Biochemistry & Molecular Biology

Professors: Furge, Langeland, Moore, Stevens-Truss

A major focus of modern scientific inquiry is uncovering the physical and chemical mechanisms underlying biological systems. Therefore, an interdisciplinary concentration in Biochemistry and Molecular Biology is offered for students interested in advanced study at the interface between biology and chemistry. Courses include a selection from the physical and biological sciences; most are laboratory based and make use of sophisticated, cutting-edge instrumentation and techniques. Students interested in graduate studies of molecular-level phenomena are especially encouraged to consider this plan of study.

The Concentration in Biochemistry and Molecular Biology

Prerequisite Coursework

- BIOL 112 Evolution and Genetics with Lab
- CHEM 110 Chemical Composition and Structure with Lab
- CHEM 120 Chemical Reactivity with Lab or CHEM 125 Chemical Composition, Structure, and Reactivity with Lab
- CHEM 210 Organic Chemistry I with Lab
- MATH 112 Calculus I
- MATH 113 Calculus II
- PHYS 150 Introductory Physics I with Lab
- PHYS 152 Introductory Physics II with Lab

Required Courses

- BIOL 246 Cell and Molecular Biology with Lab
- BIOL/CHEM 352 Biochemistry with Lab
- CHEM 220 Organic Chemistry II with Lab
- CHEM 310 Physical Chemistry I with Lab
- One unit from:
  - BIOL 420 Advance Molecular Genetics with lab
  - CHEM 460 Advanced Biochemistry with Lab

In accordance with College policy, concentrators in biochemistry and molecular biology must pass the required courses with a C- or better.

The Academic Catalog contains the most accurate information available at the time of publication.
