contemporary medical ethicists, paying particular emphasis to the main principles of medical ethics and the special nature of the relationship between doctors and patients. We then apply the principles of medical ethics and our insights about the doctor-patient relationship to controversial contemporary issues such as abortion, physician assisted death/suicide, euthanasia, the limits of doctor-patient confidentiality, the determination of organ transplant recipients, the determination of patient competence, and surrogacy contracts (among other issues). The class will often use short narrative case studies and longer court cases in order to highlight the complex nature of these issues. The course aims to emphasize that these issues are controversial precisely because very good arguments can often be made on either side, and to give students the analytical and evaluative frameworks to make judgments on their own. Readings will include contemporary philosophical articles, court decisions, statements by medical and governmental organizations, and textbook material on ethical theories and tools. Suggested for health sciences students and recommended for science students. No prerequisites, but junior- or senior-level reading and writing skills are recommended.

PHIL 306 Philosophy of Language Study of 20th-century philosophy of language. Introduction to traditional semantics (e.g. reference, truth, and meaning) will be followed by a detailed examination of speech-act theory or pragmatics. The course will focus on the complexity of speech acts and the various dimensions of understanding involved in successful communication. Using speech act theory, students are asked to analyze cinematographic artworks such as *Twelfth Night*, *Glengarry Glen Ross*, *American Buffalo*, *Oleanna*, etc. to examine how language and social power work together. Topics include theories of speaker meaning and reference, indexicals, direct and indirect speech acts, conversational implication, presupposition, anaphora, non-literal language use, translation, rule-following, and the relation between language and thought. Readings from Frege, Russell, Wittgenstein, Quine, Austin, Dummett, Putnam, Searle, Davidson, Habermas, and Recanati. Lecture and discussion format with three essay assignments. Recommended for foreign language, theatre arts, and English students.

PHIL 308 Metaphysics and Mind Examination of topics in the Western philosophical areas of metaphysics and philosophy of mind, and their intersection. Metaphysics is concerned with the structure of reality; philosophy of mind is the branch of metaphysics concerned with the nature of minds. The topics studied could include the "mind/body problem," consciousness, personal identity, and free will and determinism. Is the mind a nonphysical soul-like entity, or is the mind the brain, or is it the software that runs on the brain's hardware, or is it something else? Can the qualitative part of our experience -- the part involving what it feels like to be in various states -- be captured in purely physical terms, or is it inescapably nonphysical? What makes you the same person over time? Does modern scientific knowledge entail that none of our actions is really free? What is it for an action to be free, anyway? The readings for this course will consist mostly of primary scholarly articles by contemporary philosophers. Suggested for psychology students. Some background in philosophy recommended.

PHIL 310 Critical Social Theory: the Dialectic of Enlightenment Introduction to the Frankfurt School of Social Criticism and its legacy as "Critical Social Theory." We begin by examining the "first generation" of the Frankfurt School, from its founding in the 1920s and '30s by Horkheimer, Adorno, Benjamin, Fromm, and Marcuse to Habermas's early writings in the '60s & '70s. We then examine "second-generation" research, Juergen Habermas's "Theory of Communicative Action," with its distinctive ideal of "undistorted communication" as the measure of social rationality. Finally, we explore Axel Honneth's alternative, "third generation," Neo-Hegelian model of social development, with its distinctive ideal of "undamaged identities" and the "struggle for mutual recognition" as the critical measures of social pathologies. Throughout the course, examples of U.S. social movements -- green, feminist, queer, race-based, & post-colonial movements -- will be used to assess the relative strengths of these competing diagnostic models of social crisis. Suggested for political science, anthropology/sociology, economics, and environmental studies students. Recommended for students with some background in philosophy, in particular students who have taken 19th-Century Philosophy. We recommend 19th-Century Philosophy as a prerequisite, but it's not required.

PHIL 311 Postmodern Critical Theory: The Critique of Modernity Introduction to contemporary French philosophy, with special emphasis on the themes of language, desire, embodiment, and sexual difference. We examine the early debate between Merleau-Ponty and Lacan on the acquisition of language, formation of desire, and development of body images. We then turn to two key post-structuralists: Michel Foucault and Jacques Derrida. We focus upon Foucault's transition from his "archaeology of knowledge" to his mature "genealogy of desire," contrasting his account of embodiment and social power to Pierre Bourdieu's. After reviewing Derrida's deconstructionist analysis of language, we turn to one of the following figures: Kristeva, Deleuze, Irigaray, Butler, or Žižek. Films are shown throughout the course on Wednesday evenings. Media Studies concentrators are encouraged to write final essays linking philosophy and cinematography. Suggested for media studies, psychology, English, French, and political science students. Some background in philosophy recommended.

PHIL 490 Philosophy Seminar Intensive study of contemporary research on a major philosophical issue. The seminar is devoted to the critical reading of significant contemporary publications and a subsequent examination of the philosophical debates they have spawned. Advanced seminar-style discussion-centered course, with participants writing and presenting scholarly papers for the group. The seminar may meet over the course of either one or two quarters. Prerequisite: Senior standing

PHIL 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Physical Education

Professors: Bailey, Bell, Daniels, Duinstra, Farrell, Goyings, Hess (Chair), Horner, Krajacic, Miller, Murphy, Ott, Redko, Rice, Riley, Jay Smith, J. Smith, Shabazz, Thiede, White, Zorbo

Through its physical education activity requirement and offerings that carry academic credit, the College honors the "sound mind in a sound body" philosophy that is a landmark of a liberal arts education. Several opportunities for healthful activities are housed in the department of physical education which includes intramurals administration and the department of athletics in addition to the cadre of activity classes.

The Physical Education Graduation Requirement

All students shall earn one unit of physical education (PE) activity, which may be met by electing and satisfactorily completing five activities, each equal to 0.2 units, selected from physical education activity classes, intercollegiate athletics, study abroad, and Land/Sea, subject to the following conditions:

1. A modified or otherwise specifically planned program will be developed by an advisor in the department for any student having a complete or partial restriction as indicated on that individual's health record.
2. Students are urged to complete the requirement over the period of five quarters.
3. Students may take as many PE activity classes as they desire, but only one unit, or five 0.2-unit activities, will be counted toward the graduation requirement.
4. All activity courses may be repeated as often as desired, with the exception of PED 101, Mind/Body, and Outdoor Leadership which carry 0.4 units.
5. Varsity athletes earn .25 units per sport per academic year, and split seasons such as golf will award one activity credit for the academic year, whether the athlete participates in fall or spring or both. Therefore, should a student play 4 seasons of a varsity sport, they will earn the full PE unit. (Effective academic year 2016-2017)
6. One activity credit for physical education may be granted for each six months of military service or each quarter of ROTC training.
7. In some instances students may receive PE activity credit for activity classes on study abroad, especially those indigenous to a particular culture. These credits must be certified through the Center for International Programs.

Activity courses include various opportunities. Some courses require that students furnish their own equipment or transportation; some require a modest fee; but one can achieve the full unit with on-campus, non-fee courses. For on-campus fee courses, the fee is charged directly to the student account; for off-campus fee courses, the student pays the instructor as indicated on the course schedule.

Course categories include Fitness, Dance, Sport Skill, Life Skill/Health, Outdoor, Independent Study, Varsity Sports, and Full Unit.

Fitness: BootCamp, Barre, Conditioning and Speed, Developmental Swimming, Individual Fitness, InerTRAIN, Pilates, K-Cycle Weight Training, and Yoga

Dance: Ballet (Beginning and Intermediate), Jazz, Modern, and Stage Combat

Sport Skill: Badminton, Basketball, Circus Arts, Equestrian, Racquetball, Scuba, Soccer, Learn to Swim, Tae Kwon Do (Hapkido), Tai Chi, Tennis (Beginning and Intermediate) Ultimate Frisbee Club, and Volleyball

Life Skill/Health: CPR and First Aid, Gardening, Mind/Body (.4 units), Mindfulness, Smoking Cessation, Step Up, Tower Bell Ringing, Pollinator Gardening, Composting

Outdoor: Arboretum Stewardship, Backpacking, Land/Sea and Land/Sea Leadership, Outdoor Leadership (.4 units), River Canoeing, Rock Climbing, Wilderness First Aid and CPR, Snowshoeing, Mountain Biking

Varsity Sports: Athletes who complete 4 varsity seasons will be awarded the full PE unit

Full Unit: Care and Treatment of Injuries, Nutrition, and Senior Individualized Projects

Independent study activity credit is possible for any activity that is not offered on the course schedule, and for which the student has a certified instructor. All independent studies will need a faculty supervisor and approval by the chair.

Academic Physical Education classes

One academic, full-unit class is offered each quarter through the PE department. These classes are recommended for students interested in coaching, athletics, fitness, or leadership.

Physical Education courses

PED 002 Badminton To learn the basics of Badminton and create an active and fun environment.

PED 003 Basketball Instruction for all levels of skill in the fundamentals of basketball. Emphasis on the development and improvement of total fitness, skill and general knowledge about basketball for leisure time use.

PED 004 Advanced Basketball Open to all students who wish to improve their offensive and defensive basketball skill set through high-level, intensive drills. Students should be prepared to participate physically with proper attire, footwear, and physical condition.

PED 006 Circus Arts: Aerials The goal of this course is to improve students' fitness through circus arts training. The class will provide a safe and supportive setting in which students will push themselves and each other to work out effectively and wisely. A combination of strength, cardio, flexibility, and balance exercises will complement training on the aerial apparatuses. Students will have the opportunity to explore aerial silk, aerial hoop (also known as lyra), and partner acrobatics. Throughout the quarter, students will learn to form performance pieces out of the skills they acquire. Course instructor: Megan Loyer (meg.loyer13@gmail.com)

PED 007 Circus Arts: Ground Skills The goal of this course is to improve students' fitness through circus arts training. The class will provide a safe and supportive setting in which students will push themselves and each other to work out effectively and wisely. A combination of strength, cardio, flexibility, and balance exercises will complement the training. Students will have the opportunity to explore diabolo, juggling, globe walking, yo-yo, hooping and partner acrobatics. Throughout the quarter, students will learn to form performance pieces out of the skills they acquire. Course instructor: Megan Loyer (meg.loyer13@gmail.com)

PED 008 Equestrian Club Students must contact the instructor for more information, provide own transportation, and pay lesson fees directly to Cedar Lodge. <http://www.cedarlodge.com/>

PED 009 Fencing An introductory course presenting the sport of foil fencing; the emphasis is on safety, skill acquisition and refinement, fun, and development of a healthy lifestyle. Basic Skills of footwork, attacking and defending with a sword are developed through a combination of lessons, drills, and supervised bouts. Also, briefly covered are the equipment used, the history of the different fencing sports, and an introduction to the rules which govern fencing tournaments. The lessons are determined by the interests of the advanced students. Topics may include advanced skills in footwork, attacks to the blade, advanced parries, or tactics. The class may work on other fencing sports such as epee, saber, or the reconstruction of Renaissance rapier combat. These are developed through intensive bouting and individual or small group instruction. Working with beginning fencers continues to reinforce basic skills and gives experience in coaching others.

PED 014 Learn to Swim This class is designed to help those who cannot swim, learn the basics of the sport. This includes comfort level in the water, floating and basic swim strokes. This is an activity worth .2 units.

PED 020 Beginning Racquetball This class provides students with appropriate level of knowledge and skills in racquetball.

PED 021 Squash

PED 022 Recreational Soccer Instruction and review of basic technical soccer skills. Playing experience in an organized environment is preferred but not required.

PED 024 Indoor Rock Climbing This class is mostly self-directed and is held off-campus at Climb Kalamazoo. Students learn basic climbing and belaying techniques for climbing, and must participate in the safety training prior to climbing.

PED 027 Scuba This class covers equipment setup and equipment breakdown, gear usage on both normal and emergency situations, and equipment-familiarization drills. Open-water training is conducted in local lakes or outside this area with special arrangements. Students who complete all requirements receive a lifetime SCUBA certification from the National Association of Underwater Instructors.

PED 030 Tae Kwon Do/ Hapkido This class will give you martial arts training which uses Tae Kwon Do and Hap Ki Do in combination to create the Moo Sool Do system. The class will familiarize students with the movements, forms, and philosophies that are used in martial arts. Students will learn the art of using the hands and feet for quality self defense

PED 031 Tai Chi This class explores the mind/body connections and fitness aspects of traditional Chinese internal style martial arts. Each Class includes internal energy (chi) cultivation exercises, stretching and strengthening exercises, work on learning from an internal style Kung Fu form and work on learning a Tai Chi form

PED 032 Judo This class teaches the Martial Art / Olympic sport of Judo. In this class you will learn the techniques for throwing, falling, pinning, chokes, and arm bars. You will develop both core and physical strength along with cardio, agility, coordination, balance, flexibility, and confidence. What you learn can be used for sport, self defense, or fitness

PED 033 Beginning Tennis Learn many of the basic fundamentals and skills of tennis, as well as learning how to play the game in an enjoyable and active environment.

PED 034 Intermediate Tennis Learn all of the basic fundamentals and skills of tennis, as well as learning how to play the game in an enjoyable and active environment.

PED 035 Advanced Tennis Enhance established technical knowledge and learn the necessary competitive skills for singles and doubles in an enjoyable and active environment.

PED 036 Ultimate Frisbee Club Sport Student must be a member of the club to elect to take this class.

PED 037 Volleyball Learn basic volleyball skills and how to train for, and compete on a team.

PED 038 Introduction to Track & Field Students will work together in a fun, safe, learn-by-doing format to develop a fundamental comprehension of the lifetime sport of track & field. We will incorporate instruction, practice, video analysis, and competition to 1.) refine each student's skills in the various disciplines of track & field (running, jumping, and throwing events); 2.) understand the training methodologies needed to improve personal levels of speed, strength, endurance, flexibility, and coordination throughout one's life; and 3.) cultivate an appreciation for the history, the contemporary stars, and the breakthrough performances of the sport that is the world's oldest and the modern Olympic Games' most popular.

PED 045 Beginning Ballet An introduction to the fundamentals of Classic Ballet taught in the Vaganova Method (Russian Style). Emphasis will be placed on basic barre work followed by center work and floor combinations. Consideration will be given to body placement and ballet terminology.

PED 046 Intermediate Ballet A continuation of Classical Ballet taught in the Vaganova Method (Russian style) with further emphasis placed on more strenuous barre work, elements of dance history, and pre-pointe. Beginning Ballet I is a prerequisite or permission from the instructor.

PED 047 Ballet Company Technique Instructor approval required for this class.

PED 048 Barre a Terre It is customary for Dancers to both "warm up" before class and to "stretch" afterwards. This class is specifically designed for Ballet Dancers to prepare the body for more intensive activity. However, the class is not exclusive to Classical Ballet and may be useful for those proficient in other forms of dance. Barre a Terre employs a system of non-impact, isometric movements to improve alignment, placement and stability. Exercises are preformed on the back, stomach, and side to strengthen and sculpt both the upper and lower body. These sessions provide a most tailored approach to develop core strength as well as facilitate longevity in the joints and muscles. Special attention is provided for prevention of injury through stretching to improve flexibility, balance, mobility, and toning. Attire: loose fitting, comfortable clothes. Hair must be secured and away from the face.

PED 050 Dance Choreography This course explores different choreographic elements that will help add complexity to our work and develop the ability to look critically at every movement within a choreographed piece. Prerequisite: Must have taken previous dance class with Kate Yanchow or permission of instructor

PED 052 West Coast Swing Dance West Coast Swing is a slotted partner dance, danced in six count patterns; however, no partner is required to take this course. During the course, students will learn the basic patterns of West Coast Swing: Left Side Pass, Under Arm Turn, Push Break, Front Tuck, Side Tuck, Basket Whip, Whip, Turns & the Starter Step. The benefits of this course will go beyond a physical skill set; students will also develop a greater sense of self-confidence, communication skills, and networking skills.

PED 055 Jazz Dance Dance your way through the history of the truly American dance form, Jazz Dance. Through movement combinations and music, this class will start with the beginnings and work its way to present trends in jazz dance. This very active class is appropriate for dancers of all levels.

PED 056 Wellspring Dance Classes Join Wellspring/Cori Terry & Dancers, the only professional dance company in Kalamazoo, for our Adult dance courses and earn PE credit. Our classes are taught by company members and other professional dance educators and span a variety of types. For the 10-week quarter, you will be able to choose your weekly class to fit your schedule and interests. This class is off campus.

PED 060 Modern Dance Modern dance, established in the early 20th century, was the result of rebellion against the formal structure and rigid rules of classical ballet. Beginning with dancers like Loie Fuller and Isadora Duncan, modern dance is more grounded and uses the spine and breath more freely than ballet. This class will explore modern dance as it has progressed with a focus on contemporary modern dance that is influenced by many different techniques and styles.

PED 070 Stage Combat This course provides a fundamental knowledge of several different styles of stage combat as well as an understanding of basic fight choreography for stage and film.

PED 082 Advanced Conditioning Develop proper fundamental techniques in weight training. Show students the importance of teamwork in reaching fitness goals.

PED 084 Adv Physical Training Boot Camp This 10- week course is designed to optimize your health using the five components of physical fitness: cardiovascular health, muscular strength, muscular endurance, flexibility, and body composition.

PED 085 High Intensity Interval Training This class is designed to lead participants through a series of cardio and strength training exercises with relatively brief rest intervals in between. Open to all fitness levels and there will be emphasis on exercise safety, technique, progression and modification. The class will use a variety of equipment available on the fitness floor.

PED 089 Conditioning & Speed This is an advanced level Physical Education class. It is intended to enhance one's strength, speed, agility, conditioning and overall athletic ability.

PED 092 Developmental Swimming This course is designed to improve your comfort level in the water, your overall fitness and aerobic capacity, and is swimming on your own for fitness, logged and turned in on a regular basis.

PED 096 K-Cycle (Indoor Cycling)

PED 097 Individual Fitness Develop an awareness of the importance and value of physical fitness in everyday life. The student is responsible for one meeting per week, and the practice and recording of one's own personal fitness plan. Prerequisite: Junior or Senior standing or permission of the instructor

PED 098 inerTRAIN InerTRAIN is an online personalized fitness training service connecting real trainers to real clients using technology to remove the limitations of time and place so you can work out anytime, anywhere.

PED 098 IS: Independent Study

PED 100 Kalamazoo Barre Kalamazoo Barre is an off-campus, fun yet challenging, 50-minute workout, inspired by ballet and Pilates. Certified instructors lead the classes which involve small, isometric movements that promote fat burning and interval training.

PED 107 Pilates This course is designed to take you through the basic moves and components of a Pilate's class: concentration, breathing, quality, focus, body awareness, core control.

PED 111 AM Power Workout Start your day on a healthy foot in AM Power Workout! Classes will combines elements from many group fitness styles including yoga, Pilates, aerobics, circuit training, dance, and more. This efficient workout will build strength and flexibility while also burning calories. You will be charged up and ready to face another day!

PED 112 Wake Up and Dance Get out of bed and dance your way to a better day! This class will include high-energy, dance-inspired workouts that are sure to boost your energy and be a blast! We will burn calories, have fun, and learn fun dance routines in a variety of styles!

PED 113 Plyometric Training

PED 116 Beginning Weight Training Learn the fundamentals of weight training while helping each student reach their personal fitness goals.

PED 117 Advanced Weight Training Learn the fundamentals of weight training while helping each student reach their personal fitness goals.

PED 118 Beginning Yoga The course provides a foundation in the practice of yoga as a holistic approach to health, vigor, and happiness.

PED 124 First Aid and CPR This course is designed to teach students the currently accepted procedures and principles for CPR and First Aid to be followed in the event of an accident or sudden illness

PED 126 Gardening Feel the benefits of gardening to your overall health (mental, physical); understand the fitness/wellness benefits of gardening and gain the basic knowledge and skills needed to grow vegetables that are 100% organic and non-GMO.

PED 127 Pollinator Gardening In this course, students will engage in work needed to establish and maintain native wildflower plantings on campus, while learning about the different plants and the insect pollinators they attract. Most activities will take outdoors and involve low to moderate amounts of physical activity. No previous experience required.

PED 128 Composting: Worms, Waste, & Well-Being Composting: Worms, Waste, & Well-being: Students will explore all aspects of the life-death cycle, and practice several food waste composting techniques such as vermicompost, trench compost, and hot compost, as well as learn about the key actors in the composting processes.

PED 130 Cooking and Food Issues

PED 132 Holistic Nutrition The objective of this course is for students to learn the impact of different types of foods, beverages and supplements on their bodies, from energy levels to muscle mass to brain function, inflammatory levels, digestion and more. Students will learn how to apply foundational nutrition principles to best fuel their bodies. They get to be their own n=1 "experiment" and will come away with important insight regarding how best to nourish their unique bodies to achieve their desired level of health and wellbeing. This course will be offered entirely online through the software platform Healthie. Healthie is a HIPAA-compliant platform that allows the instructor to teach students via a live webinar format. Students can access the webinars via their computer or the Get Healthie app. Detailed instructions for how to attend the webinars will be sent to students prior to the first week of class. A new webinar will be offered each week at 3 different time slots. Mondays at 12:15 Tuesdays at 2:15pm Wednesdays at 4pm Students must attend one of those time slots each week in order to receive credit for that week's webinar. Webinars are approximately 40 minutes in length.

PED 135 Mind/Body I This course is a combination of classroom and individualized activity that focuses on personal health and recognizes a fit and active lifestyle. It is worth 0.4 credits.

PED 136 Mindfulness The emphasis of this course will involve learning from experience. The experience made available here will be contemplative (or meditation). The course is designed to cultivate an appreciation for everyday experiences and to live in the present moment. This course will involve how each of us can enhance our well being through inward reflection and self-awareness.

PED 150 Smoking Cessation This class increases awareness of smoking behavior, to provide strategies and support of cessation, and to increase fitness levels of participants.

PED 151 Step Up! Be a Leader, Make a Difference Step Up! is a prosocial behavior and bystander intervention program that educates students to be proactive in helping others. This is an activity worth .2 units.

PED 155 Tower Bell Ringing Stetson Chapel houses one of only 53 English change ringing towers in North America and the only one in the state of Michigan. Change ringing is a team sport, a musical performance, an ancient art, and a challenging pattern-based exercise that involves a group of people ringing a set of tuned bells rhythmically through a series of changing sequences that are determined by mathematical principles. Despite the fact that the bells are heavy (up to a half-ton in Stetson's tower), change ringing is more mental than physical, but you don't have to be an athlete, a mathematician, or a musician to learn. Instruction is one-on-one in conjunction with attendance at weekly practices of the Kalamazoo College Guild of Change Ringers. Open to first-year students and sophomores or with the instructor's permission.

PED 156 Tower Bell Ringing II For students who have mastered the rudiments of rope-handling and wish to continue developing their skills in change-ringing. Prerequisite: PED-155 or PED-156 or Permission

PED 160 Arboretum Stewardship Practicum The Arboretum Stewardship Practicum affords students the opportunity to participate in and learn about the management of trails and invasive species control at the college's Lillian Anderson Arboretum

PED 163 Introduction to Hiking and Backpacking This class will introduce students to local outdoor trails and teach introductory hiking and backpacking skills. An overnight backpacking trip is required November 4-5

PED 170 Michigan Land/Sea Expedition

PED 175 Outdoor Leadership The Outdoor Leadership course builds on an individual's outdoor skills to further develop proficiency in group dynamics, leadership, map and compass, trip planning, and outdoor living. Participation in one weekend trip is required. After successful completion of the class, participants will receive a nationally-recognized Leave No Trace Trainer certificate.

PED 177 Snowshoeing This activity-based class will focus on preparing students for winter outdoor travel, with weekly trips to local hiking and snowshoe trails (snow dependent). Students must provide their own winter boots and clothing. Snowshoes will be provided.

PED 180 Intro to Canoeing The Intro to Canoeing course offers students the opportunity to hone their flat-water paddling skills. The class will focus on learning and practicing paddling strokes and canoe rescues. All abilities welcome. Paddling sessions will occur around Kalamazoo.

PED 195 Men's Intercollegiate Sports

PED 196 Women's Intercollegiate Sports

PED 205 Recognition of Sport Related Injuries An introduction to the primary mechanisms of athletic injuries, response to injury, and the inflammatory process. Material specific to identifying etiology, anatomy and physiology, signs, and symptoms of common sport-related injuries and illness. Students will be expected to critically interpret athletic training literature relevant to sports. Text books required for class.

PED 210 Nutrition Examination of nutritional systems and healthy eating habits for a program of lifelong living. This class contains components of biology, microbiology, food chemistry, human nutrition and metabolism. This is worth 1 academic unit and does not count towards the PE activity requirement for graduation.

PED 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Physics

Professors: Askew, Cole (Chair), Érdi, Tobochnik, Wilson

The physics curriculum at Kalamazoo College provides preparation for the potential physicist as well as a solid background for students in the other sciences. A student majoring in physics can pursue further study in physics, engineering, computer science, astronomy, medical physics, or environmental science. Other opportunities include teaching at the high school level and working in a business that involves modern technology, and other careers such as finance, patent law, and technical editing.

Students interested in majoring in one of the physical sciences should plan to take CHEM 110, MATH 112-113, and PHYS 150 during the first two quarters of the first year.

Students with an AP score of 4 or 5 on the Physics C-Mechanics exam will also be granted credit in PHYS 150 and should begin their sequence with PHYS 152. Students with the same score on the Physics C-E&M exam will also be granted credit in PHYS 152 and should begin their sequence with PHYS 220. Students may also receive credit for PHYS 152 by receiving a 5, 6, or 7 on the IB Physics HL exam.

Students planning on a major in physics should achieve at least "B" level academic work in the department by the time they complete PHY 220.

Students interested in engineering should consider the combined curriculum in engineering. This typically follows the program of the physics major during the first three years. (See the 3/2 Engineering Program description.)

Requirements for the Major in Physics

Number of Units

Eight courses in physics, numbered 150 and higher, with a minimum grade of C- are required for the major. A SIP in physics is not required for the major and, if completed, does not count toward the eight courses. A maximum of one AP, IB, dual enrollment, transfer, or study abroad credit may be counted toward the eight courses. Any number of required cognates may be met with AP, IB, dual enrollment credit, or local placement exam results. Departmental approval is required for all use of AP, IB, dual enrollment credit, and transfer credit toward major requirements. *Students transferring from another college or university may receive credit for multiple courses in physics, subject to Departmental approval.*

Required Courses

PHYS 150, 152, Introductory Physics I and II, with Lab

PHYS 220 Intro to Relativity and Quantum Physics with Lab

PHYS 340 Classical Dynamics with Lab

PHYS 360 Thermal Physics with Lab

PHYS 370 Electronics and Electromagnetism with Lab

PHYS 380 or PHYS 410, Semiconductors and Magnetism with Lab or Advanced Electricity and Magnetism

Required Cognates

MATH 112, 113, and 214 Calculus I, II, and III

MATH 240 Linear Algebra and Vectors

MATH 280 Differential Equations and Numerical Methods

All cognates in math must be at C- or above.

Successful completion of the major requires taking a departmental comprehensive exam, normally offered in late January of the senior year. The Advanced Physics GRE exam may be used in place of the locally administered departmental exam.

A least one course in Computer Science, one course in Complex Systems, and MATH 310, Complex and Vector Variables, are recommended for all students in the major. Students planning on graduate study in Physics, Applied Physics, or Electrical Engineering should take both PHYS 380 and 410, and PHYS 420, Quantum Mechanics. Students interested in further study in environmental engineering or related programs should take CHEM 110 and 120, and consider additional coursework in chemistry and biology. Students interested in biological physics or neuroscience should explore the concentrations available in those subjects.

Requirements for the Minor in Physics

Number of Units

Six units, exclusive of lab credit, in Physics are required, with a minimum grade of C-.

Required Courses

PHYS 150, 152 Introductory Physics I, II with Lab

PHYS 220 Intro to Relativity and Quantum Physics with Lab

Three additional physics courses, two at the 200 level or above and at least one at the 300 level or above.

Students may not major in 3/2 engineering and minor in physics.

Physics courses

PHYS 102 Astronomy Study of modern astronomy beyond the solar system: stars, galaxies, pulsars, quasars, black holes, and cosmology. Emphasis on fundamental physics and its application to understanding the structure and evolution of astronomical objects.

PHYS 105 Energy and the Environment Application of scientific concepts and analyses to the study of the production, conversion, and consumption of energy, and an understanding of the associated environmental and societal implications. Designed primarily for students not majoring in the physical sciences; especially appropriate for those in the environmental studies concentration.

PHYS 150 Introductory Physics I with Lab Conceptual and practical study of the basic conservation laws (momentum, energy, and angular momentum) and the Newtonian world view. Prerequisite: MATH-111 or MATH-112 All course prerequisites must be met with a minimum grade of C-.

PHYS 152 Introductory Physics II with Lab Study of the fundamental and practical concepts associated with electric and magnetic fields and their unification. Prerequisite: PHYS-150 and MATH-111 or MATH-112 All course prerequisites must be met with a minimum grade of C-.

PHYS 205 Applications of Physics in the Biosciences How can we observe nano-scale biological systems? How does the flexibility of a molecule contribute to its biological function? How can we make sense of vast amounts of complex and sometimes "messy" biological data? This course is an introduction to the advantages and limitations of using physical techniques and models to address biological questions. We will focus on molecular-scale systems and dynamics, with topics to include optics and microscopy, physical properties of biomolecules, and modeling dynamic molecules and systems. Current biophysical research and interdisciplinary communication skills will be emphasized through periodic discussion of articles from the primary literature. Prerequisite: BIOL-112 and PHYS-150 or Instructor Permission All course prerequisites must be met with a minimum grade of C-.

PHYS 210 Nuclear and Medical Physics with Lab Emphasis on application of physics to medicine, focusing on radioactivity, radiation therapy, and diagnostic and imaging techniques. Prerequisite: PHYS-152 All course prerequisites must be met with a minimum grade of C-.

PHYS/IDSY 215 Introduction to Complex Systems Study of how collective behavior emerges from the interaction between a system's parts and its environment. Model systems from the natural sciences and social sciences will be used as examples. Both historical and contemporary approaches will be discussed.

PHYS 220 Introduction to Relativity and Quantum Physics with Lab Study of light, special relativity, and quantum physics with applications. Prerequisite: PHYS-152 and MATH-113. (MATH-214 & 240 recommended.) All course prerequisites must be met with a minimum grade of C-.

PHYS/MATH 270 Nonlinear Dynamics and Chaos Dynamical systems are mathematical objects used to model phenomena of natural and social phenomena whose state changes over time. Nonlinear dynamical systems are able to show complicated temporal, spatial, and spatiotemporal behavior. They include oscillatory and chaotic behaviors and spatial structures including fractals. Students will learn the basic mathematical concepts and methods used to describe dynamical systems. Applications will cover many scientific disciplines, including physics, chemistry, biology, economics, and other social sciences. Appropriate for Math or Physics Majors. Either MATH 305 or this course, but not both, may be counted towards the major in mathematics. Prerequisite: MATH-113 All course prerequisites must be met with a minimum grade of C-.

PHYS 340 Classical Dynamics with Lab Study of classical dynamics emphasizing physical reasoning and problem solving. The Newtonian, Lagrangian, and Hamiltonian formulations are discussed, and applications are made to planetary motion, oscillations, stability, accelerating reference frames, and rigid body motion. Prerequisite: PHYS-152 and MATH-280 All course prerequisites must be met with a minimum grade of C-.

PHYS 360 Thermal Physics with Lab Introduction to thermal physics with emphasis on a statistical approach to the treatment of thermodynamic properties of bulk material. Prerequisite: PHYS-220. (MATH-280 recommended.) All course prerequisites must be met with a minimum grade of C-.

PHYS 370 Electronics and Electromagnetism with Lab Basic concepts of analog and digital electronics are taught along with intermediate level electrostatics and electrodynamics. Mathematical topics include introductory vector calculus and field theory. The laboratory portion emphasizes circuit analysis, measurement technique, and the skillful use of modern digital instrumentation. Prerequisite: PHYS-220 and co-enrollment in or completion of MATH-280. All course prerequisites must be met with a minimum grade of C-.

PHYS 380 Semiconductors and Magnetism with Lab The relationship between electricity and magnetism is studied through the introduction of Maxwell's equations. Semiconductor material properties are studied, along with device instructions for diodes, transistors, and simple integrated circuits. The laboratory portion emphasizes circuit construction techniques, device characterization, amplifier design and feedback, and signal/noise analysis. Prerequisite: PHYS-370 and MATH-280 All course prerequisites must be met with a minimum grade of C-.

PHYS 410 Advanced Electricity and Magnetism with Lab Study of electromagnetic field theory, electrostatics, potential theory, dielectric and magnetic media, Maxwell's field equations, and electromagnetic waves; vector calculus developed as needed. Prerequisite: PHYS-370 and MATH-280 All course prerequisites must be met with a minimum grade of C-.

PHYS 420 Quantum Mechanics with Lab Study of the principles and mathematical techniques of quantum mechanics with applications to barrier problems, the harmonic oscillator, and the hydrogen atom. Prerequisite: PHYS-340 and MATH-280 All course prerequisites must be met with a minimum grade of C-.

PHYS 480 Special Topics Techniques Special Topics offerings focus on a physics topic not addressed in the department's regular offerings. Possible topics include general relativity and cosmology, solid state physics, particle physics, soft condensed matter physics, biological physics, advanced laboratory techniques, and fluid mechanics. Check the course schedule to see when Special Topics courses are being offered.

PHYS 481 Special Topics: General Relativity & Cosmology General relativity is a geometric theory of gravity which has significant implications upon cosmology from gravitational redshift and bending of light rays to black holes and the large scale structure of the universe. We will learn to use tensors to perform calculations and study the implications of the Einstein equation.

PHYS 482/IDSY 305/MATH 305 Special Topics: Dynamic Models in Social Sciences The study of why mathematical and computational methods are important in understanding social phenomena, and how different social phenomena can be described by proper mathematical models. Specifically, applications of the theory of dynamical systems will be presented. Designed for math/science and social science students. Either MATH/PHYS 270 or this course, but not both, may be counted towards the major in mathematics.

PHYS 483 Advanced Quantum Mechanics With Lab We will study special topics in quantum mechanics, including perturbation theory, solid state physics and quantum computing. Prerequisite: PHY 420 Prerequisite: Take PHYS-420

PHYS 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Political Science

Professors: Berry, Dugas, Einspahr (Chair), Elman

Political Science is an essential component of a liberal arts education, providing students with the tools to understand the complex world of politics and, in the process, to become better citizens. As a field of academic study, Political Science is both a classical discipline and a more recently developed social science. The study of politics utilizes philosophical, historical, comparative and empirical analysis to examine governments, transnational institutions, political movements, politics, and policies. Knowledge of these areas enables students to participate more effectively in the political process on behalf of their own values. Students also learn skills to scrutinize both their own value systems and those of others.

The Political Science Department seeks to provide broad yet rigorous training in the fields of U.S. politics, comparative politics, international politics, and political theory. This training provides a thorough grounding for study in graduate and professional schools (including law school), as well as preparation for public service, nongovernmental employment, civic engagement, and political activism at the local, state, national, and international levels.

Requirements for the Major in Political Science

Number of Units

Nine units are required, not including the SIP.

Required Courses

POLS 105 Introduction to U.S. Politics: Theory and Practice
POLS 106 Introduction to Comparative Politics
POLS 107 Introduction to International Politics
POLS 490 Contemporary Behavior, Theory, and Methodology

ONE of the following:

POLS 257 Justice and Political Community: Classical Political Thought
POLS 260 Liberty, Equality, and Authority: Modern Political Thought
POLS 263 American Political Thought

The political science department requires all majors to pass a written comprehensive examination covering the fields of U.S. politics, comparative politics, international politics, and political theory. In addition, the department strongly encourages students to complete their introductory courses prior to leaving for study abroad.

Requirements for the Minor in Political Science

Number of Units

Six units are required.

Required Courses

POLS 105 Introduction to American Government

Five additional political science courses

Off-Campus Credits

One Political Science course from off-campus (study abroad or transfer credit) may count for credit toward the Political Science major or minor. Students must formally petition the department for approval of the course and provide the necessary materials (e.g. syllabus, notes, papers, etc.) for review. In general, the Political Science Department will accept for credit only a course that is not offered at Kalamazoo College.

Political Science courses

POLS 105 Introduction to U.S. Politics: Theory and Practice Contemporary conceptions of democracy in the United States are often based on the classic pluralist model of governance: individual citizens articulate interests, groups naturally form and lobby on behalf of those interests, a fair debate ensues, and the democratic system generates outcomes reflecting a general will. While this may serve as a model of how democracy ought to operate, it is not clear whether it is an accurate reflection of how our democracy actually operates. In this course, we will employ a multitude of approaches-theoretical, behavioral, and institutional-to assist you in assessing the extent to which the functioning of American democracy fulfills its promise. Collectively, we will grapple with our conflicting visions of American Democracy, identify potential barriers we face, and debate the utility of potential reforms.

POLS 106 Introduction to Comparative Politics Introduction to the structure and functioning of different systems of governance within a comparative framework. What are the various paths to political development taken by various industrialized nations? To this end, students compare and contrast various political ideologies, cultures, and state institutions and their organizations.

POLS 107 Introduction to International Politics An introduction to the study of international relations that focuses on the core issue of international war and peace. The issue is used as a means to explore how political scientists analyze international relations. The course examines different approaches to analyzing international relations (the system, state, and individual levels of analysis), as well as the ongoing debates between the paradigms of realism, liberalism, radicalism, and feminism.

POLS 205 The Politics of Revolution The very casual use of the term "revolution" frequently betrays its importance. What, for example, does it mean to be a "revolutionary"? Moreover, what has "revolution" meant for men and women? This course seeks to clarify its meaning(s), consider its causes, and explore the consequences with attention to the French, Haitian and Russian revolutions. The revolutions of 1989 throughout Eastern Europe will also be considered.

POLS 210 Comparative Political Institutions: Social Europe Examination of the political systems, institutions, and practices of European states. Emphasis is on analysis and comparison of social policies concerning immigration, the environment, healthcare and other issues.

POLS 220 Voting, Campaigns, & Elections Representative democracies rely upon elections to establish and maintain the link between the will of the people and the elites chosen to represent the public will. This course will examine three interrelated concepts of the American electoral process: voting, campaigns, and elections. First, we will examine the theories and methods employed to identify likely voters and the factors that impact their vote choice. Second, we will identify the distinct factors that determine a campaign's effectiveness including: the candidate, media coverage, political strategy, and broader contextual factors. Finally, we will assess the unique configuration of our electoral design, the extent to which these characteristics structure electoral outcomes, and whether modifications are required.

POLS 225 Constitutional Law The cornerstone of American democracy rests upon the U.S. Constitution. In addition to laying the blueprint for the institutional design of our government, the Bill of Rights, in theory, establishes the fundamental rights and liberties of all American citizens. In this course, students will familiarize themselves with the structure of the federal court system, the contrasting modes of legal reasoning employed by justices on the court, and the often competing legal, political, and societal factors that influence the Supreme Court's rulings. We will focus on three substantive areas of constitutional law: 1) equal protection under the 14th Amendment; 2) the right to privacy; and 3) freedom of speech. By tracing the evolution of the law in these three key areas, students will sharpen their legal-reasoning skills, and be better equipped to evaluate the extent to which the Court has fulfilled our Constitutional ideals.

POLS 229 Race, Law, & US Politics This course will explore the intersection of race, law and politics in the United States. In the first half of the quarter we will develop a theoretical framework to understand each of these three interrelated concepts. First, we will examine the American judicial system, contrasting theories of jurisprudence, and legal reasoning and writing. Second, we will explore the complex relationship between law and politics. Third, we will examine theories of race, racial formation, and critical race theory. In the second half of the quarter we will turn our attention to tracing the key legal precedents and statutes that have at various times in our history shaped, reinforced, and/or challenged conceptions of race. We will examine the ways in which each has expanded and/or contracted the rights of racial and ethnic minorities. We will end the quarter by evaluating the extent to which the Court provides an effective venue for racial and ethnic minorities to pursue equal rights and access in America.

POLS 231/SEM 209 The Politics of Immigration According to the UN Charter of Fundamental Rights, one has a fundamental right to leave one's country of origin (1948, Article 13), yet there is no corresponding right to enter another country. This sophomore seminar considers the consequence of this tension with attention to normative questions of who should be allowed entry to and citizenship within (other) states. In addition, we explore the empirical complexities that inform and result from these judgments. This broadly international and interdisciplinary seminar privileges states, laws (domestic and international) and actual policy over the last sixty years, with particular attention to North America and Western Europe - key destinations for migrants and thus crucial laboratories to investigate the myths, realities, policies and consequences of immigration. At a time when there are growing pressures for increased immigration in Western Europe, we conclude by noting recent developments within the European Union to harmonize asylum and immigration policies. We ask - what are the ethical challenges and what might the future look like?

POLS 245 Politics of Latin America This course provides an introduction to contemporary Latin American politics. The first part of the course examines the historical factors and socioeconomic conditions that have influenced the development of Latin American politics, including its frequently troubled relationship with the United States. The second part examines the principal political structures that have characterized Latin American politics in the form of authoritarian, revolutionary, and democratic regimes.

POLS/AFST 248 Politics of Sub-Saharan Africa This course offers an in-depth perspective on the study of Sub-Saharan African politics. It examines Africa's post-independence democratic strides, security issues, and the failure and successes of statism. It specifically exposes students to the challenges and the conundrum of the postcolonial state and the efforts in dealing with such challenges in Africa. The end of the Cold War as well as the demise of apartheid affected the political landscape in Africa, thus strengthening the role of grassroots organizations and of other external forces to engage in the process of state reconstruction.

POLS/CLAS 257 Justice and Political Community: Classical Political Thought This course examines political thought from the Greek period through the Italian Renaissance. We will pay particular attention to classical conceptions of human nature, justice, the ideal political order, and the obligations of citizens to their political communities. We will also form an appreciation for the Greek and Roman foundations of subsequent political systems. Thinkers covered may include Thucydides, Plato, Aristotle, Cicero, St. Augustine, and Machiavelli. Offered biannually.

POLS 260 Liberty, Equality, and Authority: Modern Political Thought This course examines political theory in the "modern" period (roughly 1650-1900). Many of the works considered here are central to the "canon" of political theory, shaping not only the kinds of questions we have come to ask about "the political," but how we go about asking them. In particular, liberalism has been central to the political development of the west. In this class we will work toward a deep understanding of liberalism as well as radical democratic, conservative, and socialist challenges to this important paradigm. Theoretical topics covered include classical social contract theory; the emergence of the abstract "individual" endowed with natural rights; attempts to reconcile the value of equality with that of liberty; and "radical" responses to deep structural inequality. The work of Hobbes, Locke, Rousseau, Burke, Wollstonecraft, Marx, and others will be discussed and analyzed.

POLS 263 American Political Thought In this course we will approach American Political Thought (APT) as a set of narratives and counter-narratives about the meaning and value of American freedom in relation to social, economic, and political equality. Dominant narratives about the meaning of freedom have often functioned to exclude certain groups, while resistance to that exclusion has often taken the form of contestation over the meaning of freedom itself. We will examine the tensions within American narratives of freedom from the time of the first Puritan settlers to today.

POLS/WGS 265 Feminist Political Theories A core course in the Women, Gender, and Sexuality curriculum, Feminist Political Theories introduces students to a wide variety of feminist theoretical frameworks. We will examine what it means to do feminist theory; modern feminist theories, including liberal, radical, Marxist, socialist, and anarchist feminisms, as well as intersectionality theories; postmodern feminist thought, including queer and transgender theories and third-wave feminisms; and postcolonial feminist theories from early modernity to postmodernity. Prerequisite: Sophomore Standing

POLS 267 Environment and Political Theory This course will serve as an introduction to the growing field of environmental political theory, or political ecology, including the writings of political theorists past and present on the relationship between politics, humans, and non-human nature and attempts by contemporary political theorists and environmental activists to articulate principles for organizing society in relation to the natural world. Students will confront their own assumptions about the proper relationship between humans and the natural world, which are embedded in core political concepts such as citizenship and democracy, and work to form reasoned judgments in relation to current environmental problems and controversies.

POLS 270 The European Union: Institutions, Actors, Aliens and Outcomes This course offers a broad introduction to the European Union and the politics of European integration. We move from a historical overview to a description and assessment of several basic political institutions and conclude with the impact that European integration has had (and continues to exercise) over matters ranging from agriculture and the environment to crime citizenship, migration, gay rights, and women's rights.

POLS 285 United States Foreign Policy The first part of this course provides an introduction to, and a historical overview of, U.S. foreign policy from the end of World War II to the present. Particular emphasis is given to security issues, the development of the Cold War, and the search for a guiding doctrine for contemporary U.S. foreign policy. The second part of the course examines the way in which U.S. foreign policy is made, looking specifically at the role of the Presidency, Congress, and the bureaucracy.

POLS 295 Special Topics Special Topics offerings focus upon topics not addressed in the department's regular offerings. The course can be repeated with a different topic. Check the course schedule to see when Special Topics courses are being offered.

POLS 295 Special Topics From hazardous chemicals and nuclear accidents to stratospheric ozone depletion and concern over tropical rain forests and "sustainable development," environmental justice activists have raised our consciousness and endeavored to provide a coherent vision of policies and programs they want implemented. How did activists express their claims, what are some of the specific challenges they faced, and how have different states/regions around the world responded?

POLS 295 Constructing and Reconstructing Israel The basic introduction to Israeli politics offers a historical and ideological overview that moves us from the late nineteenth century to Israel's establishment as a state in 1948. Therefore, we explore the formation of Israel through migration, key political institutions, and wars. We conclude with current challenges and thus consider some of the unanticipated consequences of Zionism.

POLS 295 Politics of East Asia East Asia draws much attention from the world due to its interesting mix of the emerging world power (China), the third largest economy in the world (Japan), the two democracies having experienced rapid growth and democratization (South Korea and Taiwan), and one of the most closed and secretive dictatorships on Earth (North Korea). This course is designed to provide a general understating of the political history and contemporary politics of East Asia. The main goal of this course is to help students develop their ability to analyze various political phenomena using concepts and approaches and prepare themselves for higher-level courses in political science courses moving forward

POLS 295 Comparative Democratization The study of both democracy and democratization has become a cornerstone of American political science. However, the concept of democracy, the best way to promote it, and why democratization occurs (and why it sometimes does not) are often hot topics of contention within the field. While a Western, procedural conception of democracy dominates American political science, alternative way of thinking and theorizing about democratic regimes do exist. This course will critically survey literature that addresses these debates. Case studies and examples will be drawn from all over the world and various countries' experiences with democratization. Of particular interest, however, will be the way in which democracy promotion has become a key tenet of American foreign policy.

POLS 295 State and Local Government This course provides a basic understanding of politics at the state and local level, including the relationship between state and local governments and the federal government. The Michigan state constitution will be compared to other state constitutions, and we will examine Michigan's legislative, executive, and judiciary branches as well as political attitudes and behavior at the state level. Finally, the course will explore local politics, particularly as various cities in Michigan deal with budget crises

POLS 295 Qualitative Methods in Political Science This course is designed to familiarize students of politics with a variety of qualitative strategies for research design, data collection and data analysis. We will examine the advantages and disadvantages of these methods and the kinds of questions each is best suited to address. In addition, we will focus on the skills required for designing and carrying out a research project using the many techniques available within qualitative methods. Methods covered include ethnography, case studies, elite interviewing, interpretivism, the use of focus groups, and archival research.

POLS 295 States and International Economic Power Will increasing U.S. economic sanctions ensure Iran will not develop a nuclear weapon? Will loosening economic sanctions convince North Korea to give up its nuclear weapons? Will increased intraregional trade agreements in East Asia pacify the contentious relationships between Japan, China, South Korea, and North Korea or lead to new conflicts? When does foreign aid achieve its goals and when does it backfire? This course examines how states use economic leverage (trade, aid, finance, and investment) to cajole, compel, or coerce other states to change their behavior, i.e. how states engage in economic statecraft.

POLS 305 International Law and Organization This course addresses: 1) the history, structure, promise, and limitations of international organizations, especially the United Nations; 2) the basic nature and scope of international law; and 3) how the interplay of international law and organizations affects key areas of global relations, particularly the use of force, collective security and peacekeeping, the treatment of civilians in war, and human rights more generally.

POLS 310 Women, States, and NGOs What role do states have, if any, in defining, maintaining, constructing, or remedying sex discrimination? This course provides a comparative, historical framework to consider the challenges and opportunities feminist movements have met and continue to face as they mobilized both within and beyond their countries to demand social justice.

POLS 315 Public Opinion: Race, Class, and Gender The preferences of the public, and how these preferences are transmitted to elected officials, serve as the foundation of representative democracy. Thus, to evaluate the success of a democracy one must begin with a clear understanding of the origins, measurement, structure, and consequences of Americans' political attitudes. This course will explore the multitude of factors that structure and influence the development of political attitudes, the extent to which these attitudes are represented in government, and whether policy outcomes are reflective of public demands. Finally, we will apply the knowledge and analytical strategies that we have surveyed to better understand racial, class-based, and gender cleavages in American politics today. Prerequisite: POLS-105

POLS 320 Democracy and Democratic Theory What does it mean to say that something is "democratic" or that a government is a "democracy"? Almost everyone today claims democratic principles as their own, yet there is widespread disagreement about what this really means. The literal translation of "democracy" is "rule by the people," but rule how exactly, and over what matters? And who is included in "the people"? In this course we will examine the theory and practice of democracy in historical context as well as its meaning for people around the world today. Topics covered include classical democracy and republicanism; liberal, direct, radical, agonistic, and deliberative democracy; and challenges to democracy in the present age of global and corporatism. This course is not recommended for first-year students. Offered biannually.

POLS 330 The Politics of the Holocaust Study of two fundamental elements: (1) a brief historical overview of anti-Semitism and the social construction of identity whereby Jews are rendered "Other," and (2) a focus on how and by whom the Jews were annihilated. Students will comprehend the unique fate of the Jews under National Socialism, the incorporation of racial eugenics into law, and the capacities of modern states to service genocide.

POLS 360 Domination, Liberation, and Justice: Contemporary Political Thought In the twentieth century, a diverse group of thinkers challenged the basic underlying premises of modern political thought, refiguring how we think about domination, liberation, and justice. In this course, we will be addressing the overlapping themes of knowledge, power, history, and identity as they relate to contemporary political dilemmas. Thinkers discussed may include Arendt, Beauvoir, Butler, Foucault, Nietzsche, and other contemporary thinkers. Previous coursework in political theory or philosophy is recommended. Offered biannually.

POLS 375 International Political Economy This course deals with issues arising in a world system that is increasingly united by a global economy, but that remains fragmented politically. It begins with an examination of the alternative paradigms of economic liberalism, economic nationalism, and radicalism. It then proceeds to examine in greater detail issues concerning international trade (including debates over globalization and free trade) and the international monetary system (including the roles of the IMF and World Bank, debt crises, and financial crises). Prerequisite: POLS-107

POLS 380 Drugs, Democracy, and Human Rights An overview of three of the most contentious issues in contemporary U.S. foreign policy. Specifically, the course examines the role of U.S. policy with regard to the problems of international human rights, the promotion of democracy, and the international drug trade. Past and present U.S. policy is discussed, as well as what U.S. policy ought to be regarding these challenging problems.

POLS/SEMN 406 Male Violence Against Women This course focuses on male violence against and sexual exploitation of women. Students will examine the historical development of these related issues that feminism identifies as central (e.g., prostitution, pornography, sexual harassment, rape and battery). More specifically, we will explore how the story of that oppression and the efforts taken against it have been continuously ignored and/or undermined. Prerequisite: Seniors only

POLS/SEMN 410 From Social Movements to Non-Profits We will compare and contrast the politics of "social movements" across different countries and in the context of "globalization". We open with an overview concerning the decline of traditional mass based political institutions (e.g., parties and unions) and consider the rise and consequences of alternative forms of political expression - including movements and NGOs (non-governmental organizations). Prerequisite: Seniors Standing

POLS 490 Contemporary Behavior, Theory, and Methodology Analysis of major premises and theoretical frameworks underlying current political science research. Prerequisite: Senior standing.

POLS 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Senior Individualized Project section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Psychology

Professors: Batsell, Boatwright, Érdi, Fletcher, Gregg, Hostetter (Chair), Langeland, Liu, Perry, Tan

Psychology, broadly defined, is the study of animal and human behavior as well as human experience. The discipline involves the use of scientific methods in the discovery of facts and confirmation of theory as well as applications to problems. The major, therefore, includes a focus on the understanding and use of research skills and techniques. Psychology is a diverse field with important connections to biology, education, philosophy, and sociology. Increasingly, psychologists may be found in business, industry, education, government, and medicine, as well as in the more traditional areas of research and mental health.

Given its diversity and connections to other disciplines, psychology is a reasonable choice of major for students who seek a broad liberal arts undergraduate education. Psychology is also a practical major for those who seek careers immediately after graduation in fields where interacting with other people is primary—management, criminal justice, or human services, for example.

Psychology majors may choose to pursue advanced degrees in three general directions: one, as scientists, leading to careers in higher education or research settings; two, as practitioners, leading to roles as clinicians, school psychologists, industrial psychologists, and health psychologists; and three, as professionals in other fields such as law, medicine, and business administration.

Advanced Placement

Students with an Advanced Placement (AP) score of 4 or 5 on the Psychology Exam will be granted credit in PSYC 101. This credit will satisfy the PSYC 101 prerequisite for upper-level psychology classes.

Requirements for the Major in Psychology

Number of Units

Nine psychology units are required (SIP units do not count towards the major in psychology)
Psychology majors must pass the Comprehensive Examination in Psychology

Required Courses

PSYC 101 General Psychology

PSYC 301 Introduction to Research Methods

PSYC 390 Experimental Methods

One course designated a diversity/inclusion course (chosen from PSYC 230, PSYC 238, PSYC 270, PSYC 295 Psychology of the African American Experience, PSYC340, PSYC 465)

Two courses at the 400 level (400 level courses can also count as the Diversity/Inclusion Course)

Required Cognates

MATH 105 (Quantitative Reasoning & Statistical Analysis) or MATH 260 (Applied Statistics). MATH 260 is strongly recommended for those considering graduate study. Other statistics courses may also satisfy the cognate with departmental permission. Successful completion of the statistics cognate is a pre-requisite for PSYC 390 (Experimental Methods) which is taken in spring of the Junior year.

Requirements for the Minor in Psychology

Number of Units

Six units are required. Minors must pass the Comprehensive Examination. Students who plan to earn a minor in psychology must declare the minor by the fall quarter of their senior year.

Required Courses

PSYC 101 General Psychology

Five additional psychology electives, not including PSYC 301 or 390.

Please check on prerequisites for each course.

Psychology courses

PSYC 101 General Psychology Survey of major theories, methods, and findings related to understanding mental processes, emotions, behavior, and experience; examination of such topics as the brain, learning, memory, perception, personality, and psychotherapy. This course (or completion of AP Psychology) is a prerequisite for all courses in the department.

PSYC 205 Sports Psychology Survey of theories, research methods, and clinical techniques of psychology that focus on the mind-body problem in sports; investigation of issues relating to self discipline as well as improving individual and team performance. Prerequisite: PSYC-101

PSYC 210 Developmental Psychology The study of development from birth through early adolescence, examining concepts, theories, and research findings related to topics such as motor, perceptual, linguistic, artistic, cognitive, and identity development. Prerequisite: PSYC-101

PSYC 211 Adolescent Development Research and theory regarding development between puberty and emerging adulthood including physical, cognitive, social, emotional, and personality development. Contexts of adolescence within the family and within the peer group including sexuality, dating and romantic relationships. Perspectives regarding gender and moral development. Prerequisite: PSYC-101

PSYC 226 Physiological Psychology An exploration of the neurochemical and neurological bases of behaviors/experiences such as pain, feeding, sex, learning, memory, and emotion. Prerequisite: PSYC-101

PSYC 230 Psychology of Prejudice Introduction to social psychological perspectives on ethnocentrism, including ethnic, religious, national, and gender prejudice. Examines case studies, laboratory experiments, sample surveys, and ethnographic observations to account for the development of stereotypes and violence. Prerequisite: PSYC-101

PSYC/SEMN 238 Culture and Psychology of Arab-Muslim Societies This course provides an introduction to Arab-Muslim societies and cultures. It draws on readings from multiple disciplines to cover social structure and family organization in tribal, village, and urban communities, core value systems associated with the etiquettes of honor-and-modesty and with the beliefs and practices of Islam, and influences on psychological development through the life-span. It also will examine the processes of "modernization" and "underdevelopment," the conflict between Westernization and authentic "tradition," the "Islamic revival," and the crisis of identity experienced by youth. Prerequisite: Take PSYC-101

PSYC 240 Educational Psychology Applies the principles of psychology to the practice of teaching. In the course, we will analyze the dynamics of student-teacher interactions with particular reference to the ways in which concepts, skills, values, and attitudes are communicated. Some of the topics that will be covered include basic principles of learning and instruction, child and adolescent development, information processing, measurement and evaluation as applied to classroom situations, and methods of accommodating students with different needs. Prerequisite: PSYC-101 or EDUC-270

PSYC 250 Social Psychology Social psychology examines how people's lives are influenced by their social surroundings and especially their perceptions of their surroundings. Students will challenge their own and others' presumptions of human psychology with topics such as conformity, attitudes, prejudice, attraction, and social cognition. Students will apply social psychological research and concepts to current events and their own experiences. Prerequisite: PSYC-101

PSYC/COMP 265 Cognitive Science Cognitive science is the interdisciplinary study of mind and the nature of intelligence. It is a rapidly evolving field that deals with information processing, intelligent systems, complex cognition, and large-scale computation. The scientific discipline lies in the overlapping areas of neuroscience, psychology, computer science, linguistics and philosophy. Students will learn the basic physiological and psychological mechanisms and computational algorithms underlying different cognitive phenomena. This course is designed mostly for psychology and computer science students, but other students interested in interdisciplinary thinking might take the course. Prerequisite: PSYC-101 or COMP-105 All course prerequisites must be met with a minimum grade of C-.

PSYC 270 Feminist Psychology of Women This course places women at the center of inquiry, both as researchers and participants. Specific topics include: silencing of women in the classroom, pathologizing of women, sex bias in diagnosing, feminist developmental theories, acquaintance rape, feminist response to Freud, myth of beauty in adolescence, leadership, women's sexuality, psychological consequences of incest, rape, and other forms of violence against women. Prerequisite: Take 2- Psychology courses. Course is Restricted to First-Year and Sophomores

PSYC 275 Introduction to Psychopathology This course provides a sociocultural understanding of common forms of human psychological distress. We will rely heavily on listening to the voices of people who have experienced psychological disruptions in their lives: we will rely on case studies, journal articles, books, weekly documentaries or films, small and large group class discussions, and panels. Prerequisite: PSYC-101

PSYC 280 Cognition Study of information processing and utilization. Topics include attention, perception, imagery, memory, knowledge structures, language comprehension and production, problem solving, and decision making. Prerequisite: PSYC-101

PSYC 285 Psychology of Music An introduction to the psychology of music, providing an overview of research literature on such topics as the emergence of basic musical abilities, development of advanced skills (practice, sight-reading, performing, and conducting), and music perception and cognition. A general knowledge of musical terms and concepts will be assumed and not reviewed in the course. Prerequisite: PSYC-101 and at least 5 years of instrumental or vocal training. Open to Sophomores, Juniors and Seniors. Consult professor if you have questions.

PSYC/BIOL 290 Animal Behavior with Lab The study of animal behavior seeks to describe and explain behavior on multiple levels - from underlying physiological causation to evolutionary origin. Using examples from barnacles and worms to birds and mammals, this course examines behaviors such as orientation, communication, foraging, territoriality, reproduction and sociality. Through lectures, research literature and laboratory studies students will build proficiency in designing, conducting, analyzing and evaluating behavioral studies and gain new appreciation for the subtlety and complexity of behavior and its application to fields such as animal welfare and conservation. Prerequisite: PSYC-101, or BIOL-112, or BIOL-123 All course prerequisites must be met with a minimum grade of C-

PSYC 295 Health Psychology This course is designed to provide students with a comprehensive foundation in health psychology including the theories, concepts, methods and application of health psychology. The course will examine the interrelationship between health, illness, cognition, behavior and emotion. Prerequisite: PSYC-101

PSYC 295 Psychology of the African American Experience In this course, we will consider a range of theoretical and methodological approaches that scholars have developed to conceptualize the thoughts, styles, and behaviors of African Americans. We will begin by discussing the historical foundations and core tenets on which the field of African American psychology is based. We will then explore a range of topics that pertain to the psychological experiences of African Americans such as academic achievement, socialization, racial identity, religion/spirituality, gender, racism and discrimination and mental health. Our class discussions will integrate current topics and controversies that are at the forefront of the African American experience. Prerequisite: PSYC-101

PSYC 301 Introduction to Research Methods in Psychology This course is designed to provide you the skills necessary for designing, conducting, evaluating, and communicating psychological research. We will consider the theoretical and methodological basis for the generation of knowledge of human behavior, combining lectures, activity-based laboratory sessions, and independent research projects to accomplish this goal. You will have hands-on opportunities to observe human behavior, create measurement tools, conduct correlational studies, and analyze data using SPSS/PASW (a statistical software package). Finally, you will learn to write up scientific reports using the style of the American Psychological Association. Open to Sophomore Psychology Majors or by Instructor permission. Prerequisite: PSYC-101 and Sophomore Psychology Majors Only

PSYC 310 Organizational Behavior Introduction to and survey of topics in industrial and organizational psychology with an interdisciplinary emphasis; application of concepts, findings, and theories to organizations of all kinds. Prerequisite: PSYC-101 or Junior/Senior Standing.

PSYC 330 Interviewing and Narrative Analysis With Lab This course examines methods for investigating the narrative structures people use to interpret their experiences and integrate their lives. It will consider how "narrative knowing" differs from scientific theory, figurative language from literal, and symbolic representation from conceptual. Readings will cover the theory and practice of interviewing, psychological research on figurative language and narrative schemata, and plot-line and structuralist techniques of narrative analysis. Student assignments will consist of conducting, analyzing, and writing about interviews. Prerequisite: PSYC-101

PSYC 340 Cultural Psychology Theories of how culture shapes thought, feeling, and the development of personality. Critical survey of topics in cross-cultural psychology, including culture and personality, child rearing, psychopathology, cognition, modernization, and underdevelopment. Prerequisite: PSYC-101 and Junior or Senior Standing or Instructor Permission

PSYC 390 Experimental Methods W/Lab Laboratory course emphasizing problems of experimental design and data collection, application of statistical techniques, and reporting of experimental findings in different content areas of psychology (e.g., social psychology, developmental psychology, learning, cognition, and biopsychology). Prerequisite: PSYC-101 and One of the following: MATH-105 MATH-260 MATH-261 or ECON-160. Junior Psychology Majors only.

PSYC 410 Theories of Personality Survey of contemporary theories of personality and related research. Prerequisite: PSYC-101 and one additional PSYC course and Junior or Senior Standing

PSYC 411 Psychology and Law The purpose of this course is to provide students with a broad overview of the conceptual and empirical issues involved in attempting to apply psychological knowledge within the legal system. The ways in which psychology applies to the legal system encompasses a wide array of topics, and we will focus on several key areas where psychological research intersects with the law. Topics include the use of scientific evidence in a legal setting (e.g. amicus briefs, expert testimony), eyewitness evidence (children and adults), interrogations and confessions, and jury decision making. Prerequisite: PSYC-101 and one other PSYC course. Junior or Senior standing or by instructor permission.

PSYC/COMP 415 Computational Neuroscience Study of mathematical models, computational algorithms, and simulation methods that contribute to our understanding of neural mechanisms. Brief introduction to neurobiological concepts and mathematical techniques. Both normal and pathological behaviors will be analyzed by using neural models. Prerequisite: PSYC-101 and MATH-113 and one additional PSYC course. All course prerequisites must be met with a minimum grade of C-. Junior or Senior Standing.

PSYC 420 Learning Examination of the ways in which behavior changes as a result of experience in laboratory and natural settings. Surveys theories that account for these behavioral changes. Prerequisite: PSYC-101 and one additional PSYC course. Junior or Senior Standing only.

PSYC 422 Consciousness and Dreams This course examines consciousness and dreams from a variety of different psychological perspectives, including cross-cultural, psychoanalytic, biological and cognitive approaches. Using a range of scholarly works in combination with each student's recorded dreams and thought experiments. Students will develop their own understanding of their dreams and consciousness. Prerequisite: PSYC-101 and PSYC-226. Junior or Senior Standing only.

PSYC 424 Psychopharmacology This course will provide an overview of psychotropic drugs, both legal and illegal. An overview of psychopharmacology, behavioral pharmacology, physiological effects on the brain, social influences, and controversial issues related to drug use and abuse will be explored. Prerequisite: PSYC-101 and PSYC-226. Junior and Senior Standing only.

PSYC 450 Counseling Psychology: Theory and Practice The focus of this course is the application of eight counseling psychology theories. Prerequisite: PSYC-101 and one additional PSYC class. Senior Psychology majors only.

PSYC 460 Social Development Upper-level course exploring social development. The first module focuses on topics such as development of social skills, play and play environments, aggression, peer acceptance and peer rejection, and school bullying. The second module focuses on relationships from adulthood through old age. Prerequisite: PSYC-101, PSYC-210, and junior or senior standing

PSYC 465 Advanced Psychology of Sexuality In this course, we will consider the study of sexuality and sexual development from a psychological perspective. From this perspective, I will present ideas, theories, and concepts of gender and sexuality that are informed from the study of human behavior. The course aims to aid your critique of existing scholarship while creating your own framework for conceptualizing issues surrounding notions of sexuality. This course covers a wide variety of topics concerning the psychology of human sexuality. For example, we will consider sexual anatomy, communication about sexuality, queer identities, polyamory, and pornography. Prerequisite: PSYC-101 and one additional PSYC course. Junior or Senior Standing only.

PSYC 470 History and Systems of Psychology In this class we will trace the philosophical and scientific roots of psychology, focusing on the years 500 B.C. to 1920. Prerequisite: PSYC-101 and one additional PSYC course. Senior Psychology majors only.

PSYC 480 Psychology of Language and Mind Psycholinguistics is the study of the psychological processes that give rise to human language. This class will provide a primer to the field of psycholinguistics as well as explore the relationship between our capacity for language and other cognitive processes. What is language? Where does language come from? How do we learn a first and second language? Does the language we speak affect the way we think? Prerequisite: PSYC-101 and PSYC-280. Junior and Senior Standing only.

PSYC 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Public Policy and Urban Affairs

Professor: Stull (Director)

Centered in the social science division, the concentration in public policy and urban affairs represents an interdisciplinary approach to the study of social problems and public policy in contemporary industrial societies. It encourages students to focus on and get involved in the significant policy-related problems confronting their generation, prepares students to think from the perspective of policy makers, and promotes public service. The concentration is open to all students, but naturally complements study in anthropology- sociology, economics, and political science.

Combining concern for both local and national policy, this concentration seeks to take advantage of the College's urban setting as well as opportunities for internships and study around the country. At the local level, in part through the Center for Civic Engagement and various service learning classes, we support study, research, and internships in metropolitan Kalamazoo. The College's Study Away programs, together with its career development and SIP, provide openings for work and research in national centers. (Limits apply to the number of participants in the Study Away programs.) Off-campus experiences will serve both to develop practical experience and to promote insights based on comparisons between different approaches to social problems.

The Concentration in Public Policy and Urban Affairs

Number of Units

Six units are required.

Required Courses

Four core courses, one from each of the following areas:

Economics:

ECON 235, 265, 275, or 280

Political Science:

POLS 105, 225, 229, 230, or 310

Anthropology-Sociology:
ANSO 205, 235, or 270

Philosophy
PHIL 105, 108, 210, or 211

Electives

Students must complete two additional courses – one must be outside their major.

Students may use a second course from the above list of core courses or any of the following:

ANSO 220 The Family
ANSO 236 Race and Racism
ANSO 310 Research for Social Change
ANSO 330 Class, Status, and Power
ARTX 295 Architecture, Urbanism, Identity
PHIL 211 Philosophy of Law
POLS 220 Voting, Campaigns, & Elections
POLS 315 Public Opinion: Race, Class, and Gender
GERM 202/SEMN 241 Reading European Cities: Istanbul, Vienna, Berlin
SEMN 499 Social Justice and the American City
SEMN 401 Energy and Environmental Policy

Experiential Requirement

Students must also engage in either a sustained volunteer experience, off-campus internship, or research project providing first-hand experience with a contemporary social problem.

Religion

Professors: Anderson, Haus, Maldonado-Estrada, Petrey (Chair)

Religion is a powerful and dynamic force, influencing and shaping the world in which we live in diverse and complex ways. In the Department of Religion at Kalamazoo College, students learn about what it means to define religion as a field of inquiry. We offer traditions-based courses in Christianity, Judaism, Islam, Buddhism, Hinduism, other religions of South and East Asia, and religious traditions in the Americas. We also offer courses on particular questions and methods, including religion and science, sexuality studies, women and feminist studies, material culture, transnationalism, and commodification. In all of our courses and in our own areas of research, we are committed to investigations of religion and religious experiences from a variety of angles, including questions of theology, history, linguistics, sociology, anthropology, texts, and philosophy. We examine religion in a comparative context, recognizing that religion reflects and is braided throughout economic, cultural, and political dimensions of human experience. The study of religion is challenging and invigorating because of the intersections and exchanges that unfold across different disciplines, traditions, and faith commitments.

Requirements for the Major in Religion

Number of Units

Eight units are required, not including the SIP. The major does not require a comprehensive exam nor a SIP in Religion.

Required Courses

Majors must complete at least four elective courses at the 200-level or above, in addition to both of the following courses:

RELG 390 Junior Seminar in Religion
RELG 490 Senior Seminar in Religion

We expect students to explore the diversity of religious traditions in close consultation with an advisor in the department.

Requirements for the Minor in Religion

Number of Units

Six units are required.

Required Courses

We expect minors to determine their array of courses in consultation with a member of the department. Minors must take at least three elective courses at the 200-level or above, and at least one of the two following courses:

RELG 390 Junior Seminar in Religion
RELG 490 Senior Seminar in Religion

Religion courses

RELG/HIST 107 Introduction to Jewish Traditions This course explores the development of Judaism from its ancient origins until the present. We will discuss the biblical foundations of Judaism and the impact that different historical contexts have produced on its rituals and beliefs. This approach raises a number of questions, which we will keep in mind throughout the course: What is Judaism? Who are the Jews? What is the relationship between Judaism and "being Jewish"? How have historical circumstances shaped this relationship? What has changed and what has stayed the same, and why? The class will address these questions through discussions and readings.

RELG 110 Introduction to the New Testament This course explores the writings of the New Testament, their relationship to the history and culture in which they were produced, and their relevance to more recent issues in modern religious discourse. We will cover a range of topics, including the historical perspective on who Jesus was, the impact of Paul on Christianity, the formation of the canon, political religion in the Roman empire, ethics, and gender. We will apply several modern approaches as well as survey at various points the "afterlife" of the Christian scriptural traditions in Christianity. No prior knowledge of or experience with the subject is assumed or required.

RELG 111 From Jesus to Christianity This class critically engages the various scholarly narratives that describe the rise of Christianity by taking a close look at the texts used to construct these narratives, often with particular attention to the role of Christian women. How did a single "Christianity" emerge from a welter of alternatives and possibilities? Or did it? How did thinkers from Paul to Saint Anthony navigate the diverse teachings, rituals and social practices associated with Jesus of Nazareth and his followers to produce a religious movement that was oppressed by Roman imperial authority, but later came to occupy that authority?

RELG 120 Religion in the Early U.S. This course is an introduction to the early religious history of the part of the Americans that became the United. The time periods covered in this class are the 17th, 18th & 19th centuries. Special attention is given to Native American displacement, the religions of enslaved West Africans, and the organizational activities of Euro-Americans.

RELG 121 Religion in the Modern U.S. This course is an introduction to the religious landscape of the United States from the latter part of the 19th century through the contemporary period. Focus is placed on: the struggle of various Native American groups to keep their land and their traditions; Jim Crow and the Civil Rights fight; immigration; and the commodification of holidays and religious practices. U.S. Religious History I is NOT a prerequisite of this class.

RELG 122 Religions of Latin America Using an array of primary and secondary materials, we will look into the myriad of dynamics that make up the religious histories and narratives of Latin America. This course has been organized into seven loosely chronological themes, which will touch on various parts of the geographic region. These themes are: 1 - Pre-Columbian Religions; 2 - Encounter & Conquest; 3 - Slavery & Religion; 4 - Rebellion & Revolution; 5 - Progressive Catholicism; 6 - Protestant Challenges; and 7 - Continuous Diversity.

RELG 140 Hindu Traditions This course is a basic introduction to the myriad of rituals, texts, practices, values and beliefs that make up Hindu Traditions in South Asia and beyond. This class covers early Hindu history and the various textual traditions, focuses on practices and divine interactions in the everyday lives of Hindus, and examines some of the historical and contemporary issues of conquest, integration, caste, migration and globalization.

RELG 150 Buddhism in South Asia An examination of the historical development of the textual traditions, symbols, doctrines, myths, and communities of Buddhism throughout South Asia. Explores Buddhism's rise and decline in India and its development in Sri Lanka, Tibet, and other Southeast Asian countries through the modern period. This course uses primary sources as well as secondary, and students learn various ways to read texts in conjunction with other types of sources that include inscriptions, art historical materials, and archeological sources.

RELG 160 Hebrew Bible This course explores the writings of the Hebrew Bible (Christian Old Testament and Jewish Tanak), their relationship to the history and culture in which they were produced, and their relevance to more recent issues in modern religious discourse. We cover a range of topics, including divine encounters, worship practices, sacred space, political religion, archaeology, ethics, and gender. We apply several modern approaches as well as survey at various points the "afterlife" of the Hebrew scriptural traditions in Judaism and Christianity. No prior knowledge of or experience with the subject is assumed or required.

RELG 170 Muhammad and the Qur'an In this course, we focus on the rise of Islam as a religious tradition. We ask the following questions: Who was Muhammad? How did Islam come to emerge as a defined religious tradition? What traditions influenced the establishment of the early Muslim community? What is the Qur'an? The final question asked in this course is how we should study Islam. This course examines pre-Islamic origins in the Middle East through 692.

RELG 200 Religion and Science This course is a historical and contemporary look into the relationships between religion and science. Beginning with the development of science as an independent system of inquiry and also with the evolving and multiple definitions of religion, this class will trace the contours, the moments of cooperation and the fault-lines of discourse between religion and science. This class seeks to cultivate nuanced and more subtle understanding of religious and scientific viewpoints, and the ways in which they intersect.

RELG 201/ARTX 205/SEMN 205 Religious Art and Material Culture This course explores the relationship between religion and art. The arts, whether in the form of painting, sculpture, architecture or kitsch, are often vehicles for religious devotion and expression. At the same time, devotion to a divine figure has inspired some of the world's most beautiful pieces of art. Religion and art form a symbiotic relationship which can simultaneously be in tension and/or cohesive. Looking at various primary and secondary sources from a variety of religious traditions, we explore this tension and cohesion, which can be a window into larger societal and cultural issues. Given that we live in a mechanical age, special attention will be paid to the material production of religious kitsch and the place of religious art in the market. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

RELG 202/SEMN 230 Same Sex, Gender, and Religion This sophomore seminar explores the intersection of religions, same-sex affection/love/relations, and the category of gender. At the most basic level we examine what different religions have to say about sexuality, in particular, non-heterosexualities. We look at the role that gender plays in these constructions of these sexualities, and we return to our starting point to analyze the role of religions in these constructions of gender and same-sex sexualities, affections, love, and/or relations. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

RELG 204 Feminist Studies in Religion This course explores questions that lie at the intersections of the ideas about women, men, and gender in the academic study of religion. We examine the transformation of scholarship about religion based on feminist studies in of religion. We look first at the academic study of religion, and then at the experiences of women and men in different religious traditions, and move to more complex questions about the ways in which the lives of women and men are shaped by gendered categories. We pay particular attention to issues of identity, voice, history, and agency. Prerequisite: Previous coursework in Religion is desirable, but not required.

RELG 210 Sex and the Bible This course is about sex and interpretation, focusing primarily on how Christians have interpreted the Bible around questions of human sexuality. The questions that we will consider are: What does it mean to say a particular view of sexuality and sexual behavior is "biblical" given the sheer variety of possible interpretations? How have changing notions of human sexuality affected the way that the biblical text is understood and deployed? We will explore these questions by reading key biblical texts from the Hebrew Bible and New Testament and their interpretation by thinkers from antiquity up to the present. Topics to be covered include marriage, gender, desire, same-sex relationships, and sexual renunciation. Prerequisite: Previous course(s) in the Department of Religion recommended but not required.

RELG 211 Religion From Alexander to Constantine This course examines various forms of ancient religion and worship in the classical world. Topics included are concepts of divinity, varieties of religious space and practices, distinctions between civic and private worship, religious festivals and rituals, attitudes towards death and afterlife, importations of Near-Eastern and African religions, and political and philosophical appropriations of religion. Specifically, the course will focus on classical Greek and Roman religion, new religious movements, Judaism, and Christianity within classical culture. Students will become acquainted with a variety of texts, archaeological sites, and religious art and artifacts. (This is a designated Greek and Roman literature or culture course in Classics.)

RELG 212 Contemporary Biblical Studies Since the rise of the modern era in the 18th c., scholars have read the Bible as a historical text that can reveal something about ancient history. This method portrayed itself as an objective historical alternative to the theological readings informed by tradition and dogma. In the postmodern era, scholars have begun to read the Bible differently, revealing not only the political interests of so-called objective history of the Bible, but also articulating new ways of readings these texts. This course examines a bit of the history of biblical studies, but pays particular attention to feminist, queer, African American, and post-colonial biblical studies from recent decades. Prerequisite: RELG-110 RELG-111 or RELG-160

RELG/SEMN 213 Christianity & the Family This course critically addresses contemporary debates about the centrality of the family in Christian teaching through a historical and cross-cultural survey. What is the relationship between Christianity and the various approaches to kinship and family in different cultures in different historical contexts? Where did our contemporary ideas about the family come from and what are Christians saying about new forms of kinship? From the Bible to present day debates about divorce, sex, and same sex marriage, Christians have never embraced a single understanding of the family, but rather have been influenced by broader cultural shifts in how kinship is done. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

RELG/HIST 218 American Jewish Experience This course will explore the religious, social, political, cultural, and economic history of the Jewish people in America from the first settlement until the present. The major themes of study will focus upon the development of Judaism in America. We will take into account a number of historical factors that shaped that development: the economic, social, and political evolution of American Jewry and its institutions; Jewish immigration to the United States and its consequences; American Jewish self-perception; and the relationship between Jews and non-Jews in American society. Assignments will draw upon a wide range of materials, from secondary historical studies and primary documents to fiction and film.

RELG 220 Catholicism in the Americas This class is a history of the diverse groups of people and practices that make up the various Catholic communities of the Americas. We will examine Catholic history, life, practices and beliefs through four sections: Colonialism, Saints & Syncretism; Immigration & Rebellion; Social Justice; and the Church in Crisis. Throughout this class, special attention will not only be given to the hierarchy, but to the laity - how do Catholics live and how do they practice their devotion in their day-to-day lives. By taking an Americas approach we will be tapping into a larger framework of Catholic history and seeing the ways in which Catholicism shaped the Americas in the past and is an important part of American life in the present.

RELG 221 Black Religious Experiences in the Americas When enslaved people were forced over the Atlantic from West Africa to the Americas, they did not arrive as blank slates. While the Middle Passage was horrific and tragic, humans are resilient, and during the darkest of times, divinity, rituals, practices and beliefs are not only questioned but also embraced. This class will look at which religious traditions were rejected and which were embraced among the enslaved of the Americas. In order to do this, we follow the journey of these slaves, from West Africa to the Caribbean and to the plantations and the urban centers of the Americas. We will also examine the religious, economic, social, political and liberative changes that Black Americans experienced after the various independence movements in the Americas through to the contemporary period. Prerequisite: Sophomore standing.

RELG 250 Buddhism in East Asia An examination of the historical development of the textual traditions, symbols, doctrines, myths, and communities of Buddhism throughout East Asia. Explores the introduction and establishment of Buddhism in China, Korea, and Japan, and compares the different schools of Buddhism that developed in dialogue with Daoism and Shinto.

RELG 251 Buddhas and Buddhist Philosophies This course begins with an examination of the biography of Gautama Buddha, the founder of Buddhism. Focusing first on the traditions of Theravada Buddhism, we explore the construction of the Buddha's life story with attention to the Buddha as a model for the attainment of nirvana. We turn next to the explosion of Buddhas in Mahayana Buddhism and to the fundamental categories of the teachings of the Buddha. Questions at the center of this course are: Why have the teachings changed over time and throughout the spread of Buddhism throughout Asia? What remains "Buddhist" throughout the centuries? We examine these questions by examining the teachings of Theravada and Mahayana Buddhism using primary sources. Prerequisite: One previous RELG course or Instructor permission.

RELG 260/CLAS 261 Judaism in Antiquity This course examines the history and literature of Judaism from the Second Temple Period to the beginnings of Rabbinical Judaism (400 BCE - 400 CE). This course explores the diversity of ancient Judaism and explores themes of religious and cultural identity. We shall consider the political and religious implications for Jews living under the Persian, Greek, Roman, and Christian empires, while briefly ruling themselves in the Hasmonean period. We will read a series of primary sources in translation from ancient Jews and non-Jews, as well as modern scholarly treatments of these works.

RELG/HIST 263 Jews in a Changing Europe, 1750-1880 Between 1780 and 1880 enormous changes took place in Jewish religious, political, social, intellectual, and economic life. These changes worked in tandem with developments in general European life to create new forces within Judaism and new ways of looking at the connections between Jews. In this course, we will study these developments as they affected the Jews on the European continent. In so doing, we will explore their consequences for both Jews and non-Jews, and the issues and questions they raised.

RELG/HIST 264 Jewish Revolutions: 1881-1967 Between 1881 and the period immediately following the Second World War, the world's Jews experienced momentous demographic, religious, political, economic, and social changes. These changes in turn shaped their relationship to non-Jews with whom they lived. This course will study the context of change across the globe from Europe and America to the Middle East and North Africa. Through primary and secondary documents, we will explore the forces that produced these changes and the results they produced for both Jews and non-Jews.

RELG/HIST 265 Zionism: From Idea to State This course explores the origins, development, and manifestations of Zionism. The course examines the transformation of traditional religious conceptions of the connection between Jews and the Land of Israel (Palestine) into a nationalist ideology in the 19th century. This transformation entailed parallel changes to the idea of Jewish peoplehood. Through the use of primary documents we will follow these trends through intellectual, religious, social, and political changes that culminated in the establishment of the State of Israel in 1948.

RELG/HIST 267 Women and Judaism This course explores the religious and social position women have historically occupied in Jewish society. We will discuss religious practice and theological beliefs as well as social and economic developments as a means of addressing questions such as: What role have women played in Jewish tradition? How are they viewed by Jewish law? How has their status changed in different historical contexts, and why might those changes have taken place? What are contemporary ideas about the status of Jewish women, and how have these ideas influenced contemporary Jewish practices and communal relations? What do the historical and religious experiences of Jewish women teach us about the way that Judaism has developed?

RELG/SEMN/HIST 268 Jews on Film It will examine themes in Jewish history and culture as expressed through the medium of film. Through readings, lectures, and class discussions, students will explore issues such as assimilation and acculturation, anti-Semitism, group cohesion, interfaith relations, Zionism, and the Holocaust. We will consider questions, such as: How are Jewish characters portrayed on film? Which elements of these portrayals change over time, and which remain constant? How do these cultural statements speak to the historical contexts that produced them? What choices do filmmakers make regarding the depiction of Jewish life, and how do those choices influence perceptions of Jews in particular, or minorities generally? This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

RELG 270 Islam in the Modern World This course examines the diversity of Islam throughout the world, keeping in mind that there are many different faces of Islam. This course presumes some familiarity with the fundamentals of Islam -- Sunni and Shia -- as well as Sufi traditions, with an examination of the Sufi mystical traditions and the roles of women. Finally, we examine the impact of colonialism on Islam in the Middle East as a way to explore the historical and religious contexts of our understanding of Islam today.

RELG/HIST/AFST 274 Islam in Africa This course explores the spread of Islam from the Arab peninsula to the African continent in the seventh century through the nineteenth century and limns the factors which facilitated this advance. It examines the methods and principles of Islam and how the religion affected the life styles of its African neophytes and adherents. As a result of the interaction between Muslim and African civilizations, the advance of Islam has profoundly influenced religious beliefs and practices of African societies, while local traditions have also influenced Islamic practices. Muslims were important in the process of state-building and in the creation of commercial networks that brought together large parts of the continent. Muslim clerics served as registrars of state records and played a role in developing inner-state diplomacy inside Africa and beyond.

RELG/HIST 275/SEMN 274 African Christianity This course explores the complex and disparate trends of Christianity in Africa since the first century C. E. It highlights Africa's role in the development and growth of Christianity as a global religion. Prerequisite: Sophomores Only

RELG 280 Spirituality, Money, & Travel Travel and spirituality are well-established companions. The practice of pilgrimage is found on every continent, and taking a vacation to a particularly exotic locale to look at Buddhist temples, for example, is an increasingly common practice. Furthermore, travel is commonly assumed to be a function of economic surplus. Yet in the 1970s and subsequent decades, "backpack travel" emerged as low-cost alternatives, particularly to developing countries. This course examines the development of travel within a contemporary understanding of developing neoliberal economies and the academic study of spirituality and religion, analyzing the emergence of spiritual tourism and the costs for such enterprises.

RELG 295 Religion & Sexuality in the US Using theoretical works, historical case studies, and present-day events, we explore how ideas about religion and sexuality have been constructed in U.S. history, how religion and sexuality shape one another, and how the regulation of religion and the regulation of sexuality in U.S. society are intertwined. As we examine our case studies, which move from the colonial era to the present, we will also explore some of the key terms that guide the studies of religion and sexuality, including gender, ritual, and confession. By the end of the course, students will have a familiarity with both theoretical and historical elements of the study of religion and sexuality. Prerequisite: One previous course at the 100 level in Religion highly recommended

RELG 295 Race, Religion, and Migration in the US This course explores religion, race, and migration in North American history. Through a series of case studies and theoretical readings, we will explore how ideas about race and religion shaped American understandings of who had a right to migrate from place to place; whose movements were worthy of mention in historical accounts, and which movements were seen as good or bad, legal or illegal, noble or menacing. Though our focus will be on the United States and its controversies surrounding migration, we will also seek to historicize how U.S. boundaries came to be fixed where they are today, and how religious and racial groups span those boundaries. Prerequisite: One previous course at the 100 level in Religion highly recommended.

RELG 295 Love in a Dead Language In the religious and cultural history of South Asia, poetry, drama and epic were one of the primary means by which religions were lived and imagined. There was no distinction between "secular" and "religious" literature; the same poem that one might read for pleasure, another would read to cultivate devotion to god or learn how to live an ethical life. The 'ancient authorities' of the Hindu tradition declared Four Goals proper for a human life: love, profit, duty and liberation. This course focuses on the first goal, love (kama), and the literature of love written in Sanskrit during the early medieval period. This course will examine five major genres of Sanskrit literature-epic, drama, extended poetry, poetic miniature, and song. Prerequisite: One previous course at the 100 level in Religion highly recommended.

RELG 295 Race and Islam in America This course traces the experiences of Muslims in North America from the sixteenth century to the present, with special focus on Islam in America after 9/11. It places particular emphasis on how Muslims have shaped American life and culture, how Muslim communities have been racialized in U.S. discourse, and how Muslims have sought to re-define their racial and religious identities in a U.S. context, particularly after the rise of the War on Terror.

RELG 295 Religion and Social Struggle This course examines twentieth and twenty-first century social struggles through a religious lens. Karl Marx famously described religion as the "opiate of the masses." In practice, however, religion has been a resource for resistance as well as a mechanism of control. Drawing on case studies from the U.S. and Latin America, this course analyses how both sides of a conflict understand and deploy religious concepts. This course will examine how power and religion intersect, how those outside power structures mobilize religion, and how religions change in different conditions. This course will also analyze such contemporary movements as the War on Terror and Black Lives Matter.

RELG 390 Junior Seminar in Religion The study of religion is comprised of a set of intersecting questions and issues with its roots in the nineteenth century. This course is designed to introduce students to those questions, to wrestle with those questions again. There is no single definition of religion, but there are conversations and questions that rest at the heart of the academic study of religion. The goal of this course is to learn how to consider religious experiences as aspects of dynamic and evolving interactions between thought and action, the immediate world and that which lies beyond, and individuals and communities. A significant part of the course involves writing a research prospectus to best prepare the student to write a SIP in the Religion Department. This course is required for religion majors in their junior year and for students who want to write their SIP in the Religion Department. Minors are required to take either this course in their junior year or RELG490, the Senior Seminar in Religion, in their senior year. Prerequisite: Two courses in Religion and Junior standing or permission

RELG 490 Senior Seminar in Religion Students examine a variety of theories of religion and use them to consider retrospectively some of the topics already considered in their various courses undertaken as part of their concentration. Designed as the capstone seminar for majors and minors, to be taken during the senior year. Required for religion majors in their senior year. Minors are required to take either this course in their senior year or RELG390, the Junior Seminar in Religion, in their junior year. Prerequisite: Senior Religion majors and minors or permission of instructor

RELG 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Shared Passages

The Shared Passages Program is a curricular thread that integrates features of the K-Plan. Required in the first, sophomore, and senior years, Shared Passages courses provide a developmental, pedagogical, and intellectual arc to the liberal arts experience and create a "backbone" to an effective, flexible liberal arts education in which the whole is greater than the sum of its component parts.

First-Year Seminars

First-Year Seminars constitute the gateway to the K-Plan and to college life for entering students and serve as the foundation of the Shared Passages Program. Offered in the fall quarter, these Seminars are designed to orient students to college-level learning practices, with particular emphasis on critical thinking, writing, speaking, information literacy, and intercultural engagement.

First-Year seminars

SEM105 FYS: Music and Freedom This course will interrogate the complex yet tantalizing relationship between music and freedom. What does freedom in music mean? Is liberation found in lyrics that express a challenge to oppression? Can transcendence be summoned from sound and improvisation? Are artists emancipated when they follow their own voice at the expense of profit and even their own fans? Has freedom been extinguished from music and replaced with a cheap illusion, as Theodor Adorno believed? On our search for answers, we'll talk about protest, politics, aesthetics, film, identity, spirituality, and other topics as we seek a richer, more critical understanding of the sounds and songs that allow us to feel free.

SEM106 Reinvented: Urban Space, Capitalism, Art The historical processes of urbanization and industrialization forever altered modernity's cityscapes; however, the effects of capitalism-consumerism, leisure time, publicness, and spectacle-also worked to reshape experiences of everyday life. This course examines the relationship between urban space, capital, social relations, and works of art that try to negotiate these rapidly changing sites of modernity. Taking late-nineteenth-century Paris as our case study, we ask questions about how Impressionist artists attempted to "picture" the anonymity and ennui of modern boulevard life-its rapidity and relentless newness-and how their radical pictorial vocabularies mediated the uncertain gender, sex, and class relations in Paris, "the capital of the nineteenth century." As we consider works of art that challenge capitalism and its bourgeois morality, we will study paintings by Manet, Degas, Cassatt, Caillebotte, Monet, and Lautrec, among others and ask difficult questions about the imbalances of power in modernity's urban playground. Along the way, we will reflect on how representations of urban life and space itself can become sites of living memory. Finally, the course will ask students to rethink their own spatial and social experiences in urban geographies under late capitalism and urban renewal. How do we re-member and attempt to "fix" or "picture" the fluctuations of our everyday lives in digital representations and social media?

SEM107 Fys: Memories, Secrets and Lies Why do people write about themselves? Why do we love to read "confessions"? Who gets to publish their life story and why? We take it for granted today that people love to talk about themselves, but our very concept of the "self" has changed throughout history - as well as the possibilities for narrating one's life story. This course explores major issues and methods in the field of autobiography through a survey of first-person texts. We will investigate issues of identity, subjectivity, memory, and representation, and the problem of "truth" and "authenticity" in autobiographical writing. Readings span a wide range of life writing, including classical autobiographies, war memoirs, a graphic novel, and diaries. The authors of these texts include well-known artists and writers, as well as "ordinary" people who write to explore, manage, and represent themselves. Using these texts, we will analyze how literature reflects both the individual and her/his society. The course also includes a visit to Kalamazoo College Archives and the Kalamazoo Valley Museum.

SEM108 FYS: Plato to Playdoh: Great Math Ideas The ancient Greeks established some of the foundations of mathematics. In particular, their contributions to the field of geometry are quite well-known - who hasn't heard of the Pythagorean Theorem?! But mathematics didn't stop evolving then (and no, it hasn't stopped evolving yet!). It is a dynamic subject and the great ideas of geometry morphed into a branch of mathematics called topology. Enter playdoh. While protractors and compasses may be the tools of geometry, playdoh is a more appropriate tool for studying topology. Of course, there have been many fascinating developments in mathematics since the ancient Greeks, and we'll be exploring several of them with an eye towards establishing some of the themes that make mathematics universal. In addition to talking about math, we'll be doing math. You don't have to be good at the subject to take this course, but you should like it. Having had some math in high school, including algebra and pre-calculus, would be desirable.

SEM109 FYS: Imagining the American West With its iconic landscape, wagon trains, buffalo, gunslingers, tepees, and saloons - the idea of the American West looms large in our cultural memory and the country's identity. This seminar explores the myths and legends of the West in comparison to the historical record. Emphasis is given to popular culture narratives, including Dime novels, paintings, photographs, films, and oral traditions. While exploring the topics of racism, migration, the role of women, religion, spirituality, and technology, we discover how these narratives became the stories we tell.

SEM110 FYS: What's the Universe All About? Is the universe infinite? Is there life elsewhere in the universe? How did the universe begin? How did our moon form? When will our Sun die out? In this course you will write and talk about our current understanding and lack of understanding of the biggest questions about the universe and the things in it such as galaxies, stars, black holes and our own solar system. The focus will be on what we know and how we know it, and on how to communicate this information to a variety of different audiences such as children, people with no scientific background, people from different cultures, and your fellow students. We will also explore to what degree culture informs what questions we ask and how we think about them.

SEM111 FYS: Small Stuff, Big Questions Temple foundations, charred seeds, buried gold, bog bodies: archaeologists use the physical remains of ancient worlds and ancient peoples as a window into ancient cultures, ancient societies, and ancient minds. But how are people reflected in their material worlds? Can examining 'stuff' help us understand actual people - and what kind of questions can we ask of 'stuff' - ancient and modern - and what sorts of answers will it give us about ancient people (and ourselves)? In this seminar, we will try out different archaeological and anthropological methods to see how we can use material evidence - "stuff" - to help us think up, ask and answer the Big Questions we have about identity, culture, patterns of thought and patterns of behavior in human history. Using case studies from the Roman world and from our own physical and digital environments, we examine how everything from the layout of our streets to the images we choose to 'put up' (digitally or physically), from the contents of our sewers to the remains of human bodies themselves, can tell us a story about ancient and modern society and ancient and modern 'selves.' Each week, we'll look at the self and cultural identity through a slightly different lens, and we'll examine how different approaches to culture and material culture can open up new ways of understanding both ancient and modern identity.

SEM112 FYS: Make It Stick: How Learning Works How do people learn? Perhaps more importantly, how do you learn? The fact that you are now a K student indicates that you are able to learn and retain (at least for some time) a vast amount of information. But are you learning in the most efficient way? Are you able to remember what you learn for a long time? Are you able to transfer your learning to new situations? Are there ways to identify principles that guide such deep learning? If so, can we use these principles to become "better" learners? In our search for answers to all these questions we will study different theories of learning, the brain, instructional design, and how other cultures teach and learn. The course will use activities, experiments, discussions, and personal reflections to explore these issues, with the ultimate goal for you to become a more "effective" learner (and hence a more successful K student).

SEMN 113 FYS: Don Quixote as 'Player One' What did virtual reality look like before modern technology? What makes a virtual world feel just as 'real' - or more real - than real life? Cervantes' masterpiece, *Don Quixote*, is considered by many to be the first truly modern novel, but its historical and cultural context (Seventeenth-Century Spain) can seem very distant indeed. In this course, students will use contemporary theories from video game studies in order to explore this work with fresh eyes. Concepts like epic space, flow, medievalism, migration, virtual economies and simulation will allow us to connect with this iconic literary figure. This course is perfect for those students interested in literature, Medieval and Early Modern history or the appeal of video games today. Familiarity with Spanish is not required.

SEMN 114 FYS: History & Future of Doing Nothing What does nothing mean? What does one do when one is doing nothing? How can we make sense of a word or category (no-thing) that in itself is a denial of thing-ness? Does nothing look different through different cultural lenses? And what could humans learn from thinking about nothing? This seminar will explore different views on the subject of nothingness as it has been imagined and discussed by artists, social theorists, philosophers, and other thinkers. We will discuss the content of nothing as a category and consider what or who can be contained within, or excluded from it. Together, we will engage with the theory and practice of nothing in order to detect what its expressions, tensions, and contradictions might be, as well as what counts as a thing or as nothing.

SEMN 118 FYS: There and Back Again Humans have been writing about journeys and returns for nearly as long as we have been writing down our own stories. Though such tales are found in nearly every time period and culture, it's curious the way that many deal with similar kinds of questions: Why do we think about leaving home as an adventure? Why do we often romanticize "home"? Why is coming back home sometimes so hard? We'll begin our own journey by reading Homer's *Odyssey*, using it as a model for our exploration of these questions. Through a series of readings, films and songs (and conversations with modern-day heroes) we'll work to understand why tales of homecoming have such resonance and why we keep telling them.

SEMN 119 FYS: Holy War In a world where conflict seems apocalyptic and struggles between religious groups over contested territory appear constant, the only hope is to travel through time. This course examines the crusading and jihadist movements of the middle ages so that students can better understand how religious change and social anxiety culminated in massive and complicated movements to contest territories of major cultural significance. The first half of the course will survey the history of the crusade and jihadist movements of the long twelfth century (c.1050-1250), culminating in an independent research project. The second half of the course utilizes a (prototype) student-driven role-playing exercise to engage with the lived realities of crusaders at a pivotal period in the history of crusading.

SEMN 121 FYS: Unraveling DNA Despite being discovered nearly six decades ago, DNA research continues to have profound impacts on all of our lives and promises to become even more important in the future. We will examine the history of DNA and attempt to answer the following questions: How was DNA discovered? Who deserves credit for the discovery? What tools were needed? What information is stored in DNA? What is DNA fingerprinting? How should it be used? How can we use DNA to explore ancestry, especially for groups with no other means to do so? Do your genes determine who you'll become? What is genetic testing? How do we handle unintended consequences such as sex determination of embryos or employment discrimination based on your genes? We will begin by retracing the events that lead to the publication of the seminal paper "A Structure for Deoxyribose Nucleic Acid" by Watson and Crick. We will learn about the roles that Rosalind Franklin, Maurice Wilkins, James Watson, Francis Crick and Linus Pauling played in the discovery of the structure of DNA and the complex story surrounding it through reading their biographies and public interviews. We will examine how gender affects our perception of science and scientists. We will also learn about the tools used to discover DNA, and what modern approaches are used today. Warning we will discuss several deeply sensitive topics in this course, including sex selection and genetic disorders.

SEMN 122 FYS: Environmental (In)justice In this course we will explore the intersection between environmental and social justice. We have entered a new geological era - the Anthropocene - marked by unprecedented impacts of the burgeoning human population on the Earth's physical and biological systems. At the same time, global inequality has deepened: most of the world's wealth is concentrated in the hands of a small fraction of its people. Communities have unequal access to environmental benefits (clean air, water, greenspace), and different exposure to environmental harms (toxic waste dumps, air pollution, fossil fuel extractive industries). Recent examples in the news include the Keystone XL pipeline being routed through Native American lands without their permission, and the Flint, MI, water crisis that disproportionately affected poor, black residents of that city when lead leached into drinking water. Our study of environmental "haves and have nots" will not be limited to the United States; we will explore a diverse array of writers and genres - novels, poetry, essays, memoirs - that focus on themes of environmental justice and equity in the U.S. and around the world.

SEMN 123 FYS: Theater and the Other This course uses works by playwrights from around the world to study issues of race, gender, sexual orientation, social class, and intercultural communication, with a particular emphasis on the voices of the subaltern, those who have been silenced by the power structures they lived (or live) in. We will read works from Amiri Baraka, Luis Valdez, Tony Kushner, Caryl Churchill, and Lucienne Guedes Fahrner, among others. While reading these plays, we will discuss ways in which theatre can help bring voices to the voiceless but also talk about how to overcome obstacles we face in the theatre creation process that inhibit our voices and those of others we try to represent.

SEMN 124 FYS: Journeys to the West Why do people all over the world embark on journeys? What does it mean to be on a journey? Where does a journey begin and where or how does it end? And how do we overcome the obstacles we encounter when we go on a journey, and what do we learn about ourselves and the world through the process of overcoming those obstacles? These are some of the questions we will explore in this course through a focus on Monkey's adventures in the great Chinese novel, *Journey to the West*. The story of Monkey, based on the monk Xuanzang's historical journey to India in search of Buddhist scriptures, enjoyed widespread popularity in premodern East Asia and has continued to fascinate readers worldwide down to the present day. Together we will investigate multiple layers of meaning in Monkey's tale. We will do this by relating its message about personal transformation to its religious, literary, and cultural contexts in China's past, as well as to our experiences in the present. Additionally, we will examine a diverse range of creative forms inspired by *Journey to the West*, including its classical Chinese fantasy "sequel," the modern Chinese animation *Havoc in Heaven*, Jeffrey Lau's *A Chinese Odyssey* film adaptations, Gene Luen Yang's graphic novel *American Born Chinese*, and more. These various approaches to Monkey's story attest not only to its deep cultural significance in China and East Asia, but also to the ways in which it can have significance for different people of all different cultural backgrounds. All readings will be in English. No previous knowledge of Chinese language is necessary.

SEMN 125 FYS: Telling Queer Stories This course analyzes the history of various queer social movements and the stories that people have constructed about them. More specifically, the class interrogates a number of queer movements that have taken shape in the last fifty years, and compares how documentary filmmakers and literary authors have sought to represent these struggles for justice and greater equality. The course begins by looking at the rebellions at the Stonewall Inn and Compton's Cafeteria in the 1960s, and looks at how these uprisings paved the path for the modern LGBT movement in the United States. We will then move on to the queer activism that arose in response AIDS crisis of the 1980s and 1990s and then look at the same-sex marriage movement of the early twenty-first century, asking how the radicalism of the former transformed into the assimilationist politics of the latter. Finally, we will end with the emphatically intersectional approach undertaken by Black Lives Matter movement and its queer-identified founders. Throughout our course discussion and across several writing assignments, we will use these movements and the various texts that have narratively represented them to learn about the history of queer people and to envision our own roles in making a more just future.

SEMN 133 FYS: Drama Usa: Against the Current This course uses works by American playwrights to study issues of race, gender, sexual orientation, and social class in American society, with particular attention to dramatic authors who have sometimes struggled "against the current" to make their voices heard in the mainstream values of the dominant culture. We will read works from among Diane Glancy, David Henry Hwang, Moisés Kaufman, Cherrie Moraga, Marsha Norman, Clifford Odets, Luis Valdez, and August Wilson. Along the way we will discuss such trends in the American Theatre as realism and political theatre, including feminist theatre, African-American theatre, Hispanic theatre, Asian-American theatre, Native American theatre, and gay/lesbian theatre.

SEMN 135 FYS: Cultivating Community Novelist and environmentalist Wendell Berry has written, "A significant part of the pleasure of eating is in one's accurate consciousness of the lives and the world from which food comes. . . . Eating with the fullest pleasure-pleasure, that is, that does not depend on ignorance-is perhaps the profoundest enactment of our connection with the world." And yet, in today's world of fast, processed food, many of us have lost of our connection to where our food comes from. Is it possible to rebuild relationships between those who grow and harvest food and those who eat it and gain an accurate consciousness of the connection between plate and planet, cuisine and culture? In this seminar, we will learn about the industrial food system and explore the ways that people today are developing alternatives that use food as an instrument of social justice and a way to build strong communities. We'll read Michael Pollan's influential exposé *The Omnivore's Dilemma* as our starting point in our exploration of food justice, but we will study this issue from a variety of perspectives. We will talk with local farmers, community organizers, farm workers' advocates, entrepreneurs, and anti-hunger activists and get to know the Kalamazoo community by experiencing its harvest. We will also engage in a service-learning project that will work to provide information about and access to just, local, and sustainable food for everyone in our community. Academic service-learning combines classroom study with real world experience, allowing students to apply what they are learning to everyday life in a way that addresses community-identified needs.

SEMN 136 FYS: Crossing Borders: Autism and Other Ways of Knowing For the past ten years, the diagnosis of and attention to autism has grown exponentially. More public awareness and debate, however, does not guarantee a more complex understanding. In this class, we will explore autobiographies, essays, clinical studies, and films about or by those with autism or Asperger's in order to gain an informed understanding of this widely-diagnosed spectrum disorder. We will move outside the borders of the class to see students within AI (autistic-impaired) classrooms and participate in service-learning work in the Kalamazoo community. For this work, groups of students will be matched and spend time with a person on the spectrum and his or her family. In an effort to understand this way of knowing, we will consider how expectations about communication and social relationships "impair" and/or enhance an ability to live in a "neurodiverse" world. If you have a reason for wishing to take this seminar (i.e., if you have a sibling with autism, worked with or befriended someone on the spectrum, etc.), please contact Bruce Mills at bmills@kzoo.edu as soon as possible. Though it will not guarantee a place in the class, this contact will enable us to consider specific interests or circumstances more closely. Academic service-learning combines classroom study with real world experience, allowing students to apply what they are learning to everyday life in a way that addresses community-identified needs.

SEMN 137 FYS: Co-Authoring Your Life: Writing Your Self in the Context of Others The autonomous, self-made individual is a powerful American myth. But no person is entirely self-made; all of us are embedded in various families and communities and ideologies, and we also find ourselves marked by cultural conditions such as our race, class, religion, gender and sexual orientation, all of which influence who we are in various ways. The clash between the desire for autonomy and the shaping power of these social conditions makes the process of coming up with an identity extremely difficult and complex. How can we maintain a sense of autonomy while acknowledging influences? How can we be ourselves while learning from others? How do we write our own lives when so many other hands seem to hold, or to want to hold, the pen with us? Through novels, stories, autobiographies, essays and films, this course will explore different situations in which people struggle to form identities under intense "co-authoring" pressures. You will write analytical essays about the texts of others and personal essays about yourself.

SEMN 139 FYS: Our Shakespeares, Ourselves Cultures often retell stories from the past as a way of thinking through the present: perhaps because using already existing material makes it easier to explore difficult issues, perhaps because we feel the need to "talk back" to the writers who have so deeply inflected our culture. In this course, we'll be focusing on how modern cultures have reworked Shakespeare's plays into a 1950's sci-fi film, an MTV inspired movie, Afro-Caribbean drama, rock and rap music, and a Julia Stiles movie set in the Deep South. In exploring how Shakespeare has been adapted to these radically different contexts, we'll also be exploring the difficult issues these adaptations focus on--race, gender, sexuality, colonialism and class. What a culture does with Shakespeare's plays can tell you a lot about that culture; so we'll be asking a number of questions: Why is Shakespeare so popular in the United States today? What does he mean to us? What are we doing with his plays and why? What do our adaptations of his work tell us about our own views about racism or sexism in America, for example?

SEMN 140 FYS: Religion & Empire This course explores the role of religion in the expansion of political regimes such as the British Empire of the 17th through 20th centuries and the contemporary United States. We also examine the shifts that religions undergo as political regimes shift, as we saw the crystallization of Muslim and Hindu identities during the period of partition in India during the 1940s. Finally, we look closely at the ways in which political reformers have utilized religion as a resource to catalyze political resistance to empires, primarily in the work of Mahatma Gandhi. Authors we read include Arundhati Roy, Bapsi Sidwa, and Amitav Ghosh.

SEMN 141 FYS: One in Three Diagnosis and treatment of cancer provides an unintended journey for one in three individuals in developed countries. While cancer is not a modern disease, cases of cancer have risen in modern times. Is that due to environmental changes or population changes? How can we know? What is cancer and what have we known about it in history? What is the psychological and financial impact of cancer? How does this differ in various parts of the world? How is cancer used as an analogy in literature, film, and speech? Through reading and analysis of short reviews, newspaper articles, books, and book chapters this course will examine different aspects of cancer as a disease, modern affliction, and personal or political cause. Other readings will explore the experiences of cancer survivors in biographies and autobiographies. Students will also interview a local cancer survivor and prepare a mini-biography.

SEMN 144 FYS: Truth, Lies & Politics Are truth and politics friends or foes? Does your answer differ depending on the kind of truth in question? In political matters, is it always wrong to lie? Political thinkers have been asking such questions for millennia, but in an era of echo chambers, "fake news," and conflicting accounts of what's true, they have presented themselves with renewed urgency. In this course, we will examine the relationship between truth and politics within the political theory tradition as well as in the contemporary context. We will focus in particular on strategies for navigating the bewildering terrain of our so-called "post-fact" context, in which it seems as though politics has become a contest over reality itself.

SEMN 145 FYS: Creativity The psychology of creativity is as complex and mysterious as it is intriguing. Whether brushing paint on a canvas, composing a poem or piece of music, launching a new advertising campaign, or making a breakthrough at the frontiers of science, some form of creative thinking is involved. In this seminar, we examine how creativity is expressed in domains such as art, music, film, literature, science, business, and invention-with a special focus on the topic of film music. Classic and contemporary theories and research findings will provide the materials for discussions, essays, and projects. Students will also apply imagination and creative problem-solving skills to a variety of puzzles and exercises. This seminar will challenge your basic assumptions about the nature of creativity, and expand your horizons to encompass the richness and diversity of creative expression in its many forms.

SEMN 146 FYS: Africa and Globalization Globalization is viewed differently by scholars and policy practitioners. Humanists and Social Scientists agree that globalization is the precipitous movement of people, goods, free market and capital flows among countries. Sub-Saharan Africa's experience with globalization started in the 13th century. Since the 1990s, diasporan Africans have largely influenced public policy through tools of globalization. What is the direct impact of this phenomenon on Africa's economic development? What is the effect of globalization on the socio-cultural lives of Africans in the 21st century? This course addresses these questions and seeks to explore the influence of tools of globalization, such as communication equipment, automobile, computer services, transnational corporations (TNCs), among others in African societies. We will use primary and secondary sources, such as newspaper articles, government records, UN reports, journal articles and scholarly monographs to probe the above questions.

SEMN 152 FYS: Roots in the Earth Even in the most densely populated cities, we are connected to nature. As essayist John Burroughs wrote, "We are rooted to the air through our lungs and to the soil through our stomachs." In this seminar we'll examine our relationship with the natural world. What belief systems have influenced human interactions with nature throughout history and across cultures? Is our current relationship to nature serving us as individuals and as members of a global community or could we envision new relationships that might be both more sustainable and more satisfying? We'll grapple with how the answers to these questions affect our responses to environmental problems such as climate change, pollution, and dwindling biodiversity. Readings include Bill McKibben's *American Earth: Environmental Writing Since Thoreau* and Robin Wall Kimmerer's *Braiding Sweetgrass: Indigenous Wisdom, Scientific Knowledge, and the Teachings of Plants*. This course will ask students to reflect on their own experiences with nature as they engage in a service learning project in collaboration with Kalamazoo College's Lillian Anderson Arboretum.

SEMN 154 FYS: Who Are the Samurai? On a dark, chilly night in the city of Edo, Japan in 1703, 46 men broke into the home of a government official and murdered him. The story of these men, best known as the 47 ronin (and yes, you read the number correctly), has been retold countless times since that night. Outlaws to some and heroes to many, the 47 ronin have often been lauded as exemplars of true samurai. But what exactly is a "true samurai"? When you think of the samurai, what do you imagine? Is the image you have in mind the product of fact or fiction, or perhaps a little of both? Did you know, for instance, that the samurai included both women and children? Since most people are not familiar with the history of Japan's famous warriors, in this seminar we will begin by drawing from a variety of sources to explore how this warrior class—men, women, and children—lived, and how they have been viewed both within and outside Japan. We will combine our historical examinations of the emergence, evolution, demise, and reinvention of the samurai with analyses of representations of "samurai" in literature, film, sports, and business in order to gain a better sense of who the samurai are, how they have been portrayed, and why the samurai—and especially the 47 ronin—have become such an enduring and popular symbol of Japan.

SEMN 155 FYS: The New World Order The seminar will study recent analyses of the New World Order in the context of theories of "globalization," focusing on causes of social strife and debates about what makes for a just society. It will examine the culture of the investment bankers who are the New Order's main architects, the ideology of "neoliberalism" that is its blueprint, the fate of American workers whose jobs are disappearing, and the New World as lived by some of the two billion people in shantytowns, bidonvilles, and favelas. Students will write brief review-style essays and a case study of a city or region.

SEMN 156 FYS: Almost Human We will explore what it means to be human, by first looking at fictional accounts of those that are "almost human," namely—robots. Karel Capek, considered to be the greatest Czech author of the first half of the twentieth century, was the first to use the word "robot," which appears in the title of his play "R.U.R." (Rossum's Universal Robots). Capek explores a host of philosophical and social issues in this play and his short stories and essays. Fast forward to the 1960's, and we have Philip Dick's novel, *Do Androids Dream of Electric Sheep?*, which explores similar issues. This story is the basis for the 1982 movie *Blade Runner*. Today, robots are fast becoming more common, and a host of contemporary movies explore the relationships between humans and 'artificial' life. Other readings will discuss a variety of relevant philosophical issues, the cognitive differences between humans and other animals, and the role of culture. Our goal is to explore the essence of being human. Is it love, empathy, free will, emotion, consciousness, intelligence, or something else? Or maybe there is no essence!

SEMN 158 FYS: Humans and Other Animals This course will look at just a few of the many facets of animal-human interaction. Many societies have long assumed and enforced the singularity of the human being, placing our species in a position of superiority, and all others at our disposal. However the uniqueness of humans is an idea that has long existed in tension with phenomena and discourses that complicate and enrich our coexistence with other animal species. The course will include historical and literary perspectives with which students would already have some familiarity. The class will also look at modernization and industrialization to focus on problems and challenges (habitat "management," factory farming and fisheries, and research test subjects). The last section will consider how animal-human interactions are proposing new disciplinary intersections: the limits of consciousness and cognition in animals and humans; interspecies communication; new moral debates on the treatment of other animals; and new spaces for co-operation.

SEMN 159 FYS: History Repeats This course will explore the recent resurgence of the 19th century in novelistic adaptations and fictionalized biographies of the 21st century. Crucial to this course will be an understanding of major literary texts and authors of the 19th century, which will allow for an investigation as to why the 19th century serves as a vital literary inspiration for the 21st century, specifically how these textual re-imaginings might provide a particular insight into the contemporary national moment. Why does the 19th century continue to persist? What fuels this return to the past? Is this resurgence merely a nostalgic literary trend, or does it reveal a larger significance, both for American literature as a field of study, as well as for an American nation-space we presume to be so markedly different from that of the 19th century. This course begins with "The Emancipation Proclamation," one of the formative historical texts that shaped and defined the U.S., and will be read in tandem with Seth Grahame-Smith's *Abraham Lincoln, Vampire Hunter*. In many ways, these texts introduce the main thematic trajectory for this course: the Civil War and slavery. As such, we will also read *Adventures of Huckleberry Finn*, Mark Twain's satire of antebellum southern society which focuses on Huck's journey to "free" a slave, and Jon Clinch's *Finn*, told from the perspective of Huck's father, Pap. Likewise, Louisa May Alcott's *Little Women* finds the March women at home, waiting for their patriarch, Mr. March, to return from his role in aiding the Union's war efforts; while that novel only presents letters about Mr. March's activities, Geraldine Brooks's *March* presents Mr. March's story, those never relayed in his letters home. In addition to reading these novels, we will also investigate the socio-political underpinnings of race and "freedom" in the 21st century, specifically how the social and political spectrum of both terms function in the contemporary U.S.

SEMN 160 FYS: Visions of the End Plague and hellfire; crumbling cities and avenging angels; a heavenly kingdom, golden and eternal—these apocalyptic images are among the most stirring moments in the Bible. They have inspired countless works of art with their devastating portrayal of the world's end. They have also maintained a constant, pervasive influence on theology, philosophy, political theory, and popular culture. In this seminar, we will carefully read the biblical apocalypses and consider how these foundational texts have been interpreted by Jewish and Christian theologians over the years. We will then explore a range of literary works such as Spenser's *Faerie Queene* and the Poetic Edda which deliberately mimic the style of the biblical apocalypse. And finally we will turn to some contemporary "post-apocalyptic" works such as Ridley Scott's *Blade Runner* and Cormac McCarthy's *The Road* in order to reflect on how current events and anxieties have radically transformed our modern visions of the end.

SEMN 164 FYS: Building Kalamazoo The city of Kalamazoo serves as the textbook for this seminar, as we survey the built environment of the 20th century via the architecture of this post-industrial Midwest city. Beginning with turn-of-the-century Victorian-era homes and ending with Kalamazoo College's dramatic new building, the Studio Gang-designed Arcus Center for Social Justice Leadership, Building Kalamazoo surveys this dynamic period through site visits, primary readings, and individual research. Throughout, the seminar will seek to understand how site and space have shaped diverse experiences of a rapidly changing modern world.

SEMN 165 FYS: Stalin & the Art of Fear From the 1920s until his death in 1953, Joseph Stalin wielded an extraordinary amount of control over the newly-created Soviet state. He interpreted the proper implementation of Socialist economic policy, he silenced his critics with unimaginable savagery, and he took an especially keen interest in dictating the terms by which art should be made. To whom does art belong? What was it like to create art in an atmosphere of censorship? Could artists -- like poet Anna Akhmatova or composer Dmitri Shostakovich, for example -- navigate these treacherous waters without sacrificing their creativity and artistic integrity? We will examine these and related questions through reading memoir, fiction, and historical accounts of the time; watching films; and closely listening to the music that spoke to and reflected this tumultuous time.

SEMN 167 FYS: The Immigration Debate People often say they are either for or against greater levels of immigration. But immigration is a broad concept. In simply saying "yay" or "nay" we neglect to address a lot of important, nuanced questions. This course examines some of these questions. What is the difference between a regular immigrant and an asylum seeker or refugee? Do we owe different kinds of treatment to individuals in these categories? What happens when someone is attempting to immigrate but is stopped en route (e.g. in international waters)? How do concerns of "internal" equality and the preservation of culture impact immigration? Is it permissible for wealthy countries to actively encourage doctors and nurses from poor countries to immigrate--even though this will lead to a shortfall of skilled healthcare workers in poorer countries, thereby intensifying basic health issues? What tensions are created by the conflict between social and global justice as applied to immigration? We will investigate these questions and many more through readings in political philosophy, documentaries and short films (all documentaries and short films will be screened outside of class).

SEMN 168 FYS: Salem Possessed: the Salem Witch Trials and Their Legacies In 1692, the people of Salem, Massachusetts grew terrified when a small group of girls accused an enslaved woman, an impoverished woman, and a scandalous woman of bewitching them. Ultimately, twenty men and women were hung or pressed to death with stones and over a hundred others found themselves imprisoned. Historians have long considered the Salem Witch Trials a pivotal moment in American history. Countless works have offered countless reasons for the strange happenings in Salem, trying to explain why a small community in Colonial America would succumb to witchcraft hysteria long after it had died down in Europe. The Salem Witch Trials have haunted American culture. Starting in the nineteenth century and continuing into the present, writers and artists have grappled with the various meanings of the witch hunts and the persecution of innocent persons, seeing connections between "the furies of fanaticism and paranoia" of 1692 and their own time. Most famously, Arthur Miller in *The Crucible* used the trials to examine the persecution of alleged Communists in the 1950s. This course will examine and seek to understand the events of 1692 and the subsequent legacies of the trials in American culture through the actual documents from the trials, the writings of historians, and the imaginative works of novelists, playwrights, poets, and film makers.

SEMN 171 FYS: Social Bee-ings Honeybees and humans are supremely social. But what does it mean to be social? Why are some species social while others are solitary? Do social group members work for the common good or to fulfill selfish interests? Perhaps they can do both, but what happens when these goals conflict - how is social order maintained? We will explore the origins and maintenance of social living across the animal kingdom and ask to what extent human societies represent larger scale models of other animal societies -- insects and non-human primates in particular -- and to what extent humans are unique. We will explore the political, economic, biological, cultural, sociological and philosophical elements of social life through a variety of media and genres. In doing so, we will inevitably explore the human condition.

SEMN 172 FYS: Life with Two Languages Almost half of the world's population uses two or more languages as they go about their daily lives. In this seminar, we will explore what it means to be a bilingual or multilingual person - how this affects our ways of communicating and our perspective on the world. We will also investigate how different societies organize life with two or more languages. Topics include: code-switching, language attrition, language & identity, bilingual children, bilingual education, super-bilinguals, bilingualism & politics, the "English-only movement" in the USA, and minority languages in the USA. Yookoso - Bienvenido - Bienvenue - Hwan-yung-hahn-ni-da - Chào m?ng This course is designed for students from a multilingual household or community or those whose primary residence is outside of the United States.

SEMN 173 FYS: Migration, Community, & Self Going to college and immigrating to a new country have much in common. Moving to a new place presents many challenges. The immigrant (or first-year student) can experience loneliness and displacement, a yearning for home, and bewilderment at his/her new surroundings. Yet, a new environment also offers opportunities for personal growth that force immigrants to reconcile "Old" with "New." Through reading, writing, and discussion, students will seek to relate their own "migration" to Kalamazoo College to the experiences of European Jews moving to the United States. Along the way, the class will explore many of the universal questions raised by relocation. What motivates people to pick up their lives and move to a new place, and what happens to them when they arrive? How does the migration experience shape their view of the world they left behind and their view of their new environment? How do immigrants construct communities for themselves? Do women and men experience migration in similar or different ways? Finally, how does moving to a new place shape one's sense of self? We will explore these questions using historical and cultural sources, fiction, and film.

SEMN 176 FYS: Managing Across Cultures Suppose you have an opportunity to live and work (study) in a foreign culture, what will you need to know in order to get along and be effective? How will the locals think and act? How will you feel and react? How will you resolve a conflict, or negotiate a favorable outcome? What will you do if you need to give a presentation? What if you had a leadership role, how will you motivate your team? How will you manage team members that are different from you? Will you one day be an effective global citizen and, perhaps, a global manager? This seminar explores your assumptions about the best way to think and behave as we learn about ourselves and about others from different backgrounds. A good choice for anyone who has an interest in living and working abroad.

SEMN 181 FYS: The Paradox of Human Desire: Philosophy and Psychoanalysis In this course, we examine how 20th-century critics challenge and reject the traditional rationalist Enlightenment ideal of human reason. Traditional "Enlightenment" or rationalist models of subjectivity assume that a person is conscious of feelings and desires, rational in planning and executing actions, and responsible for explaining and justifying one's conduct - both to oneself and to others. In short, rationalists uphold the Enlightenment ideal of knowing ourselves, acting autonomously, and controlling our own lives - in a word, of mastering our fate. Against this view, critics - philosophers and psychoanalysts - demonstrate the fragmented, unconscious, wild, strange, and often chaotic nature of human desire, action, and self-understanding. The so-called "dark thinkers of Enlightenment" unmask the ideal of rational agency as a comic pretense, naïve illusion, or, worse still, deranged delusion. In the first part of the course, we examine a sophisticated account of rational agency as the activity of locating oneself in history, the history of one's own ability to learn about oneself, others, and the world we share. Such autobiographical narration would be, at once, the history of reason and reason of history, the rationality of freedom and freedom of rationality. In our first reading - *Time, Narrative, and History* - we familiarize ourselves with Hegel's argument that the history of human reason is the history of freedom, a freedom that can only be secured and exercised by agents socialized to recognize and respect others. In subsequent readings, we explore Friedrich Nietzsche's and Sigmund Freud's critique of this rational model of agency by examining their views on the paradoxical nature of desire, time, action, and embodiment. More specifically, we will examine how subsequent figures such as Jacques Lacan and Maurice Merleau-Ponty have identified four famous paradoxes of human life: the paradox that we understand something only when it's over (time); the paradox that we first know our prior intentions only through our subsequent deeds (action); the paradox that our desires are the source of our worst nightmares (desire); and, finally, the paradox that what is closest and most familiar to us, our bodies, is often what is most distant, alien, and perplexing (body). Movies such as *Memento*; *Apocalypse Now*; *la Femme Nikita*; *Sex, Lies, and Videotapes*; and *The Pervert's Guide to Cinema* will be shown.

SEMN 184 Fys: Slang A Discussion of Informal English Slang is the ever-changing use of informal language that is reflective of culture and society. Though slang is most common in spoken language, modern dictionaries have long embraced slang and recorded its usage. Notable examples include the Oxford English Dictionary new entries of 'vape,' 'selfie,' and 'GIF.' In this class, we will discuss, research, and write about the informal use of slang and its role in social interactions as well as what slang represents in the lives of English speakers. We will trace American slang from its separation from British English up until the current age and identify the purpose of slang in a community of speakers. An important distinction will be made regarding the environment of informal and formal language and how English speakers navigate the cultural requirements of spoken and written language in academic settings. Through readings, videos, discussion, and writing, we will explore the fun and function of slang. This course is designed for students whose native language is not English.

SEMN 188 FYS: Imagining Possible Worlds Is there a difference between science fiction and fantasy? When asked to explain the difference, the great American 20th-century sci-fi writer, Isaac Asimov, replied "science fiction, given its grounding in science, is possible; fantasy, which has no grounding in reality, is not." But according to the famous 18th-century Scottish philosopher, David Hume, "nothing we imagine is absolutely impossible." So, we have a philosophical puzzle: on the one hand, it seems that fantasy stories set our minds on imaginative adventures, and the very fact that we can imagine such stories suggests that they are possible. But on the other hand, science fiction stories are set within the framework of science, which provides them with a foundation in reality that is missing in fantasy. Our main question, therefore, will be: are science fiction and fantasy equally possible, or is there a sense in which science fiction is more possible than fantasy? The answer to this question has surprisingly far-reaching implications for science, literature, and philosophy. To attempt to answer the question, we will explore contemporary science fiction and fantasy in the form of short stories, films, and even games. We will read such notable writers as Margaret Atwood, Stephen King, Michael Chabon, Ursula K. Le Guin, T. C. Boyle, and Gregory Maguire. We will use these experiences as the foundation for our study of possibility, which will include thinking hard about many important philosophical matters such as God, evil, freedom, knowledge, person identity, and zombies. That's right; I said zombies!

SEMN 189 FYS: The Art of Revenge The desire for revenge is only human. But there is a risk that the actual performance of revenge will initiate a chain reaction of violent reprisals whose consequences will quickly prove fatal to social life itself. The revenger understandably wants to restore the natural order of things, to right a wrong, but his or her desire threatens to work an even greater harm. This fundamental paradox helps to explain why revenge is so prominent in our collective, cultural imagination from the theatre of ancient Greece to the popular cinema of modern Hollywood. This seminar addresses the important and often vexing questions raised by tales of revenge: What is the difference between revenge and justice? Does revenge amount to a social responsibility or a slip into self-destructive narcissism? What role does revenge play in current moral and political dilemmas such as ethnic nationalism, capital punishment, and terrorism? To explore these issues, we will study a variety of works including tragedies by Euripides (Medea) and Shakespeare (Titus Andronicus), a novel by Thomas Pynchon (The Crying of Lot 49), and films by Clint Eastwood (Unforgiven), Quentin Tarantino (Inglourious Basterds), and others. Warning: This seminar obviously deals with violent subject matter. The films in particular may be too graphic for some students.

SEMN 190 FYS: Science and Society This course is designed for those who are curious about the natural world. We aim to engage and enhance that curiosity by exploring science in the world around us. We will observe with wonder, thoughtfully hypothesize, methodically test, and conclude with deeper knowledge and more questions. We will discover roles we can take to contribute to building scientific knowledge. We will work to understand developing science. We will design and carry out experiments, read about scientific discovery, and join others on citizen-science projects. This course is intended for anyone who is excited about understanding the natural world, no science background is needed.

SEMN 191 FYS: It's Only Rock and Roll Mick Jagger said the song "It's Only Rock 'n Roll (But I Like it)" was a response to the pressure he and the band felt to continually exceed their past accomplishments. Who could have imagined how rock and roll (and all of its children) would succeed, exceed and change the world? In this seminar we will explore some of the fascinating relationships between current events, social, cultural and political developments, and rock music, as expressed through the music, lyrics, art, philosophy and fashion of rock and roll. Through generous listenings, viewings, readings, discussions, and writings, we will gain a well-rounded view of the history of rock music and a deeper appreciation for the complex and evolving part rock and roll and has played and continues to play in the social, cultural, political and, of course, musical evolution of our lives and the world.

SEMN 193 FYS Banned: Censorship & Art Politics Art is a ubiquitous part of our society, but how exactly do we define the word "art" and what do we expect from it? Some might say art is solely for aesthetic enjoyment and to make us feel good, but what happens when art becomes part of the culture wars? What social conditions drive controversy around art? This course will explore art's seemingly unparalleled ability to outrage and offend. We will discuss and dissect a wide variety of historical cases where art has been deemed dangerous and/or objectionable. Through a variety of readings and discussions we will explore such topics as: Is censorship ever okay? What can controversies surrounding art tell us about those who are offended? And, what does being offended mean in a democratic society? In this course we will learn how to unpack the context of controversial art and self-examine our personal values and what it means to have those values challenged.

SEMN 195 FYS: Bad Religion In this course, we explore communities and practices that have been considered "loud," "superstitious," "weird," "unorthodox," and purportedly "satanic." To outsiders, bad religion is religion that seems to straddle the lines of magic and witchcraft, and religion that does not stay in its sphere but seems to embroil itself in public space, business, and politics. This class does not argue that there is such a thing as "bad religion" but explores contestations over what constitutes "appropriate" religious practice, community, authority, and belief in 20th century and contemporary America. We will explore groups from Scientologists, the Peoples Temple (known for the Jonestown suicides) to apocalyptic Catholics, Latinx devotions and Afro-Caribbean religions-groups that have drawn the ire of neighbors, established churches, media, and governmental authorities. We will explore how understandings of immigration, race, ethnicity, gender, and sexuality structured these communities and shaped the controversies that surrounded them. We will interrogate the construction of religious norms and ideas of "acceptable" religious practice across different moments in American history. Students will critically analyze primary sources and media representations-from crime television shows to documentaries-to explore how media and pop culture are operative in constructing the religious mainstream and margin in America.

SEMN 196 FYS: Memories, Secrets & Lies Why do we love to read "confessions," watch makeover shows, read blogs, and take selfies? How do we shape the stories we tell about ourselves, and the image of self we present to the world? Is there such a thing as a "true" or "authentic" self? In this seminar you will work with memoirs, letters, a TV series, a graphic novel, diaries, and scrapbooks to explore how individuals present themselves and how they tell their life stories. We start with the genre of confessions, looking at how writers draw in their audiences by claiming to tell secrets, and "nothing but the truth." We will discuss memory, its failures, and the ways we retrieve "lost time" in narrative. Other topics include performance and identity, censorship and autobiographical scandals surrounding authors who "broke the rules" of memoir. One week we visit the Kalamazoo College Archives and work with diaries, letters, and scrapbooks from college students 100 years ago-examining how their experiences may parallel or differ from your own. We will also visit the Kalamazoo Institute of Art to view works of self-portraiture.

SEMN 197 FYS: Byzantium The Real Game of Thrones The Roman Empire never fell-it just turned Greek. Istanbul used to be Constantinople. It's completely normal to cut out your brother's tongue to keep him from becoming Emperor instead of you. A world of assassinations, tax fraud, and adultery existed in a city that had stadiums that held more than 100,000 screaming fans and gave its citizens free lunches. Fortune favors the bold. The bold are born for Constantinople.

Sophomore Seminars

The sophomore seminar is the second component of the Shared Passages and comes at a critical moment of challenge and opportunity in students' journeys through the K Plan. They provide a vital link between students' entry to the K experience and their other landmark K experiences - advanced work in the major, study abroad, and a SIP.

Sophomore seminars

SEM202 Who Is 'the other'? This seminar will focus on how we create and label others in our societies. Students will explore the various ways in which this occurs and along what lines: race, ethnicity, gender, sexual preference, socioeconomic circumstances, and others. The reading of the seminar will be novels from across global cultures and our own: South Africa, Australia, India, and others. There will also be theoretical readings on the creation of others, including "whiteness". The work of the course will consist of student discussions of the novels and readings, presentations by students on the background of the various readings, student journals on their readings and own reflections on otherness, and papers of analysis and reflection on the readings. Prerequisite: Sophomores only.

SEM/CLAS 203 Romans R Us: Identity & Empire Young men and women who came of age during the heyday of the Roman Empire in the second century CE faced many of the same challenges now confronting Kalamazoo College sophomores as they prepare for study abroad: how can you best harness the transformative potential of international, experiential education to become productive citizens and leaders in a global, multicultural world? What theoretical foundations can help you negotiate issues of self-definition and representation that emerge from encounters with cultural diversity? How will performing rites of passage into adulthood on a world stage, while learning new dialogues of national, ethnic, class, gender and sexual politics, affect your own sense of public and private identity? This course is designed to interrogate the impact of international education on personal identity by fostering reflective connections between the lived reality of 21st-century American students and their academic study of the Classical past. Prerequisite: Sophomores only.

SEM/ARTX 204 Drawing Today: Uncommon Visions Drawing Today introduces current themes in drawing and provides an innovative approach to basic skill development required to produce images in a contemporary context. Students will read and discuss issues related to art and visual culture from around the world. Class time will be divided between discussion of important issues in contemporary art and hands on drawing instruction. Homework will include daily readings and weekly drawing projects that will allow students the opportunity to reflect upon theory and their assumptions of what drawing is and who it is that produces it. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/ARTX 205/RELG 201 Religious Art and Material Culture This course explores the relationship between religion and art. The arts, whether in the form of painting, sculpture, architecture or kitsch, are often vehicles for religious devotion and expression. At the same time, devotion to a divine figure has inspired some of the world's most beautiful pieces of art. Religion and art form a symbiotic relationship which can simultaneously be in tension and/or cohesive. Looking at various primary and secondary sources from a variety of religious traditions, we explore this tension and cohesion, which can be a window into larger societal and cultural issues. Given that we live in a mechanical age, special attention will be paid to the material production of religious kitsch and the place of religious art in the market. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/ARTX 206 Ceramics: World Pottery World Pottery is a hands-on studio course with significant research and reflection components. Class time will be used to introduce students to a variety of clay bodies and clay-forming techniques from historical and regional perspectives (wheel-throwing will not be taught). Creative assignments ask students to consider and critique the role of cultural exchange and image appropriation within historical ceramics and in their own creative work. Projects will also investigate the roles of different types of pottery within contemporary American society, as a point of reference and departure. Each student will propose, execute, and present a research project. Lectures, critiques, and discussions will focus on individual and societal assumptions about pottery. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM207 Infection: Global Health & Social Justice This course is first and foremost a Shared Passage Seminar. As a sophomore level writing class, it will build upon the First-Year Seminar goals. Through readings and discussions, the class will explore the world of infectious agents and the use of antibiotics as they affect global health. By studying current and historical cases of infections, we will try to address the spread, containment and eradication of select infectious agents. With each of the cases we study, we will discuss race, genes, and human history, through the lens of social justice. Prerequisite: Sophomores Only

SEM/ENGL 208 Food and Travel Writing In this writing-intensive class we will study the possibilities of journalism and creative nonfiction through the various forms of food writing and its relationship to place. Through reading and writing, we will explore food as sustenance, as a route through memory, as a reflection of culture and place, as both personal and public, and as history and politics. This course is a Shared Passages Sophomore Seminar. Prerequisite: ENGL-105 or ENGL-107 and Sophomores Only.

SEM209/POLS 231 Politics of Immigration According to the UN Charter of Fundamental Rights, one has a fundamental right to leave one's country of origin (1948, Article 13), yet there is no corresponding right to enter another country. This sophomore seminar considers the consequence of this tension with attention to normative questions of who should be allowed entry to and citizenship within (other) states. In addition, we explore the empirical complexities that inform and result from these judgments. This seminar privileges states, laws (domestic and international) and actual policy over the last sixty years, with particular attention to North America and Western Europe - key destinations for migrants and thus crucial laboratories to investigate the myths, realities, policies and consequences of immigration. At a time when there are growing pressures for increased immigration in Western Europe (e.g., most recently the Arab Spring), we conclude by noting recent developments within the European Union to harmonize asylum and immigration policies. We ask - what are the ethical challenges and what might the future look like? Prerequisite: Sophomores Only

SEM210/MUSC 207 Listening Across Cultures What does it mean to be a knowledgeable music listener? An expert listener? A native listener? Hip hop has its "heads," French opera has claqueurs, and Syrian tarab has the samm'i'a (expert listeners), but is the act of listening the same across cultures, or is there something to the local perception of music that goes beyond style and genre? Questioning the adage that "Music is the universal language," this course will examine how people assign meaning and power to music. Analyzing music from around the world, we will attune our ears to the ways in which people across cultural borders conceptualize music, sound and the act of listening. No music reading or basic theory knowledge is required. Prerequisite: Sophomores only

SEM211 Crossing Cultures: How It Works We are generally unaware of ourselves as cultural beings until our own cultural values and practices "clash" with someone else's. By studying various aspects of Intercultural Communication, by reading books and seeing films about intercultural encounters, by learning techniques for observing and interpreting other cultures, and, finally, by reflecting on these experiences, we can better understand culture and anticipate how our own cultural products and behaviors might be perceived by members of other cultures - whether abroad or at home. Sophomores Only.

SEM N 212/PHIL 209 Philosophy of Science A philosophical examination of scientific methods and reasoning. Topics may include the analysis of explanation, the nature of scientific truth, instrumentalist and realist interpretations of science, confirmation and falsification, observational and theoretical terms, inter-theoretic reduction, the relation among various sciences, scientific revolutions, and the possibility of scientific progress. Recommended for science majors. Sophomore standing recommended.

SEM N/RELG 213 Christianity & the Family This course critically addresses contemporary debates about the centrality of the family in Christian teaching through a historical and cross-cultural survey. What is the relationship between Christianity and the various approaches to kinship and family in different cultures in different historical contexts? Where did our contemporary ideas about the family come from and what are Christians saying about new forms of kinship? From the Bible to present day debates about divorce, sex, and same sex marriage, Christians have never embraced a single understanding of the family, but rather have been influenced by broader cultural shifts in how kinship is done. Prerequisite: Sophomores Only

SEM N/ARTX 214 Framing Difference This course will combine research and studio components, split more or less evenly. The research topic, broadly painted, will be fine art documentary practices, grounded with an entry-level hands-on studio component (using both film and digital photography). There are two motivations for this course: to give students creative control of photographic tools (technical, formal, conceptual) prior to their leaving for study away, but also to explore the issues and ethics of photographic documentary practice. While the broad research topic is documentary practice (theory/tradition), this course will place particular emphasis on the ethics of photographing outside of one's own group. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM N/PHIL 215 Human Rights & International Law People often invoke human rights and international law in the course of debate. However, these are highly contested concepts. This course introduces some theoretical clarity with respect to their conceptual grounding, history and contemporary practice. Our primary focus will be on different philosophical theories of human rights, with secondary attention to international human rights law. We start with an orientation on human rights practice and try to move past some of the so-called "challenges" to human rights. This is followed by a look at the main contemporary approaches for conceptualizing human rights: the basic human-interest approach, the capabilities approach and the newer "political" approach (among others). We will spend a few weeks on various debates within the human rights literature as well: Whether there is such a thing as "group rights", whether and how there is a distinction between civil and political human rights on the one hand versus social and economic human rights on the other, when human rights violations might trigger external, international intervention, etc. Prerequisite: Sophomores Only

SEM N/CLAS 216 Making History? We will examine various cinematic interpretations of the ancient Romans. Students will explore the historical, social and cultural differences between ancient and modern accounts of Roman history and examine our modern desire for "watching" the ancient world. Readings by Roman writers and secondary source material will be paired with film screenings. Special attention will be given to why we retell some stories (i.e. Cleopatra), as well as to the way that this form of "Roman history" encourages us to visit difficult cultural topics, such as political imperialism, slavery, sex and gender difference, and racism. Prerequisite: Sophomores Only

SEM N/ENGL 217 World Indigenous Literatures: The People and the Land A selective study of the literary traditions and contemporary texts of indigenous peoples around the world, focusing on indigenous communities in regions where Kalamazoo College students study and with a particular emphasis on texts that explore the complex relationships between indigenous communities and the land they claim as their own. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM N/ENGL 219 Magical Realism Magical realism is a genre that combines elements of the fantastic with realism often in order to imagine utopias or resist restrictive aspects of society. This course will examine the genre, interrogate its relationship to other genres of fantasy, and consider the relationship between the aesthetic patterns of the genre and its potential for social advocacy. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM N 223 The Inward Journey: the Science, Practice, and History of Meditation This seminar will explore the meditative experience from historical, experiential, and biological perspectives. Meditation-the cultivation of a state of thoughtless awareness that can generate profound peace and inner transformation-has deep historical roots and plays a role in many cultures and religions. Modern neuroscience has made great strides in understanding the meditative experience and documenting the physical and neurochemical changes that result from meditation. Students in this course will undertake a personal journey of active practice of meditation, primarily from Buddhist perspectives. This experience will be underpinned with study of the neuroscience and practical health benefits of meditation. Finally students will delve into the historical, cultural, and religious dimensions of meditation. Prerequisite: Sophomores Only.

SEM N/ENGL 227 Opium & the Making of the Modern World This course traces the social and literary history of opium across the nineteenth, twentieth, and twenty-first centuries. In addition to exploring the drug as a trope of the "exotic East," this course also understands opium as an important catalyst of imperial development and global domination. Analyzing autobiography, poetry, and fiction, the course focuses on depictions of travel and circulation to understand how opium has activated anxieties about gender, sexuality, and race over the last two centuries and to recognize how the illicit drug trade continues to shape current patterns of diasporic movement and global exchange. Prerequisite: Sophomores Only

SEM N 230/RELG 202 Same Sex, Gender, and Religion This sophomore seminar explores the intersection of religions, same-sex affection/love/relations, and the category of gender. At the most basic level we examine what different religions have to say about sexuality, in particular, non-heterosexualities. We look at the role that gender plays in these constructions of these sexualities, and we return to our starting point to analyze the role of religions in these constructions of gender and same-sex sexualities, affections, love, and/or relations. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM N 231/ANSO 232 Nature & Society: Intro Pol. Ecology This course will introduce students to the sub-discipline of political ecology, a field broadly concerned with the relationships between nature and social power. In other words, this course will focus on developing an understanding of how social relations and politico-economic systems produce environmental problems, structure access to natural resources, the resulting struggles over 'nature' and how and in whose interests these may or may not be resolved. Because the field is broad, the course has been structured into themes that we will explore each week. Prerequisite: Sophomores only.

SEM N 232/HIST 233 Christians, Muslims and Jews in the Mediterranean World This course examines social, cultural, political, and economic interactions among the cultures of the Mediterranean World between 500 C.E and 1500 C.E. Rather than offering a chronological overview, this course explores multiple perspectives on cross-cultural contact, conflict, and exchange. We examine specific geographic areas of contact - the Crusader States, medieval Iberia - as well as more fleeting encounters through travel and trade.

SEM N 234/HIST 236 End of Christendom: Piety, Ritual, and Religious Upheaval in the Sixteenth Century This course examines the complex social, cultural, religious, and political repercussions of religious reform over the course of the long sixteenth century, from the earliest glimmers of discontent among Hussites and Lollards to the violent wars of religion that characterized the seventeenth century. Topics include lay piety and religious ritual, the reform of daily life, confessional antagonism, print culture and propaganda. Primary sources on this topic are plentiful, and we pay particular attention to the exceptionally rich visual sources of this period. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/N/HIST 235 Traders & Travelers in Early Europe In this course, we examine the narratives of traders, travelers and pilgrims in Early Europe (c. 800 BCE - 1400 CE) in order to better understand the ways in which the peoples of Europe understood other regions and the peoples that inhabited them. In doing so, we explore ideas about geography, boundaries, cultural differences, stereotypes, and the construction of identities (both internal and external to societies). These explorations help expose us to the ways in which we might construe similar kinds of knowledge in contemporary societies by providing us with a reflection point in earlier European cultures.

SEM/N/PSYC 238 Culture and Psychology of Arab-Muslim Societies This course provides an introduction to Arab-Muslim societies and cultures. It draws on readings from multiple disciplines to cover social structure and family organization in tribal, village, and urban communities, core value systems associated with the etiquettes of honor-and-modesty and with the beliefs and practices of Islam, and influences on psychological development through the life-span. It also will examine the processes of "modernization" and "underdevelopment," the conflict between Westernization and authentic "tradition," the "Islamic revival," and the crisis of identity experienced by youth. Prerequisite: Sophomores Only

SEM/N/ECON 240 Economics for Global Travelers This Sophomore Seminar examines how economics can contribute to a better understanding of the world and our place in it. We will look at differences, similarities, and linkages among the economies of various nations. We will study flows of money, products, people, technologies, and ideas across national borders. The approach will be non-technical with an emphasis on understanding economic ideas. We will spend more time writing and discussing than on models or equations. Does not count toward economics or business major. Prerequisite: Sophomores Only

SEM/N/GERM 202 Reading European Cities: Istanbul, Vienna, Berlin This course addresses the questions of how we may understand a culture by learning to "read" its cities. Texts range from maps, histories, architecture, theories of urbanism and urban ecology, to films, documentaries, memoirs, and music - an array of genres that highlights the status of the modern city as both a physical place and an imaginary construct. The broad aim of course is to provide students with conceptual tools for "reading" a city as well as a new culture critically, and thus to facilitate their intercultural competency. Berlin, Vienna, and Istanbul will serve as case studies for the practice of interpreting urban narratives, and the course will culminate with student research projects and presentations on the cities in which they plan to study abroad, or a city of their choice. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/N/ANSO 255 You Are What You Eat: Food and Identity In a Global Perspective The goal of this course is to examine the social, symbolic, and political-economic roles of what and how we eat. While eating is essential to our survival, we rarely pay attention to what we eat and why. We will look at the significance of food and eating with particular attention to how people define themselves differently through their foodways. We will also study food's role in maintaining economic and social relations, cultural conceptions of health, and religion. Finally, the class examines the complex economic and political changes in food systems and the persistence of food's role as an expression of identity, social and ethnic markers. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only. Must take ANSO-103 previously.

SEM/N/MUSC 205 Music and Identity Music serves multiple roles: a force for social transformation, a flag of resistance, a proclamation of cultural identity, a catalyst for expressing emotion, an avenue to experiencing the sacred. Students will look at identity through the lens of contemporary and traditional American music and will consider how race, ethnicity, age, gender, national identity, and other factors express themselves in and are shaped by music. The ability to read music or understand basic music theory is not required; a love of music and an interest in American culture are essential. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/N/HIST 256 Refugees and Migrants in Modern Europe The course explores the history of migration from the mid-nineteenth century to the present day, focusing on people moving from, within, and to Europe. Prerequisite: Must be a sophomore to enroll

SEM/N/ANSO 262 Real and Imagined Cities This course explores the city as an idea, as material reality and the interconnections between the two. As an interdisciplinary field, urban geography draws from theories and frameworks in urban planning, anthropology, sociology and economics. This course introduces students to that field. Because the field is broad, the course has been structured into themes that we will explore each week. Prerequisite: Take ANSO-103 and a sophomore

SEM/N/ENGL 264 Global Shakespeares Shakespeare is the most translated, adapted, performed, and published Western Author. Just what this means to Western and non-Western cultures is at the heart of this course. What does it mean to think of Shakespeare as a colonizing force? What additional ways are there to see the influence of his works? Many cultures have written back to Shakespeare, addressing race, sexuality, gender, and religion from their own cultural perspectives. What do exchanges between differently empowered cultures produce and reproduce? We'll tackle such questions as we read works by Shakespeare and literary/film adaptations from around the globe. And, closer to home, how do different communities in the United States receive and write back to Shakespeare? How do issues of race and class, especially, affect access to Shakespeare? A service learning project with the Intensive Learning Center of the Kalamazoo County Juvenile Home will allow your students there, and our class, to consider those questions. As we work with these students to write their own adaptations of Othello, we'll all consider how writing back to Shakespeare might be a good way to empower students to question the assumptions his plays make. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/N/THEA 265 First Theatres This sophomore seminar will survey the "first theatres" of many different areas of the pre-modern world -- including the Abydos Passion Play of ancient Egypt, Yoruba ritual, ancient Greek & Rome, Japanese Noh Theatre, early Chinese music drama, Sanskrit theatre of India, and European Medieval theatre. Through research, discussion, and critical thinking exercises, students will be encouraged to view performance as an intercultural and continually developing phenomenon in both art and daily life. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

SEM/N/RELG/HIST 268 Jews on Film It will examine themes in Jewish history and culture as expressed through the medium of film. Through readings, lectures, and class discussions, students will explore issues such as assimilation and acculturation, anti-Semitism, group cohesion, interfaith relations, Zionism, and the Holocaust. We will consider questions, such as: How are Jewish characters portrayed on film? Which elements of these portrayals change over time, and which remain constant? How do these cultural statements speak to the historical contexts that produced them? What choices do filmmakers make regarding the depiction of Jewish life, and how do those choices influence perceptions of Jews in particular, or minorities generally? Prerequisite: Sophomores Only

SEM/N/AFST/HIST 271 Nelson Mandela & the Anti-Apartheid Movement There are times when specific people, places and moments in history capture the imagination of the world. This occurs when that specificity speaks volumes to the human condition and offers lessons that we all sense are important. Such has been the case with Nelson Mandela and anti-apartheid movement. This course will use Mandela and the evolution of, and struggle against, apartheid as a window into some of the 20th century's most complex issues. Prerequisite: Sophomores Only

SEM/N/AFST 275/HIST 275 African Christianity This course explores the complex and disparate trends of Christianity in Africa since the first century C. E. It highlights Africa's role in the development and growth of Christianity as a global religion. Prerequisite: Sophomores Only

SEM/N/HIST 287 What If: Alternate Pasts This is a class about what might have been. Taking history itself as an object of analysis, this seminar will ask us to reconsider how we understand the past by thinking and acting in counterfactual ways. We will explore debates for and against counterfactualism and examine diverse counterfactual writings. We will also experience counterfactualism by participating in two role-playing activities, one set in a critical moment of reform in 19th century Korea, and the other set in Japan in the months before Pearl Harbor. As we seek to achieve the goals associated with specific roles, we will gain insights on the contingent, complex, and often messy reality of the past. Prerequisite: Sophomores only

SEM/ANSO 292 Development and Dispossession This course takes a critical approach to the study of development, focusing particular attention on the displacement and dispossession of local populations. Using contemporary case studies, we examine how neoliberal policies and practices play out in various development sectors, including agriculture, infrastructure, and the extractive industry, in both rural and urban spaces in the U.S. and around the world. Prerequisite: Sophomores only.

SEM/ENGL 295 Poetic Justice This course will examine the treatment of law and political order in historically and culturally varied literary texts as part of a broader consideration of the relationship between art and social justice. We will explore how literature addresses "questions that matter," including personal ethics, the purposes and manners of criminal punishment, and racial and gender equality. Students will consider how literary texts, like legal texts, have the power to influence politics and society. Readings will include such texts as *Antigone*, *The Faerie Queene*, *The Merchant of Venice*, Kafka's *The Trial*, Philip K. Dick's *Minority Report*, and Shirley Jackson's *The Lottery*.

SEM 295 Principles of Civic Engagement This course for sophomore Civic Engagement Scholars and other sophomores with experience in service-learning will enhance their skills, knowledge and attitudes as effective social justice leaders and deepen their understanding of the processes and outcomes of critical service-learning as a tool for social change. Students will explore the structures, history, and intersections among the social justice issues that our programs address -educational and health equity; immigrant rights; mass incarceration; reproductive rights; sustainability and food justice; and others - and will trace connections from the local to the global. Students will expand and apply the learning they derive from working with communities by examining the rationale for and best practices in experiential education and higher education initiatives to link personal and political commitments, public action, and democracy. They will study, design and lead structured reflection, a key component of community engagement for social justice.

Senior Seminars

Senior Seminars are the culmination of the Shared Passages Program. Disciplinary senior seminars integrate students' experiences inside and outside a particular major, while the interdisciplinary senior seminars listed below provide a liberal arts capstone experience, allowing students from a variety of majors to apply diverse aspects of their Kalamazoo College education to an interesting topic or problem.

Senior seminars

SEM/ENVS 401 Energy & Environmental Policy Worldwide National patterns of energy use and approaches to environmental policy vary over a wide range around the World. A grand experiment, with unfortunate consequences, is being conducted before us, as some large nations pollute with reckless abandon, and largely ignore environmental issues, while others, mostly in Europe, have made significant changes in behavior, seemingly to everyone's benefit. Who should pay for all this? Should the United Nations intervene on the big polluters? What policy should the U.S. follow? An intelligent discussion of these issues needs input from the fields of Science, Political Science, and Economics, and is also informed by international experiences. The course is designed to bring together viewpoints from several different majors, and personal perspectives gained through international experiences are also valuable. Possible careers involving environmental science, engineering and politics/policy will be discussed. Personal environmental impact and various choices/options will also be discussed. Prerequisite: At least three courses in either natural science, economics, or political science, with a major in one preferred.

SEM 407 The Quest for Happiness: Living the Good and Gracious Life This course will draw on Psychological principles to explore how people can make their lives more fulfilling and meaningful. The course will focus on discussion and development of important life skills, including gratitude, resilience, and optimism, that are important for emotional well-being. Course assignments and discussions will emphasize reflection about one's own experiences at K as well as one's own goals for life post-graduation. Prerequisite: Seniors Only

SEM 408 Slow Farming: Resilient, Just, and Joyful Agriculture In this senior capstone course, students will explore solutions to problems created by our current food systems. We will critically examine recent movements in organic, local, and sustainable agriculture and discuss how we might each personally engage in transforming our individual, institutional, community, and political relationships with food and farming. This course includes a practicum in "slow farming" at Harvest of Joy Farm, LLC. Students should attend an informational meeting or speak individually with Professor Amy Newday prior to enrolling in this course. Prerequisite: Seniors Only

SEM 432 Steal Like an Artist The aim of this senior capstone is to create a space in which artists across disciplines may collaboratively and individually prepare for life beyond the balance of safety and creative tension embodied in the studio, rehearsal space, and workshops central to their K education. What happens to the artist's creative life once set free from the structure and discipline of apprenticeship? Through self-designed projects, service-learning partnerships with local makers, lively discussion and reflective writing, we'll thoughtfully consider, define, and begin practicing what is required to sustain a joyful creative life beyond K. Prerequisite: Seniors only

SEM/ENGL 435 American Indian Literature & Law

SEM 491/ENGL 495 Building the Archive: Baldwin & His Legacy In February of 1960, James Baldwin delivered an address, "In Search of a Majority," at Stetson Chapel which he later included in his collection of essays, *Nobody Knows my Name*. This seminar will approach this visit (and Baldwin) as a site of analysis. As an actual event, the occasion left artifacts (correspondence, publicity, newspaper accounts, published essay). The event also can be read within the legacy of other Civil Rights era visitors to the college, including Charles V. Hamilton (co-author of *Black Power: The Politics of Liberation*) and others. Moreover, as a writer who addressed national and international identity, racial politics (personal and cultural), and sexuality, Baldwin's various writings remain relevant even as they locate themselves within particular historical moments. Through close attention to Baldwin and his milieu, this course will invite students to engage their own experiences and disciplinary knowledge in their reading, writing, and archival research. Students will also document (in film and transcript) oral histories of participants in the Civil Rights period as part of their course work. This course is designated as a Senior Seminar for the 2015-2016 academic year. Prerequisite: Seniors Only

SEM 499 Special Topic Senior Capstone Senior Shared Passages Capstone special topics course. Topics will vary from course to course. SEMN-499 courses may be added to the curriculum throughout the year. Prerequisite: Seniors Only

SEM 499 Social Justice & the American City This class undertakes a critical examination of American city spaces, using Chicago, Detroit, and Kalamazoo as its key cities. Placing literary texts alongside works of history, sociology, and urban studies, the course investigates how race and class structures shaped the formation of Chicago in the early twentieth century and how the undergird the multiple issues facing contemporary Detroit. Throughout, the class examines how artists, musicians, writers, and activists have responded to social inequalities and worked for social justice. These readings will provide the raw materials for helping students use the course as a working laboratory and studio, in which they undertake self-led projects of creative and critical intervention. In so doing, students will not only theorize their relationships to and within these urban spaces, but become both informed scholars and active agents of social change. Prerequisite: Seniors only

SEMN 499 Being... While acknowledging the magnitude of the task, over time and across cultures, participants in this Senior Capstone will explore many endings to the title of the course and the means by which those ends can be attained. Though not limited to a short list of possible endings (and ends?) - such as aware, human, responsible, in transition, of use, green, a community, present, or good enough - explorations will be prescribed by time available and who is participating in the course. That said, two parts of being aware will entail learning to identify common bird songs and trees in our local environs. And, being situated at a threshold, this course will include the Janus-like endeavors of reflecting on experiences and anticipating possible futures that will become part of narratives explored. Prerequisite: Seniors Only

SEMN 499 Historical Reading on Ferguson This course draws students into a critical engagement with police violence in the United States and the mounting resistance to it. Sparked by killings in Ferguson Missouri, many people are questioning how, why and to what extent such violence occurs. While the professor suggests readings, students will select texts, articles and blogs for the class and will lead discussions. Students will do reflections on how their liberal arts education at K has prepared them to take on this topic and how their education and this seminar might impact their life choices after graduation. Among other assignments, students will also write their own booklet on "a contemporary history of the police." The areas of research for this project will be decided upon, framed, developed and written by the students. Prerequisite: Seniors Only

SEMN 499 Exploring Stigma: Verbal & Visual Narratives Social stigma exists. It may be associated with perceptions toward mental illness, HIV/AIDS, socioeconomic status, gender identity, body image, race and religion. Engaging their own experiences and disciplinary knowledge, students from all majors will be invited to explore the existence of stigma in their lives-on campus and in their communities. Stories help humanize issues and are invaluable as educational and awareness-raising tools across multiple sectors and disciplines. Through the creation of multimedia digital stories, and utilizing art-therapy-based approaches, students will build a narrative of self and others relating to discovered stigmas. Reading works of psychology, art therapy, and sociology; viewing multimedia artwork; and interacting with community members, students will examine how the digital story plays a role in social justice and in eliminating stigma. Prerequisite: Seniors Only

SEMN 499 Crafting a Life: Living the Liberal Arts This course is based on the liberal arts idea of educating the whole person. It will help students define and refine a contextual understanding of their own identity, a direction based on values, purpose and passion, and a personal philosophy upon which they can build a life. It will seek to explore and support integration of students' social, emotional, physical, cultural and ethical development and consider psychological well-being, the value of a rich and thoughtful interior life, articulated core beliefs, social engagement and openness to the unexpected as elements of a well-considered life plan. Prerequisite: Seniors Only

SEMN 499 Digital Passages: Personal & Public Narratives Digital storytelling stands out for its directness of emotional expression and voice. In this course, students will help bring to life the reality of their individual experiences-past, present, and conceivable future-through digital storytelling of various means. Students will reflect on their lives prior to college as well as what they've experienced while in school. They will look inward, but also outward, since students at Kalamazoo College have developed strong interests in a field of study and/or causes of social justice. We will look to see how their personal experiences have coalesced to influence their deep interest in a discipline-possibly interwoven with a practice of a being a socially constructive human being. Stories will begin with personal, factual evidence that grows outward-from the specific to the universal. Students then will make small pieces that relate their story using image and text or video and sound (utilizing easily accessible tools). The works may range from straight reportage to the experimental, from non-fiction to the allegorical. Their creative works will be designed primarily for, and dissemination through, social media. By imparting their story to an audience, it is hoped they will make meaningful connections between themselves and others. Prerequisite: Seniors only.

SEMN 499F Crafting a Life - Fall This course will help students define life goals and a direction based on values, purpose and passion, interests, identities, and a personal philosophy upon which they can build a life. Reflective practice is partnered with core practical life skills such as budgeting, public speaking, and interviewing, among others. This course requires students to begin imagining and preparing for the immediate next stages of life as well as the necessary work of designing a well-considered life plan. Prerequisite: Seniors Only

SEMN 499W Crafting a Life - Winter This course will help students define life goals and a direction based on values, purpose and passion, interests, identities, and a personal philosophy upon which they can build a life. Reflective practice is partnered with core practical life skills such as budgeting, public speaking, and interviewing, among others. This course requires students to begin imagining and preparing for the immediate next stages of life as well as the necessary work of designing a well-considered life plan. Prerequisite: SEMN-499F and Senior Standing

Spanish Language and Literature

Professors: Carisella, MacLean (Chair), Malagamba, Romero-Eshuis, Valle

The Spanish program emphasizes a critical understanding of the Spanish-speaking world by focusing on language skills, analytical tools, and the study of a variety of cultural expressions. These studies are an effective way of gaining a deeper understanding of the world, which is an important element of a liberal arts education. The program offers courses in language, literature, film and other cultural expressions from the Spanish-speaking world. There are study abroad opportunities in Madrid and Cáceres, Spain; Quito, Ecuador; Oaxaca, Mexico; San José, Costa Rica; and Santiago and Valparaíso, Chile.

Off-campus experiences are complemented by on-campus study and experiences that maintain and improve a student's language skills. Opportunities to view Spanish language films, read Spanish publications, and converse with native speakers are an integral part of the Spanish program.

Faculty members meet students inside and outside the classroom, participate in campus activities, and counsel students regarding graduate and professional career choices in high school and college teaching, science, publishing, international trade, international banking, and other fields.

Placement

Language placement exams are required for students who have taken Spanish courses or who are native or heritage speakers of Spanish, even if they are not sure they will continue studying Spanish at Kalamazoo College. Students with three or more years of high school Spanish will not be placed into SPAN 101. Placement exams for first-year and incoming transfer students completed by June 15th will be scored before First-Year Registration in July. All placement exams for first-year students taken between June 15th and August 15th will be scored prior to Orientation week. All students (including first-year students) who do not complete a language placement exam prior to the deadlines indicated above will not be able to register for Spanish until they have taken a language placement exam. Students needing to take the language placement exam have until the end of 4th week of the current quarter to complete the placement exam if they wish to take a language class the following quarter. Exams taken by the deadline will be scored in 5th week so that students will know their placement in time for registration for the next quarter.

Those students who wish to receive credit for language courses they have taken at another college or university before enrolling at Kalamazoo College must take the Spanish language placement test and test into a higher-level course than the one for which they are seeking credit. Any appeal of the placement test results should be directed to a Spanish faculty member.

Advanced Placement (AP) and International Baccalaureate (IB) Credit for Spanish Major and Minor

Students with Advanced Placement (AP) or IB scores must still take the placement test in Spanish. An Advanced Placement (AP) score of 4 or 5 in Spanish language will count as one credit toward the Spanish major or minor, provided that the student take Spanish 203 or beyond as her/his first Spanish course at the college.

An advanced placement (AP) score of 5 in Spanish literature shall count as one credit toward the Spanish major or minor provided that the student take Spanish 203 or beyond as her/his first Spanish course at the college.

IB scores of 5-6-7 on the Higher Level may count toward a major, minor, or concentration at the discretion of the department faculty.

Requirements for the Major in Spanish

Number of Units

Eight units are required, not including SPAN 101, 102, or 201 but which may include the SIP. No more than two of these units can be earned during study abroad. No more than three units total may be earned off campus through any combination of study abroad, AP, IB, transfer credits or inter-institutional enrollment. Although a student may take any number of courses at the 200 (intermediate) level, no more than two of these courses may count toward the major.

Requirements

- 0 – 3 units from intermediate courses (SPAN 202 - SPAN 206)
- SPAN 301 Introduction to Hispanic Literature (prerequisite to all 400 level courses) and up to one additional 300-level course
- SPAN 491 or 492, the Senior Seminars (taken in the senior year)
- Three or more 400-level courses besides the senior seminar
- Successful completion of Comprehensive Examinations during the Senior year

Speech Communities: An experience of study abroad, study away, service learning, internship or community service in a Spanish-speaking environment; or growing up in a Spanish-speaking community that fostered the acquisition of language and cultural knowledge

Units from Study Abroad

Only two units, to be used toward the major in Spanish, may be earned in a long term (6 month) or an extended term (9 month) program. One unit only from a short term (3 month) program may be used.

1. The student who goes abroad AFTER having taken SPAN 301 may bring back one unit in hispanophone literature or culture, and another one in language or topics pertaining to the country/region; students on short-term programs may only bring back one unit. That student must still take the Senior Seminar and enough 400-level courses on campus to complete the eight-unit requirement.
2. The student who goes abroad BEFORE having taken SPAN 301 may bring back one unit in hispanophone literature or culture and another one in language or topics pertaining to the country and region; students on short term programs may only bring back one unit. Students must still take SPAN 301, the Senior Seminar, and enough 400-level courses to complete the eight-unit requirement.

Spanish majors are expected to participate in a study abroad program and acquire a high proficiency of language skill. Spanish majors are encouraged to develop appropriate cognate programs in areas such as the Sciences, History, Political Science, Economics, Business, Music, Philosophy, Anthropology, Sociology, or International and Area Studies.

Requirements for the Minor in Spanish

Number of Units

Six or more units are required, not including SPAN 101, 102, or 201. No more than one of these units can be earned during study abroad.

Requirements

- 0 – 3 units from intermediate courses (SPAN 202 - SPAN 206)
- SPAN 301 Introduction to Hispanic Literature and up to one additional 300-level course
- Two or more 400-level courses
- Speech Communities: An experience of study abroad, study away, service learning, internship or community service in a Spanish-speaking environment; or growing up in a Spanish-speaking community that fostered the acquisition of language and cultural knowledge

Units from Study Abroad

1. A student may count one unit from abroad toward the minor in Spanish. The unit, which must be taught in Spanish, may be in the literature of the hispanophone world, or in language, or a cultural/topical course pertaining to the hispanophone world.
2. If a student has taken SPAN 301 (Introduction to Literature) before going abroad, the student brings back a unit in literature or culture (from abroad) towards the minor. A student who goes abroad before taking SPAN 301 needs to take SPAN 301 and enough 400-level courses on campus after study abroad in order to complete the minor requirements. Students who go on study abroad before taking SPAN 301 should contact Spanish faculty prior to their return to determine which on-campus Spanish course to take next in the sequence.

Spanish courses

SPAN 101 Beginning Spanish I Introduction to the Spanish Language and the Spanish-speaking world. Students begin developing competency in the four basic skills (reading, writing, listening, and speaking) through communicative activities and cultural exploration. Prerequisite: Placement test if student has any prior experience with Spanish.

SPAN 102 Beginning Spanish II Further development of the four skills through continued exploration of the Spanish-speaking world. Students will work to acquire the linguistic skills and cultural knowledge needed to navigate a variety of cultural settings. Prerequisite: SPAN-101 or Placement Test

SPAN 202 Conversation and Composition Critical explorations of the Spanish-speaking world through focused reading, discussion, and related written assignments. Prerequisite: SPAN-201 or Placement Test

SPAN 203 Advanced Conversation and Composition An introduction to the critical analysis of texts from the Spanish-speaking world. Students begin to acquire a more sophisticated knowledge of the intricacies of the Spanish-speaking world while putting into practice more complex forms of written and oral expression. Prerequisite: SPAN-202 or Placement Test

SPAN 205 Culture of Health and Disease in the Hispanic Community This course enables students to connect with Spanish-speaking clients and healthcare providers by teaching appropriate vocabulary and presenting different cultural attitudes and practices relating to health and disease. A service-learning component is included in this course. Prerequisite: SPAN-201

SPAN 206 Business Spanish/Español Comercial Business Spanish is a course aimed at developing students' communicative skills and intercultural awareness when interacting with Spanish-speakers in a business setting. The course employs a multifaceted, communicative approach to second language acquisition that foment the development of all essential skills: listening, speaking, reading and writing. The course is driven by topics, language functions and situations pertinent to business settings. Prerequisite: Take SPAN-201 or place into SPAN-202 or above.

SPAN 301 Introduction to Hispanic Literatures An introduction to the periods, concepts, genres, and major figures of Spanish and Spanish-American literature. Using selected texts, discussion, and a variety of written assignments, this course will introduce students to literary analysis and bibliographic methods. Prerequisite: SPAN-203 or Placement Test

SPAN 302 Advanced Oral Communication This course is for advanced Spanish students who are committed to improving their competency in spoken Spanish, and who are interested in moving to a cohesive multi-paragraph discursive level. Students will learn the strategies required to communicate effectively in a variety of contexts. Students will be expected to develop proficiency in a number of discursive modes including conversations, discussions, presentations, debates, and reports, among others. Attention will be given to pronunciation, intonation, both verbal and non-verbal communication, as well as the skill of active listening. This course will not count for the Spanish major prior to the 2018 catalog requirements. Prerequisite: Take SPAN-303

SPAN 401 The Spanish-Speaking World on Film Research, discussion, and analysis of selected topics and issues in the Spanish-speaking world as reflected in film. Students develop the vocabulary and critical-thinking skills necessary to analyze and interpret the genre in both oral and written form. This course may be repeated for credit toward graduation if the content is different, but may count only once toward the major or minor. Prerequisite: SPAN-301

SPAN 435 Advanced Literary Studies Course focuses on major figures and movements in Spanish and/or Spanish-American literature. Topics will vary. May be repeated for credit if the course content is different. Prerequisite: SPAN-301

SPAN 445 Visual Practices in Latin America This course introduces students to critical texts, debates and questions proposed by the visual studies field in the context of Latin American cultural production. The course will examine and question various historical cases in which the visual medium has been used as a tool of power and dominance of populations, and as a way to express resistance and subversion. The course will include discussions on: Barroco de Indias, Mexican Muralism, Third Cinema, issues on photography and photojournalism, and soap opera aesthetics under dictatorships. In order to participate in an active and well-informed way, students are required to read, observe, reflect and write about visual material. Prerequisite: SPAN-301

SPAN 455 Limits of Genre This course explores the limits of the traditional boundaries (poetry, narrative, drama, essay) among literary classifications. Appropriate cultural, historical, and political context provides the backdrop to understand the crossing of boundaries among literary genres and the incorporation, in literary texts, of diverse art forms. Prerequisite: SPAN-301

SPAN 465 Imperial Spain Enlightenment to the Restoration A survey of Spanish literature from the 16th to the 19th centuries. This period covers Spain's imperial expansion, religious and political conflicts in Europe, and a problematic internal reorganization. This upheaval nevertheless sparked numerous literary innovations in narrative, theatre and poetry. Students will analyze literary texts, and appropriate secondary readings, in order to understand the key concepts and debates in the early modern period; some of which remain unresolved today. Prerequisite: SPAN-301

SPAN 470 Modern Spain A survey of Spanish literature from the 19th and 20th centuries. As Spain's overseas territories won their independence, the Spanish nation struggled to modernize and redefine itself. Lingering internal conflicts fueled a series of civil wars, and regional differences challenged national discourses on unity and identity. The literary sphere is where many of these clashes were articulated, and where many versions of modern and postmodern subjectivities were posited. Students will use literary and visual texts to examine important themes and movements in Spanish culture. Prerequisite: SPAN-301

SPAN 475 Conquest, Colonization, and Independence Study of the principal literary figures, works, and cultural and political contexts of XIV century to 1830. Prerequisite: SPAN-301

SPAN 480 Constructing Spanish-America Study of the principal literary figures, works, and cultural and political contexts from mid XIX-century to mid XX-century. Prerequisite: SPAN-301

SPAN 485 Literary Revolutions of Spanish-America Examination of the intellectual and literary patterns in Spanish-American literature from the mid-XXth century onward. Prerequisite: SPAN-301

SPAN 491 Peninsular Spanish Seminar Advanced study of outstanding authors, works, or genres that will vary to reflect the interest of students and the professor. Prerequisite: One unit above SPAN 301 and senior standing

SPAN 492 Spanish-American Seminar Advanced study of outstanding authors, works, or genres that are generally recognized as seminal to an understanding of Spanish America's social, philosophical, and aesthetic traditions. Prerequisite: One unit above SPAN 301 and senior standing

SPAN 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Theatre Arts

Professors: Berthel (Chair), Menta (Emeritus), Potts (Director of Theatre), Reeves

Dedicated to the liberal arts traditions and innovations of Kalamazoo College, the Department of Theatre Arts offers students access to the collaborative nature of drama through the integration of both creative and analytical courses, production laboratories, internships, and individualized projects. By studying the wealth of worldwide theatre traditions reflecting the pluralism in our society and the interdependence of all peoples and cultures, students gain the research tools for self-discovery; informed, critical thinking; the ability to take action on their ideas and responsibilities; and the development of the kind of self-esteem and values that will lead them as artists toward enjoying a lifelong journey of personal growth and inquiry in a climate whereby each may learn to speak with his or her own voice.

Open to all, majors and nonmajors alike, theatre arts productions emphasize both personal and skill development in acting, design, stage management, arts management, technical areas, and directing. The productions also serve as creative activities for students and enjoyable, thought-provoking entertainment for audiences. The academic program focuses upon a wide range of dramatic styles, encouraging students to understand the breadth of dramatic literature from the classical to the most contemporary. Experiential components are clearly linked with classroom studies and offer involvement with the Festival Playhouse Company, drama study in England, student projects in the experimental Dungeon Theatre, placement with regional and professional theatres, and opportunity for participation in the GLCA New York Arts Program. Students interested in these opportunities should consult with department faculty regarding options and prerequisites.

Requirements For the Major In Theatre Arts

Number of Units

Ten units are required.

Required Courses

One full unit of Theatre 200 Production Practicum

Foundations (Two units to be completed in first year):

THEA 110 Stagecraft

THEA 120 Fundamentals of Acting

Explorations (Four units to be completed, if possible, by end of second year):

One design course (to be completed by end of sophomore year) chosen from among:

THEA 210 Stage Lighting

THEA 235 Costuming & Stage Makeup

THEA 240 Scenic Design

Two theatre histories chosen from:

THEA 155 Introduction to African-American Theatre

THEA 265 First Theatres (Sophomore Seminar)

THEA 270 Theatre of Illusionism

THEA 280 Theatre of Revolt: Modernism and Postmodernism

THEA 290 Asian Theatre

One dramatic literature course chosen from:

ENGL 264 Global Shakespeares

ENGL 265 Shakespeare

THEA 255 Playwriting

(Another option is that a third theatre history course may substitute for the one dramatic literature course. Appropriate courses taken at Study Abroad Centers may also be eligible.)

Connections (three units to be completed in junior and senior year):

THEA 380 Directing I

THEA 490 Senior Seminar

And at least one course chosen from among:

THEA 210 Stage Lighting

THEA 225 Developing a Character

THEA 235 Costuming & Stage Makeup

THEA 240 Scenic Design

THEA 305 Voice & Diction

THEA 420 Advanced Acting

THEA 445 Advanced Design

THEA 480 Advanced Directing

(The Design courses – THEA 210, 235, 240 – may count as an upper level course if the student is particularly interested in Theatre Design.)

THEA 200 Production Practicum (one unit of four different 1/4 units)

Throughout their four years, theatre arts majors must distribute each 1/4 unit in a different area of production (acting, stage management, costuming, lighting, scenery, sound, properties, etc.)

The department believes strongly in the importance of interdisciplinary studies as a means of directly enriching a theatre focus and highly recommends cognate courses in the arts, literature, history, international area studies, writing, and women and gender studies. With the exception of the dramatic literature course, all courses for the theatre major must be taken on campus. All majors and minors must complete one unit of THEA 200 as a graduation requirement, which is a regular part of their theatre production involvement. Please see the department faculty for specific instructions to complete the THEA 200 unit.

Requirements for the Minor in Theatre Arts

Number of Units

Six units are required.

Required Courses

One unit of THEA 200 (see THEA 200 requirement for major)

One unit from each of the following areas:

Performance

THEA 115, 120, 225, 305, 380, 420

Design/Technical

THEA 110, 235, 210, 240

Theatre History

THEA 155, 260, 265, 270, 280, 290

Electives

Any two additional units in theatre arts.

Students should meet with department faculty when selecting this minor.

Theatre Arts courses

THEA 110 Stagecraft Introduction to the principal topics and practices of technical support for theatre production: construction of stage scenery, scene painting, properties, rigging/focusing of lights, sound techniques, basic technical craft skills, and production communication practices. Fifteen-hour production lab required.

THEA 115 Activating Theatre Techniques for Community Dialogue A workshop course based on the Activating Theatre techniques of Augusto Boal. A developmental skills course in creating forum theatre for community and social change, and for moderating effective group dialogue. Interdisciplinary links with psychology, sociology, women and gender studies, and education with a focus on both experiential education and interpersonal communications.

THEA 120 Fundamentals of Acting Introduction to the skills necessary for performing on stage. This course is an exploration of the fundamental techniques necessary for beginning scene and monologue study in modern and contemporary realism. Through physical and vocal exercises, text and character analysis, scene and monologue studies, the student is introduced to the process of acting preparation and performance. Excellent course for nonmajors seeking an introduction to the art of acting.

THEA 155 Introduction to African-American Theatre Survey/lecture course from an African-American perspective, examining the activities and developments of Black American life as evidenced through its theatre, with emphasis on history, philosophy, dramatic creations, criticism, and socio-psychological concerns. Includes lectures in theatrical contributions of Western and African civilizations.

THEA 200 Theatre Production Practicum Each student involved in a significant role on regular theatre productions is a participant in the Festival Playhouse Company and shall thereby earn 1/4 unit of credit per production. Students may earn a maximum of two full units through THEA 200. Theatre Arts majors and minors must distribute each 1/4 unit in a different area of production (acting, stage management, costuming, lighting, scenery, sound, properties, publicity, etc.). Students must register themselves into Theatre 200 by then end of second week of the quarter in which they are participating. Instructor permission may be required.

THEA 210 Lighting Design Studies in the ideation and communication techniques of stage lighting; emphasis on play analysis, sculpting and painting with light, color theory, drafting, projection, and practical laboratories. Fifteen-hour production lab required.

THEA 225 Developing a Character Advanced work in characterization with emphasis placed on building a character through various acting techniques, including Stanislavski, Suzuki, Viewpoints, and improvisational exercises. A continuation of THEA 120, this course is designed to deepen the student's understanding of their acting process combined with the discovery of voice and body in relation to character development. The course includes partner and monologue work, as well as written assignments. Prerequisite: THEA-120

THEA 235 Costuming and Stage Makeup This course is split into two sections: stage makeup and costuming. The makeup section will introduce the student to the basic principles of makeup application and design for the stage. The costume section will introduce the student to the basic techniques, tools, and materials used in costume construction along with an introduction to costume shop organization. Fifteen-hour production lab required.

THEA 240 Scenic Design Practical application and study of scenic design, including play analysis and historical research, followed by sketches, decor, drafting, construction of models, and color renderings. Focus upon the principles of movement, scale, color, light, silhouette, environment, and composition. Fifteen-hour production lab required.

THEA 255 Playwriting An introduction to playwriting, examining such topics as script analysis, dramatic structure, characterization, rhythm, and imagery. In addition to specific writing projects, students will also read and analyze representative plays.

THEA/SEM 265 First Theatres This sophomore seminar will survey the "first theatres" of many different areas of the pre-modern world -- including the Abydos Passion Play of ancient Egypt, Yoruba ritual, ancient Greek & Rome, Japanese Noh Theatre, early Chinese music drama, Sanskrit theatre of India, and European Medieval theatre. Through research, discussion, and critical thinking exercises, students will be encouraged to view performance as an intercultural and continually developing phenomenon in both art and daily life. This course is a Shared Passages Sophomore Seminar. Prerequisite: Sophomores Only

THEA 270 Theatre of Illusionism: Western Theatre From the Renaissance to Early Film Study of Western theatre history from the Italian Renaissance to the evolution of early film, emphasizing the trend of the theatre to simulate the details of everyday life and the growth of theatre as an entrepreneurial institution that informed developments in audience, playwriting, acting, and design.

THEA 280 The Theatre of Revolt: Modernism and Post Modernism A study of the Theatre of Revolt, an overview of Western theatre history and dramatic literature over the last 150 years including Brecht, Artaud, and Beckett. Emphasis on comparing realism and various forms of nonrealism, such as expressionism and absurdism, through the plays and trends in acting, directing, and design, and an examination of what constitutes the modern theatre and our current age of post-modernism.

THEA 305 Voice and Diction Study of techniques for actors to develop the vocal production necessary for stage performance. Training in Fitzmaurice Voicework, Standard American English for neutralized dialect, and phonetic ear training. Class exercises, monologues, vocal physiology, proper warm-up techniques, and care for the professional voice. Prerequisite: THEA-120 and sophomore standing or with instructor permission.

THEA 380 Directing I with Lab Introduction to the art of stage direction including its history, development, functions, and components; study of script analysis, composition, working with actors, and the organization of a production. Weekly rehearsal lab required. Prerequisite: THEA-120 & Theatre Majors Only

THEA 420 Advanced Acting Introduction to the skills necessary to act in plays from some major periods and styles of dramatic literature: Shakespeare and Restoration. Class exercises, monologues, scene study, workshop performances, written assignments, and analysis of dramatic literature will form the basis of the course work. Specific costume pieces, including shoes, which are not provided by the department, are required to be worn during the classes and in rehearsals. Prerequisite: THEA-225

THEA 445 Advanced Design Advanced forms of scenery, costume, or lighting study selected in consultation with the instructor. May involve portfolio development and design of main-stage productions. Prerequisite: THEA-210, THEA-235, or THEA-240

THEA 465 Theatre Production Management This course combines the fundamentals of theatre production management with the principles and practice of theatre arts management. Production fundamentals will include aspects of stage management and production supervision while stressing the application of efficient production methods. Theatre Arts management will study areas of management including personnel, budget, audience analysis, fundraising, promotion, operation, and organizational strategies for academic, community and professional theatre.

THEA 480 Advanced Directing Advanced problems in directing for the upper-level student, with a focus on independent projects and directing a one-act play. Prerequisite: THEA-380

THEA 490 Senior Seminar Preparation for the professional working world in theatre. Résumé preparation, various workshops and professional guest speakers. Discovery and articulation of artistic goals through group activities, written assignments, and readings. Class group agenda project. Preparation for required departmental SIP presentations. This course also include Theatre Arts Departmental Comprehensive Written and Oral Exams. Prerequisite: Theatre major with senior standing.

THEA 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum -> Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Women, Gender, and Sexuality

Women, Gender, and Sexuality

Professors: Anderson, Bangura, Berthel, Boatwright, Boyer Lewis, Einspahr, Elman, Fong (Director), Garriga-Lopez, Hahn, Haus, Heinritz, Manwell, Petrey, Smith, Stefatos, Sugimori

The major and concentration in Women, Gender, and Sexuality offers an interdisciplinary approach designed for students wishing to pursue these interests systematically in their academic programs. The concentration is strongly recommended for those considering graduate work in women's, gender, and/or sexuality studies, but is intended to enrich the liberal arts experience of any student through concerted study of a significant dimensions of human experience. The program aims to include the widest possible spectrum of issues affecting women and GLBTQ individuals. Students are encouraged to select courses that will acquaint them with a variety of perspectives. Those considering the major or concentration are encouraged to consult with the director as early as possible in order to make the most of the opportunities available.

Requirements for the Major in Women, Gender, and Sexuality

Number of Units

Eight units are required

Required Courses

The following four courses are required of all Women, Gender, and Sexuality majors:

WGS 101 Women, Gender, and Sexuality

WGS/POLS 265 Feminist Political Theories

WGS 390 Feminist and Queer Inquiries

WGS 490 Seminar in Women, Gender, and Sexuality

Elective Courses

Four elective courses representing at least two divisions:

Fine Arts

ARTX 290 Art and Gender

Humanities

AFST/HIST 272 Gender Relations in Africa

CLAS/HIST 230 Women in Classical Antiquity

ENGL 224 Early Modern Women's Literature: Shakespeare's Sisters

ENGL 225 19th Century Women's Literature: The Epic Age

ENGL 226 Women's Literature 1900-Present: Modern Voices

HIST 220 American Women's History to 1870

HIST 221 American Women's History Since 1870

HIST 237 Women in Europe

HIST 238 Gender and Sexuality in Pre-Modern Europe

HIST/RELG 267 Women and Judaism

PHIL 311 Postmodern Critical Theory

RELG 202 Same-Sex, Gender, and Religion

RELG 210 Sex and the Bible

Modern and Classical Languages and Literatures
JAPN 236 Premodern Japanese Literature in Translation
JAPN 250 Manga/Anime and Gender in Modern Japan

Social Science

ANSO 120 The Family
ANSO 225 Sex and Sexualities
PSYC 270 Feminist Psychology of Women
PSYC 465 Advanced Psychology of Sexuality
POLS 310 Women, States, and NGO's
POLS/SEMN 406 Male Violence Against Women

Requirements for the Concentration in Women, Gender, and Sexuality

Number of Units

Six units are required.

Required Courses

The following three courses are required of all Women, Gender, and Sexuality concentrators:

POLS 265 Feminist Political Theories or WGS 390 Feminist and Queer Inquiries
WGS 101 Women, Gender, and Sexuality
WGS 490 Seminar in Women, Gender, and Sexuality

Elective Courses

Three elective courses chosen from the approved list above.

In the major and concentration, required courses are designed to introduce students to fundamental concepts and issues in Women, Gender, and Sexuality through the lens of disciplines representing the arts, the humanities, and the social sciences. Through this core, students should begin to see parallels between disciplines, to develop a basic vocabulary in the field of WGS, and to become familiar with major works, thinkers, and directions in the field.

Other, one-time course offerings may be counted as a core course only with the approval of the director. Courses taken overseas and at other U.S. colleges may meet major or concentration requirements with the approval of the director.

Senior Individualized Project (SIP)

The SIP in Women, Gender, and Sexuality is encouraged but not required. Any faculty member regularly teaching in the Women, Gender, and Sexuality program may direct a SIP in Women, Gender, and Sexuality.

Juniors planning to write a SIP in WGS are required to enroll in WGS 390: Feminist and Queer Inquiries.

Various resources exist to fund SIP research. A couple to consider are Arcus Center for Social Justice Leadership Fund and CIP Grants for Student Projects Abroad.

Procedure for Approval

1. Enroll in WGS 390: Feminist and Queer Inquiries in your Junior Spring term. Discuss your plans to write a SIP in WGS with your proposed SIP advisor or with the WGS program director, who may recommend an appropriate advisor.
2. Revise your SIP proposal on the basis of your advisor's recommendations and submit it for signatures by the end of Week Eight of Spring term. The SIP proposal should be signed by the student and advisor and be delivered to the WGS program director. (Remember you must also register for the SIP with the Registrar).
3. Keep in mind that this is a provisional plan, and while we expect you to stick to your outline and schedule of research, we do recognize that your hypothesis and sources are a bit tentative. If your research takes a substantially different track than that proposed in your proposal, please contact your advisor immediately to get his or her advice.

Length

A thesis or research SIP might be comprised of 2-4 parts/sections/chapters, an introduction and conclusion, or some organizational equivalent. The student may make use of Internet source materials but not exclusively. The number of required bibliographic citations will be determined by the SIP advisor in consultation with the student. Guidelines: 1 unit: 30-50 pages of writing, excluding bibliographic materials; 2 units: 51-80 pages excluding bibliographical material.

Criteria for evaluation of other kinds of SIPs should be established in advance with the SIP advisor(s) and the WGS director.

Evaluation

The SIP is read and evaluated by the SIP advisor, according to the criteria set and agreed upon by the SIP advisor and the student, and on the basis of the student's success in meeting deadlines, completing revisions, and producing a competent piece of work.

If the SIP advisor would like to recommend the SIP for Honors, another member of the WGS program or occasionally a faculty member outside the program reads it. If that faculty member agrees, then the SIP is awarded Honors. One and two unit SIPs are eligible for consideration for honors.

Submission Requirements

For all SIPs, the final copy (i.e., no more revisions) is due to the SIP advisor no later than Friday of the second week of the term following the SIP quarter. For Summer SIPs, this means the second week of Fall quarter, even though Summer SIPs appear with the Fall registration. Students are expected to be completely finished with all work associated with the SIP by the time, with the possible exception of departmental symposia in later terms.

The time lag between students turning in complete SIPs and faculty deadlines for turning in grades should not be interpreted as extra time for students to make revisions to the SIP. Work on the SIP in a quarter in which the student is not registered for the SIP credit is considered an "invisible overload" for the students and is against College Policy.

Women, Gender & Sexuality courses

WGS 101 Introduction to Women, Gender, and Sexuality This course offers all students, including prospective concentrators in Women, Gender, and Sexuality, an introduction to the field, with attention to fundamental issues in Women's Studies. The course will identify the forms and sites of women's subordination, as well as women's collective responses to their conditions. In introducing the concept of structural inequality as it has affected women's lives, it will also explore the intersections of gender with race, sexual orientation, and class as significant factors in the construction of women's status.

WGS/POLS 265 Feminist Political Theories A core course in the Women, Gender, and Sexuality curriculum, Feminist Political Theories introduces students to a wide variety of feminist theoretical frameworks. We will examine what it means to do feminist theory; modern feminist theories, including liberal, radical, Marxist, socialist, and anarchist feminisms, as well as intersectionality theories; postmodern feminist thought, including queer and transgender theories and third-wave feminisms; and postcolonial feminist theories from early modernity to postmodernity. Prerequisite: Sophomore Standing

WGS/HIST/AFST 272 Gender Relations in Africa This course explores categories of masculinity and femininity that relate to and inform one another. It analyzes how these identity categories interact with other axes of social and political power, such as ethnic affiliation, economic status, and age in various places and times in Africa.

WGS/IAST 295 Women in Latin America This seminar provides an anthropological and historical introduction to the study of gender, gender-based violence, and women's activism in Latin America, with a focus on the realities and lived experiences of women in Latin America not only as victims of violence and oppression, but also as survivors and agents of their own herstory. Emphasis is placed on the phenomenon of gender violence, gender inequality, state terror, racism and socio-economic marginalization of women, children and LGBTIQ individuals.

WGS 295 Testimonies: Women's Narratives The course will examine the complex interplay and negotiation of trauma, memory, resistance and agency through women's writing (memoirs, oral, and written testimonies) and in opposition to official accounts, grand narratives, national histories and interpretations of the past. It will address the ways in which women have been excluded from history and public memory and how this silencing and marginalization has been reflected, negotiated, and opposed in their own narratives and life-herstories. Accordingly, these (her)stories will be discussed not only as testimonies of fear, deprivation, sexual victimization, silencing and trivialization, but also as "spaces" of political activism, resistance, and agency.

WGS 390 Feminist and Queer Inquiry An examination of the forces that have shaped or that are currently reshaping women, gender and sexuality studies. Focusing on the ways that recent work has drawn upon and challenged disciplinary forms of knowledge, the course aims to familiarize students with the current status of feminist and queer scholarship. The class encourages students to define their own critical interests and place themselves within this larger, scholarly conversation. Course will also prepare students for the SIP. Prerequisite: Open to juniors and seniors. Must have taken WGS-101.

WGS/ARTX 395 Performance Art in the 20th Century This course examines the dynamic history of performance art in the twentieth century, from the historical avant-garde to contemporary practices. A chronological exploration of performance art, the course also studies the themes inherent to live performance works, most especially gender, sexuality, and race. We will trace the alternative models of artistic-subjectivities and spectatorship produced when the body - and its vulnerabilities - is the subject of art. Such themes include: the politicization of daily life; the problem of documentation; the inherent narcissism of body art; the role(s) of the body in psychological and phenomenological experience; and the body and its modern mechanizations.

WGS 490 Seminar in Women, Gender & Sexuality A study of a particular aspect of feminist theory, history, or practice. Emphasis upon the theory and methodology of Women, Gender, and Sexuality, collaborative learning, and alternate source material. Topics vary annually. Prerequisite: Senior Majors & Concentrators Only

WGS 593 Senior Individualized Project Each program or department sets its own requirements for Senior Individualized Projects done in that department, including the range of acceptable projects, the required background of students doing projects, the format of the SIP, and the expected scope and depth of projects. See the Kalamazoo Curriculum Details and Policies section of the Academic Catalog for more details. Prerequisite: Permission of department and SIP supervisor required.

Directories

Board of Trustees

2018-2019 Officers of the Board

Charlotte H. Hall, Chair
James A. Clayton, Vice Chair
S. Si Johnson, Vice Chair
Eugene V. N. Bissell, Treasurer
James E. Prince, Assistant Treasurer
Amy S. Courter, Secretary
Melanie K. Williams, Assistant Secretary

Members of the Board

Hashem Akhavan-Tafti '82, President /Chief Science Officer, AhuraTech LLC, Howell, Michigan
Eugene V. N. Bissell '76, Former President and CEO AmeriGas Propane, Gladwyne, Pennsylvania
Judith L. Bollinger '76, CEO, Judico Capital Pte Ltd., Singapore
Martha L. Campbell '72, Former US Ambassador to the Republic of the Marshall Islands, Venice, Florida
Jody Clark '80, Senior Vice President Leasing, Realterm, Annapolis, Maryland
James A. Clayton '78, Former Senior Managing Director, General Electric Capital, Norwalk, Connecticut
Jonathan R. Cunningham '84, Principal and Founder, Aequitas Advisors, LLC, Stamford, Connecticut
Amy S. Courter '83, Chief Operating Officer, inerTRAIN, Santa Monica, California
Harold J. Decker '67, Retired, Miller, Canfield, Paddock and Stone, P.L.C. Kalamazoo, Michigan
Helen B. Etkin '76, Partner, Etkin and Company, Walled Lake, Michigan
Gwen A. Fountain '68, Former Director of Investment Management, Indianapolis Children's Museum, Bonita Springs, Florida
Mark G. Ghafari '14 Financial Advisor, Merrill Lynch, Grand Rapids, Michigan
Jorge G. Gonzalez, President, Kalamazoo College, Kalamazoo, Michigan
Charlotte H. Hall '66, Former Senior Vice President and Editor, *Orlando Sentinel*, Newtown Square, Pennsylvania
Donald L. Hafner '66, Former Vice Provost for Undergraduate Academic Affairs, Boston College, Belmont, Massachusetts
James N. Heath '78, Executive Vice President of Customer Excellence, Flexfab, Hastings, Michigan
Jerrod A. Howlett '09, Senior Solutions Consultant, Google, New York, New York
S. Si Johnson '78, Former Group President, Stryker MedSurg Group, Richland, Michigan
Alexander C. Lipsey '72, Circuit Judge, Kalamazoo County Circuit Court, Kalamazoo, Michigan
Asia L. Morales '15, Strategic Projects Specialist, The Posse Foundation, New York, New York
Hans P. Morefield '92, Vice President, Population Health and Care Coordination, Experian Health, New York, New York
Donald R. Parfet, H'13 Managing Director, Apjohn Group, LLC, Kalamazoo, Michigan
Gail A. Raiman '73, President, Raiman Consulting, Arlington, Virginia
Christopher Reynolds '83, Managing Officer and General Counsel, Toyota Motor Corporation; Executive Vice President, Toyota Motor North America, Inc., Plano, Texas
James A. Robideau '76, General Manager, Tecumseh Packaging Solutions, Inc., Van Wert, Ohio
Mary Beth Sarhatt, Chaplain, Hospice Care of Southwest Michigan, Kalamazoo, Michigan
William R. Stoeri '78, Partner, Dorsey and Whitney, LLP, Minneapolis, Minnesota
Jon L. Stryker '82, President and Founder, Arcus Foundation, New York, New York
Bonnie Wachter Swenby '69, Retired Dentist, Oxboro Dental Care, Bloomington, Minnesota
Amy E. Upjohn, Richland, Michigan
M. Elizabeth Washington '94, Director, Inclusion & Equality, Bronson Healthcare, Kalamazoo, Michigan
Richard E. Yehle '68, Former Contracts Manager, Alliance Wood Group Engineering, Houston, Texas
Debra L. Yourick '80, Director, Science Education and Strategic Communications, Walter Reed Army Institute of Research, Silver Spring, Maryland

Emeriti Trustees

John W. Brown H'03, Portage, Michigan, served 1980–95
Rosemary K. Brown, Portage, Michigan, served 1998–2009
Roger E. Brownell '68, Fort Myers, Florida served 1993–2016
Lawrence D. Bryan, Martinsville, Indiana, served 1990–96
Phillip C. Carra '69, Fennville, Michigan, served 1990–2008
Joyce K. Coleman '66, Dallas, Texas, served 1990–2008
James H. Duncan, Santa Fe, New Mexico, served 1985–96
Marlene C. Francis '58, Ann Arbor, Michigan, served 1980–98
Harry T. Garland '68, Los Altos, California, served 1987–2005
Alfred J. Gemrich '60, Delton, Michigan, served 1975–93
Otha Gilyard H'01, Columbus, Ohio, served 1979–97
Robert P. Kittredge, Kalamazoo, Michigan, served 1975–93
Robert O. Kramer H'07, Bloomfield Hills, Michigan, served 2008–15
Thomas W. Lambert '63, Kalamazoo, Michigan, served 1986–2004
William E. LaMothe, Battle Creek, Michigan, served 1976–85 and 1988–90
E. Turner Lewis '63, Brattleboro, Vermont, served 1991–2009
Elizabeth Upjohn Mason H'93, Kalamazoo, Michigan, served 1973–91

Mary M. McLean '61, Portage, Michigan, served 1990–2008
 Preston S. Parish H'97, Kalamazoo, Michigan, served 1985–98
 William C. Richardson, Richland, Michigan, served 1997–2015
 Omer Robbins, Jr., Manchester, Michigan, served 1954–84
 Alan E. Schwartz, Detroit, Michigan, served 1969–72
 Ronda E. Stryker, Portage, Michigan, served 1988–2017
 Ralph G. Wellington '68, Philadelphia, Pennsylvania, served 1991–96, 2000–05

Faculty

Emeriti

Rolla L. Anderson (1953), Professor of Physical Education, Emeritus. BS Western Michigan University; MS University of Michigan
 Marigene Arnold (1973), Professor of Sociology and Anthropology, Emerita. BA Florida Presbyterian (Eckerd College); PhD University of Florida
 David Barclay (1974), Professor of International Studies, Emeritus. BA, MA University of Florida; PhD Stanford University
 Mary Beth Birch (1988), Professor of Music, Emerita. MusB Northwestern University
 Herbert Bogart (1965), Professor of English, Emeritus. BA, MA, PhD New York University
 Stillman Bradfield (1965), Professor of Sociology and Anthropology, Emeritus. BA, MA, PhD Cornell University
 Roselee Bundy (1991), Professor of Japanese Language and Literature, Emerita. AB, MA, PhD University of Chicago
 Jean M. Calloway (1960), Professor of Mathematics, Emeritus. BA Millsaps College; MA, PhD University of Pennsylvania
 Margarita Campos (1986), Professor of Romance Languages and Literature, Emerita. BA Mexico City College
 Richard N. Carpenter (1979), Professor of Computer Science, Emeritus. BA Albion College; MS Western Michigan University
 Madeline M. Chu (1988), Professor of Chinese Language and Literature, Emerita. BA National Taiwan University, Taipei; MA, PhD University of Arizona
 Henry D. Cohen (1974), Professor of Romance Languages and Literature, Emeritus. BA Williams College; MA Harvard University; PhD University of California - Berkeley
 Ruth L. Collins (1974), Registrar, Emerita. BS, MS University of Wisconsin, Madison
 Rhoda E.R. Craig (1980), Professor of Chemistry, Emerita. BSc University of Alberta; PhD Cornell University
 C. Kim Cummings (1972), Professor of Sociology and Anthropology, Emeritus. BA Harvard College; PhD Washington University
 Ralph M. Deal (1962), Professor of Chemistry, Emeritus; BA Oberlin College. MA, PhD Johns Hopkins University
 John B. Fink (1975), Professor of Mathematics, Emeritus. BA University of Iowa; MS, PhD University of Michigan
 Billie T. Fischer (1977), Professor of Art, Emerita; BA University of Kansas. MA, PhD University of Michigan
 Donald C. Flesche (1962), Professor of Political Science, Emeritus. BA Drury College; MA, PhD Washington University
 Hardy O. Fuchs (1969), Professor of German Language and Literature, Emeritus. BA Kalamazoo College, University of Bonn; MA Indiana University; PhD Michigan State University
 Joe K. Fugate (1961), Professor of German Language and Literature and Director of Foreign Study, Emeritus. BA Southern Illinois University; MA, PhD Princeton University
 Gail B. Griffin (1977), Professor of English, Emerita. BA Northwestern University; MA, PhD University of Virginia
 Ann Haight (1976), Bibliographer and Acquisitions Librarian, Emerita. BA Kalamazoo College, MLS Western Michigan University
 Robert L. Kent (1968), Professor of Physical Education, Emeritus. BS, MA Western Michigan University
 Margo R. Light (1962), Professor of German Language and Literature, Emerita. BA Hope College; MA Indiana University; PhD University of Michigan
 Ed Menta (1986), James A.B. Stone College Professor of Theatre Arts, Emeritus. BA Southern Connecticut State University, MFA University of Connecticut, PhD Michigan State University
 Marilyn A. Maurer (1969), Professor of Physical Education, Emerita. BS, MA Western Michigan University
 George M. Nielsen (1963), Professor of Mathematics, Emeritus. BA Ohio Wesleyan University; MA, PhD University of Wisconsin
 Paul D. Olexia (1968), Professor of Biology, Emeritus; BA Wabash College. MA State University of New York at Buffalo; PhD University of Tennessee
 Sally L. Olexia (1973), Director of Health Sciences and Professor of Biology, Emerita. BS Kent State University; MA, PhD State University of New York at Buffalo
 Bernard S. Palchick (1972), Professor of Art, Emeritus; BA Purdue University. MFA Rhode Island School of Design
 Lisa Palchick (1982), Dean of Libraries and Information Services, Emerita. BFA Rhode Island School of Design; MA Western Michigan University
 Romeo E. Phillips (1968), Professor of Education, Emeritus; BM, MM Roosevelt University. MA Eastern Michigan University; PhD Wayne State University
 Eleanor Pinkham (1964), Director of Libraries and Media Services, Emerita. BA Kalamazoo College; MLS Western Michigan University
 Zaide E. Pixley (1984), Adjunct Associate Professor of Music and Dean of the First Year and Advising, Emerita. BMus Hope College; MA City University of New York Hunter College; PhD University of Michigan
 Franklin A. Presler (1976), Professor of Political Science, Emeritus. BA Oberlin College; MA, PhD University of Chicago
 Stanley L. Rajnak (1965), Professor of Mathematics, Emeritus. AB, PhD University of California at Berkeley
 Barry F. Ross (1972), Professor of Music, Emeritus. BS Hartt College of Music; MMA, DMA Yale University
 David S. Scarrow (1961), Professor of Philosophy, Emeritus. BA Duke University; MA, PhD Harvard University
 Waldemar Schmeichel (1974), Professor of Religion, Emeritus. BA Judson College; BD, MA, PhD University of Chicago
 Diane Seuss (1988), Writer in Residence and Assistant Professor of English. Emerita. BA, MSW Western Michigan University
 Greg A. Slough (1997), Professor of Chemistry, Emeritus. BA Goshen College, PhD Pennsylvania State University
 Carol Smith (1983), Reference Librarian, Emerita; BA Bryn Mawr College. MLS Western Michigan University
 Lawrence Rackley Smith (1963), Professor of Music, Emeritus. BM, MA Northwestern University; PhD Eastman School of Music
 T. Jefferson Smith (1967), Professor of Mathematics and College Ringing Master, Emeritus. BA Emory University; MS, PhD University of Wisconsin
 Kathleen W. Smith (1972), Professor of French, Emerita. BA Mundelein College, MA, PhD University of Wisconsin
 Thomas J. Smith (1978), Dorothy H. Heyl Professor of Chemistry, Emeritus. BS Illinois Benedictine College, PhD Purdue University
 Janet Solberg (1988), Professor of French, Emerita. BA Macalester College; MA, PhD University of Minnesota

Paul R. Sotherland (1985), Professor of Biology, Emeritus. BS Carroll College; MS, PhD Colorado State University
Robert Stauffer (1973), Professor of Sociology and Anthropology, Emeritus. BA University of Illinois; MA, PhD University of Chicago
David Strauss (1974), Professor of History, Emeritus; BA Amherst College. MA, PhD Columbia University
Lonnie Supnick (1972), Professor of Psychology and Associate Provost, Emeritus. BA City College of New York; MA, PhD Clark University
Philip S. Thomas (1965), Professor of Economics and Business, Emeritus. BA Oberlin College; MA, PhD University of Michigan
J. Mark Thompson (1961), Professor of Religion, Emeritus; BA Harvard College. BD Yale Divinity School; PhD Vanderbilt University
Leslie T. Tung (1986), Professor of Music, Emeritus; BA Yale University. MM Eastman School of Music, University of Rochester; DMA University of Southern California
James Turner (1994), Professor of Music and Music Director of Kalamazoo Bach Festival, Emeritus. BA Mars Hill College, MM Louisiana State University
John B. Wickstrom (1966), Professor of History, Emeritus. BA Michigan State University; MA, PhD Yale University
Laurence E. Wilson (1963), Professor of Chemistry, Emeritus. BA Western Washington College; PhD University of Washington
Wayne M. Wright (1962), Professor of Physics, Emeritus. BA Bowdoin College; MS, PhD Harvard University

Faculty

Carol S. Anderson (1993), Professor of Religion. BA University of Puget Sound; MA, PhD University of Chicago Divinity School
Hannah J. Apps (1989), Thomas K. Kreilick Professor of Economics. AB University of North Carolina at Chapel Hill; PhD University of Pennsylvania
Thomas R. Askew (1991), Professor of Physics. BA Gordon College; MS, PhD University of Illinois, Urbana-Champaign
Joseph J. Bangura (2005), Professor of History and African Studies. BA Fourah Bay College, University of Sierra Leone; MA, PhD Dalhousie University, Halifax
Espeleencia M. Baptiste (2003), Associate Professor of Anthropology. BA Colgate University; PhD Johns Hopkins University
David E. Barclay (1974), Margaret and Roger Scholten Professor of International Studies. BA, MA University of Florida; PhD Stanford University
Eric Barth (1997), Professor of Mathematics. BM, MA, PhD University of Kansas
Jeffrey A. Bartz (1997), Kurt D. Kaufman Professor of Chemistry. BS Southwest State University; PhD University of Wisconsin, Madison
W. Robert Batsell, Jr. (1999), Professor of Psychology. BA Southern Methodist University; MS, PhD Texas Christian University
Oliver Bendorf (2018) Assistant Professor of English. BA University of Iowa; MA University of Wisconsin-Madison
